PAPER ONE

SECTION A: 40 MARKS
Questions 1 to 40 carry one mark each.

1. Why is a razor blade considered to be matter?

2. Which part of a flower receives pollen grains during pollination?

3. Name the instrument used to measure the human body temperature.

4. State one common use of wind to people.

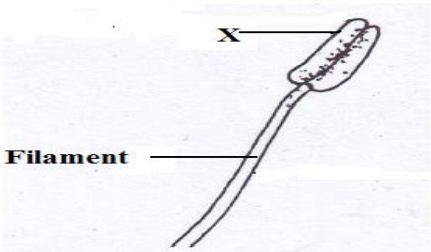

5. Why are female anopheles mosquitoes very dangerous to human beings?

6. Name the germ that causes new castle disease in poultry.

7. Why are worker bees usually seen around flowers?

8. What term is used referring to a person who has got an accident?

Use the diagram below to answer questions 9 and 10.

9. Name the part of the flower marked with letter X.

10. What name is given to the above part of the flower?

11. Which component of air which is the least of all?

12. Mention one disease spread by a house fly

13. What is the role of the drone bee in a hive?

14. Suggest one importance of farm records to a poultry farmer.

15. Give one example of a floating object?

16. In which part of the alimentary canal does digestion of food end?

17. Which type of immunity do children get through immunization?

18. Which term describes plants which bear flowers?

19. State the difference between poultry and poultry keeping

20. Write O.R.S in full.

21. Which type of chicken is kept for eggs production?

22. Give one advantage of exotic breads of poultry have over the local one.

23. Apart from the sun give other source of heat energy.

24. Which component of air supports burning?

25. In which type of combs does the queen bee lay the eggs?

26. Why is it advisable to wash hands after visiting a latrine?

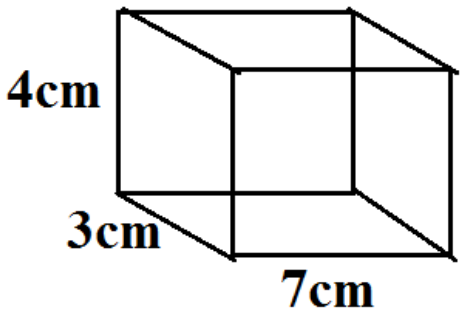

27. Point out one commercial system used by poutry farmers.

28. Mention one example of a natural fertilizer.

29. Which type of soil is the best for crop growing?

30. Identify one product we get from honey bees besides honey..

31. Find the volume of the cubiod below.

32. How do plants benefits from bearing brightly coloured petals?

33. Give one reason why it's important to give first aid to accident victims.

34. Mention one activity that can be done at home to promote proper sanitation.

35. What name is given to the foods that give energy to our body.

36. Identify the breed of poultry recommended for commercial purposes.

37. Mention any one example of litter found in a poultry house

38. Write down one characteristic of chemical changes.

39. Name the vaccine given to babies at 9 months.

40. How can poultry farmers control egg eating on their farms?

__SECTION B: 60 MARKS

Questions 41 to 55 carry four marks each.

41a) Mention the form of energy which causes rise in temperature.

_____

b) Give two uses of the form of energy you have mentioned in (a) above.

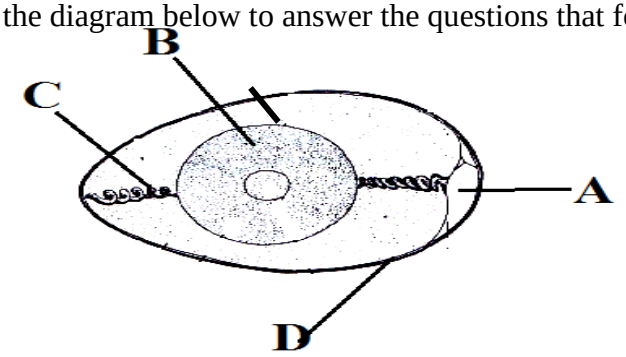

i) _____

ii) _____

c) Which form of energy is possessed by a book put on a table?

i) _____ ii)_____

42. Use the diagram below to answer the questions that follow.

a) Name the parts labeled with the following letters.

i) A_____ ii) C_____

b) Which part of an egg develop into a chick after fertilization?

_____

c) What is the main function of part labeled with letter D?

_____

43a) What is mulching?

_____

b) Give one examples of mulches.

i) _____ ii)_____

c) Mention two reason why farmers mulch their garden.

_____

44a) What is dehydration?

i) _____

ii) _____

b) Identify any two signs of a dehydrated person.

i) _____ _____

ii) _____

c) Give any one cause of dehydration in infants.

_____

45a) Write “Hib” in full as used about immunization diseases.

_____

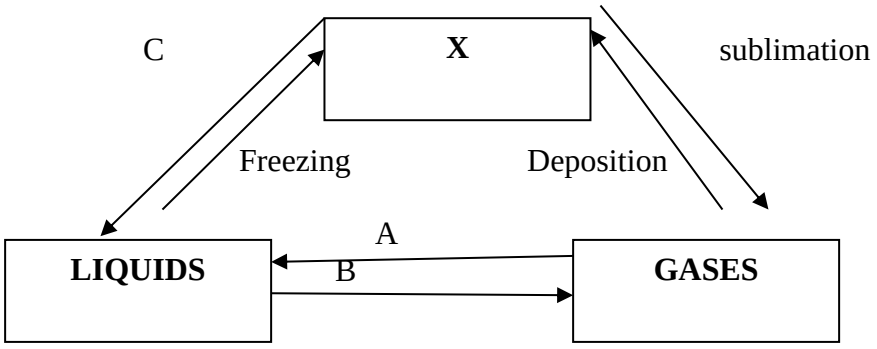

b) Identify two vaccines given to babies at birth.

i) _____ ii)_____

c) Which immunizable disease has the following signs and symptoms?
swollen neck, sore throat, and difficult breathing.

_____

46. Use the diagram illustrated below to answer questions that follow.

a) Which state of matter is represented by letter X?

_____

b) Mention the processes represented by the following letters

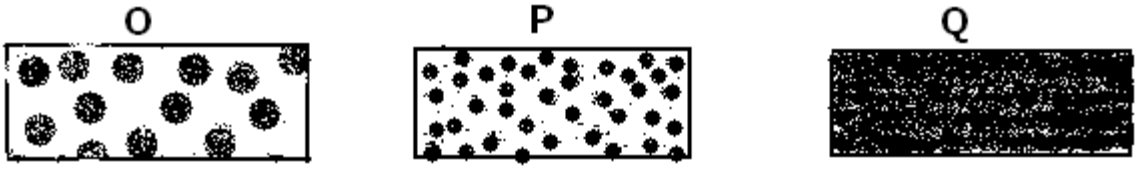

i) A_____

iii) C_____

c) Suggest one importance of physical changes to people.

_____

47.a) Identify the states of matter represented in the diagrams below.

P_____

Q_____

b) Mention the state of matter which has closely packed molecules.

_____

48a) Define the term soil erosion.

_____

b) Mention any two agents of soil erosion.

i) _____ ii)_____

c) Identify any one type of soil erosion.

_____

49a) Why is it advisable to immunize all the children below the age of five years?

_____

b) Mention the vaccines for the following diseases.

i) Tuberculosis_____

iii) Polio_____

c) At what age is measles vaccine administered to infants?

_____

50. Match the following disease vectors in A to their diseases in B.

	A	B
i)	Culex mosquito	Trachoma
ii)	Infected dog	Biliharziasis
iii)	House fly	elephantiasis
iv)	Water snail	malaria.

i) Culex mosquito _____

ii) Infected dog _____

iii) House fly _____

iv) Water snail _____

51. What do you understand by the term soil profile?

_____

b) Which layer of soil supports plant life?

_____

c) Give a reason for your answer in (b) above

_____

d) Suggest one way of conserving soil.

_____

52a) Outline two activities people do to control the spread of diseases in a home

.i) _____

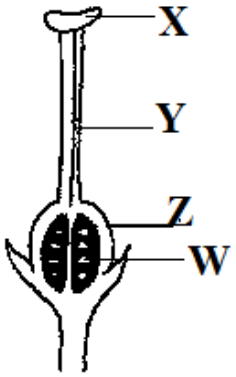

ii) _____

b) Apart from malaria, give two other diseases spread by mosquitoes

i) _____

ii) _____

53. Use the diagram below to answer the given questions.

a) Which part of the flower is drawn above?

_____

b) Name the part labeled with the letter Z.

Z_____

c) What does part W develop into after fertilization?

_____

d) State the function of part marked with letter Y

_____

54a) Give any one reason why people eat food.

_____

b) How do people depend on green vegetation in our environment?

_____

c) Name the food value we get from the following foods.

i) Rice_____

ii) Beans_____

55a) what is the main use of saliva in the mouth?

_____

b) In which part of the alimentary canal do we find the hydrochloric acid?

_____

c) Mention two importance of roughages in our diet.

i) _____

ii) _____

PAPER TWO

SECTION A (40 marks)

1. Give one source of proteins.

   _____

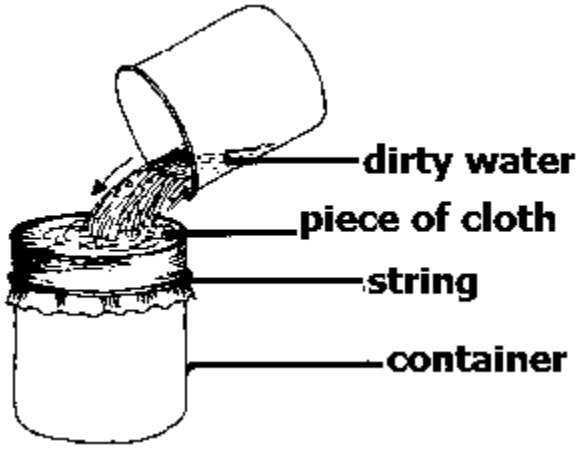

2. How are gills important to a mushroom?

   _____

3. In which part of a flower are ovules found?

   _____

Below is a process commonly carried out in our homes. Use it to answer questions 4 and 5.

