PAPER ONE

SECCTION A

1. Give one example of a foodstuff in man's diet.

   _____

2. What body part does a grasshopper use to breathe?

   _____

3. Which part of a flower produces pollen grains?

   _____

4. Why do we wash hands before eating food?

   _____

5. State one problem that can affect bean seeds while under storage.

   _____

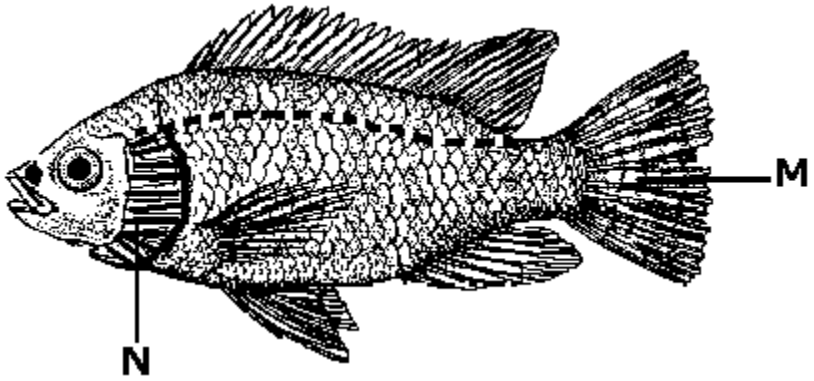

6. Which instrument is used to measure the amount of rainfall received in an area?

   _____

7. Mention one difference in the body appearance of housefly and a spider.

   _____

The diagram below shows a fish. Use it to answer questions 8 – 9.

8. Name part marked M.

   _____

9. How is part marked N important to a fish?

   _____

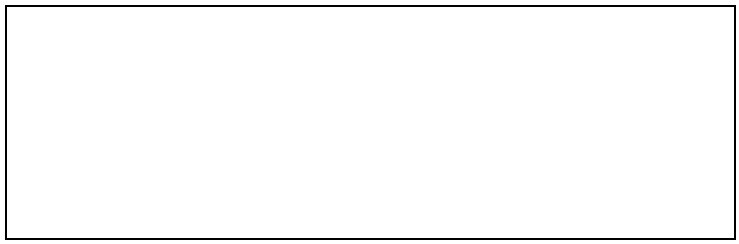

10. State one practice that can make water sources dirty.

    _____

11. Which process in the rain cycle helps to form vapour?

    _____

12. In the space provided below, draw a garden tool used for weeding.

13. State the common way AIDS spreads from one person to another.

_____

14. Mention one way a snake protect itself from enemies.

_____

15. How is a tongue important to the body?

_____

16. Why is loam soil suitable for crop growing?

_____

17. Give one way of preventing diseases among people.

_____

18. Why are bees called social insects?

_____

19. State the type of clouds that brings rain.

_____

20. State one importance of birds in the environment.

_____

21. Why is it important to do regular body exercises

_____

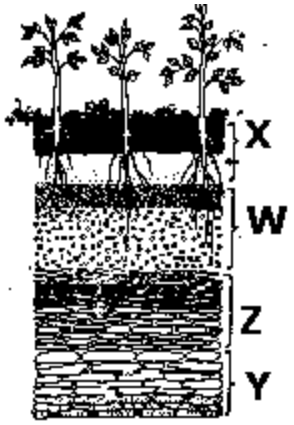

22. How is the eating of posho important to a human body?

_____

23. Give one example of plants that bear fruits.

_____

Use the diagram below to answer questions 24 – 25.

24. What term is used to name the arrangement of soil layers as shown above?

_____

25. In which way can man use soil in layer Z?

_____

26. Why is it important to cover cuts and fresh wounds?

_____

27. Mention the main use of a latrine in a home.

_____

28. Which season is suitable for harvesting crops?

_____

29. Write one importance of keeping records about the school garden.

_____

30. Give one example of a material used to construct temporary houses.

_____

31. What root system does a maize plant develop?

_____

32. Why do people use mosquito nets over their beds at night?

_____

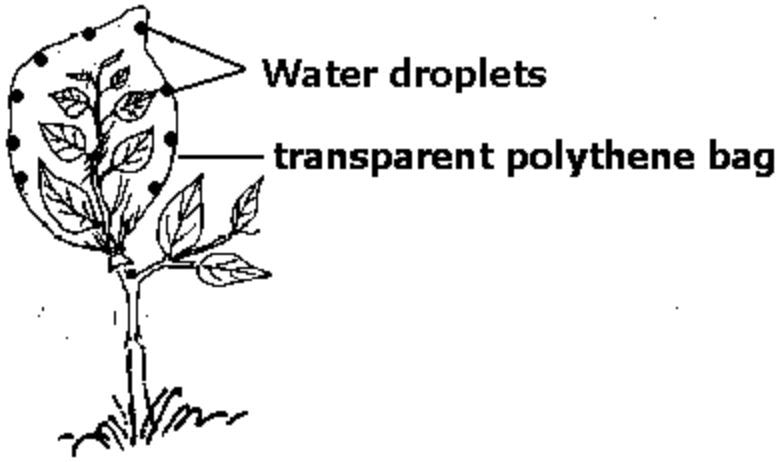

33. Give one example of germs.

_____

34. State one way of promoting hygiene of out teeth.

_____

The diagram below shows one of the processes that takes place in plants. Use it to answer questions 35 and 36.

35. Name the above process.

_____

36. How can the process be dangerous to plants?

_____

37. Give one danger of too much rain in the environment.

_____

38. How the germination of seeds similar to rusting of metals?

_____

39. Why is it bad to play with sharp objects?

_____

40. What element of Primary Health Care is promoted when one cuts bushes around the house?

_____

Section B

41(a) What is a family?

_____

(b) Name one basic need of a family.

_____

(c) Why do people keep the following animals in their homes?

(i) dogs

_____

(ii) cats

_____

42(a) How are the following gases useful in the environment?

(i) carbon dioxide

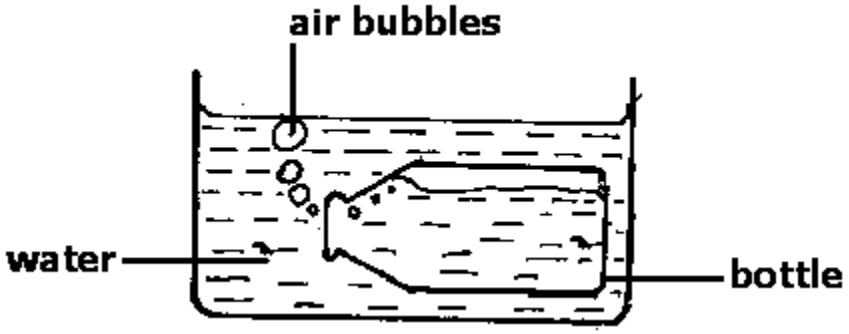

_____

(ii) oxygen

_____

(b) What does the experiment below prove about air?

_____

(c) Name any other property of air apart from the one given in (b) above.

_____

43(a) What is a pest?

_____

(b) Give one example of a pest:

(i) in the garden

_____

(ii) in the store

_____

(c) How does spraying chemicals in crops help to control pests?

_____

44. Given the following list: **hen, housefly, stone, leopard**

(a) Name the item in the list which is different from the others.

_____

(b) Give two reason for your answer in (a) above.

(i) _____

(ii) _____

(c) How useful is a hen to a leopard?

_____

45(a) Mention one cause of diseases among people.

_____

(b) Give one symptom of malaria.

_____

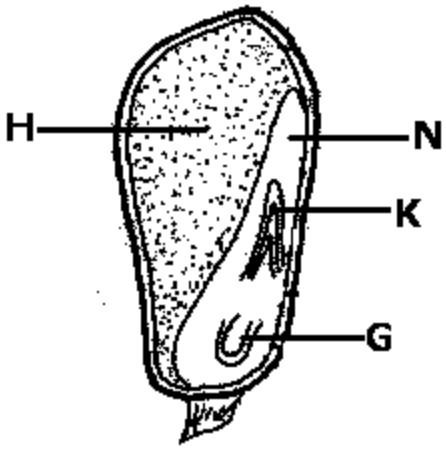

(c) Why is malaria not a non-infectious disease?

_____

(d) Apart from malaria, name any other common doisease.

_____

Study the diagram of a seed given below and answer the questions that follow.

46(a) Name part ma

_____

(b) What name is given to part K and G?

_____

(c) How is part H useful to the seed during germination?

_____

(d) What type of germination does the above seed undergo?

_____

47(a) Give two components of soil.

(i) _____

(ii) _____

(b) What is soil erosion?

_____

(c) State one way of controlling soil erosion in the school compound.

_____

48. How are the following practices useful in farming?

(i) pruning:

_____

(ii) drying harvested crops

_____

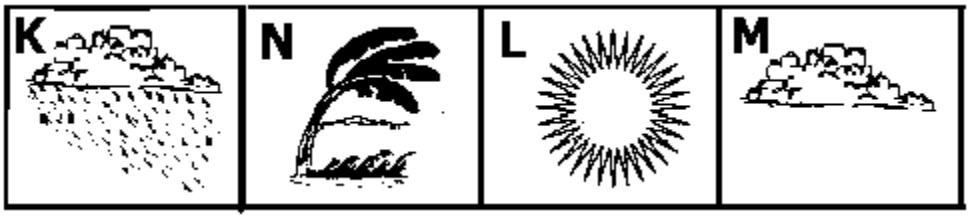

(iii) crop rotation

_____

(iv) seed selection

_____

49. **Below is a diagram showing a weather chart.**

(a) Which type of weather is identified with the presence of items marked K and m?

(i) K:_____

(ii) M:_____

(b) In which way is weather condition marked N?

(i) useful:

_____

(ii) dangerous:

_____

50. Match the items in list A with those in list B.

A		B
tsetse fly	-	spreads malaria fever
Female Anopheles mosquito	-	spreads trachoma
house flies	-	spread rabies
dogs	-	spreads sleeping sickness

(i) tsetse fly _____

(ii) female anopheles mosquito _____

(iii) house flies _____

(iv) foxes _____

51(a) What is hygiene?

_____

(b) Give one reason why we have to keep our bodies clean

_____

(c) Mention any one item that is used to keep our bodies clean.

_____

(d) Mention problem that affects a person with a dirty body.

_____

52(a) Give one source of light energy.

_____

(b) Mention one way light energy is important to us.

_____

(c) Name one source of electricity.

_____

(d) Give one device that uses electricity in a home.

_____

53(a) Write HIV in full.

_____

(b) Write down two PIASCY messages that protect children from getting HIV.:

(i) _____

(ii) _____

(c) State one way we can care for an AIDS patient.

_____

54(a) What is first aid?

_____

(b) State any two reasons why we give first aid.

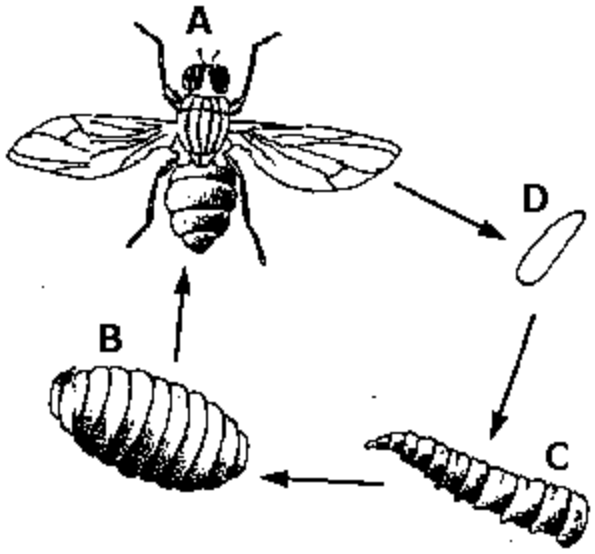

(i) _____

(ii) _____

(c) Give any one common item found in a first aid box.

_____

55. **The diagram shows the life cycle of a housefly. Use it to answer the questions that follow.**

(a) What type of life cycle is shown in the diagram above?

_____

(b) Name one other insect with the above type of lifecycle.

_____

(c) How is stage marked C useful in pit latrines?

_____

(d) Why is stage marked B said to be dormant?

_____

PAPER TWO
SECTION A

1. Give one example of a flowering plant.

_____

2. Why do farmers encourage bees in their crop gardens?

_____

3. Write P.H.C in full.

_____

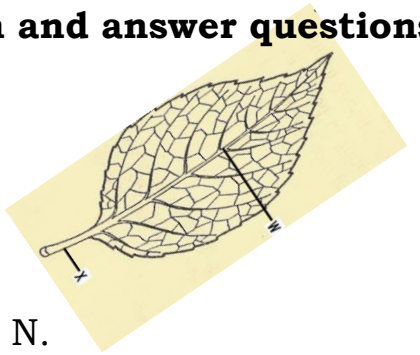

4. How are stomata similar to spiracles?

_____

5. Give one solute used in the making of ORS.

_____

Study the diagram and answer questions.

