# PRIMARY FIVE SCIENCE LESSON PLANS TERM ONE 2026

**LESSON 1: KEEPING POULTRY - INTRODUCTION**

| DATE | CLASS | SUBJECT / L. AREA | NO. OF CHILDREN | TIME |
|---|---|---|---|---|
| | Primary Five | Integrated Science | | 60 Minutes |

| THEME | TOPIC | CONTENT |
|---|---|---|
| Science in Human Activities and Occupations | Keeping Poultry and Bees | Introduction to Poultry Keeping |

**COMPETENCES:**

- **Cognitive Competence:** Learners define poultry and explain the importance of keeping poultry.
- **Affective Competence:** Learners appreciate the value of poultry farming as a source of food and income.
- **Psychomotor Competence:** Learners identify different types of poultry from pictures and real specimens.
- **Language Competence:** Learners correctly pronounce and use terms such as poultry, fowls, layers, broilers, and dual purpose.

---

**TEACHING METHODS/TECHNIQUES:**

- Question and answer
- Discussion
- Demonstration
- Observation
- Group work
- Explanation
- Brainstorming

---

**LEARNING OUTCOMES:**

By the end of this lesson, learners should be able to:

1. Define poultry and poultry keeping.
2. Identify different types of poultry.
3. State the importance of keeping poultry.
4. List products obtained from poultry.

---

**TEACHING/LEARNING MATERIALS:**

- Pictures of different poultry birds (chicken, ducks, turkeys, geese)
- Real specimens (if available) - feathers, eggs

- Chart showing poultry products
- P.5 SUREKEY SCIENCE NOTES (Page 6)
- Diagram of types of poultry (Page 6)

**LESSON DEVELOPMENT**

| TIME | STAGE | TEACHER'S ACTIVITY | METHODS/TECHNIQUES | LEARNERS' ACTIVITY |
|---|---|---|---|---|
| 5 mins | **ENGAGE** | - Asks learners: "Which birds do people keep at home?"<br>- Lists learners' responses on the board<br>- Shows pictures of different birds (chicken, ducks, turkeys)<br>- Asks: "What do we call these birds kept at home?" | - Brainstorming<br>- Question and answer | - Mentions birds kept at home (chicken, ducks, pigeons)<br>- Observes pictures<br>- Suggests the term "poultry" |
| 15 mins | **EXPLORE** | - Divides learners into groups<br>- Gives each group pictures of different poultry birds<br>- Asks groups to identify and name each bird<br>- Asks groups to discuss why people keep these birds<br>- Guides groups to share findings | - Group work<br>- Guided discovery<br>- Discussion | - Observes pictures in groups<br>- Identifies and names poultry birds<br>- Discusses reasons for keeping poultry<br>- Shares findings with class |
| 20 mins | **EXPLAIN** | - Defines poultry: "Poultry are domestic birds." (Page 6)<br>- Defines poultry keeping: "The rearing of domestic birds."<br>- Shows types/examples of poultry from the diagram on Page 6:<br>• Chickens<br>• Ducks<br>• Turkeys<br>• Geese<br>• Guinea fowl<br>• Pigeons<br>- Explains reasons why people keep poultry (Page 6):<br>• To get eggs<br>• To get meat<br>• To sell and get money<br>- Lists products obtained from poultry:<br>• Eggs<br>• Meat | - Explanation<br>- Lecture<br>- Demonstration | - Listens attentively<br>- Takes notes<br>- Observes diagrams on Page 6<br>- Names types of poultry<br>- Lists reasons for keeping poultry<br>- Identifies products from poultry |