4. Name the process shown in the diagram above.

   _____

5. How is the process useful in a home?

   _____

6. Give one example of a solute used to make ORS.

   _____

7. Which part of a bean plant contains nitrogen fixing bacteria?

   _____

8. State the danger of eating with unwashed hands.

   _____

9. Give one factor that may make an egg of a chicken fail to hatch.

   _____

10. Why do crop farmers mulch crop gardens?

    _____

11. What attracts houseflies to food?

_____

12. State the danger of leaving pigs to roam without proper housing.

_____

Use the diagram below to answer questions 13 and 14.

13. Name the type of tooth shown in the diagram above.

_____

14. How is the tooth important in human beings?

_____

15. Seeds are usually planted in the soil. Where do they get oxygen necessary for germination?

_____

16. State the danger of settling in swamps.

_____

17. Why does an ice block float on water?

_____

18. Give one use of water in a home.

_____

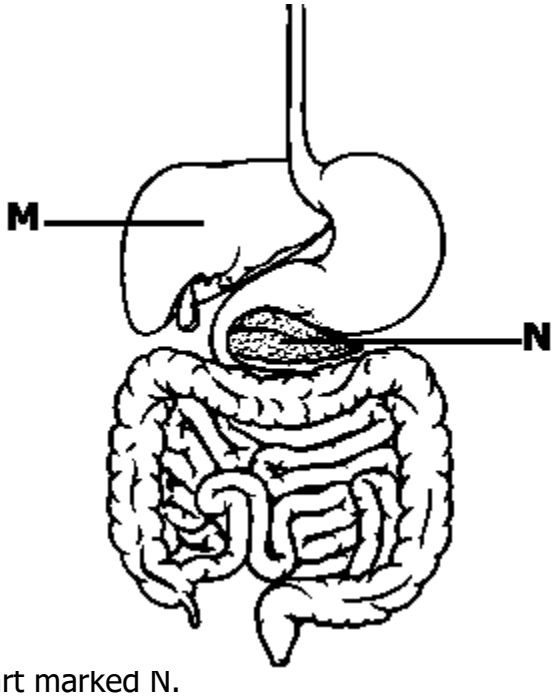

19. Name one animal that moves by flying.

_____

20. How do engineers prevent wires to break in cold conditions?

_____

Below is a part of the alimentary canal. Use it to answer questions 21 and 22.

21. Name the part marked N.

_____

22. How is part marked M important in the digestive system?

_____

23. What are heat insulators?

_____

24. State one danger of the sun in the environment.

_____

25. How is soil important to termites?

_____

26. Give one grain storage facility in our homes.

_____

27. State one reason why most goat farmers prefer to use the paddock system of grazing.

_____

28. What is temperature?

_____

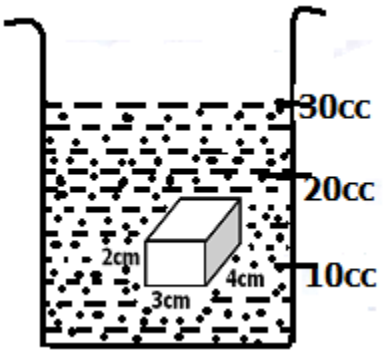

29. Which part of a house lets in cool air?

_____

30. Write the class of food suitable for steaming up a sow.

_____

Study the experiment below and answer questions 31 and 32.

31. Which method of finding volume of objects was used in the above experiment?

_____

32. Why are farmers encouraged to spray their livestock with acaricides?

_____

33. What energy do plants need to make food?

_____34.

Why is milk very important in the fight against kwashiorkor?

_____

35. Name a suitable garden tool for weeding.

_____

36. Write one physical characteristic of an insect.

_____

37. Mention one function of roots on a plant.

_____

38. How can you recover salt from a salt solution?

_____

39. What role is played by the cotyledon in a bean seed?

_____

40. Mention one method of preserving food.

_____

Section B (60 marks)

41(a) Apart from Tuberculosis, mention one immunisable disease in infants.

_____

(b) What vaccine is used to immunize children against Tuberculosis.

_____

(c) Give one way vaccines are administered into a human body.

(d) What type of immunity does the body develop when vaccines are administered?

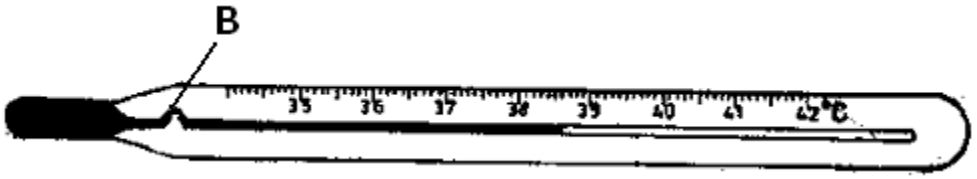

42(a) Give one member of an extended family who is not a member of a nuclear family.

(b) How can lame people be helped in movement?

(c) Mention one advantage of breast-feeding to a baby.

(d) State one situation where bottle-feeding is recommended over breast-feeding.

43. **Study the diagram and use it to answer the questions that follow.**

(a) Name the instrument shown in the diagram above.

(b) Give the importance of the above instrument in health centre.

(c) Why is mercury preferred in the above instrument to alcohol?

(d) How is part marked B important when using the machine?

44(a) Name one fibre goat from keeping sheep.

(b) Mention the tool used to remove the fibre mentioned in (a) above from a sheep's body.

(c) How can mating in sheep be made easier?

(d) Point out one disease among sheep.

45(a) Give one example of a physical change in our environment.

_____

(b) What is a biological change?

_____

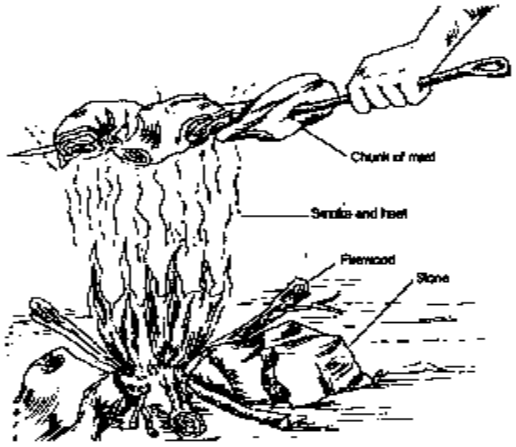

(c) What type of change takes place when a dead animal rots to form humus?

_____

(d) Name one type of organisms in our environment that cause rotting.

_____

46. **The diagram below shows a man preparing meat over fire. Use it to answer the questions that follow.**

(a) Name the way of preparing food shown in the diagram above.

_____

(b) Which form of energy is being used to prepare the food?

_____

(c) How does the form of energy mentioned in (b) above reach the meat?

_____

(d) What role doe the firewood play in the above process?

_____

47(a) Give one example of a dicotyledonous seed.

_____

(b) How is the function of a cotyledon in monocotyledonous seeds different from that in dicotyledonous seeds?

_____

(c) Point out one thing that passes through the micropyle during germination.

_____

(d) Mention one way non-flowering plants reproduce.

_____

48(a) Match correctly:

Type of soil	**Use**
Clay soil	mixed with cement for building
Sand soil	crop growing
Loam soil	make bricks

(i) clay soil_____

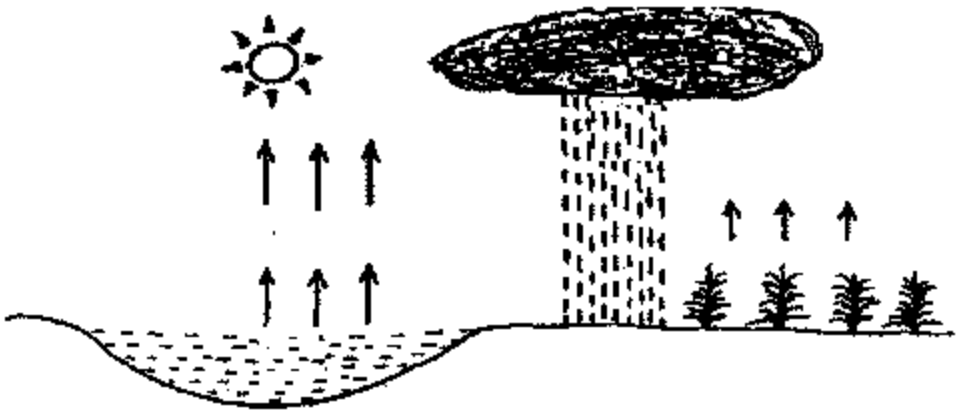

(ii) sand soil_____

(iii) loam soil_____

(b) Why should chicken droppings be poured into the garden?

_____

49. **The diagram shows one of the natural changes in the environment. Use it to answer the questions that follow.**

(a) Name the natural process shown in the diagram above.

_____

(b) Use letter W to mark any point where condensation takes places.

(c) How are the plants important in the above process?

_____

(d) Mention one way man benefits from the above process.

_____

50(a) What do the following animals mainly feed on?

(i) goats

_____

(ii) dog

_____

(b) Which breathing organs do the following animals use?

(i) tilapia

_____

(ii) cow

_____

51(a) Name the type of chicken kept for meat production.

_____

(b) Why do farmers include shells in the feeds of layers?

_____

(c) Mention one vice among poultry.

_____

(d) Give one way farmers benefit from keeping poultry under the free-range system.

_____

52(a) What is soil erosion?

_____

(b) Mention one cause of soil erosion.

_____

(c) State one effect of soil erosion to the soil?

_____

(d) How do farmers on mountainous areas control soil erosion?

_____

53(a) What type of bees is responsible for mating with the queen bee?

_____

(b) Give one product people get from keeping bees.

_____

(c) Mention any one cause of swarming in bees.

_____

(d) Mention one reason why bee keepers prefer using a modern beehive.

_____

54(a) What are stem tubers?

_____

(b) State one importance of stem tubers to a plant?

_____

(c) Mention one crop with root tubers.

_____

(d) Give one pest that affects root tubers.

_____

55(a) Mention one property of air.

_____

(b) Name the gas plants use to make starch during photosynthesis.

_____

(c) Name one process in nature that needs oxygen to take place.

_____

(d) What name is given to moving air?