6. Name part marked N.

_____

7. Identify one function of a leaf to a plant.

_____

8. Give the importance of a hoe in the process of food production.

_____

9. Why do plants with weak stems climb others?

_____

10. How are scales important to a fish?

_____

11. Mention one method of preserving food.

_____

12. Which type of germination occurs in a maize grain?

_____

13. Give one way carbon-dioxide is useful to man.

_____

14. State one way of controlling typhoid at school.

_____

15. **In the space provided, draw a simple serrated lead.**

16. Name one animal that lives in water.

_____

17. Define the term photosynthesis.

_____

18. Which process leads to the formation of clouds in the water cycle?

_____

19. Suggest one danger of too much rain in the environment.

_____

20. Identify one insect that undergoes a complete metamorphosis.

_____

21. What term is used to refer to the act of giving birth in rabbits?

_____

22. What is wind?

_____

23. Identify one element of weather.

_____

24. Where does cassava store its excess food?

_____

25. Give one disadvantage of mulching in the garden.

_____

26. Why is a goat regarded as a living thing?

_____

27. Name the female part of a flower.

_____

28. How is much air dangerous to man?

_____

29. Give one reason why we eat food.

_____

30. What name is given to the mouth part of a bird?

_____

31. How can you prevent tooth decay?

_____

32. Which body part is used for tasting?

_____

33. Suggest one way we can care for crops in the garden.

_____

34. Give one example of a childhood immunisable disease.

_____

35. Write down one disease spread by a housefly.

_____

36. Mention the gas which plants use during the day.

_____

37. Give one use of electricity at home.

_____

38. What term is used to refer to an injured person in an accident?

_____

39. Why is a cockroach regarded as a true insect?

_____

40. Mention the best food for babies of less than one year.

_____

SECTION B

41. (a) Give three components of air.

_____

(b) Which component of air is used in burning?

_____

42. (a) Why is soil important to people?

_____

(b) Give any three layers of the soil.

(i) _____

(ii) _____

(iii) _____

43. (a) Write down three things a clean home should have.

(i) _____

(ii) _____

(iii) _____

(b) Suggest one activity you can do at home to promote family hygiene.

_____

44. (a) Write down two reasons why first Aid should be given to a casualty.

(i) _____

(ii) _____

(b) Give two items found in the first Aid box.

(i) _____

(ii) _____

45. (a) Name any three main body parts of an insect.

(i) _____

(ii) _____

(iii) _____

(b) Identify the part of an insect where the legs are attached.

_____

46. (a) Write short notes on each of the following.

(i) Thinning

_____

(ii) Pruning

_____

(iii) weeding

_____

(b) Give one importance of weeding in a garden.

47. **Match animals with their homes correctly.**

Animals		
bird	-	kennel
cow	-	nest
man	-	kraal
dog	-	house

(i) bird _____

(ii) cow _____

(iii) man _____

(iv) dog _____

48. Write two ways water can be made dirty.

(i) _____

(ii) _____

49. Give two examples of water sources.

(i) _____

(ii) _____

50. (a) Identify the two raw materials needed for photosynthesis.

(i) _____

(ii) _____

(b) How is photosynthesis important to:

(i) plants _____

(ii) man _____

51. (a) Mention one example of each.

(i) A legume _____

(ii) A cereal crop _____

(iii)Root crop _____

(i)A fruit crop _____

52. (a) Identify two crops having prop roots.

(i) _____

(ii) _____

(b) Give the importance of prop roots to a plant.

_____

(c) Write down any other type of root you know.

_____

53. (a) What are social insects?

_____

_____

(b) Give two examples of social insects.

(i) _____

(ii) _____

(c) Suggest one way insects can be useful to man.

_____

54. (a) What are germs?

_____

_____

(b) Write down two places where germs can be found.

(i) _____

(ii) _____

(c) Suggest one way germs can be controlled.

_____

55. (a) Write down two causes of dehydration

(i) _____

(ii) _____

(b) Suggest one reason why parents take their children for immunization.

_____

(c) Which immunisable disease makes children lame?

PAPER THREE

SECTION A (40 MARKS)

1. Name the main source of food.

_____

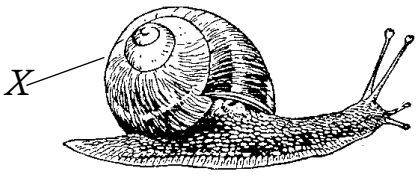

2. In which way is germination similar to rusting?

_____

3. Why do some flowers produce scent?

_____

The diagram below shows an animal.

4. Name the animal above.

_____

5. How is part X useful to the animal?

_____

6. State one solute used to make ORS.

_____

7. Why is it important for you to feed on food rich in carbohydrates?

_____

8. How are roots useful to a cassava plant?

_____

9. Mention one non living component of the environment.

_____

10. Why do green plants need carbon dioxide during the day?

_____

11. Mention one method used to preserve beans.

_____

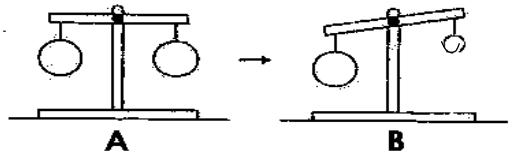

12. Mention one agent of soil erosion.

_____

13. What term is refers to the smallest unit of a living thing?

_____

14. Which property of air is illustrated below?

_____

15. Mention one way you can help your parent at home.

_____

16. Which weather instrument measures the amount of rainfall received in an area?

_____

17. Identify one accident that can be got near fire places.

_____

18. What is the use of a kennel at home?

_____

19. Why is a cockroach regarded as a vector?

_____

20. How are ferns similar to mosses?

_____

21. Give one way of preventing bad smell from latrines.

_____

22. Draw the shadow of the objects below.

23. How are cats useful at home?

_____

24. Mention one factor that affects the transpiration rate in plants.

_____

25. Apart from hearing, give the other function of the human ear.

26. Why should babies be fed on foods rich in proteins?

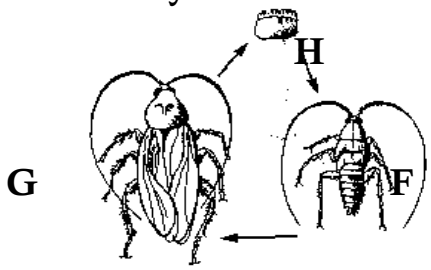

27. Which part of a fish is compared to the lungs of man?

28. What does A stands for in PIASCY?

29. Give one example of a wild animal.

30. How is sand soil useful to people?

Below is a life cycle of a cockroach.

31. Name stage F.

32. Identify one basic need of man.

33. State one way you can care for your skin.

34. Which characteristic of living things causes increase in size?

35. Why are peas and soya bean called leguminous crops?

36. Apart from the sun, mention one other natural source of light.

37. What do we call a mixture of gases?

38. Why is an aeroplane not regarded a living thing?

_____

39. The diagram below shows sun glasses. In which type of weather are they used?

_____

40. Mention one domestic animal that feeds on grass.

_____

SECTION B (60 MARKS)

41. a) What is a crop pest?

_____

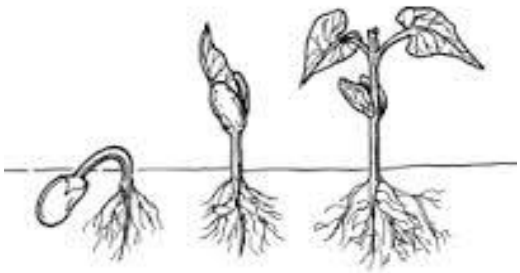

b) Mention any two crop pests you know.

i) _____ ii) _____

c) State one effect of pests to crops.

_____

42. **The diagram below shows a type of germination.**

a) Name the type of germination shown above.

_____

b) Mention any two crops with the above type of germination.

i) _____ ii) _____

c) What type of leaf venation will the above crops develops?

_____

43. Primary Four children, mixed eight levelled teaspoon of sugar and one levelled teaspoon of salt in a 1litre of cool boiled water and stirred until all the sugar and salt dissolved.

a) In the solution made, identify the;

i) solute _____ ii) solvent _____

b) Which condition is treated using the above solution?

_____

c) Name the solution formed.

_____

44. **Match correctly**.

List A	**List B**
Wind vane	amount of rainfall
Barometer	speed of wind
Rain gauge	amount of air pressure
Anemometer	direction of wind

i) Wind vane _____

ii) Barometer _____

iii) Rain gauge _____

iv) Anemometer _____

45. a) What term refers to factors that lead to soil erosion?

_____

b) Mention any two cause of soil erosion.

i) _____

ii) _____

c) Name one type of soil erosion.

_____

46. a) Give one reason why cows are called domestic animal.

_____

b) Mention any two products got from cows.

i) _____ ii) _____

c) State one way you can care for your cow.

_____

47. A family feeds on the following foodstuff.

millet, beans, vegetables, fruits

a) Which food stuff contains vitamins?

_____

b) Why are beans included in the diet?

_____

c) Which food stuff provides the family with carbohydrates?

_____

d) Why should you regard the above meal a balanced diet?

_____

48. Mention the garden tool used for;

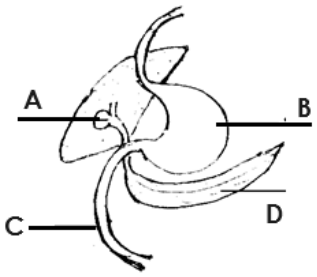

i) transplanting seedling _____

ii) turning manure _____

iii) weeding _____

iv) cutting big trees _____

49. The diagram below is showing some of the body organ, use it to answer the questions that follow.

a) Name the organ marked.

i) A _____ ii) B _____

iii) C _____

b) State one function of part A.

_____

50. Write the 4F's in full.

i) _____ ii) _____

iii) _____ iv) _____

51. a) What term refers to a collection of materials used in giving first Aid?

_____

b) Which item of the first Aid box is used to;

i) disinfect or kill germs on wounds _____

ii) cover wounds _____

c) Which structure is used by first Aiders to carry casualties who can't walk?

_____

52. How does each of the following animals protect itself against the enemies?

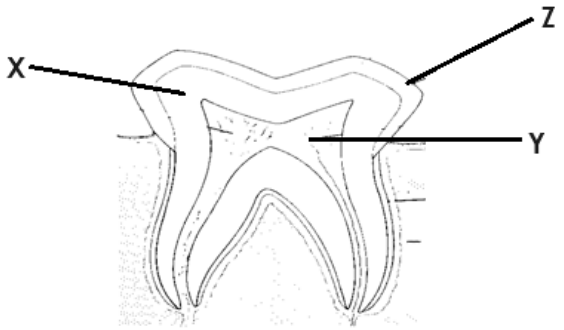

i) bee _____

ii) millipede _____

iii) snail _____

iv) chameleon _____

53. **The diagram below is of a tooth.**

a) Name the parts labelled.

i) X _____ ii) Y _____

iii) Z _____

b) Name the above type of tooth.

_____

54. Describe one way you can care for the following body parts.

i) finger nails _____

ii) teeth _____

iii) hair _____

iv) skin _____

55. a) What is air?

_____

b) State any two properties of air.

i) _____

ii) _____

c) Mention the component of air with the greatest percentage.

_____

PAPER FOUR

SECTION A: (4 0 marks)

1. Write down one living thing that lives in water.

_____

2. Give one way of preventing diseases in a home.

_____

3. What is a balanced diet?

_____

4. State one use of water in the body.

_____

5. Write down one use of clouds in the environment.

_____

6. Name one method farmers use to remove weeds from a garden.

_____

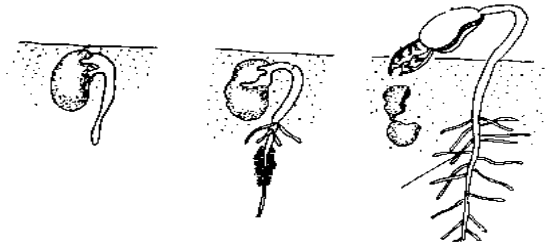

7. Mention one way people in a community can make good use of old plastic containers.

_____

8. How is stagnant water a danger to the health of people living in a community?

_____

9. Name the type of germination shown in the diagram below.

_____

10 What is the importance of chlorophyll during photosynthesis?

_____

11 Name one waste product removed from the body of animals.

_____

12. What is soil profile?

_____

13. **State one way man benefits from the process of rotting.**

_____

14. **Give any one disease spread through contact with an infected person.**

_____

15. **Identify any one way through which Primary Health Care can be promoted in a community.**

_____

16. **Mention one facility used to store food for future use.**

_____

P. 4 pupils were given the following list of insects: houseflies, tsetse flies, bees and mosquitoes.

17. **Which insect is different from the others in the list?**

_____

18. **Give a reason for your answer in (17) above.**

_____

19. **What are root tubers?**

_____

20. **Give one importance of buds on a plant.**

_____

21. **Name one food prepared by roasting.**

_____

22. **Give one animal that reproduces by laying eggs.**

_____

23. **Why is it important to keep records about a school garden?**

_____

24. **Give any one way pests affect crop farmers.**

_____

25. **What are parasites?**

_____

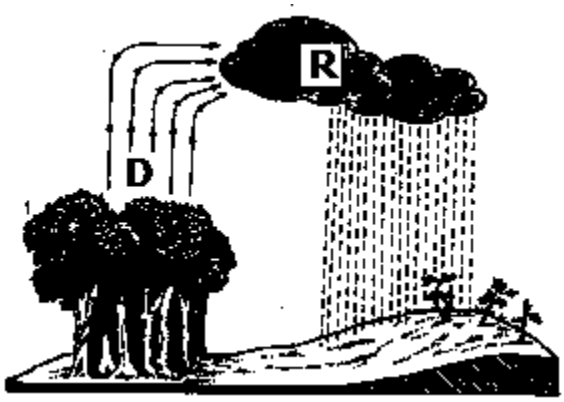

25. Give one sign of measles infection in children.

_____

26. How are roots useful to a plant?

_____

The diagram shows one way rain is formed in our environment. Use it to answer questions 27 and 28.

