PRE PLE SERIES(10) sets

NAME:.....

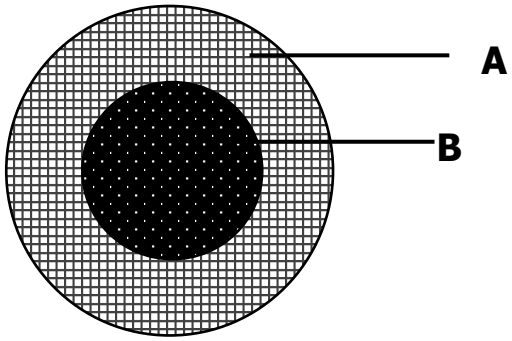

SCHOOL:.....

0780-438054 0708-438054

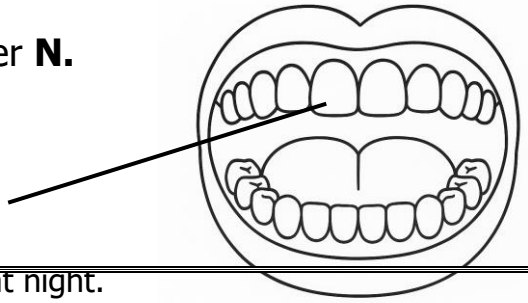

SECTION A: 55 MARKS

1. Name the hardest part of the teeth.
   Enamel *reject dentine//pup cavity*
2. State the advice you can give to Natasha whose child has goitre.
   To feed the child on foods rich in iodine
3. Mention the body sense that enables a cook to know that its lunch time through the timekeeper's bell.
   Hearing *reject ear*
4. Give any **one** disease caused by poor sanitation
   Cholera, typhoid, dysentery, diarrhea *reject dysentery*
5. State the method of planting crops where a farmer doesn't mind about spacing of seeds.
   Broadcasting method
6. Give any **one** importance of insects in the environment.
   They act as food for people for example grasshoppers
   They help in pollination//they make honey for example bees.
7. Mention the largest internal body organ.
   Liver *reject skin*

The diagram below is of shadow, study it and answer question **8** and **9**

8. Name the part of the shadow shown by part **A.**
   Penumbra
9. Give any **one** importance of shadow in the environment.
   They help to show direction/ they help in telling time
10. Name the germ that causes AIDS.
    Virus//HIV
11. Mention any **one** way in which people in your area control soil erosion
    By mulching//By contour ploughing
    By planting cover crops//By terracing //By planting short grass
12. Give any **one** agent of pollination.
    Water//Animals//Wind
13. State the best season for preparing land.
    Dry season
14. Give the difference between air and wind.
    Air is a mixture of gases while wind is moving air
15. Write **ORS** in full
    Oral Rehydration Solution
16. State the major importance of carbohydrates in the body.
    They provide the body with energy
17. Name the type of teeth labelled with letter **N.**

N-Incisors teeth

18. Mention any **one** insect that pollinates flowers at night.

Moth//beetle

19. State the element of weather that requires the use of heavy clothes and umbrella.
Rainfall

20. Give the meaning of the term **fuel**.
Fuel is substance that is burnt to produce heat energy

21. Mention the foodstuff preserved by icing.
Fish

22. State the name given to the larva stage of a mosquito.
Wriggler

23. Name the property of air used by people to drink soda using a straw.
Air exerts pressure

24. Name the immunizable disease that causes lameness
Polio

25. Give the reason why the radicle comes out first during germination.
To absorb water and mineral salts for the seedling

26. Mention any **one** factor that affects food production in an area.
Drought//Pests//Diseases//Floods//Hailstones//Earthquakes

27. Mention the place where we commonly find the windsock.
Airports/ airstrips

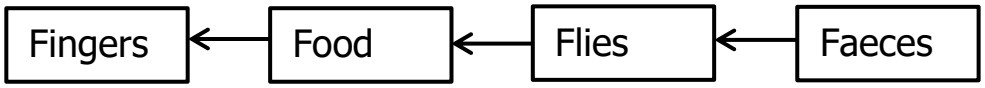

28. State any **one** indicator of a child with poor personal hygiene.
Bad body smell//Skin disease
Long fingernails//Long toenails
Uncombed hair
Dirty body//Dirty clothes on the body
Yellowish//teeth