_____

PAPER THREE

SECTION A (40 MARKS)

1. Which type of bee develop from unfertilized egg?

_____

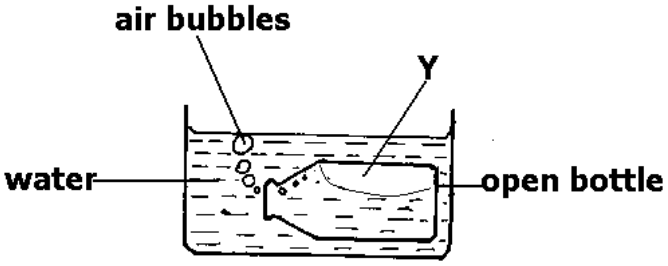

2. State one way a farmer can improve on soil fertility.

_____

3. How do poultry farmers who keep layer under deep litter system prevent eggs from breaking during laying?

_____

The illustration below shows a property of air.

4. What property of air does the experiment above show?

_____

5. In which way are the kidneys useful to a P.5 pupil?

_____

6. Why is coffee plant called a perennial crop?

_____

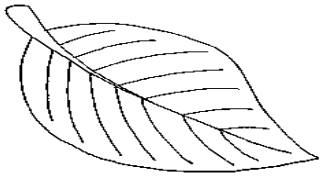

7. Give one example of a traditional bee hive.

_____

8. How is sunshine as an element of weather important to crop farmers?

_____

The diagram below shows a part of a plant. Use it to answer questions 9.

9. State the main function of the above part to a plant.

_____

10. Give one importance of brushing the teeth after every meal.

11. Why does paraffin float on water?

12. What are non-communicable diseases?

13. Why isn't a mushroom grouped under plants?

14. How can we protect ourselves from mosquito bites at night?

15. Give one way of caring for garden tools.

16. Write UNEPI in full.

17. Why does an earthworm come out of the soil when it has rained?

18. State one importance of records to a poultry farmer.

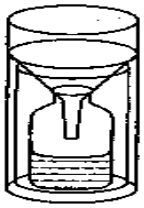

19. Mr. Kamonde's home lacks a latrine and rubbish pit or dustbin. Mention any one disease his family is likely to suffer from due to lack of the above elements of sanitation.

20. Give one way of caring for rabbits.

21. Name the class of food which is digested in the stomach.

22. Which type of soil is used to scrub utensils like saucepans?

23. Which element of weather is measured using the weather instrument below?

_ _____

24. Mention one block of food path besides pest and diseases.

_____

25. How is the brain an important organ in the human body?

_____

26. State the difference between a vector and a germ.

_____

_____

27. Give one cause of swarming in bees.

_____

28. Why is the BCG vaccine administered to babies at birth?

_____

29. A farmer was told to supply an hotel with eggs everyday. Which type of chicken would you advise him to rear?

_____

30. How is the tooth below useful to people?

_____

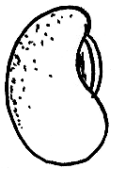

31. Name the domestic animal which provided us with security.

_____

32. Mention one activity you can engage in to promote cleanliness at your home.

_____

The diagram below shows a seed. Use it to answer the questions that follow.

33. How is part X important to the seed?

_____

34. Name the main source of heat and light on earth.

_____

35. Why does a piece of stone thrown in space fall back to the ground?

_____

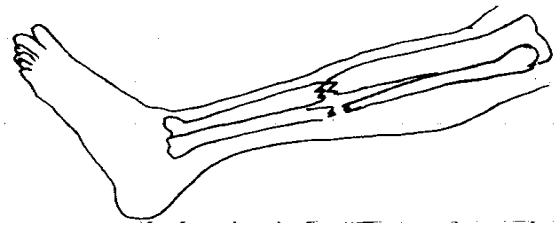

36. Give one danger of strong wind.

_____

37. What type of immunity does a baby acquire through breast feeding?

_____

A boy fell from a tree and got an accident as shown below.

38. Name the accident the boy got.

_____

39. Give one reason why the boy should be given first aid.

_____

40. Mention one method of soil formation.

_____

SECTION B (60 MARKS)

41. a) What do we call the study of living and non-living things?

_____

b) Identify the characteristic of living things that enables a goat to;

i) increase in size _____

ii) take oxygen into the body _____

c) Why is a house regarded as a non – living thing?

_____

42. a) Give two characteristics of insects.

i) _____

ii) _____

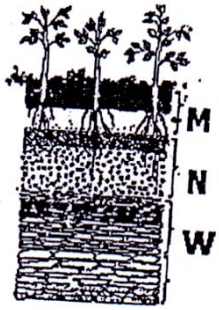

b) Why are mosquitoes called solitary insects?

_____

c) Give one danger of insects to people.

_____

43. ***Use the diagram below to answer the questions that follow.***

a) What term is used to describe the above arrangement of soil layers?

_____

b) Name the layers marked M and W.

i) M_____ ii) W_____

c) Why is layer marked N not good for crop growing?

_____

44. a) What are non-flowering plants?

_____

_____

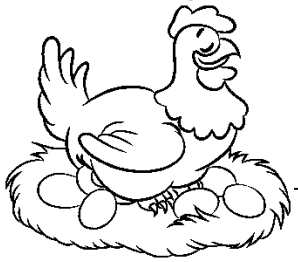

b) Give two examples of non-flowering plants.

i) _____ ii) _____

c) Give one importance of plants to people.

_____

45. a) The diagram below shows a type of incubation. Name it.

_____

b) Besides the above type of incubation, name one other type of incubation.

_____

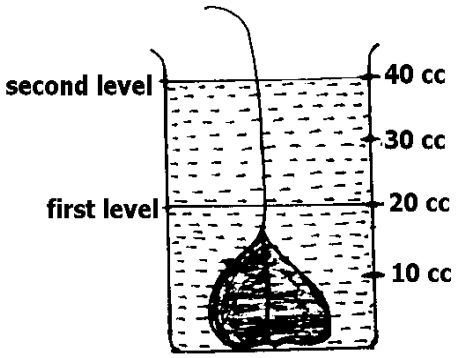

c) Mention any one requirement needed by eggs during incubation.

_____

d) Give a reason why some of the above eggs may fail to hatch even after incubation.

_____

46. ***The diagram below shows a method of finding volume. Use it to answer the questions that follow.***

a) Name the method above.

_____

b) How much water was in the measuring cylinder before the stone was lowered in it?

_____

c) Calculate the volume of the above stone.
(2mks)

47. a) Give two examples of root crops.

i) _____ ii) _____

b) State two ways a farmer can care for root crops.

i) _____

ii) _____

48. a) What is a balanced diet?

_____

_____

b) What do we call a group of diseases people get due to lack of some food values in the body?

_____

c) Give one example of the diseases you have mentioned in (b) above.

_____

d) What class of food provides energy to the body?

_____

49. a) Crop pests are living organisms that destroy people's crops. Give two examples of pests that destroy crops in the garden

i) _____ ii) _____

b) Mention any two ways of controlling crop pests in the garden.

i) _____

ii) _____

50. a) What do we call a family consisting of parents and their biological children?

_____

b) Mention any two roles of children at home.

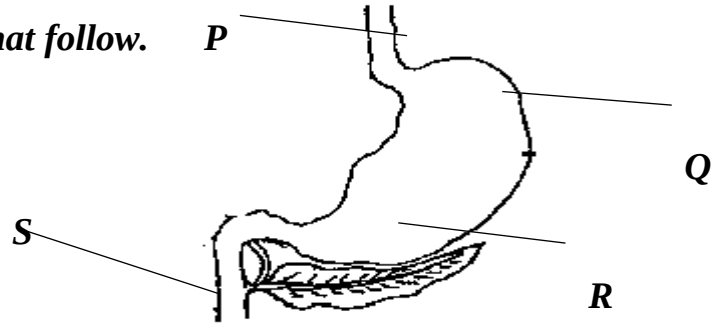

i) _____

ii) _____

c) Why is it not good for children to accept lifts from strangers?

_____

51. ***The diagram below shows part of the alimentary canal. Use it to answer the questions that follow.***

a) Name the organ marked R.

_____

b) By what process does food move through part P?

_____

c) Name the class of food that is first digested in part marked S.

_____

d) Mention any one disease that affects the alimentary canal.

_____

52. a) In which way are germs dangerous to people?

_____

b) Mention any two types of germs.

i) _____ ii) _____

c) How can we kill germs in water meant for drinking?

_____

53. ***Match the item in A to those in B correctly.***

A	**B**			
Mass	metre	i)	Mass	_____
Volume	gramme	ii)	Volume	_____
Weight	cubic units	iii)	Weight	_____
Length	Newtons	iv)	Length	_____

54. a) What condition is caused by severe diarrhoea and severe vomiting?

_____

b) How can the above condition be controlled?

_____

c) Write O.R.S in full.

_____

d) Name the solute in O.R.S that provides energy to the patient.

_____

55. a) Give one reason why infants should be immunised.

_____

b) Identify any two examples of childhood immunisable diseases.

i) _____ ii) _____

c) Which immunisable disease causes lameness sin children?

_____

PAPER FOUR

1. In which state of matter are molecules closely packed together?

_____

2. Which farm practice is carried out to remove unproductive birds in poultry?

_____

3. Why is it dangerous to have stagnant water near our homes?

_____

4. Write any one element of P.H.C.

_____

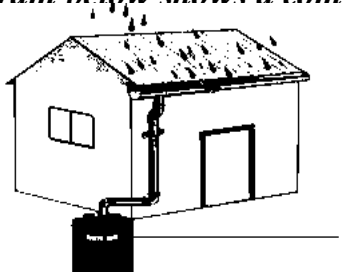

5. How can a P.5 pupil care for his or her hair?

_____

6. In which way is transpiration an important process to plants?

_____

The diagram below shows a common equipment used at home. Use it to answer questions 7 and 8.