27. Name the process marked D in the above rain cycle.

_____

28. How is process marked D useful to plants?

_____

29. How are shadows formed?

_____

30. Write down one item people use to collect rubbish in a home.

_____

31. Mention one cause of dehydration in humans.

_____

32. What mineral salt is needed for proper growth of bones?

_____

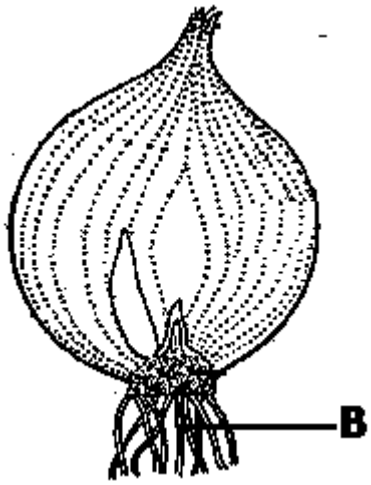

33. Give one advantage of mulching a crop garden.

_____

34. Identify the instrument used to measure atmospheric temperature.

_____

The diagram shows one type of plant stems. Use it to answer questions 35 and 36.

35. Name the ty above develops.

_____

36. What name is given to roots marked B?

_____

37. How is the habit of eating sweets regularly dangerous to our teeth?

_____

38. Why is wearing shoes a good health habit?

_____

40. Which stage in the life cycle of an insect does not feed or move?

_____

SECTION B

41(a) Name the class of food that gives energy to the body.

_____

(b) Give one mineral salt our bodies need.

_____

(c) Mention one use of proteins in our bodies.

_____

(d) Write down one deficiency disease caused by lack of vitamins in the body.

_____

42(a)What is food contamination?

_____

(b) Give one indictor of food that has gone bad.

_____

(c) Write down one way food gets contaminated.

_____

(d) State one way of preserving food.

_____

43(a)In which main body part is the stomach found?

_____

(b) Give one use of the stomach in a human body.

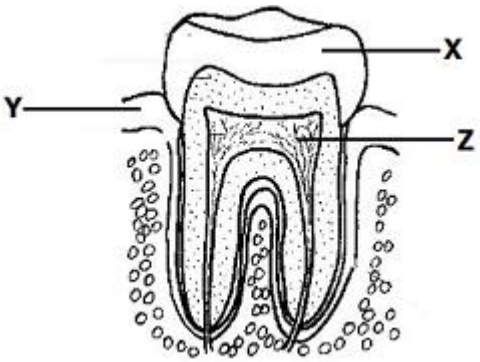

_____

(c) Name the body organs that carry out the following functions:

(i) removing urine from the body_____

(i) pumping blood around the body_____

44. Study the diagram of the tooth and answer the questions that follow.

(a) Name the type of tooth shown in the diagram above.

_____

(b) Name part marked Y.

_____

(c) State one function of part marked Z.

_____

(d) Mention one disorder of teeth that affects marked X.

_____

45(a)Why is it important to wash the cloths we sleep on?

_____

(b) Apart from brushing our teeth, give one other way we can promote oral health.

_____

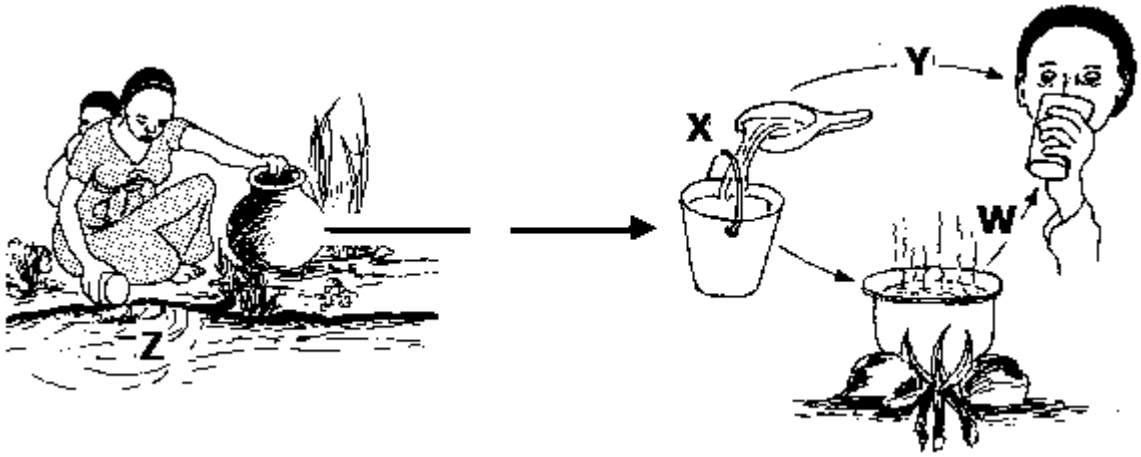

(c) Give one indicator of a person with poor hygiene.

_____

(d) Why is it a bad health habit to share things people wear?

_____

46. Study the diagram below and answer the following questions.

(a) Name any one thing that can make water unsafe for human use at Z.

_____

(b) Why do people carry out activity marked X on the water they use in a home?

_____

(c) State one danger of drinking water prepared through route Y.

_____

(d) What makes water prepared through route W safe for drinking?

_____

47(a)What are non-flowering plants?

_____

(b) Give one example of a non-flowering plant.

_____

(c) Give one way non-flowering plants reproduce.

_____

(d) Which part of a leaf has a similar function as gills of a fish?

_____

48(a) How is a rain gauge useful to people?

_____

(b) Give one way a crop farmer can know that the dry season has started.

_____

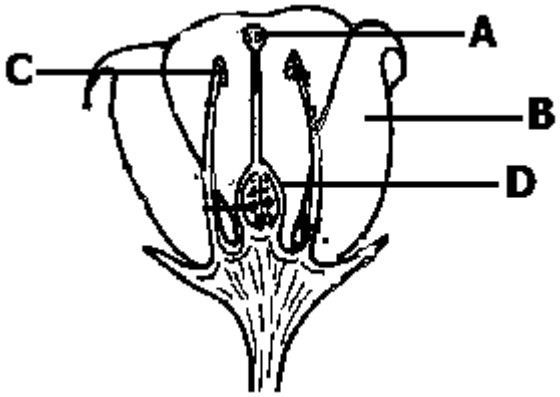

(c) Write down one activity farmers commonly carry out in the wet season.

_____

(d) Mention one way farmers can grow crops under drought conditions.

_____

49. The diagram below is of a flower. Use it to answer the questions that follow.

(a) Name part n

_____

(b) How are each of the following parts of a flower important during its pollination?

(i) A: _____

(ii) B: _____

(iii) C: _____

50(a) What are perennial crop?

_____

(b) Give one example of a cereal crop.

_____

(c) Mention characteristic of leguminous crops.

_____

(d) Why should tomatoes be sold immediately after harvest?

_____

51(a)Use one sentence to define the following farming practices.

(i) thinning

_____

(ii) transplanting

_____

(b) Give the importance of each of the following farming practices:

(i) crop rotation

_____

(ii) pruning

_____

52(a) Give any one change that happens in the environment with the help of the sun.

_____

(b) Mention one cause of soil erosion.

_____

(c) State one way source of heat in a home.

_____

(d) Write down one way people manage weather changes in our environment.

_____

53(a)Give one difference between animals and plants.

_____

(b) Name one animal that feeds on meat.

_____

(c) Mention one way domestic animals depend on people in a home.

_____

(d) Write down one way plants depend on animals during photosynthesis.

_____

54(a)How is a stretcher useful in first aid management?

_____

(b) Apart from a stretcher, name one item used in first aid management.

_____

(c) Mention the injury caused by hot water.

_____

(d) Why do most first aid providers put on gloves when giving first aid?

_____

55(a)Mention two processes in nature that take place with the presence of oxygen.

(i) _____

(ii) _____

(b) State one importance of carbon dioxide to man.

_____

(c) Which property of air enables a P. 4 pupil inflate a balloon with air?

PAPER FIVE

SECTION A:

1. Name any **one** domestic animal that gives us milk.

   _____

2. What deficiency disease causes swelling of the neck?

   _____

3. How do most people in the city get food?

   _____

4. Why is sugar important in **ORS**?

   _____

5. How are flowers useful to bees?

   _____

6. Why is it important to wash hands after eating food?

   _____

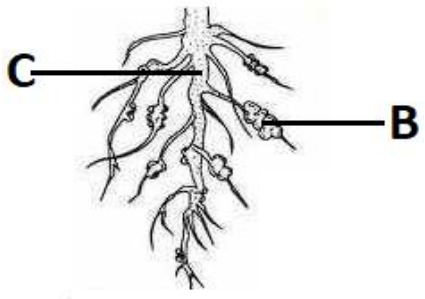

7. How are ears useful to a dog?

   _____

8. Which component of soil makes the soil fertile?

   _____

The diagram below shows roots of a plant. Use it to answer question 9.

9. Identify any **one** plant with such roots.

   _____

10. Give any **one** danger of diseases to people.

    _____

11. Write **one** way farmers can stop rats from destroying stored food.

_____

12. How are termites similar to wasps in the way they live?

_____

13. Give **one** way of controlling houseflies at home.

_____

14. What is the importance of a micropyle to a bean seed?

_____

15. Which food value is needed most by people who make bricks?

_____

16. Why do first aiders need a first aid box?

_____

17. How can P.4 children keep their classroom clean?

_____

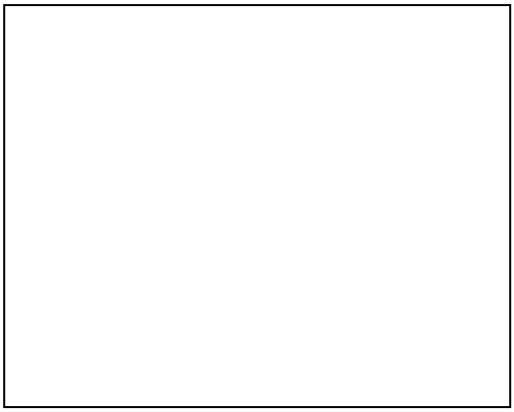

18. Give **one** importance of banana fibres to school children.

_____

19. Why is it important for people to preserve food?

_____

20. In the space below, draw any one item used to manage rainy weather.

21. Write **one** effect of drought to people.

_____

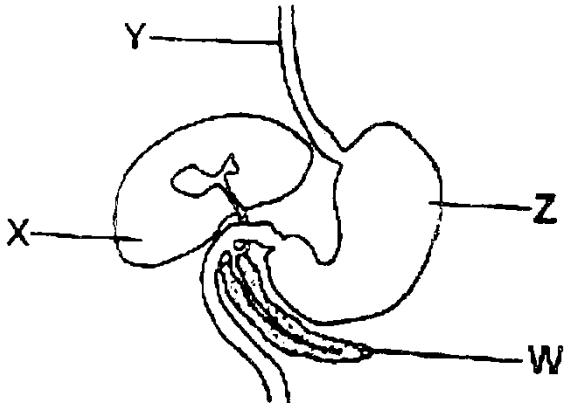

22. Give any **one** way of killing germs and vectors in our clothes.

_____

23. Name any **one** childhood immunisable disease in our community.

_____

The diagram below shows a human body organs. Use it to answer questions 25 and 26.

24. Name the body organ marked **Z.**

_____

25. Give any **one** function of the part marked **X** to the body.

_____

26. Why do some schools have gardens?

_____

27. Which instrument is used by health workers to find the body temperature of a patient?

_____

28. Name any **one** natural change in the environment.

_____

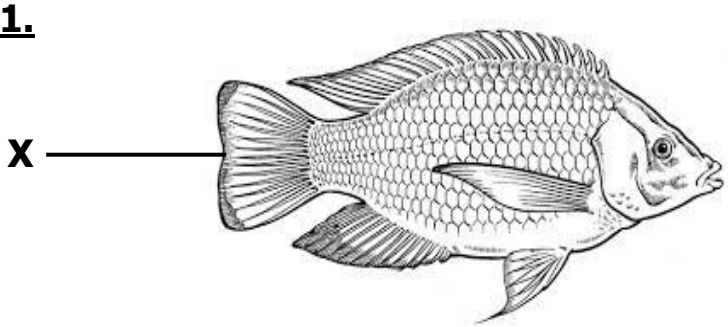

29. Identify **one** group of people who control the flow of traffic on our roads.

_____

30. Why should people eat a balanced diet?

_____

The diagram below shows a common animal. Use it to answer question 31.

31. How is part **X** useful to the animal above?

_____

32. Show on the diagram the part the above animal uses for picking food.

33. Give the difference between air and wind.

_____

_____

34. Write **one** way of saving energy at home.

_____

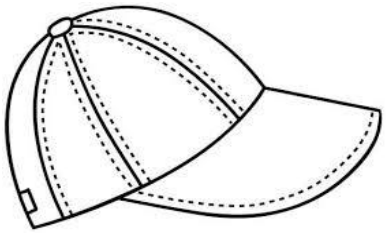

35. State any **one** way of caring for toilets at school.

_____

36. Which sense enables people to tell that there is sugar in tea?

_____

37. How is the item below useful to people?

_____

38. Why do dogs move from one place to another?

_____

39. Give the importance of earthworms in the soil.

_____

40. Name any **one** local material that is used to build permanent houses.

_____

SECTION B:

41. (a) Give any **two** dangers of accidents to people.

(i) _____

(ii) _____

(b) State **two** ways in which people can prevent accidents at home.

(i) _____

(ii) _____

42. (a) How many teeth make up the first set?

_____

(b) Give the function of teeth when eating food.

_____

(c) Name any **one** disorder of teeth.

_____

(d) State **one** way people at home can take care of their teeth.

_____

43. (a) What is photosynthesis?

_____

_____

(b) Which part of a plant carries out photosynthesis?

_____

(c) How is chlorophyll important during photosynthesis?

_____

(d) Apart from photosynthesis, name one other process that takes place in plants.

_____

44. (a) Write any **two** processes involved in the formation of rain.

(i) _____

(ii) _____

(b) How is too much rainfall dangerous to our environment?

_____

(c) Give the function of the sun in rain formation.