29. Give the importance of a sickle to a crop farmer.
It is used by a farmer to harvest cereals
It is used by a farmer to cut grass for mulching the garden

30. Mention any **one** place in the community where you can get food from.
Garden//Markets//Shops//Super market//Water bodies

31. Give any **one** activity done by pupils in your class to promote its hygiene.
Mopping the class//Sweeping dust from the class
Removing the cobwebs

32. Complete the missing part in the chart below

33. Mention the main natural source of water
Rain

34. State the natural habitat for a wild rabbit.
Burrow

35. Give any **one** characteristic of non- living thing you know
Non-living things do not grow//Non-living thing do not respire
Non-living things do not excrete//Non-living thing do not loco-mote
Non-living things do not respond to stimuli

36. Give any **one** importance of photosynthesis to human beings.
People get oxygen from photosynthesis
People get food from photosynthesis

37. Name the part of an onion where food is stored.
Fleshy leaves//storage leaves

38. Give any **one** example of a waste product from the body.
Carbon dioxide//Sweats//Urine

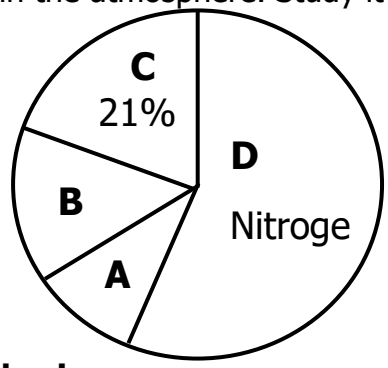

39. State the importance of shedding leaves by plants during the dry season.

To reduce on the rate of transpiration

40. Mention the stage in plants during which prop roots develop.
Flowering stage/ fruiting stage

SECTION B: 60 MARKS

41. The circle below shows gases and their percentages in the atmosphere. Study it carefully and answer questions that follow

(a) Name the component of air marked with letter **B**
Rare gases

(b) State the importance of component **A** to plants
Helps plants to make food through photosynthesis

(c) Mention the plant process that needs component **C** to occur
Germination

(d) Give the percentage of component **D**
78%

42. (a) Give **one** term used to mean the removal of top soil.
Soil erosion

(b) State the agents of the word mentioned in 42(a) above.
Water// wind

(c) Mention the type of soil erosion that is caused by fast flowing water.
Gulley erosion/ gully erosion

43. (a) Give any **one** condition necessary for photosynthesis to take place.
Sunlight //chlorophyll

(b) Give a reason why photosynthesis cannot take place at night.
There is no sunlight energy

(c) Apart from photosynthesis, give any other process that takes place in plant leaves.
Transpiration//breathing

(d) Name the gas given out during photosynthesis
Oxygen

44. The steps below are used to keep our teeth clean but in wrong order. Re-arrange them correctly

(a) Pour water on the toothbrush.
(b) Rinse your mouth after brushing and spit out.
(c) Start brushing the teeth.
(d) Put toothpaste on the toothbrush.

(a) Put toothpaste on the tooth brush
(b) Pour water on the toothbrush
(c) Start brushing the teeth
(d) Rinse your mouth after brushing and spit out

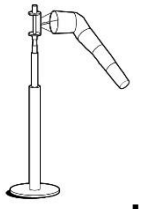

45. (a) Name any **two** items at home that work with the help of electricity
Refrigerators//Computers//Telephones//Flat iron/Television Radios

(b) Write down any **one** way of saving electricity at home.
By switching off electricity when not in use
By switching off electric bulbs during day time

(c) Mention any **one** use of electricity at home
For cooking//For lighting at home//For entertainment //For ironing clothes

46. (a) Mention the importance of leaves to herbalists
Leaves act as herbal medicine
(b) Give any **two** examples of fuel got from plants
Firewood//Charcoal//Briquettes//Saw dust
(c) Name the part of a flowering plant that develops into a branch.
Axillary bud

47. (a) Give the difference between rain and rainfall
Rain is the water droplets that fall from clouds in the sky while rainfall is the amount of rain that falls over a certain place
(b) Mention the type of clouds that provides rain to farmers
Nimbus cloud
(c) Name the weather instrument used to measure temperature
Thermometer
(d) In the space below, draw the weather instrument used to show the strength of wind