K

7. Name the source of water which is collected at K.

_____

8. Give one importance of the water collected at part K.

_____

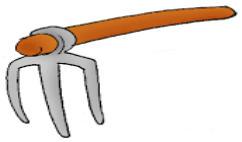

9. State one danger of pollution in the environment.

_____

10. A stone with mass of 20g and density of 5g/cc was dropped in a measuring cylinder. How much water did it displace?

_____

11. Name the garden tool drawn below.

__ _____

12. Why is hydrocholic acid produced in the stomach during digestion?

_____

13. Kakai was bitten by a poisonous snake on her way to school. State the main reason why she should be given first aid.

_____

14. Why should children be given enough foods rich in proteins?

_____

15. State one way animals depend on plants in the environment.

_____

16. How is polio vaccine administered to babies?

_____

17. Mention any one activity carried out on a school compound to control soil erosion.

_____

18. State one factor a farmer should consider before starting up a rabbit keeping project.

_____

19. Why are windows left open during day time on a living house ?

_____

_____

20. How is cassava preserved?

_____

21. Convert 20^0C to ^{0}F.

_____

22. Besides using a child health card, how else can a health worker identify if a child has been Immunized against Tuberculosis?

_____

_____

23. Mention any one human activity that destroys the environment.

_____

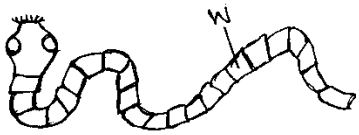

24. In which way is soil important to an earth worm?

_____

25. What is formed when light is blocked by an opaque object?

_____

Below is a diagram of an intestinal worm.

26. How does the above worm get into the human body?

_____

27. Name the poultry disease that also attacks human lungs.

_____

28. Why does a stone usually sink when dropped in water?

_____

29. What method of heat transfer enables us to iron our clothes?

_____

30. State the function of the gills of a mushroom.

_____

31. Name the gas given off by plants during photosynthesis.

_____

32. How do bees benefit from flowering plants growing around them?

_____

33. In which way are quill feathers useful to an eagle?

_____

34. Why is a goat called a domestic animal?

_____

35. How does boiling of drinking water prevent typhoid?

_____

36. Name one material used to build permanent houses.

_____

37. Why are clothes usually put under sunshine after washing?

_____

38. Identify any one food that is eaten without cooking.

_____

39. Which component of a clean home is used to spread utensils to dry after washing?

_____

40. Name the body organ used for seeing.

_____

SECTION B (60 MARKS)

41. a) What are weeds?

_____

_____

b) Name the garden tool used to remove weeds from the garden.

_____

c) Besides weeding, mention any two other ways of caring for crops in the garden.

i) _____

ii) _____

42. a) Which term is used to mean the surrounding in which we live?

_____

b) What group of living organisms in our surrounding make their own food?

_____

c) Name one water animal that provides us with proteins.

_____

d) Give one reason why animals move from place to place.

_____

43. What are biological changes?

_____

_____

a) Give any one characteristic of biological changes.

_____

b) How is rusting similar to burning?

_____

c) Mention one example of a chemical change in the environment.

_____

44. a) Why are chicken called poultry?

_____

b) Apart from chicken, name two other types of poultry.

i) _____ ii) _____

c) State one way of caring for chicken at home.

_____

45. a) Food is anything good to eat or drink. Give two reasons why we eat food.

i) _____

ii) _____

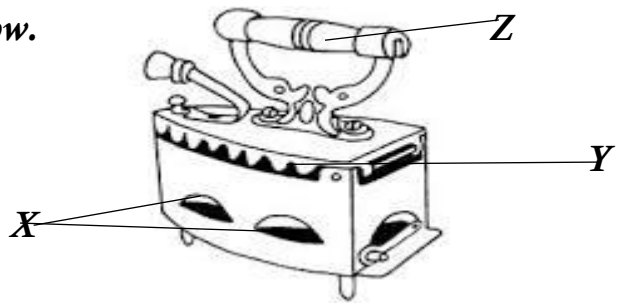

b) Write one of the 3G's in full.

_____

c) How can Marasmus be prevented in children?

_____

46. ***The diagram below is of a common equipment used at home. Use it to answer the questions that follow.***

a) State the use of the above equipment at home.

_____

b) What is the best material for making part Z?

_____

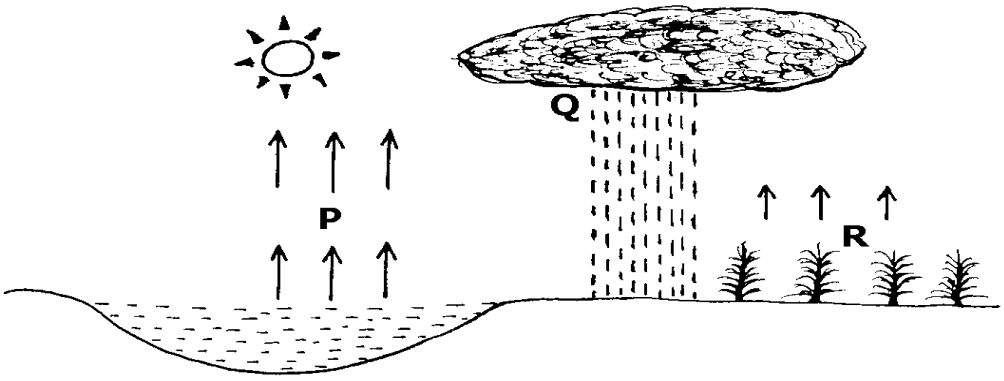

c) How are holes marked X useful in the above equipment?

_____

d) Why is silver not commonly used to make equipment like the above yet it is the best conductor if heat?

_____

47. ***The illustration below shows the water cycle. Use it to answer the questions that follow.***

a) Identify the process marked P above.

_____

b) Which method of heat transfer is represented by arrows marked R?

_____

c) Which plant process helps in the rain cycle?

_____

d) By what process are the clouds formed at Q?

_____

48. a) What is air?

_____

b) Identify the component of air used for;

i) respiration _____

ii) preservation of soft drinks _____

iii) putting out fire _____

49. a) What do we call a collection of first aid materials?

_____

b) Give two examples of materials used to give first aid.

i) _____

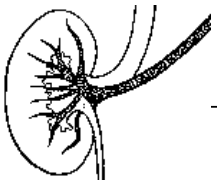

ii) _____

c) Why is it dangerous to play on the road?

_____

50. a) **State the importance of each of the following organs drawn below.**

i)  _____

ii)  _____

iii)  _____

b) Which part of a fish has the same function as the organ in (i)?

_____

51. a) What are irregular objects?

_____

_____

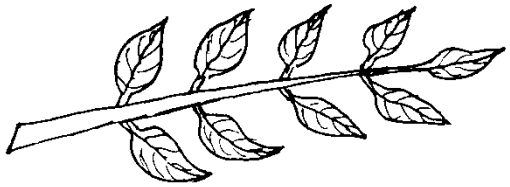

b) Give two examples of irregular objects.

i) _____ ii) _____

c) We can't find the length, width and height of irregular objects. What is the best method for finding their volume?

_____

52. a) Name the types of leaves drawn below.

b) Give two uses of leaves to people.

i) _____

ii) _____

53. Match the garden tool to their functions.

A	***B***
rake	for turning manure
secateur	for collecting weeds
trowel	for transplanting seedlings
garden fork	for pruning

i) rake _____

ii) secateur _____

iii) trowel _____

iv) garden fork _____

54. a) What is soil exhaustion?

_____

_____

b) Mention any two causes of soil exhaustion.

i) _____

ii) _____

c) How does mulching control soil exhaustion?

_____

55. Complete the table below correctly.

Disease	*vaccine*	*site*
Polio	Polio vaccine	
_____		
Hepatitis B	_____	Left upper thigh
_____	BCG vaccine	Right upper arm
Measles	_____	Left upper arm

PAPER FIVE

Section A

1. Give one use of feathers to a bird.

   _____

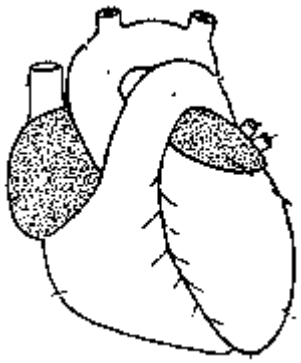

2. Why is it important to wash a toothbrush after use?

   _____

3. State the cause kwashiorkor.

   _____

Study the diagram and answer questions 4 and 5.

4. Name the organ shown in the diagram.

   _____

5. Mention the function of the organ above in our bodies.

   _____

6. Give one way of controlling mosquitoes at the larva stage.

   _____

7. Which gas does a germinating seed need?

   _____

8. Mention one animal that poisons people when it is defending itself.

   _____

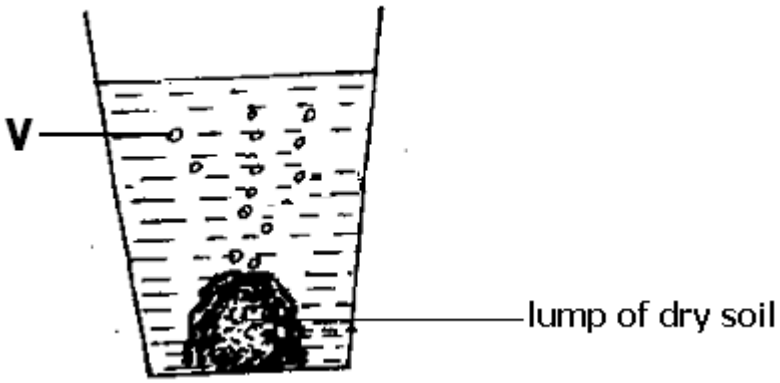

9. Why is the use of polythene bags as toilets discouraged?

   _____

10. How are gills of a fish similar to spiracles of an insect?

    _____

Study the experiment below and answer question 10 and 11.