_____

45. (a) Write any **two** diseases that result from poor feeding.

(i) _____

(ii) _____

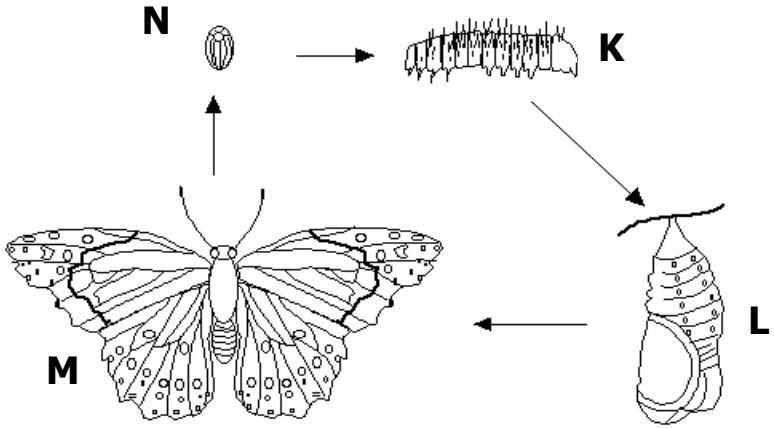

(b) Give **one** sign of poor feeding among children.

_____

(c) Identify any **one** way people in your family get food.

_____

The diagram below shows a life cycle of a butterfly. Use it to answer question 46.

46. (a) Name stage marked **L** on the diagram above.

_____

(b) How is stage **N** dangerous to people?

_____

(c) Which of the stages above is useful to farmers?

_____

(d) Identify any other insect that undergoes a life cycle like the one above.

_____

47. (a) Write any **two** ways water gets contaminated at home.

(i) _____

(ii) _____

(b) Give **one** danger of drinking contaminated water.

_____

(c) Identify any **one** method you would use to make water safe for drinking.

_____

48. (a) What is fuel?

_____

_____

(b) Name any **two** fuels commonly found in the kitchen.

(i) _____

(ii) _____

(c) Write any **one** way of saving energy at home.

_____

49. (a) Give any **one** example of a wild bird.

_____

(b) Name any **one** domestic animal which does not give us meat.

_____

(c) Write any **two** ways of caring for domestic animals.

(i) _____

(ii) _____

50. (a) Name the second layer of soil profile.

_____

(b) Why is top soil suitable for plant growth?

_____

(c) Identify any **two** human activities that can damage soil.

(i) _____

(ii) _____

51. (a) How is **AIDS** dangerous to people?

_____

(b) Give **two** ways of caring for **AIDS** patients.

(i) _____

(ii) _____

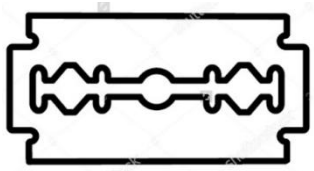

(c) Identify any **one** way pupils can protect themselves from **HIV/AIDS**.

_____

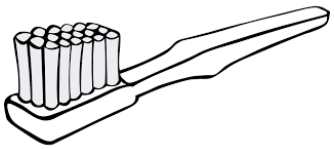

The diagrams below show items used to keep our bodies clean. Use them to answer question 52.

A

B

C

52. (a) Name any **one** part of the body that is cared for using item marked **C**.

_____

(b) Write any **one** hygiene activity that is done using item marked **A**.

_____

(c) How is item **B** useful to people?

_____

(d) Identify any **one** source of item marked **A**.

_____

53. Match the part of a flower to the correct function.

	Part		**function**
(i)	stigma	-	produce pollen grains.
(ii)	ovary	-	attract pollinators.
(iii)	anthers	-	holds the ovules.
(iv)	petals	-	receives pollen grains.

(i) stigma _____

(ii) ovary _____

(iii) anthers _____

(iv) petals _____

54. (a) Give the function of the following weather instruments.

(i) wind vane - _____

(ii) anemometer - _____

(b) Why should a rain gauge be placed in an open place?

_____

(c) Write any **one** activity that farmers can do in windy weather.

_____

55. Below are drawings of certain garden tools. Identify a correct statement from the list below to show the use of each tool to a farmer.

Tool **A**

Tool **B**

Tool **C**

Tool **D**

For collecting rubbish	For transplanting seedlings
For spraying crops	For cutting tree stumps
For turning manure	For cutting tree branches

(a) Tool **A** .....

(b) Tool **B** .....

(c) Tool **C** .....

(d) Tool **D** .....

PAPER SIX

1. Give one importance of leaves to plants.

   _____

2. Mention one disease in infants commonly prevented through immunisation.

   _____

3. How can water be made safe for drinking?

   _____

4. What is a balanced diet?

   _____

5. Write down one way of controlling pests in the garden.

   _____

Below is one of the equipment used to ensure cleanliness of classrooms.

6. Name the item given in the diagram above.

   _____

8. Point out one other item that can be put to serve the same function as the above equipment.

   _____

9. Mention one tool farmers use when weeding the garden.

   _____

10. Write down one condition seeds need to germinate,

    _____

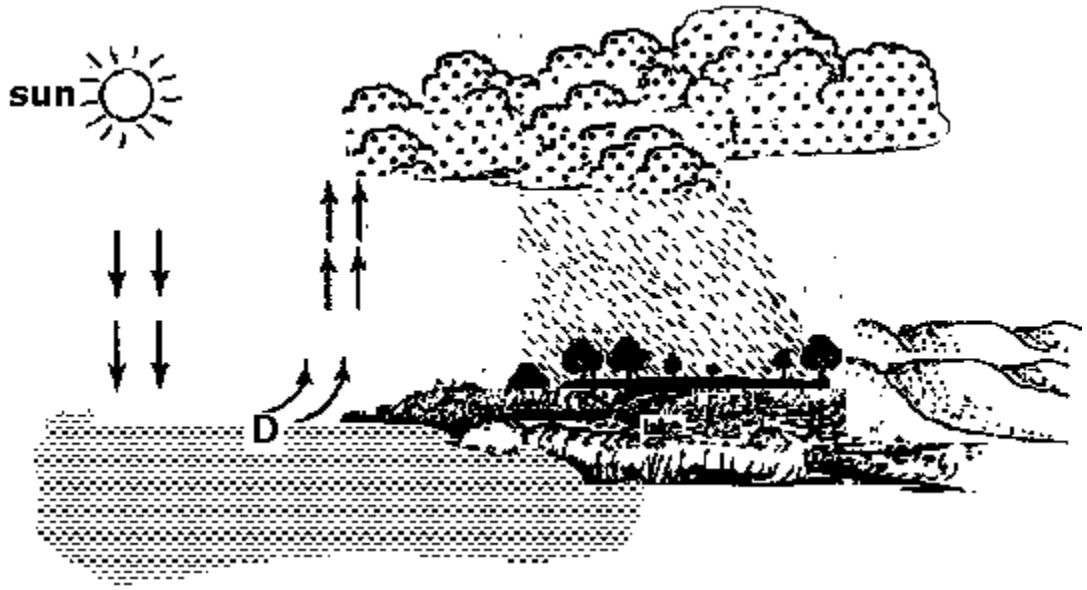

11. Give one example of a perennial crop.

    _____

12. In which way are gills of a fish similar to spiracles of an insect?

    _____

The diagram below shows a process in nature. Use it to answer questions 13 and 14.

13. What natural change is shown in the diagram above?

_____

14 Name the processes marked D.

_____

15. Which part of a seed develops into a seedling?

_____

16. Mention one source of light in the environment.

_____

17. Give the importance of giving Oral Rehydration Solution to patient with severe diarrhoea.

_____

18. Mention one method of preserving perishable foods like fish.

_____

19. Apart from producing a sweet smell, state one other way petals of a flower are adapted to attracting pollinators.

_____

20. State one way non-flowering plants reproduce.

_____

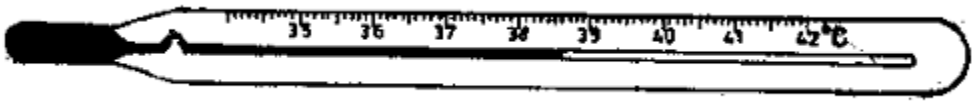

21. Give one way birds depend on plants in their environment.

_____

22. Why do bees visit flowers?

_____

Study the diagram below and answer questions 23 and 24.

23. Name the instrument shown in the diagram above.

_____

24. How is the above instrument important in health management?

_____

25. What are deficiency diseases?

_____

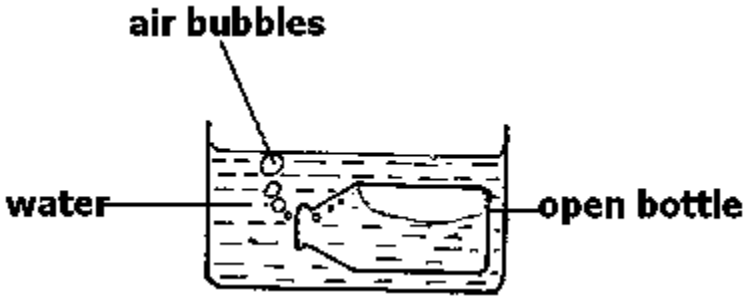

26. State one reason why a spider is not considered an insect.

_____

27. Name one body waste produced by animals.

_____

28 What property of air is shown in the diagram below?

_____

29. Mention one way man cares for domestic animals.

_____

30. What name is given to the larva stage of a butterfly?

_____

31. How is water important in promoting good hygiene?

_____

32. How do farmers control soil erosion in the garden?

_____

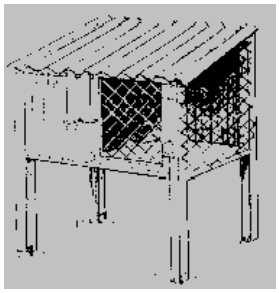

33. Give one example of an underground stem.

_____

34. Mention one way people can make good use of old plastic containers like jerry cans.

_____

The structure below is used in rabbit keeping. Use it to answer questions 35 and 36.

35. Name the structure shown in the diagram above.

_____

36. Why is the structure built above the ground as shown in the diagram above?

_____

37. For which injury do first aiders use splints?

_____

38. Identify any one non-living component of the environment.

_____

39. Which body organ is used for feeling?

_____

40 Give one condition needed by a plant during photosynthesis.

_____

Section B

41(a) Name one exotic breed of rabbits.

_____

(b) Mention one advantage of keeping local breeds of rabbits.

_____

(c) Mention one importance of keeping rabbits.

_____

(d) Mention one disease that affects rabbits.

_____

42(a) Mention one cause of body poisoning in human beings.

_____

(b) Give the first aid that should be given to a person affected by body poisoning.

_____

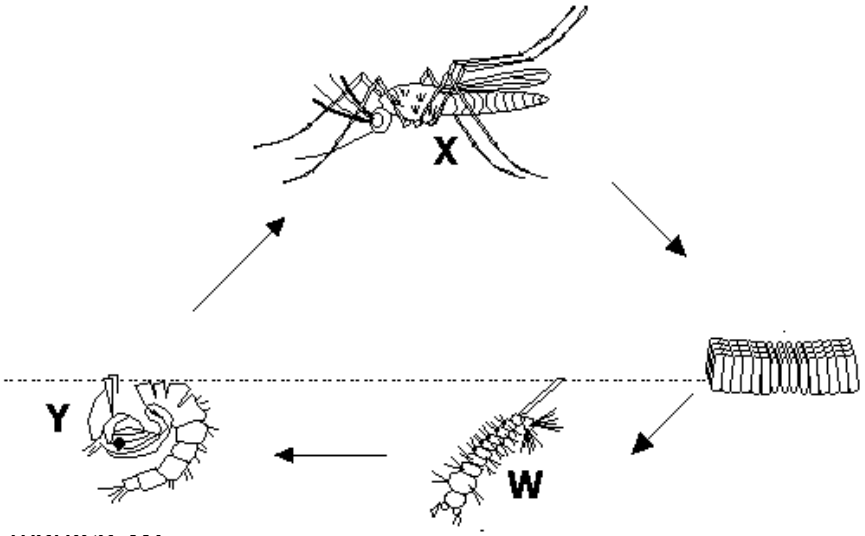

(c) Name one accident that affects bones in our bodies.

_____

(d) State any one item that can be used to give first aid to a casualty with fresh wounds on the skin.

_____

43. **Below is a life cycle of a mosquito. Use it to answer the questions that follow.**

(a) Name stage marked W

_____

(b) What is the best way of controlling mosquitoes at stage marked Y?

_____

(c) Why is stage X considered a vector?

_____

(d) Mention one disease spread by mosquitoes in human beings.

_____

44(a) What are germs?

_____

(b) Mention one problem that is caused by poor disposal of human body wastes in a home.

_____

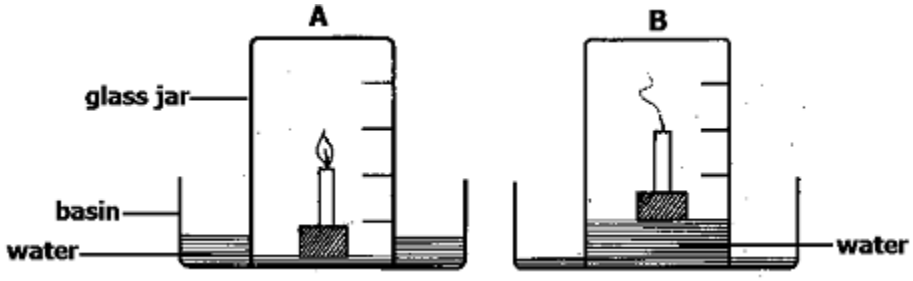

(c) Which activity at home can attract houseflies to our houses?

_____

(d) State one way burning waste materials is dangerous to the environment.

