PRE PLE SERIES(10) sets

NAME:.....

SCHOOL:.....

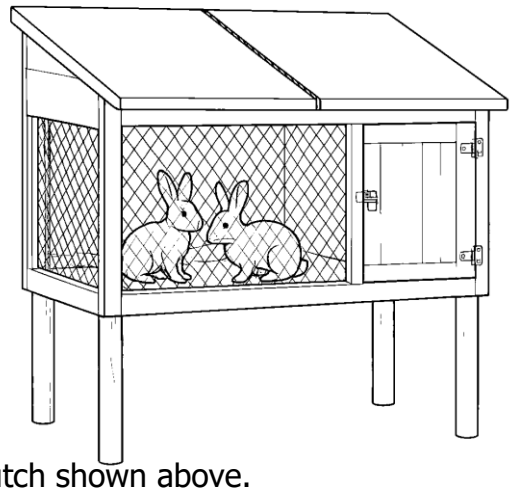

0780-438054 0708-438054

SECTION A: 40 MARKS

Questions **1** to **40** carry **one** mark each.

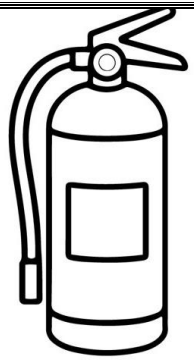

1. Name the type of teeth that grow first in babies.
   Incisors *(also accept incisor teeth).*
2. State the reason for chewing food properly before swallowing.
   It prevents indigestion//eases digestion of food//prevents choking
3. Give any **one** way of improving soil fertility.
   Manuring//practicing crop rotation//practicing inter- cropping//Agro-forestry//mulching//moderate use of artificial fertilizers//bush fallowing//
4. Mention any **one** importance of proper sanitation in an area.
   Reduces bad smell in the environment
   Reduces breeding and hiding places for vectors
   Reduces outbreak of diarrhoeal diseases
   Reduces outbreak of water borne diseases
   Reduces soil pollution//water pollution/

The diagram below shows a rabbit hutch. Study and use it to answer questions **5** and **6**.

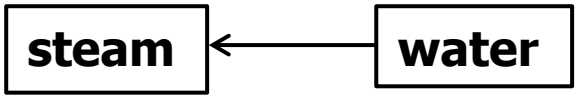

5. Name the type of hutch shown above.
   Caged Hutch
6. State the reason for putting a wire-mesh during construction.
   Wire mesh allows free air circulation
7. Write down the property of air which helps in drinking soda using a straw.
   Air exerts pressure
8. Identify any **one** way P.5 children can control accidents on their way to school.
   Avoid playing on the road, crossing busy roads on zebra crossing// proper use of road islands/ Use of lollipops.
9. Give the number of teaspoonful of sugar that are required when preparing one litre of ORS locally.
   Eight teaspoonfuls
10. Write any **one** thing poultry farmers add to layer feeds to increase calcium content.
    Crushed silver cyprinid, crushed cereal shells
    Crushed egg shells
11. Give the meaning of the term **heat energy**.
    Heat energy is the form of energy that moves from a hot point to a cold point
12. State the reason of adding ash to organic matter when making compost manure.
    Ash improves the mineral salts content
13. Mention any **one** use of carbohydrates in our bodies.
    Carbohydrates provide energy to the body.

The diagram below shows an equipment commonly found at school. Use it to answer questions **14** and **15**.

14. Identify the gas used in the equipment above.
Carbon dioxide
15. Give **one** reason why the above equipment is always painted red.
For easy identification in case of a fire outbreak
16. State the use of water to a germinating seed.
Water softens the seed coat//dissolves stored food
17. Mention any **one** way in which school children can prevent getting tooth decay.
Regular brushing of teeth, avoiding eating too much sugary foods
18. Apart from protection from harsh weather condition, state any other reason for planting seedlings in a nursery bed.
It gives a farmer enough time to prepare the main garden//it helps in selecting seedlings//
19. Give the reason why farmers harvest some of their crops during dry season.
There is enough sunshine to dry the harvested crops
20. State the importance of boiling water for drinking in our homes.
Boiling water helps to kill germs
21. Mention any **one** characteristic of sinking objects.
They have more density than water ***(they are denser than the fluid they are placed in).***
They have a higher weight compared to buoyant force acting on them
22. Give the reason why an object weighs less when placed in water.
Due to up thrust force//upward force//buoyant force//
23. State any **one** characteristic of tuber crop pests.
Have sharp incisors which bite tubers//have sharp claws to dig the soil//have fingers to uproot the tubers.
24. Mention any **one** way P.5 children can care for an HIV/AIDS patient.
Encouraging the patient to take the medicine **Feeding them.** **Washing their clothes** **Clothing them**
25. Name the root system possessed by a soya bean plant.
Taproot system

The illustration below shows a physical change. Study and use it to answer questions that follow.