10. Name part marked V.

_____

11. What does the experiment prove about soil?

_____

12. State one way a family can promote good health care among its members.

_____

13. Mention one way HIV is spread among people.

_____

14. What are transparent objects?

_____

15. In which part of the alimentary canal of a bird is food crushed into smaller particles?

_____

16. What happens to ice when it is placed in a hot saucepan?

_____

17. Which form of energy enables us to see?

_____

18. In which facility are chicks below two weeks kept?

_____

19. State one way of promoting the cleanliness of our bodies.

_____

20 State one danger of living in a dirty environment.

_____

21 Name one exotic breed of rabbits.

_____

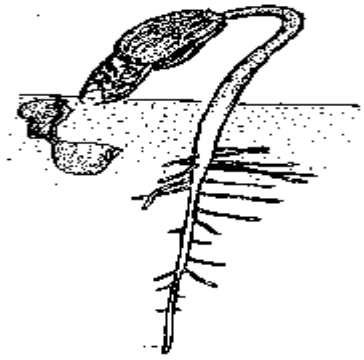

22. Give one way of controlling rats in our homes.

_____

23. What is a weed?

_____

Below is a germinating seed. Use it to answer questions 24 and 25.

24. What type germination does the above seed undergo?

_____

25. Name the root system the seedling will develop after germination?

_____

26. Why are people encourage to take children under five years of age for immunization?

_____

27. Give one practice that can improve food production in villages.

_____

28. What is pollination?

_____

29. Name one item used for the disposal of waste materials in a home.

_____

30. Name the parasite commonly found on bodies of dirty people.

_____

31. How do animals benefit from plants during photosynthesis?

_____

32. Give one example of a vegetable crop.

_____

Given the following list: **housefly, stone, rabbit and plant.**

33. Which item in the above list is different from others?

_____

34. Give a reason for your answer in (33) above.

_____

35. How is a tsetse fly dangerous to our health?

_____

36. What injury is caused by hot milk?

_____

37. State one danger of eating sweets and cakes regularly.

_____

38. Give one importance of leaves to a plant.

_____

39. What is a pen in poultry keeping?

_____

40. Give one importance of a school garden.

_____

Section B

41(a) What is poultry?

_____

(b) What type of chicken do farmers keep for the following purpose?

(i) producing eggs and meat

_____

(ii) producing eggs

_____

(c) Mention one exotic breed of chicken.

_____

42(a) Give one use of water in a community.

_____

(b) State two ways water sources can be contaminated by people.

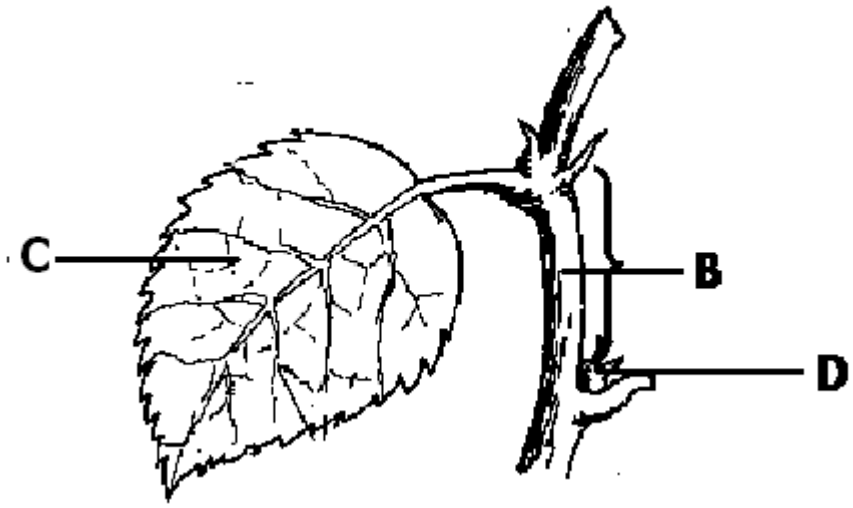

(i) _____

(ii) _____

(c) Mention one way water can be made safe for drinking.

_____

43. **Below is a diagram of a part of a plant. Use it to answer the questions that follow.**

(a) Name part Marked B.

_____

(b) How is part B useful to a plant.

_____

(c) Why is it important for part C to remain green?

_____

(d) Mention one part of a plant that can develop from part D.

_____

44(a) Which type of worms can be prevented through the following:

(i) wearing shoes

_____

(ii) eating well cooked meat

_____

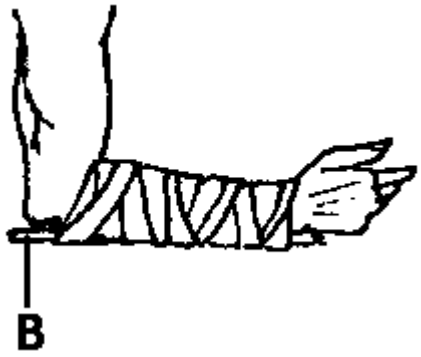

(b) State one way worms affect human health.

_____

(c) Apart from wearing shoes and cooking meat properly, give one other way of preventing worm infestation.

_____

45. **Study the diagram below and answer the questions that follow.**

(a) What type of injury is shown above?

_____

(b) Mention one possible cause of the above injury.

_____

(c) How is the structure marked B important while giving first aid to a casualty affected with such an injury?

_____

(d) State one way the above injury can be prevented.

_____

46(a) What is the main source of light energy?

_____

(b) Name the body organ that responds to sound energy.

_____

(c) How is electricity dangerous to the users?

_____

(d) State one way wind is useful to a crop farmer.

_____

47(a) What is soil erosion?

_____

(b) Name the layer of soil mostly affected by erosion.

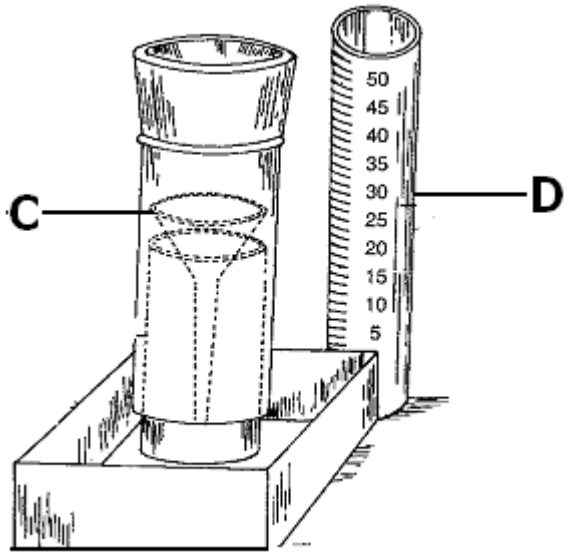

_____

(c) Mention two ways of controlling soil erosion.

(i) _____

(ii) _____

48. **Study the diagram and answer the questions about it.**

(a) Name the instrument shown in the above diagram.

_____

(b) What element of weather is measured by the above instrument?

:_____

(c) Name part C of the instrument.

_____

(d) How is part D important when using the instrument?

_____

49(a) What is mulching?

_____

(b) State one importance of crop rotation in crop growing.

_____

(c) Mention one way farmers can ensure proper spacing of crops in the garden.

_____

(d) Give one use of a wheelbarrow on a crop farm.

_____

50(a) Why to farmers harvest cereal crops in the dry season?

_____

(b) State one method farmers use to preserve harvested crops.

_____

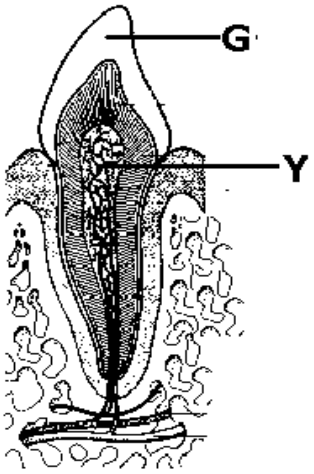

(c) Name one storage facility for cereal crops.

_____

(d) Name one pest that destroys crops under storage.

_____

51. **The diagram shows a human tooth. Use it to answer the questions that follow.**

(a) Name the type of tooth shown in the diagram.

_____

(b) How is the tooth above important during food digestion?

_____

(c) What mineral is necessary for proper development of part marked G?

_____

(d) Name part marked Y?

_____

52(a) Mention one advantage of using free- range system of poultry keeping.

_____

(b) How is battery cage system a disadvantage?

_____

(c) State one cause of egg eating in layers.

_____

(d) Suggest one way of controlling vices in poultry.

_____

53(a) State one cause of dehydration in human bodies.

_____

(b) Give one effect of dehydration of a human body.

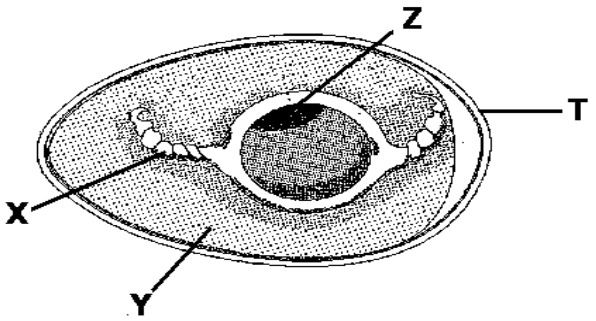

_____

(c) Name any two things needed in making ORS.

(i) _____

(ii) _____

54. **The diagram below is of an egg. Use it to answer the questions that follow.**

(a) Why wouldn't it be necessary to incubate an unfertilized egg?

_____

(b) Name part marked T.

_____

(c) How is part X important in the egg?

_____

(d) Give one thing that a fertilized egg needs to hatch into a chick.

_____

55(a) Give one example of a mineral salt needed in a human body.

_____

(b) Mention one importance of vitamins in our bodies.

_____

(c) Why do children under five years need a lot of proteins?

_____

(d) What class of food gives our bodies energy?

_____

PAPER SIX

1. Which body organ is protected by the skull?

   _____

2. Suggest one way malaria cab be controlled at school.

   _____

3. How does painting prevent rusting of metals?

   _____

4. Identify one external parasite in chicken.

   _____

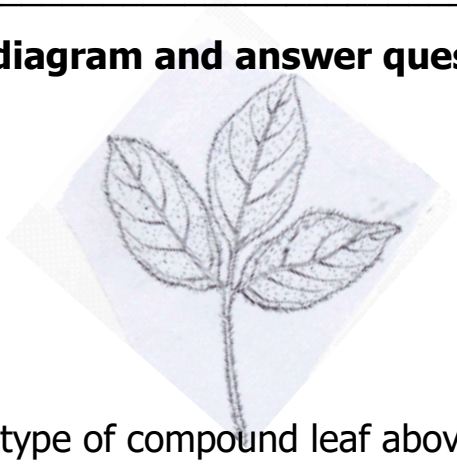

5. Suggest one way tape worms enter our bodies.

   _____

6. Why does a bed bug produce a bad smell when touched?

   _____

Study the diagram and answer questions.