| | | | | |
|---|---|---|---|---|
| | | • Feathers<br>• Manure (droppings)<br>- Explains ways in which keeping poultry is important to people (Page 6):<br>• Source of eggs<br>• Source of meat<br>• Source of income<br>• Provide feathers<br>• Droppings used as manure | | |
| 10 mins | **ELABORATE** | - Asks learners to name poultry birds found in their community<br>- Asks: "Give any two ways in which poultry farming is important to people." (Evaluation 1.1, Page 8)<br>- Guides learners to complete Evaluation activity 1.1 questions 1-6 (Page 8)<br>- Helps learners answer questions about the diagram on Page 8 | - Question and answer<br>- Guided practice<br>- Diagram interpretation | - Names local poultry birds<br>- Answers importance of poultry farming<br>- Completes Evaluation questions with guidance<br>- Answers questions about the diagram |
| 5 mins | **EVALUATE** | - Asks oral questions:<br>• What is poultry?<br>• Name three types of poultry<br>• Give two reasons why people keep poultry<br>- Gives class work from the source material | - Oral questioning<br>- Written exercise | - Answers oral questions<br>- Writes class work in books |
| 5 mins | **EXTEND** | - Asks learners to observe poultry at home and note the products obtained<br>- Tells learners to read about types of chicken on Pages 8-10 | - Giving assignment<br>- Setting homework | - Listens to home assignment<br>- Prepares to observe poultry |

**CLASS WORK:**

*From Evaluation activity 1.1 (Page 8)*

1. Give the meaning of the following terms:
   (i) Poultry
   (ii) Poultry keeping
2. Write down any two types of poultry kept by people in your community.
3. Mention any two ways in which poultry farming is important to people.
4. State any two differences between the external parts of a hen and that of a cock.
5. Write down any two products got from birds.

6. Name the external features marked in the diagram on Page 8.

**LESSON EVALUATION**

| STRENGTHS: | AREAS WHICH NEED IMPROVEMENT: | WAY FORWARD: |
|---|---|---|
| | | |
| | | |
| | | |
| | | |

**LESSON 2: KEEPING POULTRY - TYPES OF CHICKEN**

| DATE | CLASS | SUBJECT / L. AREA | NO. OF CHILDREN | TIME |
|---|---|---|---|---|
| | Primary Five | Integrated Science | | 60 Minutes |

| THEME | TOPIC | CONTENT |
|---|---|---|
| Science in Human Activities and Occupations | Keeping Poultry and Bees | Types of Chicken - Layers, Broilers, Dual Purpose, Local and Exotic Breeds |

**COMPETENCES:**

- **Cognitive Competence:** Learners differentiate between layers, broilers, local breeds, and exotic breeds of chicken.
- **Affective Competence:** Learners appreciate the value of both local and exotic breeds for different purposes.
- **Psychomotor Competence:** Learners identify different breeds of chicken from pictures.
- **Language Competence:** Learners correctly pronounce and use terms such as layers, broilers, dual purpose, exotic, and crossbreeding.

---

**TEACHING METHODS/TECHNIQUES:**

- Explanation
- Question and answer
- Discussion
- Comparison
- Observation
- Group work
- Classification

**LEARNING OUTCOMES:**

By the end of this lesson, learners should be able to:

1. Identify different types of chicken based on purpose.
2. Differentiate between layers and broilers.
3. State characteristics of local and exotic breeds.

4. Explain advantages and disadvantages of local and exotic breeds.

---

**TEACHING/LEARNING MATERIALS:**

- Pictures of different chicken breeds (layers, broilers, local breeds)
- Chart showing types of chicken
- P.5 SUREKEY SCIENCE NOTES (Pages 8-10)
- Diagrams of local and exotic breeds (Page 10)