26. Identify the physical change in the environment shown above.
Evaporation
27. Apart from the above change, write **one** other change of state that takes place in the absence of heat.
Condensation//deposition
28. Name the type of immunity acquired through recovery from an illness.
Natural Immunity
29. Mention any **one** cause of malnutrition among children.

Poor diet, ignorance.

30. Give a reason why BCG vaccines are given to babies at birth.
Babies are born without natural immunity against tuberculosis

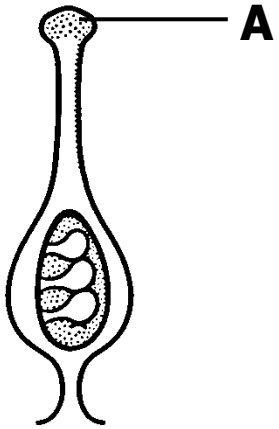

31. State any **one** importance of conducting health parades at school.
They help pupils to improve on their personal hygiene// help to identify skin diseases among children//They help children to promote good health
Helps children to promote child to child program
It promotes health education

32. Mention the way tapeworms get to enter in a human body.
Through eating undercooked meat or pork

33. Identify **one** sign of a dehydrated person.
Sunken eyes// little or no urine// dry lips//A pinch on the skin goes back slowly

34. Give any **one** reason why animals move from one place to another.
To get food// To run away from enemies//To find their mates// To look for shelter

The diagram below shows part of a flower. Use it to answer questions **35** and **36**.

35. Name the part of a flower shown in the diagram.
Pistil ***(also accept carpel)***

36. Mention the plant process that takes place on part marked **A**.
Pollination

37. Identify what would happen to a piece of metal made of iron when left outside in the night.
A piece of metal will rust.

38. State the way animals benefit from the process of photosynthesis.
Animals get food// Animals get oxygen

39. Give the reason why a rain gauge is always placed above the ground.
To prevent splashing//flowing water from entering it.

40. Mention **one** reason why electric wires are loosely fixed on poles.
To allow room for contraction on cold days.

SECTION B

41. (a) Name any **one** agent of pollination.
Wind// insects// water

(b) Give the reason why a maize plant is able to carry out cross pollination.
It has male and female flowers grow on different parts on the same maize plant.
It grows male and female flowers at different times on the same maize plant on different parts.

(c) Write down any **two** characteristics of insect pollinated flowers.
They produce scent//They produce sticky pollen//They have nectar.

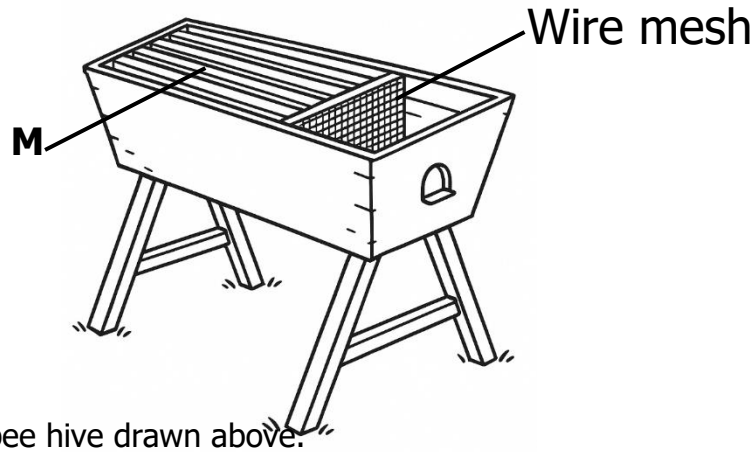

42. (a) Mention any **two** conditions provided to a chick during brooding.
Warmth// food// protection.

(b) Give any **one** reason why poultry farmers prefer artificial brooding
Chicks are protected from predators
Chicks are protected from harsh weather conditions
Many chicks are catered for at once.
Chicks get enough warmth

(c) State the importance of ventilation in an incubator for poultry eggs.

It maintains optimal oxygen levels
It allows free air circulation
It allows eggs to have enough oxygen.

43. The diagram below shows a modern bee hive. Use it to answer questions that follow.

(a) Name the bee hive drawn above.

Top bar hive

(b) State the use of the hive chamber marked **M**.

For storing honey

(c) Give the reason why the partition in the middle is made up of wire-mesh

To allow worker bees pass through to the honey chamber.
To prevent the queen bee from laying eggs in the honey chamber.

(d) Mention any **one** advantage of using the above modern bee hive.