_____

45. **Study the experiment below and answer the questions that follow.**

(a) What gas enabled the candle to burn in A?

_____

(b) Why did the candle go off in B?

_____

(c) Name the gas the candle produced in B before in went off.

_____

(d) Give one use of gas the candle produced in B to man.

_____

46(a) Name one diarrhoeal disease in man.

_____

(b) Mention the common sign of diarrhoea infection in man.

_____

(c) Give one effect of severe diarrhoea infection.

_____

(d) What home treatment is recommended for a diarrhoea patient?

_____

47(a) State one use of incisor teeth to animals.

_____

(b) How are canine teeth adapted to their function of biting hard foods like meat?

_____

(c) Name the mineral salt needed for proper growth of teeth.

_____

(d) Give one disease that affects teeth.

_____

47(a) Name the organs in our bodies responsible for the functions given below:

(i) breathing_____

(ii) removing urine from blood _____

(b) Give the function of the following organs in a human body.

(i) stomach

_____

(ii) liver

_____

48. **Study the diagram and answer the questions that follow.**

(a) Name the parasite shown in the diagram above.

_____

(b) Why is the organism in the diagram above called a parasite?

_____

(c) Mention one common way the parasite above infests human bodies.

_____

(d) Give one way of controlling the spread of the above parasite.

_____

49(a) Name one vegetable crop.

_____

(b) Mention one characteristic of cereal crops.

_____

(c) State the importance of each of the farming practices given below:

(i) mulching.

_____

(ii) thinning.

_____

50(a) Give the use of proteins in the body.

_____

(b) Which mineral salt helps in the formation of blood in the body?

_____

(c) What causes rickets in infants?

_____

(d) Mention one way food gets contaminated after cooking it.

_____

51. **The diagram below shows a plant. Use it to answer the questions that follow.**

(a) Name the type of stem marked M.

_____

(b) What is the type of roots marked N?

_____

(c) Mention one importance of a stem to a plant.

_____

(d) Give one use of roots to a plant.

_____

52(a) Name one non-living component of soil.

_____

(b) Which type of soil is most suitable of crop growing?

_____

(c) Give one characteristic of sand soil.

_____

(d) Mention one cause of soil erosion.

_____

53(a) What is personal hygiene?

_____

(b) Mention one way we can keep our bodies clean.

_____

(c) Give one indicator of poor hygiene.

_____

(d) Apart from being smart, give one other importance of wearing shoes.

_____

54(a) Give one sign of a wet season.

_____

(b) How is the sun useful to crop farmers?

_____

(c) How can crop farmers be able to grow crops in the dry season?

_____

(d) Which weather condition helps in the pollination of flowers in the environment?

_____

55. Match the diseases to the way they are transmitted in man.

DISEASE	MODE OF TRANSMISSION
AIDS	a bite of an infected female anopheles mosquito.
Tetanus	breathing in infected air.
Influenza	playing unprotected sex with an infected person.
Malaria	germs enter the body through fresh wounds.

(a) AIDS _____

(b) Tetanus _____

(c) Influenza _____

(d) Malaria _____

PAPER SEVEN

SECTION A (40 MARKS)

1. Name the sense organ for feeling.

_____

2. Which gas supports burning?

_____

3. Give an example of a leguminous crop.

_____

4. How does a dog protect itself?

_____

5. What condition is shown by dry lips and sunken eyes in babies?

_____

6. Why do farmers paint their garden tools?

_____

7. How are leaves useful to a tomato plant?

_____

8. Apart from flavouring food, state any other use of salt at home.

_____

9. Mention one living component of the environment.

_____

10. In which type of weather is the item below usually used?

_ _____

11. Mention one thing at home where water for drinking can be kept?

_____

12. How does brushing teeth after meals prevent tooth decay?

_____

13. State any one cause of road accident.

14. State the main natural source of light in the environment.

15. What is the use of a hutch at home?

16. Mention one item used to clean our body when bathing.

17. Why is a cockroach regarded as an insect?

18. Why do some flowers have bright colours?

19. What instrument is used to measure the human body temperature?

20. Identify one human activity that can lead to soil erosion.

21. State one similarity between a stone and a pencil.

22. How is the garden tool below useful to a farmer?

23. Why are locusts called crop pests?

24. Write P.H.C in full.

25. Which type of family has the following members; father, mother, nephew, biological children?

26. Mention one non flowering plant.

27. Why should we cover latrines after use?

_____

28. What food value is got from eating mangoes?

_____

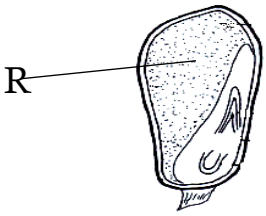

29. State the importance of shadow to man.

_____

30. Apart from evaporation, give one other process involved in the rain cycle.

_____

The diagram below is of a maize grain. Use it to answer question 31 and 32.

31. State the use of part R to the maize grain.
32. Why is a maize grain called a fruit?

_____

33. State one way of controlling rats at home.

_____

34. Mention one product got from goats.

_____

35. Why should a child who has been burnt by hot porridge be given first Aid?

_____

36. Name the process that enables plants to cool down.

_____

37. How does a millipede protect itself from danger?

_____

38. Which property of air is demonstrated when air is pumped into a ball and the ball becomes bigger?

_____

39. Name one component of soil.

_____

40. Write one PIASCY message.

_____

SECTION B (60 MARKS)

41. a) What are domestic animals?

_____

_____

b) Identify the domestic animal that;

i) chase and eat rats _____

ii) provide meat and milk _____

c) Give one way you can care for domestic animals.

_____

42. Match garden tools to their uses.

A	B
Hoe	cut small trees
Axe	water crops
Panga	for digging
Watering can	cut big trees

i) Hoe _____

ii) Axe _____

iii) Panga _____

iv) Watering can _____

43. a) What is a nuclear family?

_____

_____

b) Which member of a nuclear family;

i) breast feeds a baby _____

ii) heads a family _____

iii) respect parents and helps in house work _____

44. **A P.4 class carried out the experiment below. They put nails in water for 3 days.**

a) In which tin will the nails have changed colour after 3 days?

_____

b) What will oil do in tin B?

_____

c) Mention one condition necessary for rusting?

_____

d) In which tin will the nail remain unaffected?

_____

45. a) What is food?

_____

_____

b) Give one reason why we eat food.

_____

c) What is the best food for a baby of 2 months?

_____

d) Why is food cooked before eating?

_____

46. a) Give any one common accident at home.

_____

b) Mention any two items found in a first aid box.

i) _____ ii) _____

c) How is a stretcher useful to a firstaider?

_____

47. a) State any one way of keeping the school clean.

_____

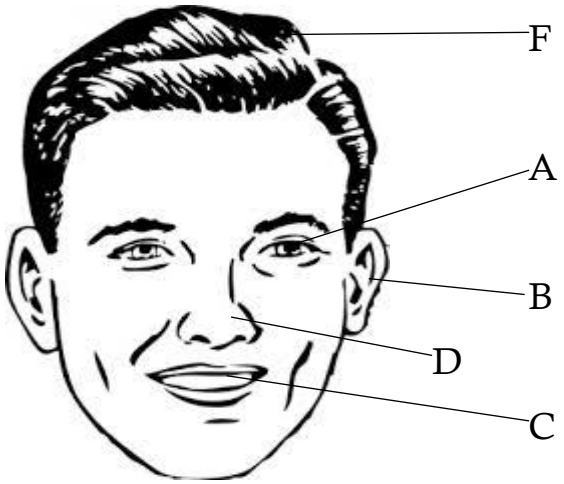

b) Identify any two items used to clean the classroom.

i) _____ ii) _____

c) For what purpose are dustbins used?

_____

48. **Study the diagram below and answer the questions that follow.**

a) Name the body organ labelled A and B.

i) A _____ ii) B _____

b) How is the use of part C different from that of part D?

_____

c) Give one way you can care for part F.

_____

49. a) What is weather?

_____

_____

b) Which element of weather is measured using a rain gauge?

_____

c) Name any two types of weather.

i) _____ ii) _____

50. Give two examples of the following crops.

a) Leguminous crops

i) _____ ii) _____

b) Cereal crops

i) _____ ii) _____

51. Mention any four childhood immunisable disease.

i) _____ ii) _____

iii) _____ iv) _____

52. a) What is a habitat?

_____

_____

b) Identify the habitat for the following;

i) fish _____ ii) bird _____

iii) earthworms _____

53. a) What name is given to the vertical arrangement of soil layers?

_____

b) Identify any two soil layers.

i) _____

ii) _____

c) Which type of soil has small, fine, sticky particles?

_____

54. a) State the difference between wind and air.

_____

_____

b) How is wind useful to man?

_____

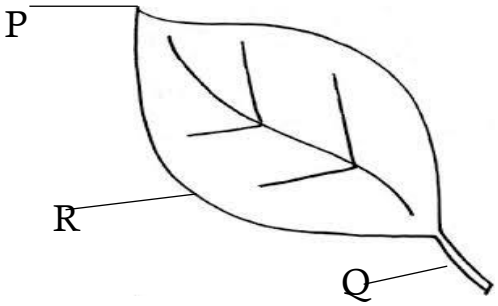

c) Mention one danger caused by wind.

_____

d) Write any property of air?

_____

55. **The diagram below shows a leaf. Use it to answer questions that follow.**

a) Name part labelled Q.

_____

b) What type of leaf venation is shown?

_____

c) How is a leaf useful to a plant?

_____

d) State the function of chlorophyll in a leaf to a plant.

_____

PAPER EIGHT

1. Why do bees visit flowers?

   _____

2. Mention one importance of animals in the environment.

   _____

3. Identify one process where evaporation is involved.

   _____

4. Why are bees grouped under social insects?

   _____

5. How are weeds important in a crop garden?

   _____

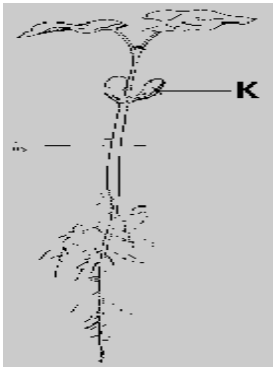

6. What is personal hygiene?

   _____

7. Give one importance of oxygen to man.

   _____

The diagram below shows a germinating seed. Use it to answer questions 8 and 9.

8. What type of germination is shown in the diagram?

   _____

9. Name part marked K in the diagram.

   _____

10. Why is it necessary to wash our hands after eating food?

    _____

11. Mention one way animals protect themselves from enemies.

    _____

12. Identify one place in a school where we can find a high number of germs.

13. State one way of preventing malaria infection in a home.

_____

14. Why is bush burning considered a bad method of clearing land?

_____

15. Apart from making food, state one other use of leaves to a plant.

_____

16. State one way water sources get contaminated.

_____

17. Suggest one way weeds can be controlled in a garden.

_____

18. Name the simple leaf shown below.

_____

_____

19. Identify one way the process of condensation is important in the environment.

_____

20. Name one waste product plants give off during photosynthesis.

_____

21. Why is carbon dioxide commonly used in fire extinguishers?

_____

22. How are claws useful to animals like cats?

_____

23. How are cereals commonly preserved before storage?

_____

24. Mention one substance that dissolves in water.

_____

25. Give one use of electricity to the people in your area.

_____

26. State one reason why plants climb others.

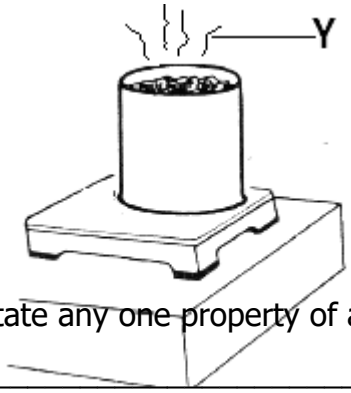

_____

27. Point out one way personal hygiene can be maintained by a P.4 child.

_____

28. Mention one type of roots that develop on a maize plant.

The diagram below shows an experiment about soil. Use it to answer questions 29 and 30.

29. Name part marked Y in the diagram above.

_____

_____

30. What does the experiment prove about soil?

_____

31. State any one property of air.

_____

32. How are shadows formed?

_____

33. Name one source of light.

_____

34. Why should water be boiled before drinking?

_____

35. How are nimbus clouds useful to a farmer?

_____

36. How is a bandage useful to a person giving first aid?

_____

37. Why is carbondioxide used to preserve tinned foods and drinks?

_____

38. Which stage of a butterfly helps to pollinate flowers?

_____

39. Give one use of seeds to man.

_____

40. Mention one effect of soil erosion.

_____

Section B

41a). What is photosynthesis?

_____

b). What type of food do plants make during photosynthesis?

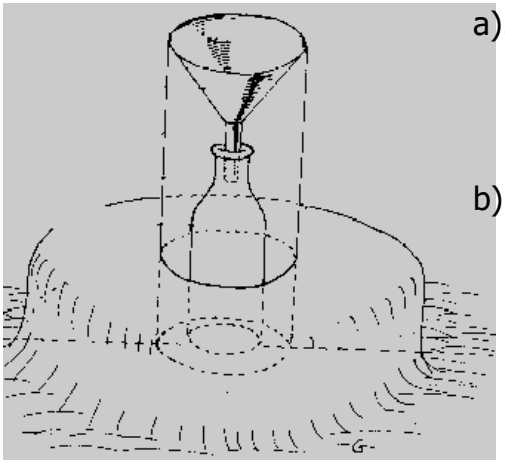

_____

c). How is chlorophyll important during the process of photosynthesis?

d). Why do you think plants do not make food at night?

_____

42. ***The diagram below shows instruments. Use it to answer questions that follow.***

a). Name the weather instrument shown above.

_____

_____

b). Name one place we can find this instrument.