**LESSON DEVELOPMENT**

| TIME | STAGE | TEACHER'S ACTIVITY | METHODS/TECHNIQUES | LEARNERS' ACTIVITY |
|---|---|---|---|---|
| 5 mins | **ENGAGE** | - Revises previous lesson on poultry<br>- Asks: "What are the main reasons people keep chickens?"<br>- Asks: "Are all chickens kept for the same purpose?"<br>- Shows pictures of different chicken breeds | - Question and answer<br>- Revision | - Answers reasons for keeping chickens<br>- Realizes chickens may have different purposes<br>- Observes pictures |
| 15 mins | **EXPLORE** | - Divides learners into groups<br>- Gives each group pictures of different chicken breeds<br>- Asks groups to sort chickens into those kept for eggs, those kept for meat, and those kept for both<br>- Asks groups to observe differences in appearance<br>- Guides groups to share findings | - Group work<br>- Guided discovery<br>- Classification | - Sorts chickens into groups based on purpose<br>- Observes physical differences<br>- Discusses findings with group<br>- Shares with class |
| 20 mins | **EXPLAIN** | - Explains types of chicken based on purpose (Page 8):<br>• **Layers**: chickens kept purposely for egg production (light breeds)<br>- Breeds: White Leghorn, Brown Egger, Minorca, Ancona, Sykes<br>• **Broilers**: chickens kept purposely for meat production (heavy breeds)<br>- Breeds: Plymouth Rock, Sussex, Cornish<br>• **Dual purpose**: chickens kept for both eggs and meat<br>- Defines local breeds (Page 9): indigenous chickens kept in | - Explanation<br>- Lecture<br>- Demonstration | - Listens attentively<br>- Takes notes<br>- Observes diagrams on Page 10<br>- Names breeds of layers and broilers<br>- Compares local and exotic breeds<br>- Lists advantages and disadvantages |

| | | | | |
|---|---|---|---|---|
| | | villages<br>• Examples: Naked Neck, Ugandan Black, Ugandan Red, Ugandan Brown<br>• Characteristics: multiple colours, lay fewer eggs, give less meat, resistant to diseases and harsh weather<br>• Advantages: survive harsh weather, resistant to tropical diseases, resistant to parasites<br>• Disadvantages: grow slowly, produce less meat, lay fewer eggs<br>- Defines exotic breeds (Page 10): chickens imported from overseas (pure breeds)<br>• Examples: New Hampshire, White Leghorn, Light Sussex, Ancona, Plymouth Rock<br>• Characteristics: lay many eggs, grow faster, produce plenty meat, same colour<br>• Advantages: grow faster, more meat, more eggs<br>• Disadvantages: prone to tropical diseases, need special care, affected by harsh climate, expensive to maintain<br>- Explains hybrids/crossbreeds (Page 10): mating local and exotic breeds to improve quality | | |
| 10 mins | **ELABORATE** | - Asks: "Cereal wants to supply eggs to different shops. What type of chicken would you advise him to keep?" (Evaluation 1.2, Page 11)<br>- Asks: "State any two advantages of keeping local breeds over exotic breeds." (Page 11)<br>- Guides learners to complete Evaluation activity 1.2 questions 1-8 (Page 11) | - Question and answer<br>- Guided practice<br>- Problem solving | - Advises keeping layers<br>- Lists advantages of local breeds<br>- Completes Evaluation questions with guidance |
| 5 mins | **EVALUATE** | - Asks oral questions:<br>• What are layers? | - Oral questioning<br>- Written exercise | - Answers oral questions |

| | | | | |
|---|---|---|---|---|
| | | • Name two exotic breeds of chicken<br>• Give one advantage of local breeds<br>- Gives class work from the source material | | - Writes class work in books |
| 5 mins | **EXTEND** | - Asks learners to find out from home which breeds of chicken their families keep<br>- Tells learners to read about systems of keeping poultry on Pages 11-15 | - Giving assignment<br>- Setting homework | - Listens to home assignment<br>- Prepares to find out about local breeds |

**CLASS WORK:**

*From Evaluation activity 1.2 (Page 11)*

1. Mention any two types of chicken commonly kept by people in your community.
2. Apart from Light Sussex, name any two other exotic breeds of chicken kept for meat.
3. Cereal wants to supply eggs to different shops. What type of chicken would you advise him to keep?
4. How does a poultry farmer benefit from keeping a Black Australorp?
5. State any two advantages of keeping local breeds of chicken over exotic breeds.
6. Which type of chickens are kept to obtain two main products?
7. How best can a poultry farmer improve the quality of local breeds of chicken?
8. Name any two exotic breeds of chicken commonly kept in your community.