It is easy to inspect bees in a modern beehive clean honey is harvested//It is long lasting.

44. (a) Write down any **two** agents of soil erosion in an area.

Water//animals//wind

(b) Explain how deforestation is able to cause soil erosion. (02 marks)

It leaves the soil bare, exposing it to agents of soil erosion.

45. How does each of the following animals protect itself against the enemies?

(i) bee -**By stinging**
(ii) millipede - **By coiling**
(iii) snail -**By entering the shell**
(iv) chameleon - **By changing colour**

46. (a) Name **two** common examples of fractures in humans

Simple fractures//Compound fractures

(b) Give any **one** way in which fractures can be managed.

Using splints to immobilize the affected part.
Applying ice packs //Giving painkillers to reduce pain
Compressing the area to reduce swelling.
Rushing the casualty to the hospital
Applying arm sling to the affected part.

(c) Mention any **one** required first aid for a person who has got fracture.

Applying splints//arm sling

47. (a) Name any **two** types of stems in plants.

Underground stems//Aerial stems

(b) Give any **one** plant whose stems can be used as a planting material.

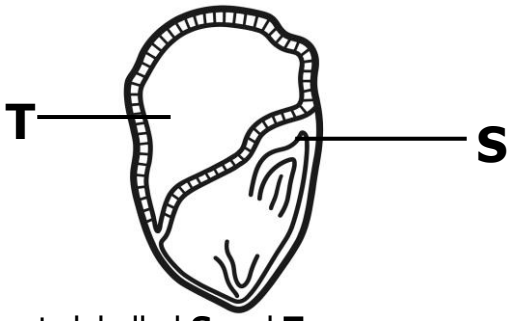

Zoysia plants//turmeric plants ***(accept all rhizomes)***

Cassava plants
Gladiolus plants //crocus//stem tubers ***(accept all corms)***
Onion plants//garlic plants ***(accept all bulbs)***
Irish potato plants ***(accept all stem tubers)***

(c) State any **one** way in which stems support human life

Sources of food//electricity poles//herbal medicine//firewood//charcoal//

48. The diagram below shows internal parts of a maize grain. Use it to answer questions that follow.

(a) Name parts labelled **S** and **T**

(b) Give the reason why the above maize grain is regarded as a fruit.

It has two scars

(c) Identify the part of a bean seed which has the same function as part **T**.

49. (a) Give the meaning of the term **balanced diet**.

A balanced diet is a diet that contains all food values in their correct amount.

(b) Name the cause of the following deficiency diseases in infants

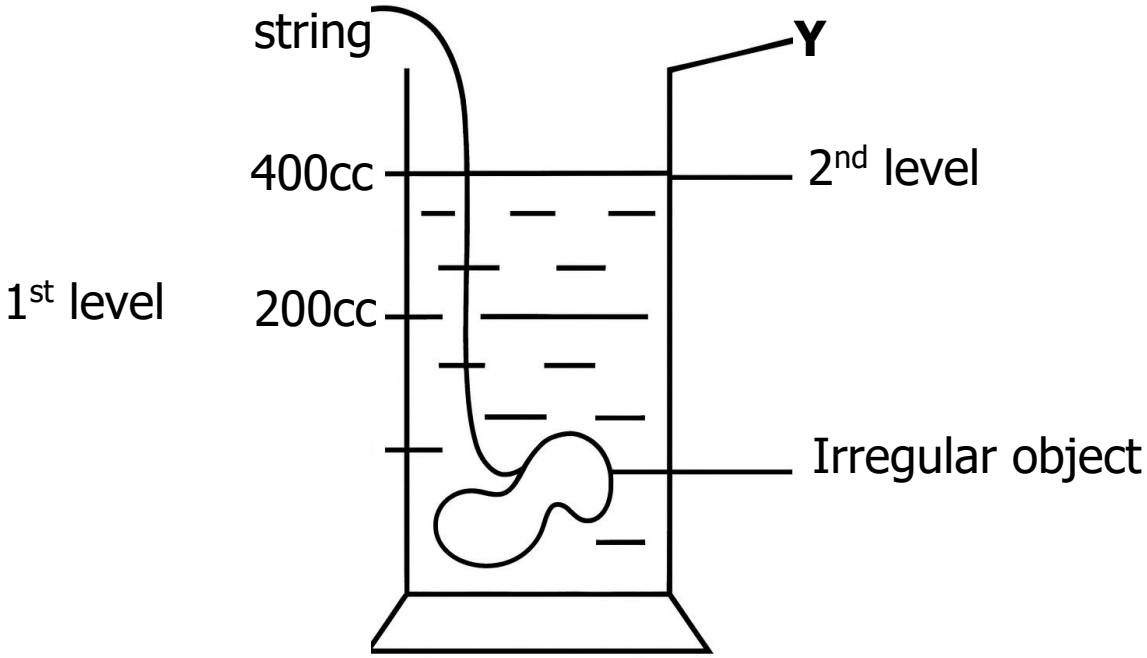

(i) Marasmus – **lack of all food values in the body.**

(ii) Scurvy - **lack of vitamin C in the body.**

(c) State the reason why young children should eat more proteins.