_____

_____

c). How is the instrument shown above useful at a weather station?

_____

d). Besides the instrument shown above, identify any one other weather instrument found at a weather station.

_____

43a). Mention one cause of soil erosion.

_____

b). Give two agents of soil erosion.

i. _____

ii. _____

c). How can farmers control soil erosion in their gardens? (Give one way).

_____

44a). What is dehydration?

_____

b). Give two substances used to make Oral Rehydration Solution (ORS) at home.

i. _____

ii. _____

c). How is water in ORS important in the body of a patient?

_____

45a). Name one garden tool farmers use to carry out the following crop growing practices.

i. weeding _____

ii. pruning _____

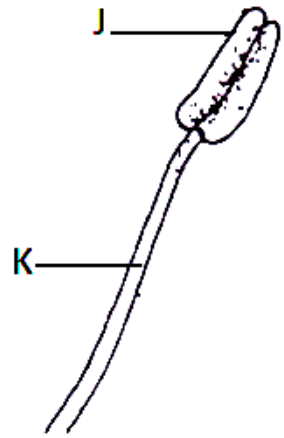

b). How are weeds harmful in the garden?

_____

c). Mention one example of weeds.

_____

46. ***<u>The diagram below shows a major part of a flower. Use it to answer questions that follow.</u>***

a). Name the part of a flower shown in the diagram.

_____

_____

b). Name the parts marked;

i. J _____

ii. K _____

c). How is part marked **J** important to a flower?

_____

47a). What are farm records?

_____

b). Mention any two examples of farm records.

i. _____

ii. _____

c). State one use of farm records.

_____

48a). How is crop rotation important in crop farming?

_____

b). Besides crop rotation, name any two other practices that can control crop pests.

i. _____

ii. _____

c). Mention one pest that destroys stored grains.

_____

49a). What is a nursery bed?

_____

b). Name any one plant whose seeds are first planted in a nursery bed.

_____

c). Point out one factor farmers consider when selecting a site for a nursery bed.

_____

d). Suggest one activity carried out on a nursery bed.

_____

50. Give one examples of the following types of crops.

i. legumes _____

ii. root crops _____

iii. cereal crops _____

iv. fruit crops _____

51a). State the main natural source of water.

_____

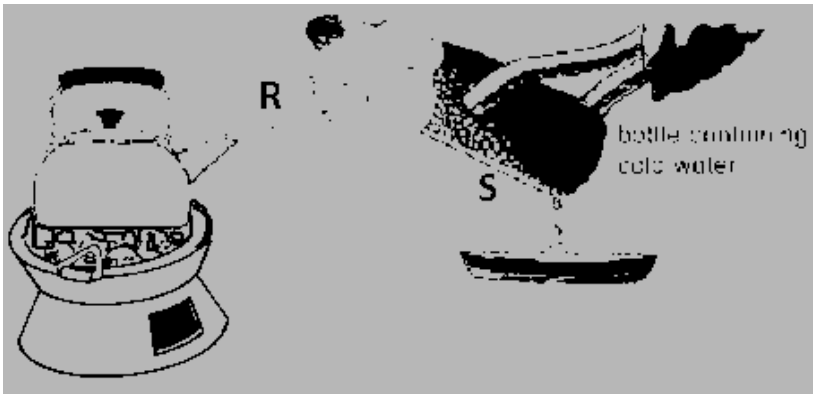

b). Write two diseases that one can get if he/she drinks contaminated water.

i. _____ ii. _____

c). Apart from boiling water, name any one other way of making water safe for drinking.

_____

52. ***<u>Study the diagram and answer the questions about it.</u>***

a). What process in nature does the diagram show?

_____

b). Which processes take pace at

i. R _____

ii. S _____

c). What is the importance of a charcoal stove in the experiment above?

_____

53a). Why is a goat considered a living thing?

_____

b). Give two reasons why animals move.

i. _____

ii. _____

c). How do people care for domestic animals like goats? (Give one way).

_____

54a). Identify one plant with the following kinds of leaves.

i. net veined leaves _____

ii. parallel veined leaves _____

b). Mention any one plant whose leaves are eaten by man.

_____

c). Besides photosynthesis, name any one other plant process that takes place in leaves.

_____

55a). Identify two types of soil.

i. _____

ii. _____

b). Which type of soil is mixed with cement and water when building houses?

_____

c). Why does clay soil retain water for the longest time?

_____

PAPER NINE
SECTION A (40 MARKS)

1. Give any one example of domestic animal?

   _____

2. Which component of soil makes it fertile?

   _____

3. Write down one way of controlling rats at home.

   _____

4. In which way is electricity useful to people.

   _____

5. State any one way of making water safe drinking.

   _____

6. What name is given to a glass tank where fish and other aquatic animals are kept?

   _____

7. What are vectors?

   _____

8. Give one reason why plants with weak stems climb others.

   _____

9. State the importance of a health centre to the community.

   _____

10. Name one type of germs.

    _____

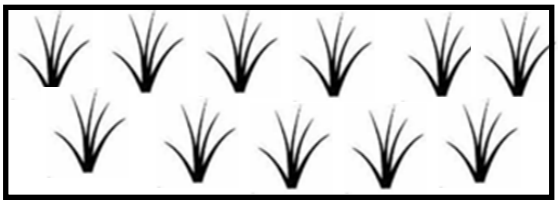

11. Write one human activity that destroys the environment.

    _____

12. Name one type of pollination.

    _____

13. **Name the method of planting crops shown in the diagram below.**

_____

14. How does a chameleon protect itself against enemies?

_____

15. State one reason why animals move from one place to another.

_____

16. Write down one way of controlling disease vectors at home.

_____

17. Which method of controlling soil erosion is used in a banana garden?

_____

18. Name the type of soil that people use for pottery.

_____

19. Give one agent of pollination.

_____

20. How can garden tools be prevented form rusting at home?

_____

21. Which element of weather helps to dry our clothes?

_____

22. On which body part of an insect are the wings found?

_____

23. Write one way of keeping cooked food safe.

_____

24. How is the item shown below useful at home?

25. Give the use of a rain gauge to a farmer.

26. Give one item that is used to fight fire outbreak at home.

27. Which part of a leaf has the same function like the gills of a fish?

28. Name the part of a germinating seed that develops into the root system.

29. How does HIV spread?

30. Give one product got from bees.

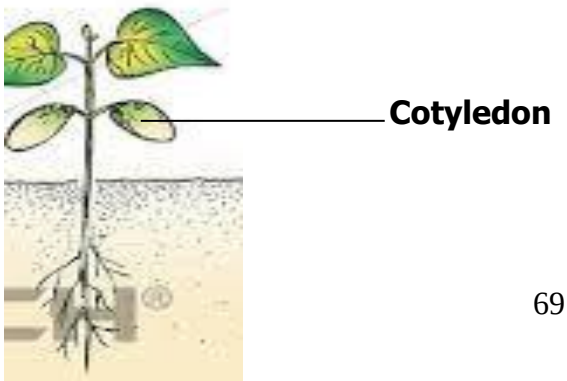

31. Write down one way of maintaining soil fertility.

32. Which part of a cassava plant is mainly eaten by people?

33. What name is given to the second stage in the life cycle of a cockroach?

34. Name one disease that can break out due to poor sanitation.

35. **Which type of germination is shown in the diagram below?**

_____

36. Give one way children can avoid getting accidents at school.

_____

37. How is chlorophyll important to plants?

_____

38. Name one basic need people get from plants.

_____

39. In which one way can weeds be useful to people?

_____

40. Write down one characteristic of living things.

_____

Section B (60 marks)

41. a) What are crop pests?

_____

b) Give two examples of crop pests.

i) _____

ii) _____

c) How can crop pests be controlled in a garden?

_____

42. a) How are vaccines important in the human body?

_____

b) Write down two examples of immunisable diseases.

i) _____

ii) _____

c) Name any one vaccine that is given to babies at birth.

_____

43. a) Give one danger of weeds.

_____

b) State two ways of controlling weeds.

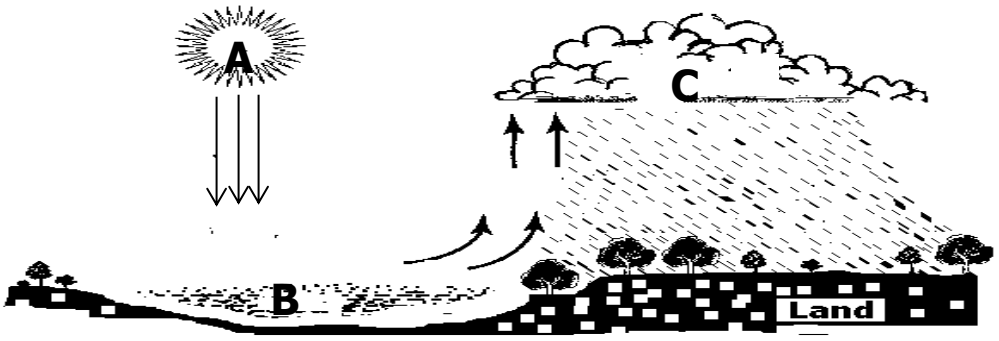

i) _____

ii) _____

c) Write down one example of weeds that may grow in gardens.

_____

44. **Study the diagram below carefully and answer the questions that follow.**

a) Name the components of the environment labeled **A** and **B**.

i) A_____

ii) B_____

b) Which type of clouds are formed at point labeled **C**?

_____

c) Give one use of rain to man.

_____

45. a) Write down one way of saving electricity at home.

_____

b) Give two examples of items at home that use electricity.

i) _____

ii) _____

c) In which one way can electricity be dangerous to people.

_____

46. a) Which term is used to refer to man and all his surroundings?

_____

b) State any two living components of the environment.

i) _____

ii) _____

c) Give one characteristic of living things

_____

47. a) What are germs?

_____

b) Give two types of germs common in your area.

i) _____

ii _____

c) Write down any one disease that is caused by germs.

_____

48. Study the table below carefully and answer the questions about it correctly.

Class of food	**Source**
carbohydrates	Rice, posho
Proteins	Eggs, Fish
Vitamins	Oranges, mangoes

a) From the list above, name two foods that give us energy.

i) _____

ii) _____

b) Name one class of food missing in the list.

i) _____

ii) _____

c) State the importance of food in our body.

_____

49. a) How are leaves important to animals?

_____

b) Write down one plant that stores food in the leaves.

_____

c) Apart from the leaves give two other main parts of plant.

i) _____

ii) _____

50. a) What name is given to animals that are kept at home?

_____

b) State two examples of animals kept at home.

i) _____

ii) _____

c) In which way can a P.3 child care for animals at home?

_____

51. **Match garden tools in list A to their uses in list B correctly.**

Garden tools	**uses**
Collecting grass	Hoe
Cutting branches	Wheel barrow
Digging the garden	Rake
Carrying garden tools	Panga

i) Collecting grass _____
ii) Cutting branches _____
iii) Digging the garden _____
iv) Carrying garden tools _____

52. a) Write HIV in full.

_____

b) Name the disease that is caused by HIV.

_____

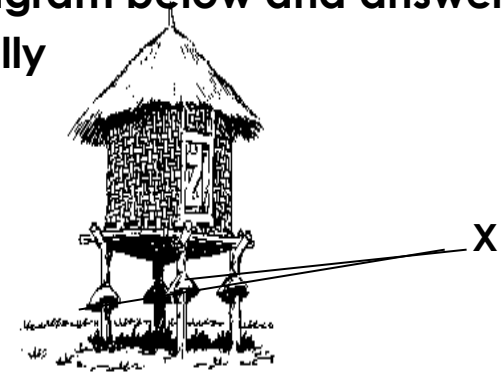

c) How can a P.3 child avoid getting HIV/AIDS?

_____

d) State any one danger of AIDS to the family.

_____

53. **Study the diagram below and answer the questions that follow carefully**

a) What name is given to the structure above?

_____

b) How is that above structure useful in a home?

_____

c) State the importance of part labeled X.

_____

d) Give one food stuff that can be stored the above strutcture.

_____

54. a) Name any one exotic breed of rabbits kept in your area.

_____

b) Write down one way a P.3 child can care for the rabbits in a hutch.

_____

c) Give any one reason why people keep rabbits.

_____

d) Name one disease that affects rabbits.

_____

55. **Use the words given below to complete the phrases.**

bush burning, hunting, soil erosion, crops, deforestation.

The carrying away of top soil is called _____.
It is caused by _____and _____ it leads to soil infertility that prevents _____from getting enough nutrients.

PAPER TEN

SECTION A (40 MARKS)

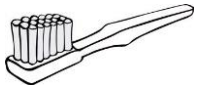

1. Mention any one food deficiency disease.

_____

2. How many legs does a bird have?

_____

3. **Name the part of the body kept clean by use of the item in the diagram.**

_____

4. Give one reason why people keep animals like donkeys.

_____

5. Which gas is given out during the process of photosynthesis?

_____

6. What term do we use to mean the top layer of the earth's surface?

_____

7. Give one way of controlling housefliesin our homes.

_____

8. Name the dangerous pest at home controlled by keeping cats.

_____

9. How is transpiration useful in our environment?

_____

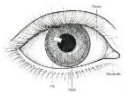

10. In which way can water from an open well be made safe for drinking?

_____

11. Write down the similarity between the gills in fish and the spiracles in insects.

_____

12. **Name any one disease that attacks the body organ below.**

_____

13. Mention one danger of birds in our environment.

_____

14. State one reason why people eat food.

_____

15. In which system of a plant do we find a terminal bud?

_____

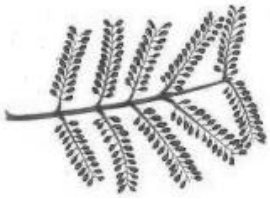

16. Name the weather instrument used in measuring the amount of rainfall received in an area at a given time.

_____

17. What is the importance of cooking food before eating it?

_____

18. **Name the type of leaf drawn below.**

_____

19. Why do schools like Victorious Ebenezer campus plant paspalum grass on their school compound?

_____

20. Mention any one crop first grown in a nursery bed.

_____

21. Point out one important reason for giving first aid to casualties.

_____

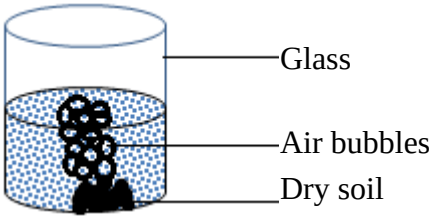

22. Identify one raw material that can be obtained from swamps.

_____

23. Outline the component of air used in preserving soft drinks.

_____

<u>The diagram below shows the experiment carried out on soil. Use to answer question 24</u>.

