TOTAL		

SECTION A

Questions **1** to **40** carry **one** mark each.

1. Name any one material that can cause a scald to a body.

   .....

2. Why do bacteria commonly live in decaying matter?

   .....

   .....

3. Apart from allowing free air circulation, how else is a wire mesh important to a rabbit hutch?

   .....

4. Give any one way of feeding babies at home.

   .....

5. Identify any one chemical change that adds air to the environment.

   .....

6. Why is sand soil more aerated than loam soil?

   .....

   .....

Below is a diagram of a boy cleaning the home compound. Study and use it to answer questions 7 and 8.

7. Which activity is being done by the boy?

.....

8. Name the item marked with letter **L**.

.....

9. Mention any one exotic breed of goats.

.....

10. What name is given to the wave like movement of food along the alimentary canal?

.....

11. State any one function of fingernails on the body.

.....

12. Give the reason why health services provided to people should be affordable.

.....

.....

13. Cite out one factor that can affect weight of a stone.

.....

14. How do farmers care for maize after harvesting?

.....

15. Write down any one message that can be displayed on the school compound to maintain personal hygiene.

.....

.....

16. Suggest the main reason for rearing cashmere goats.

.....

17. Identify any one type of immunity.

    .....

18. In the space provided below, draw a seed that undergoes epigeal germination.

19. In which way can the mother ensure strength of teeth in a child?

    .....

20. Give one reason for introducing other food to babies alongside breast milk.

    .....

21. How is the stomach adapted to mechanical digestion?

    .....

    .....

22. State any one use of insulators in our daily life.

    .....

23. What are food taboos?

    .....

    .....

24. Name any one type of change in the environment.

    .....

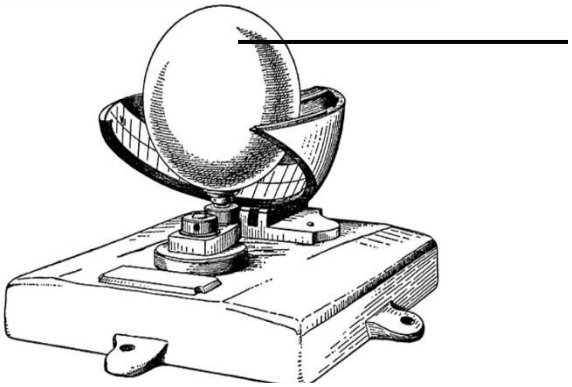

25. How can farmers encourage the growth of more tubers in cassava plants?

.....

26. Briefly explain how pickling prevents the rotting of carrot.

.....

Study the weather instrument below to answer questions 27 and 28.

27. Name the part marked with letter **P**.

.....

28. Which element of weather is detected by the above instrument?

.....

29. How important is flushing up of ewes on a farm?

.....

.....

30. Identify any one communicable intestinal disease.

.....

31. Mention any one activity that can control the breeding of mosquitoes at the larva stage.

.....

32. Name any one disease that can affect rabbits.

.....

33. State the difference between yeast and other fungi in the way they reproduce.

.....

.....

34. Why should patients be given plenty of fluids?

.....

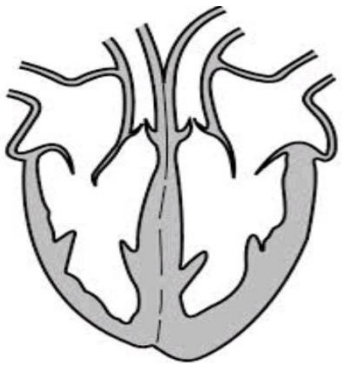

35. Mention any one characteristics of maize as an annual crop.

.....

36. Give the importance of bandaging wounds.

.....

Study the body organs below and answer questions 36 and 37.

C

D

37. State the functional difference between organ **C** and **D**.

.....

.....

38. How can a P.5 child care for organ **D** while in sunshine?

.....

39. Why does a piece of paper float on water?

.....

40. How is a blackfly similar to the tsetse fly in terms of feeding?

.....

.....

SECTION B

Questions **41** to **55** carry four marks each.

41. (a) Mention any two examples of domestic animals.

(i) .....

(ii) .....

(b) Give any two reasons why animals make sound.

(i) .....

(ii) .....

42. **The table below shows some of the parts of the digestive system and their functions. Complete it correctly.**

Parts	**Functions**
.....	Stores bile juice.
Duodenum	....
.....	Stores food for some time.
Rectum	....

43. **The diagram below is of a symbol of a certain health programme. Use it to answer questions that follow.**

(a) Which health programme is represented by the above symbol.

.....

(b) State any two activities done in the above programme.

(i) .....

(ii) .....

(c) Give any one importance of the above programme to children.

.....

.....

44. (a) Define stem tubers?

.....

.....

(b) Name any two examples of stem tubers.

(i) .....

(ii) .....

(c) State the difference between a white yam and an Irish potato in terms of food storage.

.....

.....

45. (a) Which collective name is given to the following parts of a flower;

(i). Anther head and filament.

