LESSON PLAN – MATHEMATICS (PRIMARY FIVE)

Table 1: General Information

Class	Stream	Subject	Duration	Topic	Sub-topic
Primary Five	_____	Mathematics	80 Minutes	Set Concepts	Types of Sets

Table 2: Competences

Subject Competences	Language Competences
• Identify sets in real-life situations. • Describe types of sets (empty set, equal sets, equivalent sets, finite and infinite sets). • Represent sets using listing and description methods. • Compare different types of sets.	• Correctly use mathematical terms such as set, element, empty set, equal, equivalent, finite, infinite. • Construct clear sentences when explaining types of sets. • Participate in discussions using appropriate mathematical vocabulary.

Table 3: Teaching Preparation

Methods	Life Skills & Values	References	T/L Aids
• Brainstorming • Question and Answer • Group discussion • Demonstration • Guided discovery	• Critical thinking • Cooperation • Confidence • Respect for others' ideas	• Primary Five Mathematics Textbook (NCDC Approved 2026 Edition) • Teacher's Guide (Mathematics P.5) • Uganda Primary School Curriculum Framework 2026	• Manila papers • Flash cards • Chalkboard and chalk • Real objects (books, pens, stones) • Chart showing types of sets

Table 4: Lesson Development

Steps	Teacher's Activity	Learner's Activity
Step 1: Introduction (10 mins)	Greets learners. Reviews grouping of objects. Displays objects and introduces the term 'set'.	Respond to greetings. Group objects. Define a set as a collection of well-defined objects.
Step 2: Presentation (20 mins)	Explains meaning of a set and types: empty, finite, infinite, equal, equivalent. Gives examples.	Listen, copy notes, ask questions, give examples.
Step 3: Guided Practice (20 mins)	Divides learners into groups to classify examples. Guides learners.	Work in groups and present findings.

Step 4: Practice (20 mins)	Gives individual exercises and supervises.	Attempt exercises individually.
Step 5: Conclusion (10 mins)	Summarizes lesson, asks oral questions, gives homework.	Answer questions and write homework.

Evaluation

Strength	Weakness	Way Forward
• Most learners identified types of sets correctly. • Active participation in group discussions.	• Some learners confused equal and equivalent sets. • Difficulty in using correct symbols.	• Provide more exercises differentiating equal and equivalent sets. • Give remedial work. • Use more practical examples.