Children need more proteins to build and grow their bodies than adults who need them for repairing worn-out body tissues.

50. The diagram below shows the method of finding volume of an irregular object. Use it to answer questions that follow

(a) Name the container marked **Y**.

Measuring cylinder

(b) Find the volume of the irregular object.

Volume = 2nd level - 1st level

400cc-200cc

200cc

(c) Give the reason why the string was used.

The string helps to lower the irregular object gently into water.

(d) State the reason why the volume of water in the container rises when the object is lowered into it.

The object displaces water equal to its volume/ Due to displacement of water in the container

51. (a) Mention any **two** ways of caring for crops in the garden.

Watering/ weeding/ pruning/ thinning/ spraying pesticides/mulching//staking them//

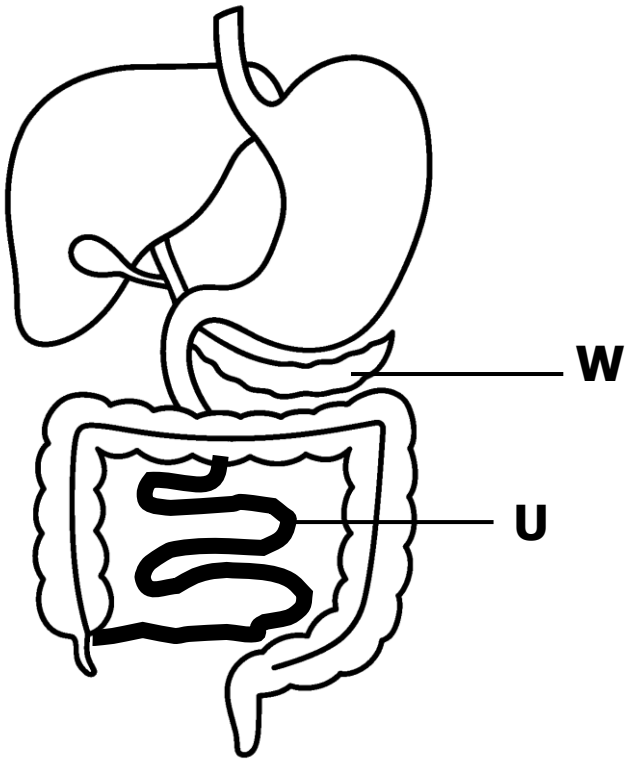

(b) Give the importance of transplanting seedlings in the evening.

To reduce the rate of transpiration/ /To prevent withering//wilting

(c) Name the correct garden tool farmers use for transplanting.

Garden trowel

52. The diagram below is part of the human alimentary canal. Use it to answer the following questions

(a) Name the part marked with letter **W**. **pancreas**

(b) State any **one** adaptation of part marked **U** to its function of food absorption.

U is long and coiled to increase surface area for food absorption

U has villi for absorbing digested food.

(c) Write down **one** disorder and disease of the above system.

(ii) Disorder:

vomiting//constipation//intestinal obstruction

(ii) Disease:

Peptic ulcers//diarrhoea//dysentery//cholera//typhoid

53. (a) Name the soil layer which is suitable for crop growing.

Top soil

(b) Mention any **two** ways in which dumping of polythene bags into the soil is dangerous.

Polythene bags prevent water//air from entering the soil//They cause infertility by killing soil organisms//soil pollution

(c) Identify the component of soil formed through decomposition of organic matter.

Humus

54. (a) Give a reason why filtered water is not suitable for drinking.

Filtration does not kill germs

(b) State any **two** ways filtration is useful in our daily life.

Filtration helps to separate seeds from passion fruit juice

Helps to remove tea leaves from tea//helps to obtain clean water from dirty water.

(c) Mention any **one** way in which crop farmers can separate beans from husks. **By winnowing**

55. Match the following terms in list **A** and their meanings in list **B**.

A	**B**
Density	Pull or Push
Mass	Force that pulls objects towards the centre of earth
Force	Amount of matter in an object
Gravity	Ratio of mass per unit volume

(i) Density - **Ratio of mass per unit volume.**

(ii) Mass - **Amount of matter in an object**

(iii) Force - **Pull or Push**

(iv) Gravity - **Force that pulls objects towards centre of the earth.**

END