7. Identify the type of compound leaf above.

   _____

8. Which type of venation does the above leaf have?

   _____

9. Why is it important to brush our teeth regularly?

   _____

10. Mention one use of clay to man.

    _____

11. Which deficiency disease is caused due to lack of proteins in the body?

    _____

12. How is a clinical thermometer important to a patient?

    _____

13. State one body organ protected by the rib-cage.

_____

14. How are gills important to a fish?

_____

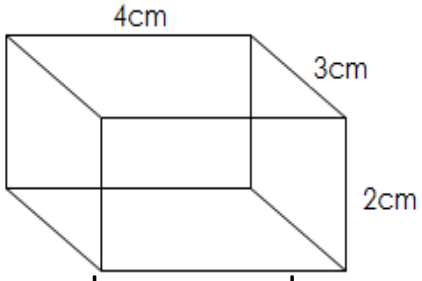

15. Why do farmers mulch their gardens?

_____

16. Identify one way drinking water can be made safe.

_____

17. Calculate the volume of the figure.

18. Why do farmers keep records on a poultry farm?

_____

19. Identify one role played by a worker bee in a hiave.

_____

20. Which part of a flower produces pollen grains?

_____

21. Mention one item used in harvesting honey.

_____

22. How is a nursery bed important to a farmer?

_____

23. What are social insects?

_____

24. Which component of air is used for preservation of drinks?

_____

25. Give one reason why animals move from one place to another.

_____

26. How are ferns similar to mosses?

_____

27. Give one method of preserving cereals.

_____

28. What is the role of brightly coloured petals on a flower?

_____

29. Identify one function of food in the body.

_____

30. Mention one example of a leguminous crop.

_____

31. Why is air regarded as matter?

_____

32. Which body organ is affected by trachoma?

_____

33. Suggest one reason why some plants climb others.

_____

34. How are flowers useful to man?

_____

35. What is a fracture?

_____

36. Which stage of a butterfly is dangerous to plants?

_____

37. How is a butterfly similar to a bee as insects?

_____

38. Identify any one common pest in the garden.

_____

39. Suggest one importance of crop rotation to a farmer.

_____

40. Name the best season for harvesting crops.

_____

SECTION B

41. (a) Define the term first Aid.

_____

(b) Give two reasons why first Aid is important to a casualty.

_____

(c) Identify one item found in the first Aid box.

_____

42. (a) Define the term poultry.

_____

(b) Give twp examples of poultry kept at home.

i_____ii_____

(c) Suggest one reason why farmers keep poultry.

_____

43. Match A and B correctly.

A	B
Culex mosquito	salmonella typhoid
Tiger mosquito	virus
Anopheles mosquito	plasmodia
Typhoid	filarial worm

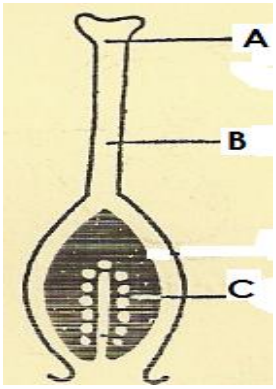

(i) Culex mosquito _____

(ii) Tiger mosquito _____

(iii) Anopheles mosquito _____

(iv) Typhoid _____

44. Study the diagram and answer questions

(a) Name part marked A

_____

(b) How is part marked C important to a flower?

_____

(c) Where are pollen grains made in a flower?

_____

45. (a) Identify three systems of poultry keeping.

(i)_____

(ii)_____ _____

(b) Give one reason why farmers in villages prefer free range system?

_____

46. (a) Suggest one reason why farmers keep bees.

_____

(b)What is the role of a drone bee in a bee hive?

_____

(c)Identify any one example of a traditional bee hive

_____

47. (a) What is air?

_____

(b) Give two components of air.

_____

(c) Which component of air carries the largest percentage?

_____

48. (a)Identify the vector for each disease.

(i) Cholera _____

(ii) Bilharzias _____

(b) Mention one way of controlling vectors.

_____

(c)Define the term vector.

_____

49. (a)Out line two materials that can be used to keep our bodies clean.

(i) _____ (ii)_____

(b) State two diseases caused due to poor personal hygiene.

(i)_____ (ii)_____

50. **(a) Draw a simple leaf and show these parts**.

(i) Apex (ii) leaf blade (iii) leaf margin

(b)Give one function of leaves to man.

_____

51. (a)Write down two items used in the making of ORS.

(i)_____(ii)_____

(b)Write ORS in full.

_____

(c)Give one way of controlling diarrhea.

_____

52. Write short notes on the following.

(a) Mass _____

(b) Density _____

(c) Volume _____

(d) Matter _____

53. (a)Identify any one item that floats on water.

_____

(b)Why do some objects float on water?

_____

(c)Name the force that makes objects weigh less on water.

_____

(c)Identify the method used in measuring the volume of irregular objects.

_____

54. (a)Explain how each of the following crops is propagated.

(i) Cabbages _____

(ii) Maize _____

(iii) Banana _____

(b)Give one pest that can attack maize.

_____

55 .(a)Mention one component of the soil.

_____

(b)Suggest one way soil fertility can be increased.

_____

(c)Name one animal that stay in the soil.

_____

(d)How can soil lose its fertility?

_____

PAPER SEVEN

SECTION A

1. Name the component of air which supports burning.

   _____

2. Give one example of monocotyledonous seed.

   _____

3. Why do bees visit flowers in our environment?

   _____

4. Mention one way people use soil.

   _____

5. Give one reason why a primary five pupils should wash his or her hands before eating food.

   _____

6. Why is a fire extinguisher painted with bright red colour?

   _____

7. Name the breathing organ for a housefly.

   _____

8. What is the use of the garden tool below?

   _____

9. Name the vector that spreads elephantiasis to human being.

   _____

10. One which main body part are legs of an insect attached?

    _____

11. Why is it that photosynthesis cannot take place at night?

    _____

12. What are disease vectors?

    _____

13. Write the term used to describe the chicken kept for egg production.

    _____

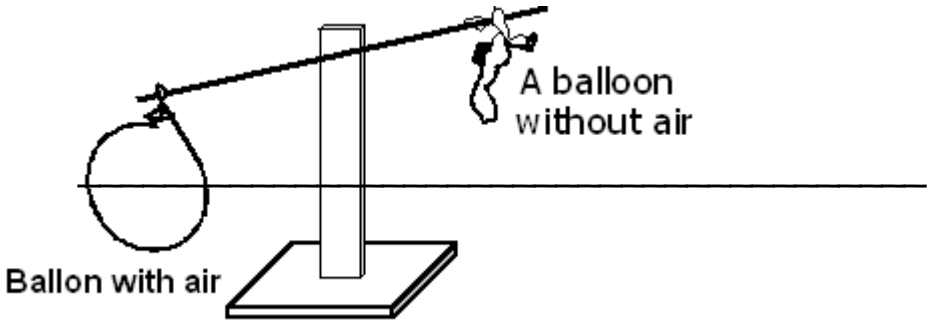

14. Identify one plant which is first planted in a nursery bed.

    _____

15. Write O.R.S in full.

    _____

16. Identify the property of air show below

17. What is the main duty of the queen bee.

_____

18. Mention on use of manure to a crop farmer.

_____

19. Why is it important to boil drinking water?

_____

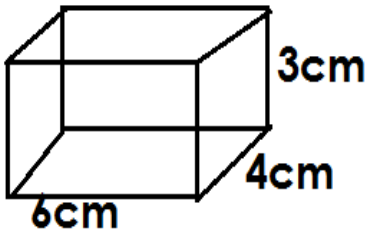

20. Which term describes that mixture of gases?

_____

21. Identify one importance of green plants to people.

_____

22. Find the volume of the cuboid below.

24. Name the digestive juice found in the mouth

_____

25. What is personal hygiene?

_____

_____

26. Mention one example of an object which sinks when thrown into water

_____

27. Name the type of leaf venation below.

_____

28. What is mass?

_____

29. Give one insect which pollinates flowers at night.

_____

30. Suggest one reason why farmers keep poultry.

_____

31. Identify one use of feathers to a bird.

_____

32. What name is given to the house of bees?

_____

33. Which vaccine is given to a baby at nine months?

_____

34. What are baits as used in bee keeping?

_____

35. Give one example of an energy giving food.

_____

36. Who is a dentist?

_____

37. Why does a leaf float on water?

_____

38. Name the main natural source of heat on earth?

_____

39. What is soil erosion?

_____

40. Which mineral is responsible for formation of strong bones and teeth?

_____

SECTION B.

41a) Which component of air has the following percentage in the atmosphere?

i) 0.03%_____

ii) 78%_____

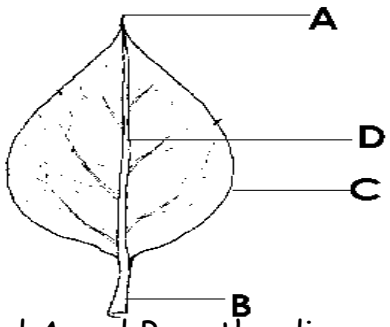

b) Identify one importance of carbondixide to plants

_____

c) Give one example of a rare gas.

_____

42a) Use the diagram below to answer questions that follow.

a) Name parts labeled A and B on the diagram above

i) A_____

ii) D_____

b) What is the function of part marked B?

_____

c) Give one example of a plant which has leaves shaped as one above.

_____

43 Write 4Fs germ path correctly in it's order.

i) _____

ii) _____

iii) _____

iv) _____

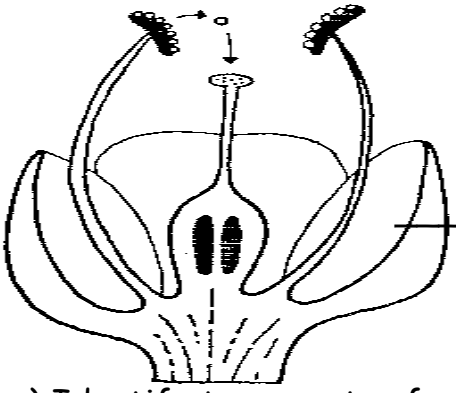

44a) what is pollination?