24. What does the experiment show about soil?

_____

25. What name do we give to the first set of teeth in human beings?

_____

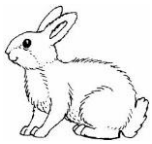

26. Why is fish grouped under aquatic life?

_____

27. Mention any one member of an extended family.

_____

28. **<u>Give any one way of caring for the animal shown below.</u>**

_____

_29.Why should garden tools be kept in dry places after use?

_____

30.Point out one example of a social insect.

_____

31. How is too much rain a problem in the environment?

_____

32. Why should people like builders be given a lot of food rich in carbohydrates?

_____

33. State one quality of a good first aider.

_____

34. Identify any one process in the environment that needs oxygen in order to take place.

_____

35. Which body organ enables children to remember answers when answering this paper?

_____

36. Why is a maize grain called a monocot?

_____

37. Apart from pollen, what else do bees collect from flowers?

_____

38. Mention any one item used to manage sunny weather.

_____

39. Which part of a sweet potato plantdo we eat?

_____

40. **In the space below, draw a diagram of a material used for cutting finger nails?**

SECTION B

41. a) Outline any two elements of weather.

i)_____ ii)_____

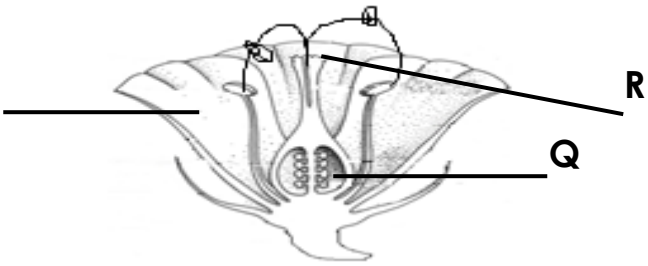

b) Identify the best season for harvesting cereals like maize.

_____

c) How is too much wind dangerous to people?

_____

42. **The diagram below is of a flower showing a certain process in plants.**

a) Name the process shown in the diagram.

_____

b) Give any two agents of the above process.

i)_____ ii)_____

c) Which letter represents a place where fertilization occurs in the above flower?

_____

43. a) Write down one way a farmer can control each of the following;

i) soil erosion _____

ii) growth of weeds _____

iii) crop pests _____

b) Mention any one way of maintaining soil fertility.

_____

44. a) What does the term personal hygiene mean?

_____

b) Write down two things a P.4 child can do to promote personal hygiene.

i)_____

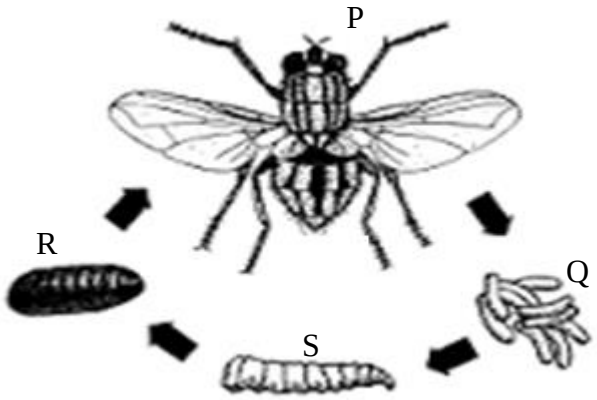

ii)_____

c) Which health habit do people carry out after using a latrine?

45. a) Mention any two places where immunization services are provided from.

i)_____ ii)_____

46.**The diagram below shows a life cycle of a housefly. Study it carefully and answer the questions that follow.**

a) Name the stages marked Q and S.

i)**Q**_____ ii)**S**_____

b) Where do houseflies lay their eggs?

_____

c) What feature on a house fly's body enables it to carry germs?

_____

47. a) Why is a lion calleda wild animal?

_____

b) Apart from a lion, write down twoother examples of wild animals.

i)_____ ii)_____

c) In which one way are wild animals important to people?

_____

48. a) Mention any two food values that make up a balanced diet.

i)_____ ii)_____

b) Which value repairs worn out body cells?

_____

c) Give any one way of preparing food for a meal.

_____

49. a) Define the term leaf venation.

_____

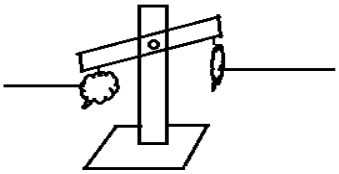

b) Name the two types of venation.

i)_____ ii)_____

c) Mention any one process that take place in leaves.

_____

50. a) **Name the property of air shown below.**

Balloon full of air  Empty balloon

_____

b) Give the difference between air and wind.

_____

c) State any two uses of wind to people.

i)_____

ii)_____

51. a) Write PHC in full.

_____

b) Mention any two elements of PHC.

i)_____ ii)_____

c) How can a P.4 child in Victorious promote primary health care?

_____

52. a) Bwambale feeds on unwashed fruits from the market. Identify two diseases that he is most likely to suffer from.

i)_____ ii)_____

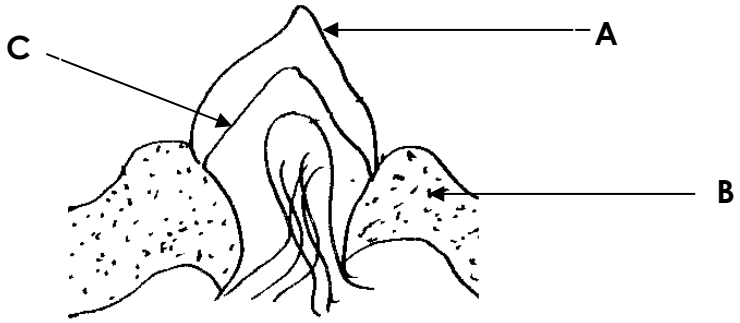

b) In which one way can these diseases be prevented?

_____

c) Name the disease caused by plasmodia parasites.

_____

53. a) The diagram below is a mammalian tooth. Study it careful and use it answer questions about it.

a) Name the type of tooth above.

_____

b) Identify the parts labeled A and B

A_____

B_____

c) How is the above tooth adopted to its function?

_____

54. a) How do people make use of heat from the sun?

_____

b) Mention any two food stuffs preserved by sun drying.

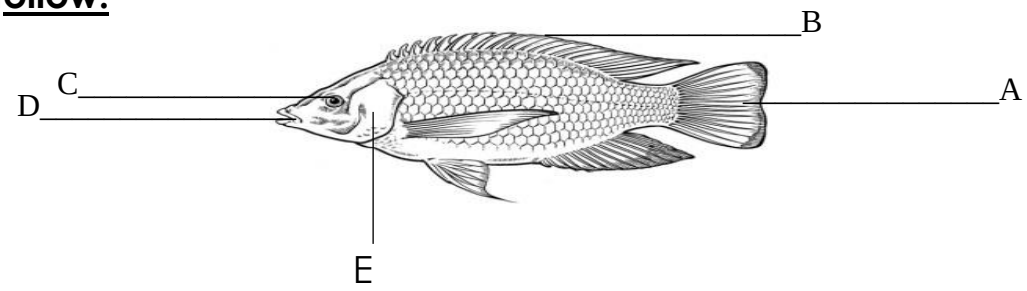

i)_____

ii)_____

c) How is the sun useful in preventing rickets?

_____

55. **The diagram below is of a fish. Use it to answer the questions that follow.**

a) Identify the main food value got from eating the above animal.

_____

b) Name the parts marked A and C.

i) A _____ ii) C _____

c) How does the animal above move?

_____

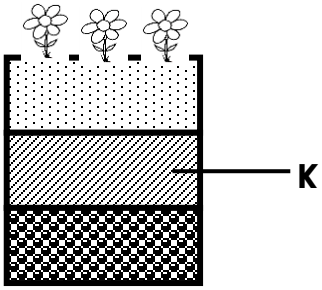

PAPER ELEVEN

SECTION A:

1. Give any one example of a dicotyledonous seed.

   _____

2. The diagram below shows a soil profile.

   Name the layer of soil marked K.

   _____

3. Name any **one** vector commonly found in dustbins

   _____

4. Name any **one** material used to make a kite used for playing.

   _____

5. Why are people encouraged to boil water for drinking?

   _____

6. Identify any **one** food stuff rich in proteins.

   _____

7. Give **one** example of a monocotyledonous seed.

   _____

8. Write down **one** natural source of energy.

   _____

9. Give any **one** use of flowers to people.

   _____

10. Why do people plant grass in the school compound?

    _____

11. Name the type of leaf venation shown by the leaf below

    _____

12. Give any **one** example of a fuel commonly used at home.

    _____

13. How can you prevent a water source like a well from contamination?

_____

14. Give any **one** use of a broom at home.

_____

15. Which body part do you use to taste food?

_____

16. Give any **one** effect of too much rain in the environment.

_____

17. To which body part of an insect are the legs attached?

_____

18. Why is a stone considered to be a non living thing?

_____

19. Name any **one** example of a wild bird.

_____

20. Write **one** way we can save resources at home.

_____

21. Identify the part of a sugarcane plant that stores food.

_____

22. Why do we cook food before eating it?

_____

23. How is a shadow useful to people?

_____

24. Identify any **one** common accident at home.

_____

25. Name any **one** element of weather.

_____

26. Give **one** use of things like toy cars made from artificial materials.

_____

27. Give any **one** role of a father at home.

_____

28. How is the garden tool below useful to a farmer?

29. Name any **one** item used to manage rainy weather.

_____

30. Give any **one** type of soil.

_____

31. How is a watering can useful to a farmer in a dry season?

_____

32. State any **one** importance of transpiration to plants.

_____

33. Write any **one** PIASCY message.

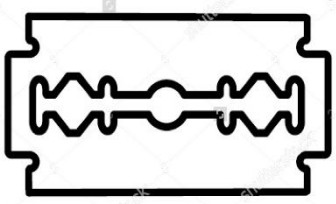

_____

34. State any **one** way a P.4 child can control the spread of malaria at home.

_____

35. In the space below, draw the animal that guards our home.

36. Which accident will come as a result of playing with the object below?

_____

37. Give one use of banana fibres at home.

_____

38. Why is it advisable to brush our teeth after every meal?

_____

39. Mention any one animal kept in an aquarium.

_____

40. The diagram below shows a sick child.

Identify the immunisable disease the above child is suffering from.

_____

SECTION B

41. a) What is photosynthesis?

_____

_____

b) Give two conditions needed for photosynthesis to take place in plants.

(i) _____

(ii) _____

c) What name is given to the food made during photosynthesis?

_____

42. (a) What are domestic animals.

_____

_____

b) Give two examples of domestic animals that are kept for transport.

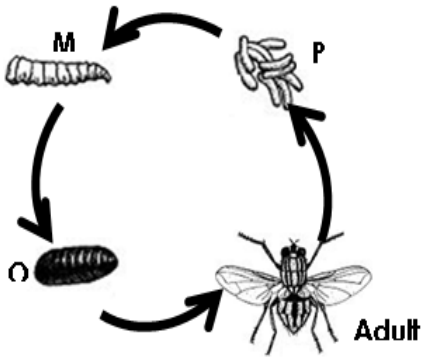

(i) _____

(ii) _____

c) How is a cow useful at home?

_____

43. <u>The diagram below shows the life cycle of a housefly. Use it to answer questions that follow.</u>

a) Name the stage marked O and P.

O _____

P _____

b) How is the adult stage of a housefly dangerous to people?

_____

_____

44. (a) Name <u>two</u> items used in the kitchen to cook food.

(i) _____

(ii) _____

(b) Give <u>two</u> ways of caring for the items found in the kitchen.

(i) _____

(ii) _____

45. <u>Use the diagram below to answer questions that follow.</u>

a) Identify the above item.

_____

b) Give <u>one</u> use of the above item in a school.

_____

c) Apart from a school, name any other place where the above item is found.

_____

d) Name the part of air found in the item above.

_____

46. a) What are flowering plants?

_____

b) How do flowering plants reproduce?

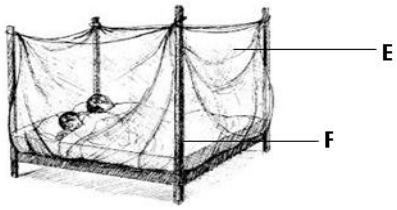

_____

c) Give any <u>two</u> examples of flowering plants.

i. _____

ii. _____

47. <u>The picture below shows items found in a bedroom.</u>

(a) Name the item marked E and F.

E _____

F _____

(b) Name the vector controlled by structure E?

_____

(c) Which disease is controlled by using item E?

_____

48. (a) What is air?

_____

(b) Write any <u>two</u> components of air.

(i) _____

(ii) _____

(b) Give any <u>one</u> property of air.