**LESSON EVALUATION**

| **STRENGTHS:** | **AREAS WHICH NEED IMPROVEMENT:** | **WAY FORWARD:** |
|---|---|---|
| | | |
| | | |
| | | |

**LESSON 3: KEEPING POULTRY - SYSTEMS OF KEEPING POULTRY**

| **DATE** | **CLASS** | **SUBJECT / L. AREA** | **NO. OF CHILDREN** | **TIME** |
|---|---|---|---|---|
| | Primary Five | Integrated Science | | 60 Minutes |

| **THEME** | **TOPIC** | **CONTENT** |
|---|---|---|
| Science in Human Activities and Occupations | Keeping Poultry and Bees | Systems of Keeping Poultry |

**COMPETENCES:**

- **Cognitive Competence:** Learners identify different systems of keeping poultry and explain their advantages and disadvantages.

- **Affective Competence:** Learners appreciate the importance of choosing appropriate housing systems for poultry welfare.
- **Psychomotor Competence:** Learners draw and label diagrams of different poultry housing systems.
- **Language Competence:** Learners correctly use terms such as free range, deep litter, battery cage, and fold system.

---

**TEACHING METHODS/TECHNIQUES:**

- Explanation
- Demonstration
- Question and answer
- Discussion
- Comparison
- Diagram interpretation
- Group work

---

**LEARNING OUTCOMES:**

By the end of this lesson, learners should be able to:

1. Identify different systems of keeping poultry.
2. Explain the advantages and disadvantages of each system.
3. State factors to consider when choosing a poultry keeping system.
4. Identify equipment used in poultry houses.

---

**TEACHING/LEARNING MATERIALS:**

- Charts showing different poultry housing systems
- Diagrams from P.5 SUREKEY SCIENCE NOTES (Pages 11-15)
- Pictures of free range, deep litter, and battery cage systems
- P.5 SUREKEY SCIENCE NOTES (Pages 11-15)

**LESSON DEVELOPMENT**

| TIME | STAGE | TEACHER'S ACTIVITY | METHODS/TECHNIQUES | LEARNERS' ACTIVITY |
|---|---|---|---|---|
| 5 mins | **ENGAGE** | - Asks learners: "Where do farmers keep their chickens?"<br>- Asks: "Do all farmers keep chickens in the same way?"<br>- Shows pictures of chickens in different housing systems | - Question and answer<br>- Observation | - Suggests places where chickens are kept<br>- Realizes there are different systems<br>- Observes pictures<br>- Shares opinions |

| | | | | |
|---|---|---|---|---|
| | | - Asks: "Which system do you think is best? Why?" | | |
| 15 mins | **EXPLORE** | - Divides learners into groups<br>- Gives each group pictures showing different poultry keeping systems<br>- Asks groups to observe and describe each system<br>- Asks groups to discuss advantages and disadvantages of each system<br>- Guides groups to share findings | - Group work<br>- Guided discovery<br>- Discussion | - Observes pictures in groups<br>- Describes each system<br>- Discusses advantages and disadvantages<br>- Shares findings with class |
| 20 mins | **EXPLAIN** | - Lists factors to consider when choosing a system (Page 11):<br>• Expenses involved<br>• Safety of birds<br>• Skills for disease control<br>• Knowledge about the system<br>• Number of birds<br>- Explains each system:<br>**1. Free range system** (Page 11): birds left free to move and look for food<br>• Common in rural areas because it is cheap<br>• Advantages: less attention, variety of food, cheaper, birds get exercise<br>• Disadvantages: predators, diseases, eggs get lost<br>**2. Deep litter system** (Page 13): birds kept in a house with litter on floor<br>• Advantages: easy management, manure collection, disease control<br>• Disadvantages: respiratory diseases, expensive litter<br>**3. Battery cage system** (Page 14): birds kept in separate cages<br>• Advantages: easy identification of sick birds, easy management, protection from predators, easy egg | - Explanation<br>- Lecture<br>- Demonstration | - Listens attentively<br>- Takes notes<br>- Observes diagrams on Pages 11-14<br>- Compares different systems<br>- Lists advantages and disadvantages of each system |