_____

b) Mention two types of pollination.

i) _____ ii)_____

c) Identify the type of pollination shown below.

_____

45. a) Identify two agents of soil erosion.

i) _____ ii)_____

b) Suggest two ways farmers control soil erosion in their gardens.

i) _____

ii) _____

46a) Define the term "poultry".

_____

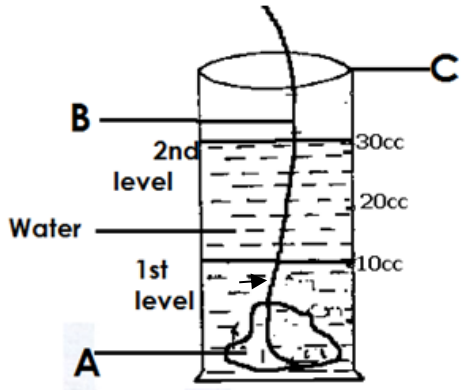

b) Give two examples of poultry.

i) _____ ii)_____

c) Identify the system of poultry which is common in rural areas.

_____

47. Use the diagram below and answer questions that follow.

a) Name the instrument labeled C above.

_____

b) Identify the method used above to find the volume of object A.

_____

c) Find the volume of object A in the diagram.

_____

d) What name can be given to object A?

_____

48a) Mention two early childhood immunizable diseases.

i) _____ ii)_____

b) What is immunity?

_____

c) Identify two types of immunity.

i) _____ ii)_____

49a) What is another name to mean digestive system?

_____

b) In which part of the digestive system does:

i) Digestion of food start_____

ii) Digestion of food end_____

c) Write down one disorder of the digestive system.

_____

50a) Define the term swarming.

_____

b) What happens to the bees in a colony when the queen bee dies?

_____

c) Give one use of honey to people.

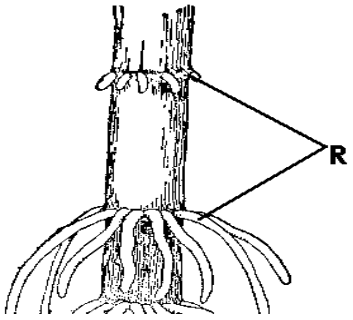

_____

d) Mention two duties of worker bees.

i) _____

ii) _____

51. Use the diagram below and answer the questions that follow.

a) Name part labeled R

_____

b) Give the function of part labeled R.

_____

c) Mention at least one example of a plant with such roots.

_____

52. What are social insects?

_____

b) Give two examples of social insects.

i) _____ ii) _____

c) Give one danger of insects to people.

_____

53. What is personal hygiene?

_____

b) Mention two items needed to keep our bodies clean.

i) _____ ii) _____

c) Identify one activity which can be done to keep proper sanitation at home.

_____

54a) What is soil profile?

_____

_____

b) Mention two layers of soil.

i) _____ ii) _____

c) Identify one living organism found in soil.

_____

55a) Identify the breathing or organs for the following.

i) man_____

ii) fish_____

iii) leaf_____

b) Name the type of chicken kept for meat production.

_____

PAPER EIGHT

SECTION A:

1. Name any **one** component of soil.

   _____

2. Which part of the human body is used for feeling?

   _____

3. Apart from seeds, give any other way plants reproduce.

   _____

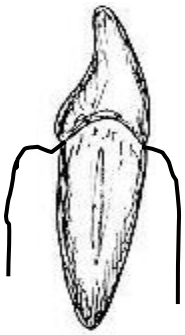

4. How can you control soil erosion in a school compound?

   _____

5. Why are garden tools kept in cool dry places after use?

   _____

The diagram below is of a human tooth. Study it and answer question number 6.

6. Name the above tooth.

   _____

7. What is seed viability?

   _____

   _____

8. How is heavy rainfall dangerous to people?

   _____

9. How are foods rich in proteins important to a seven year old boy?

   _____

10. Why should we cover leftover food at home?

    _____

11. Why should we keep our bodies clean?

_____

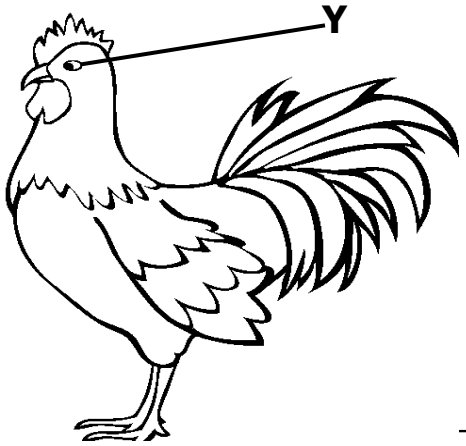

12. Give any **<u>one</u>** use of water at home.

_____

13. What do we call the crops that can be harvested every year?

_____

<u>The diagram below is of a bird. Use it to answer question 14 and 15.</u>

14. Name part marked with letter **Y**.

_____

15. By use of an arrow and letter **X**, show the part which is used to pick food.

16. Give any **<u>one</u>** way a P.5 child can cross a busy road safely.

_____

17. <u>In the space below, draw one item used to manage sunny weather.</u>

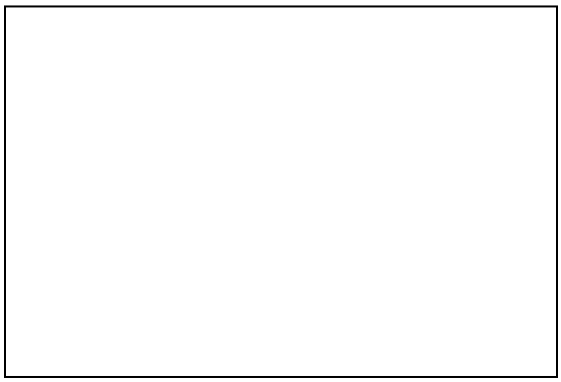

18. Name any **<u>one</u>** disease that we can control by boiling water for drinking at home.

_____

19. State the first aid for a burn.

_____

20. **<u>In the space provided below, draw a diagram to show network leaf venation.</u>**

21. Looking at the watery stool of a patient, how can you tell that the person has dysentery?

_____

22. State any **<u>one</u>** reason why farmers carry out **culling** in poultry.

_____

23. Why should people close doors and windows early in the evening?

_____

24. How are rat guards useful on a granary?

_____

25. Why is it dangerous to stay with domestic animals in the same house?

_____

26. Give the importance of chlorophyll during photosynthesis.

_____

27. State any **<u>one</u>** factor that affects the rate of transpiration in plants.

_____

28. Apart from being used to extinguish fire, state any other use of carbon dioxide to people.

_____

29. Give any **<u>one</u>** way people use bricks in our community.

_____

30. What class of food is contained in the food drawn below?

_____

31. Why should every classroom have a dustbin?

_____

32. How do farmers preserve maize after harvesting?

_____

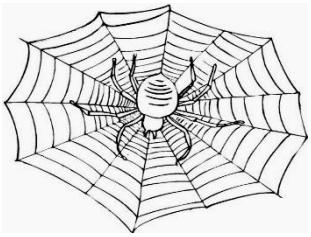

33. State any **one** way in which people may damage the environment.

_____

34. Give any **one** way we can care for our eyes.

_____

35. How is the structure below useful to a spider?

_____

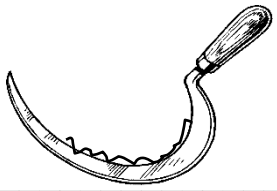

36. Name any one item in a home made from plastics.

_____

37. How are plants useful to animals?

_____

38. State the use of the garden tool below to a farmer.

_____

39. State any **one** difference in structure between a hen and a cock.

_____

_____

40. Write down any **one** item that can be used in water harvesting at home.

_____

SECTION B

41. (a) State any **two** ways of maintaining proper sanitation at home.

(i) _____

(ii) _____

(b) Name any **two** diseases that can be spread through poor sanitation.

(i) _____

(ii) _____

42. (a) What do the following worms feed on in the human body?

(i) Hook worms _____

(ii) Tape worms _____

(b) Besides the above worms, mention **one** other worm which affects the human body.

_____

(c) How can worms be prevented?

_____

43. (a) What is a resource?

_____

_____

(b) State any **one** use of electricity at home.

_____

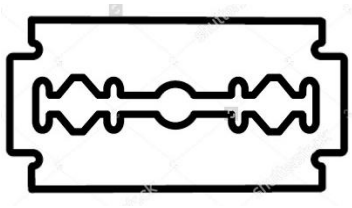

(c) How can electricity be dangerous to people at home?

_____

(d) State **one** way of saving electricity as an energy resource.

_____

44. (a) How do we use the item below at home?

_____

(b) Why do we brush our teeth after every meal?

_____

(c) Name any **two** diseases spread as a result of poor personal hygiene.

(i) _____

(ii) _____

45. (a) Give the importance of these parts to a plant.

(i) Leaves _____

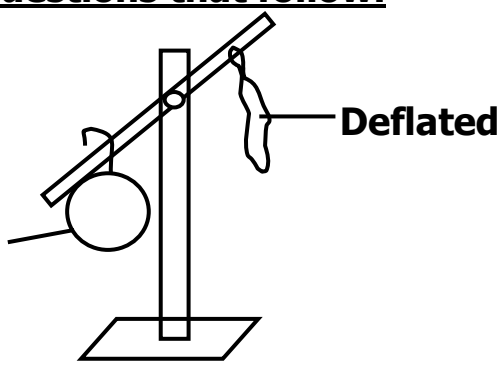

(ii) Roots _____

(b) Write down any **two** uses of stems to people.

(i) _____

(ii) _____

46. The diagram below shows one of the properties of air. Use it to answer the questions that follow.

(a) Which property of air is shown above?

_____

(b) Apart from the above property, mention **two** other properties of air.

i. _____

ii. _____

(c) Mention any **one** example of a **rear** gas.