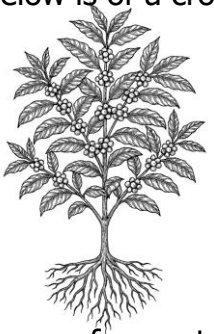

48. (a) Mention the set of teeth that develop first in babies.
Milk teeth
(b) Mention any **two** ways of caring for our teeth.
By brushing **By eating correct food**
By dental flossing **By regular dental check up**
(c) Name the tooth disorder corrected by the use of tooth braces
Improper growth of teeth

49. (a) Give any **two** ways in which the human body works.
It takes in food and oxygen
It uses food and oxygen to get energy// It removes wastes
It carries food and oxygen to different parts of the body
(b) Mention the body organ that performs the duties below
(i) Gaseous exchange **Lungs**
(ii) Producing urine **Kidney**

50. (a) Briefly explain what is meant by the term **food contamination**
Food contamination is the addition of harmful substances in food that can make it unsafe to eat.
(b) Mention any **one** way in which food gets contaminated
Serving food in dirty containers//Handling food with dirty hands
Keeping food in dirty containers//Keeping food in dirty places
(c) Give any **two** ways of keeping food for a long time without going bad locally
Salting//Sun drying//Smoking

51. The diagram below is of a crop found in your locality, study it and answer questions that follow

(a) Name the group of crops to which the above plant belongs.
Perennial crops
(b) Apart from the group mentioned in (a) above, give any other group of crops
Annual crops
(c) Give any **one** example of a crop mentioned in (b) above.
Cotton//Maize//Bean//Groundnuts
(d) Mention the method used to harvest the above crop

Hand picking

52. (a) Give one reason why a housefly is regarded as a vector

A housefly carries germs

(b) Mention any **one** place where a housefly breeds from

Faeces, latrine, manure heaps, rubbish pit

(c) Give a reason why housefly breed in the place mentioned in (b) above

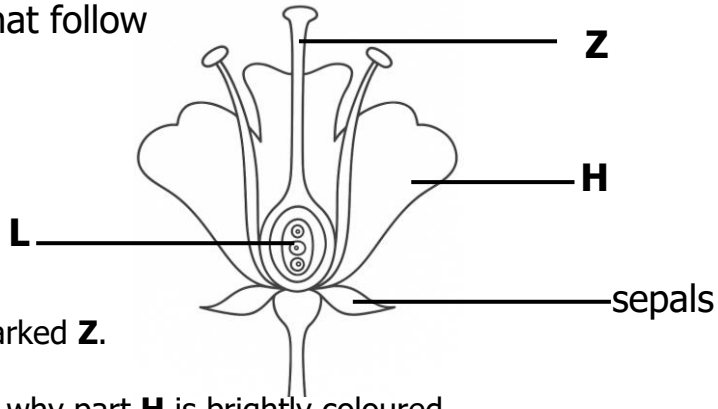

To enable maggots get food easily

(d) State any **one** way in which houseflies spread diseases.

Using the hairy body to carry germs

Vomiting germs on human food

53. The diagram below is a structure of a flowering, study it and answer questions that follow

(a) Name part marked **Z**.

Style

(b) Give a reason why part **H** is brightly coloured.

To attract pollinators

(c) State what part **L** develops into after fertilization.

Seeds

(d) Give **one** importance of the stigma on a flower.

Part Z protect the flower at a bud stage

54. The table below shows deficiency diseases and how they can be prevented but in wrong order. Match them correctly.

LIST A (deficiency diseases)	**LIST (how they are prevented)**
Kwashiorkor	Feeding on food rich in iron
Anemia	Feeding on food with all food values
Marasmus	Feeding on food rich in vitamin c
Scurvy	Eating protein rich food

(a) Kwashiorkor- **eating protein rich food**

(b) Anemia - **feeding on food rich in iron**

(c) Marasmus - **feeding on food with all food values (balanced diet)**

(d) Scurvy - **feeding on food rich in vitamin C**

55. Sarah planted maize grains in two tins. In tin A, she added water daily, while in tin **B** she didn't add any water. After one week, only the seeds in tin A had come out of the soil.

(a) Name the tin that had grains that came out of the soil

Tin A

(b) Give a reason why the grains in the other tin did not come out of the soil.

They lacked water

(c) Give **two** conditions that were necessary for the maize grain above to germinate

Water//Oxygen

END