.....

(ii). Stigma, style, ovary and ovules.

.....

(b) Name the part of a flower that;

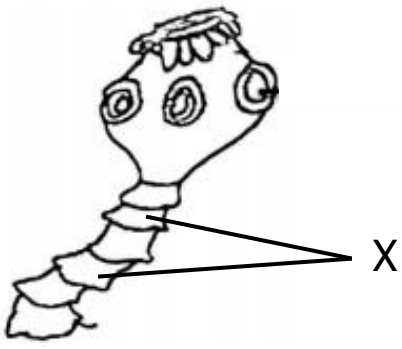

(i) protects the flower bud.

.....

(ii) Receives pollen grains during pollination.

.....

46. **The diagram below shows some of the intestinal worms. Study it and answer the questions that follow.**

S

T

(a) Name the intestinal worms marked with letters **S** and **T**.

(i) S .....

(ii) T .....

(b) Where in the human body does the intestinal worm marked with letter **S** live?

.....

(c) How are parts marked **X** on intestinal worm **T** adapted to their function of feeding?

.....

.....

47. (a) Which part of a vacuum flask controls heat loss or gain by;

(i) radiation

.....

(ii) conduction and convection

.....

(b) How is each of the parts named in (a) above adapted to their functions?

(i) .....

.....

(ii) .....

.....

48. (a) Give two reasons why people are encouraged to eat a balanced diet.

(i) .....

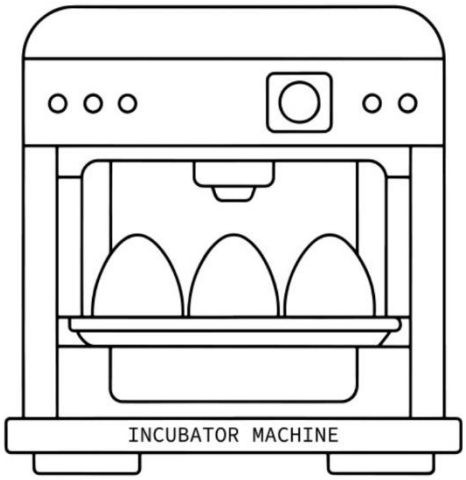

(ii) .....

(b) Mention any two proper ways of handling food at home.

(i) .....

(ii) .....

49. **Below are illustrations of the two methods of incubation. Study them carefully and answer the questions that follow.**

Z

W

(a) Name the methods of incubation marked **Z** and **W**.

(i) W .....

(ii) Z .....

(b) Give any one reason why commercial farmers prefer using the method of incubation in **Z** over method **W.**

.....

.....

(c) State the importance of water in the method of incubation marked **Z**.

.....

50. (a) Outline the two sets of teeth that develop in human beings.

(i) .....

(ii) .....

(b) Apart from brushing, give two other ways of caring for our teeth.

(i) .....

(ii) .....

51. (a) Identify any two components of soil.

(i) .....

(ii) .....

(b) Suggest any two importance of mineral salts in the soil.

(i) .....

(ii) .....

52. You are provided with clean water, toothpaste and a toothbrush. In four sentences describe the process of cleaning mouth using the above items.

(i) .....

.....

(ii) .....

.....

(iii) .....

.....

(iv) .....

.....

53. **The table below shows crop growing practices in part A and their meaning in part B in a wrong order.**

Part A: Practices	Part B: Meaning
Hardening off	The act of removing maize grains from the cob.
Pruning	The act of covering topsoil with dry plant materials
Threshing	The way of making seedlings used to the garden conditions.
mulching	The removal of excess branches or leaves from a growing plant

Match correctly the crop growing practices with their meanings.

(a) Hardening off:

.....

.....

(b) Pruning:

.....

.....

(c) Threshing:

.....

.....

(d) Mulching:

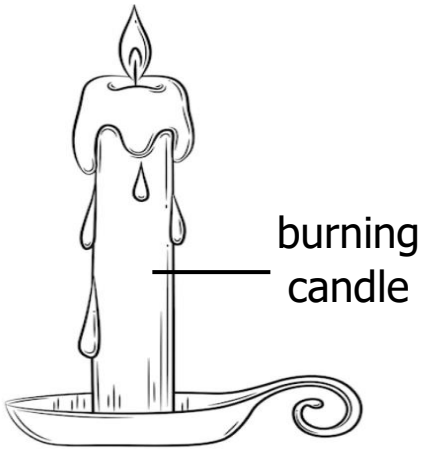

.....

.....

54. **The diagram below shows physical changes in states of matter. Study it carefully and answer the following questions carefully.**

F

G

(a) Name the physical changes marked **F** and **G**.

(i) F .....

(ii) G .....

(b) How is physical change marked **F** similar to **G**?

.....

(c) Name any one substance formed when the physical change marked **G** takes place.

.....

55. (a) Give any two types of vaccines.

(i) .....

(ii) .....

(b) In which two ways are vaccines administered to babies?

(i) .....

(ii) .....