| | | | | |
|---|---|---|---|---|
| | | collection<br>• Disadvantages: expensive, no exercise, much attention needed<br>**4. Fold system/pen system** (Page 14): birds kept in small movable structure<br>• Advantages: manure easily collected, disease control easy, reduced parasites<br>• Disadvantages: expensive, few birds kept, tiring to move<br>- Shows diagrams on Pages 11-14<br>- Explains uses of items in poultry house: water trough, feed trough | | |
| 10 mins | **ELABORATE** | - Shows pictures and asks learners to identify the system<br>- Asks: "Why do most poultry farmers in rural areas use free range system?" (Evaluation 1.3, Page 13)<br>- Guides learners to complete Evaluation activity 1.3 questions 1-6 (Page 13)<br>- Helps learners answer questions about the diagram on Page 13 | - Question and answer<br>- Guided practice<br>- Diagram interpretation | - Identifies systems from pictures<br>- Answers: because it is cheap<br>- Completes Evaluation questions with guidance<br>- Answers questions about the diagram |
| 5 mins | **EVALUATE** | - Asks oral questions:<br>• Name four systems of keeping poultry<br>• Give one advantage of battery cage system<br>• Why is free range system common in villages?<br>- Gives class work from the source material | - Oral questioning<br>- Written exercise | - Answers oral questions<br>- Writes class work in books |
| 5 mins | **EXTEND** | - Asks learners to observe poultry houses in their community and identify the system used<br>- Tells learners to read about poultry housing and feeding on Pages 14-18 | - Giving assignment<br>- Setting homework | - Listens to home assignment<br>- Prepares to observe poultry houses |

**CLASS WORK:**

*From Evaluation activity 1.3 (Page 13)*

1. State any two factors that a poultry farmer should consider when choosing a system he/she should use to keep poultry.
2. Why do most poultry farmers in rural areas use free range system of keeping poultry?
3. Apart from free range system, name any two other systems used by poultry farmers in your community.
4. Give any two disadvantages of keeping poultry in free range system.
5. Name the system of keeping poultry commonly practiced by poultry farmers in town.
6. Give any one way in which litter is important in a poultry house.

**LESSON EVALUATION**

| STRENGTHS: | AREAS WHICH NEED IMPROVEMENT: | WAY FORWARD: |
|---|---|---|
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |

**LESSON 4: KEEPING POULTRY - HOUSING AND FEEDING**

| DATE | CLASS | SUBJECT / L. AREA | NO. OF CHILDREN | TIME |
|---|---|---|---|---|
| | Primary Five | Integrated Science | | 60 Minutes |

| THEME | TOPIC | CONTENT |
|---|---|---|
| Science in Human Activities and Occupations | Keeping Poultry and Bees | Poultry Housing and Feeding |

**COMPETENCES:**

- **Cognitive Competence:** Learners explain the qualities of a good poultry house and the importance of proper feeding.
- **Affective Competence:** Learners appreciate the need for proper housing and balanced nutrition for poultry health.
- **Psychomotor Competence:** Learners identify different types of poultry feeds and feeding equipment.
- **Language Competence:** Learners correctly use terms such as coop, mash, layers mash, broilers mash, calcium, and grit.

---

**TEACHING METHODS/TECHNIQUES:**

- Explanation

- Demonstration
- Question and answer
- Discussion
- Observation
- Group work
- Diagram interpretation

---

**LEARNING OUTCOMES:**

By the end of this lesson, learners should be able to:

1. State the qualities of a good poultry house.
2. Explain the importance of proper feeding.
3. Identify different types of poultry mash for different ages.
4. Explain the importance of calcium and grit in poultry diet.