_____

49. <u>Match the materials used to clean the body correctly to their uses.</u>

<u>Material</u>	<u>Use</u>
Tooth brush	scrubbing dirt from the body.
Soap	brushing teeth.
Sponge	removing wax from ears.
Ear bud	kill germs on the skin.

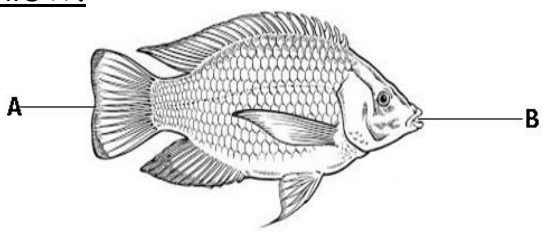

a) Tooth brush _____

b) Soap _____

c) Sponge _____

d) Ear bud _____

50. The diagram below shows a fish. Use it to answer questions that follow.

(a) Name the parts labeled with letter A and B.

A _____

B _____

(b) What is the habitat of a fish?

_____

(c) Give any one use of fish to people.

_____

51. a) How are doctors and nurses useful in our sub-country?

_____

b) Name any one place where doctors and nurses work.

_____

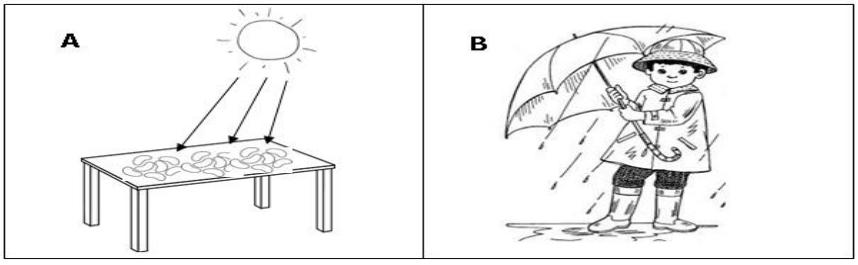

c) What special name is given to the vehicle that transports people who have got accidents to the hospital?

_____

d) Name any one hospital you know in Uganda.

_____

52. The figure below shows a weather chart. Use it to answer questions that follow.

(a) Identify the types of weather shown in A and B.

(i) A _____

(ii) B _____

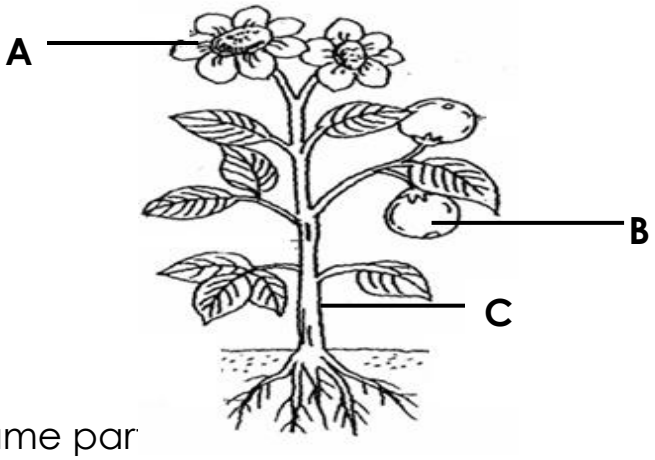

(b) Give any <u>one</u> way in which the type of weather in B is useful to a crop farmer.

_____

(c) State **<u>one</u>** way of protecting ourselves from weather B.

_____

53. **<u>Below is a diagram of flowering plant, use it to answer the questions that follow.</u>**

a) Name par

A _____

B _____

C _____

b) Use letter T to show the part that makes food for the plant.

54. (a) Give **<u>two</u>** types of root systems.

i. _____

ii. _____

b) Mention **<u>two</u>** uses of roots to people.

(i) _____

(ii) _____

c) Identify any **<u>one</u>** place where we find a first aid box.

_____

55. a) Name any **<u>one</u>** source of water in our community.

_____

b) Give any **<u>one</u>** use of water to people.

_____

c) Write any **<u>one</u>** way of making water safe for drinking.

_____

d) Give any **<u>one</u>** danger of having stagnant water near our homes.

_____

PAPER TWELVE

SECTION A: 40 MARKS

Questions 1 to 40 carry one mark each.

1. Give any **one** example of a dicotyledonous seed.

   _____

2. Name any **one** domestic animal that gives us milk.

   _____

3. Give any **one** component of soil.

   _____

4. State any **one** importance of shadows to people.

   _____

5. Name any **one** material used to make a kite used for playing.

   _____

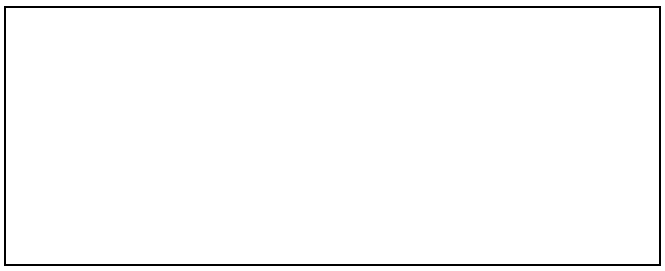

6. Why do we iron clothes?

   _____

7. Name any **one** place where harvested crops can be stored.

   _____

8. In the space below draw an item used to keep our bodies clean.

9. Why is a maize grain called a fruit?

   _____

10. What is wind?

    _____

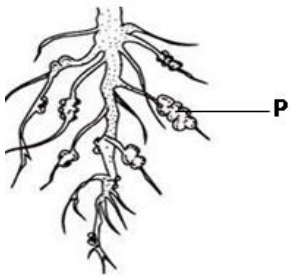

11. Name the plant fibre used for making balls.

    _____

12. Apart from cirrus, name any other type of clouds.

    _____

The diagram below shows a root system, use it to answer questions 13 and 14.

13. Name the root system drawn above.

_____

14. Name any **one** example of a plant with the above type of root system.

_____

15. What do we call the young plant in the garden?

_____

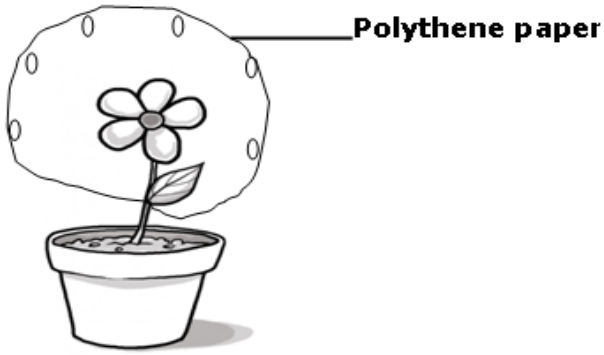

16. Give any **one** way in which some plants climb others.

_____

17. How do flowering plants reproduce?

_____

18. What does the experiment below show?

_____

19. Name any **one** common accident at home.

_____

20. Name the sanitation material we use for putting on plates to dry.

_____

21. Mention any **one** natural change in the environment.

_____

22. Give any **one** way of caring for our teeth.

_____

23. Mention any **one** type of soil.

_____

24. Name the type of leaf shown in the diagram

_____

25. How is a dog important at home?

_____

26. Why are beans called annual crops?

_____

27. Give any **one** use of leaves to plants.

_____

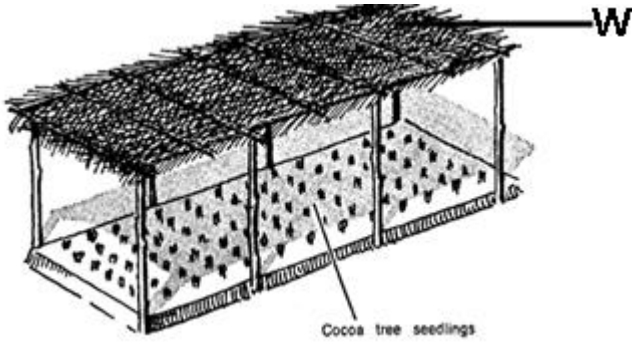

28. Name any **one** activity done to clean our bodies.

_____

29. What are pests?

_____

30. Name the structure drawn in the diagram below.

_____

31. What type of germination do beans undergo?

_____

32. Mention any **one** method used in growing plants.

_____

33. State any **one** danger of wind.

_____

34. What name is given to a male part of a flower?

_____

35. Why are people encouraged to boil water for drinking?

_____

36. State any **one** importance of a dust bin in your classroom.

_____

37. Name any **one** insect that protects itself by stinging.

_____

38. Name any **one** type of leaf venation.

_____

39. Name any **one** place where houseflies lay their eggs.

_____

40. Give any **one** use of plants to people.

_____

SECTION B: 60 MARKS

Questions 41 to 55 carry four marks each

41. (a) What is seed germination?

_____

_____

(b) Give **two** conditions needed for seeds to germinate.

(i) _____

(ii) _____

(c) Mention any **one** type of germination.

_____

42. (a) What is personal hygiene?

_____

_____

(b) Give any **two** ways of promoting personal hygiene.

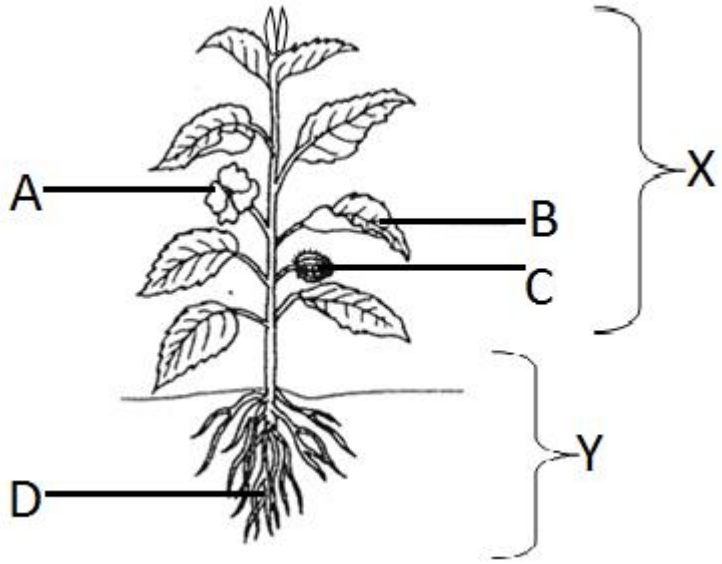

(i) _____

(ii) _____

(c) State any **one** danger of not promoting personal hygiene.

_____

The diagram below shows a flowering plant. Use it to answer question 43.

43. (a) Name parts marked **A** and **C**

(i) **A** _____

(ii) **C** _____

(b) Name the systems of a plant marked **X** and **Y**.

(i) **X** _____

(ii) **Y** _____

44. (a) Give **two** examples of pests which attack crops in the garden.

(i) _____

(ii) _____

(b) Mention any **one** way of controlling pests in the garden.

_____

(c) Mention any **one** disease of crops.

_____

45. a) Name any **two** crops grown in a nursery bed.

(i) _____

(ii) _____

(b) Give any **one** way of caring for crops in a nursery bed.

_____

(c) Why is transplanting of seedlings done in the evening?

_____

46. (a) Mention any **two** crop growing practices.

(i) _____

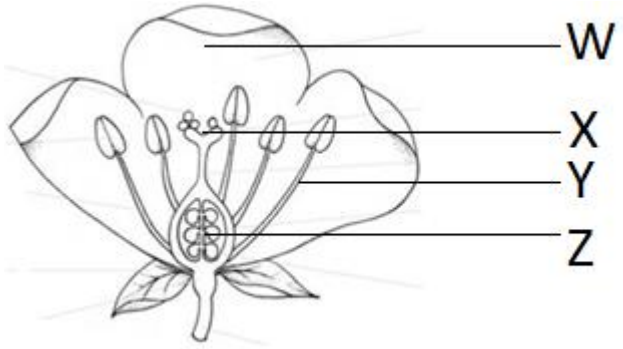

(ii) _____

(b) Give any **two** examples of leafy vegetables.

(i) _____

(ii) _____

The diagram below shows a flower. Use it to answer question 47.

47. (a) Name parts marked **W** and **Y**

(i) **W** _____

(ii) **Y** _____

(b) What does part **Z** develop into after fertilization?

_____

(c) State any **one** importance of flowers to people.

_____

48. (a) What is pollination?

_____

_____

(b) Give any **two** types of pollination.

(i) _____

(ii) _____

(c) Which insect pollinates flowers at night?

_____

49. (a) What are perennial crops?

_____

_____

(b) Give any **two** examples of perennial crops.

(i) _____

(ii) _____

(c) Name any **one** method used to harvest perennial crops.

_____

50. (a) What name is given to the food made by plants during photosynthesis?

_____

(b) Give **two** raw materials needed by plants to make their food.

(i) _____

(ii) _____

(c) Mention any **one** condition needed by plants to make their own food.

_____

51. The table below shows types of weather in **A** and activities done in **B** in a wrong order.

A	**B**
Rainy weather	Winnowing seeds
Windy weather	Drying harvested crops
Sunny weather	Harvesting water

Write the correct activities from the table done during;

(i) Rainy weather : _____

(ii) Windy weather : _____

(iii) Sunny weather : _____

(b) Which of the above weather can be managed by putting on gumboots?

_____

52. (a) Give any **two** types of stems

(i) _____

(ii) _____

(b) Mention any **two** uses of stems to people.

(i) _____

(ii) _____

53. a) Mention any **two** sources of water.

(i) _____

(ii) _____

b) Give any **one** use of water at home.

_____

c) Write down any **one** way of making water safe for drinking at home.

_____

54. (a) What is air?

_____

(b) Mention any **two** gases found in air.

(i) _____

(ii) _____

(c) State any **one** property of air.

_____

55. a) Name the garden tools below.

(b) Give any **two** ways of caring for garden tools.

(i) _____

(ii) _____