_____

47. (a) State any **two** causes of accidents on our roads today.

(i) _____

(ii) _____

(b) Why are accident victims given first aid?

(i) _____

(ii) _____

48. (a) Write down any **one** cause of dehydration.

_____

(b) Why are dehydrated people given plenty of drinking water?

_____

(c) Identify any **two** materials used in the making of oral rehydration solution (ORS) at home.

(i) _____

(ii) _____

49. (a) Why are termites called social insects?

_____

(b) Name the habitat for termites.

_____

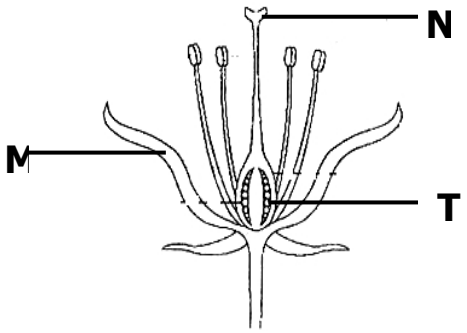

(c) How are termites dangerous to crop farmers?

_____

(d) Besides termites, name any other example of social insects.

_____

50. The diagram below is of a flower.

(a) Name parts marked **N** and **T**.

N _____

T _____

(b) By use of an arrow and letter **P**, show the part that produces pollen grains.

(c) What is the main work of a flower to a plant?

_____

51. (a) Name one breed of rabbits

_____

(b) Give any two reasons for keeping rabbits.

i. _____

ii. _____

(c) Mention any one way of caring for rabbits.

_____

52. <u>Match the body organs in A to their functions in B correctly.</u>

A	**B**
Kidney	stores food for some time.
Liver	stores information.
Stomach	produces bile.
Brain	filters blood.

a) Kidney _____

b) Liver _____

c) Stomach _____

d) Brain _____

53. (a) Apart from the extended family, name any **<u>one</u>** other type of family in Uganda.

_____

(b) Give any **<u>one</u>** role of the following people in a family.

(i) Children _____

(ii) Mother _____

(a) Write any **<u>one</u>** advantage of an extended family.

_____

_____

54. (a) What are vectors?

_____

_____

(b) Name any **one** vector commonly found in pit latrines.

_____

(c) Give any **two** ways in which the above vector can be controlled.

(i) _____

(ii) _____

55. Use the words provided in the box to complete the passage below.

Sun, condensed, clouds, evaporation, water vapour

The water cycle

During rain formation, the _____ heats water bodies like oceans, lakes, seas, rivers, swamps to cause _____. The _____ rises up to the sky and is _____ to form nimbus clouds. The droplets of water from clouds then fall down as rain. The water flows and collects in water bodies and the cycle continues.

PAPER NINE

SECTION A(40 marks)

1. Give any **one** infant immunisable disease.

   _____

2. What is the use of earthworms in the soil?

   _____

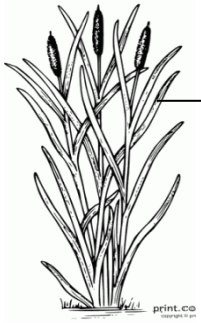

3. In which way are teeth useful during digestion of food?

   _____

4. Which type of seeds undergoes epigeal germination?

   _____

   The diagram below shows a plant.

5. Of what use is structure marked **S** to the plant?

   _____

6. Why does sand soil easily lose water?

   _____

7. Give any **one** advantage of weeding to farmers.

   _____

8. How can you help in saving electricity at home and school?

   _____

9. Name the fungus used to ferment alcohol.

   _____

10. In which **one** way can you help to improve soil fertility?

    _____

The diagram below shows the head of a bird.

11. By use of an arrow, show the wattle.
12. How do plants like mangoes reduce their rate of transpiration during the dry season?

    _____

13. Why is a shed put at the top of a nursery bed?

    _____

14. Name the human body organ where urine is stored before it is removed from the body.

    _____

15. Why is massive cutting down of trees dangerous to our environment?

    _____

16. Why would you advise poultry farmers using free range not to live near forests?

    _____

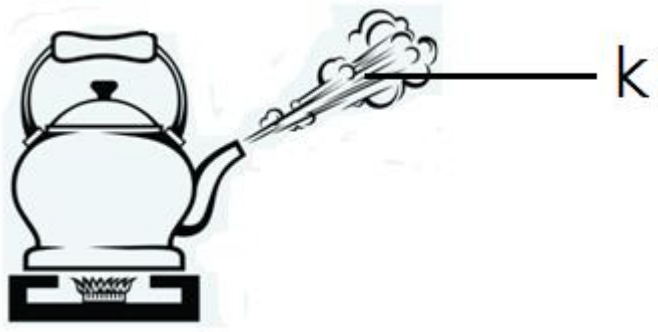

17. Give any **one** danger you may get for failing to wash your clothes.

    _____

18. In which **one** way can you help in controlling diarrhoea at home?

    _____

The diagram below shows a kettle with boiling water.

19. Name the substance labeled **K**.

    _____

20. Which form of energy leads to formation of substance **K**?

_____

21. Why is rusting called a chemical change?

_____

22. Give **one** danger of polio to infants.

_____

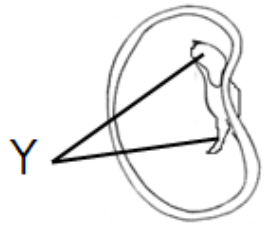

23. How do children get infected with worms?

_____

24. Name any **one** type of poultry.

_____

The diagram below shows a bean seed. Use it to answer question 25.

25. Name part marked **Y**.

_____

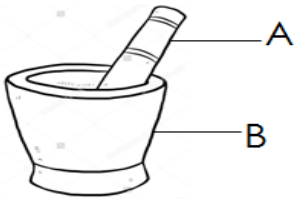

26. Name any one bacterial disease of the lungs.

_____

27. Why are people discouraged from carelessly playing with razor blades?

_____

Use the diagram below to answer questions 28 and 29.

28. Name part marked A.

_____

29. How important is the above item in a home?

_____

30. How can you separate passion fruit juice from its seeds?

_____

31. Name the kind of honey bee commonly found near flowers.

_____

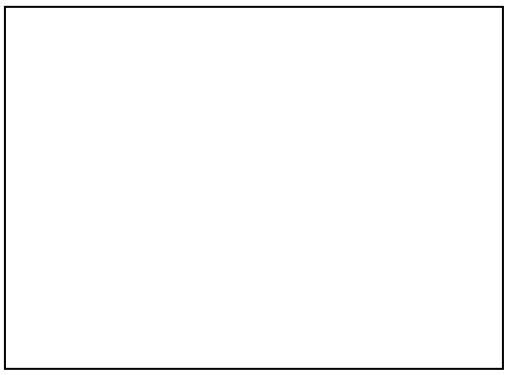

32. In which units is mass measured?

_____

33. How do farmers care for their crops during drought?

_____

34. **Draw the item in which rubbish is disposed in the classroom.**

35. Give any **one** advantage of keeping records to poultry farmers.

_____

36. How do farmers control crop pests in their gardens?

_____

37. In which **one** way can children and their teachers use shadows in their environment.

_____

38. In which way is a nuclear family different from an extended family.

_____

_____

39. How can crop farmers make good use of wind?

_____

40. Why do animals make move from one place to another?

_____

SECTION B

41. a) Name any **two** examples of root tubers

(i) _____

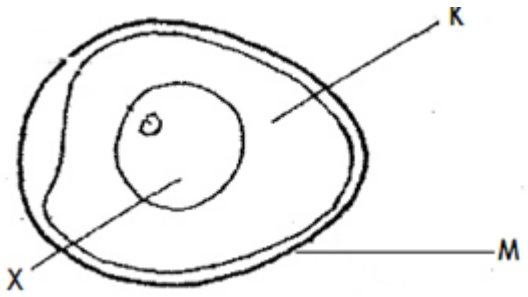

(ii) _____

b) Give any **two** diseases of cassava caused by a virus.

(i) _____

(ii) _____

42. **The diagram below shows internal parts of an egg. Use it to answer questions that follow.**

a) Name the part labeled **K** and **X**

K _____

X _____

b) By use of an arrow (→) and letter **P**, show the part that develops into a chick.

c) How is structure labelled **M** useful to poultry farmers?

_____

43. a) Identify any **two** exotic breeds of rabbits

(i) _____

(ii) _____

b) Name any **one** disease that affects the above animals.

_____

c) How do farmers control rabbit diseases?

_____

44. a) How do bacteria reproduce?

_____

b) State any **one** condition required for bacteria to reproduce.

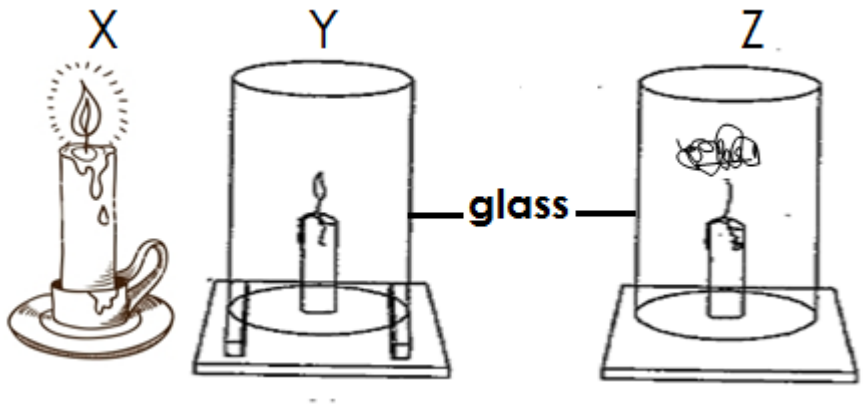

_____

c) Give any **two** importance of harmless bacteria to people.

i) _____

ii) _____

45. **The diagram below shows an experiment which was carried out by P.3 pupil's. Use it to answer questions that follow.**

a) Which component of air supports the process in **X**?

_____

b) Why did the candle continue burning in **Y**?

_____

c) Why did the candle stop burning as shown in **Z**?

_____

d) What does the above experiment show about air?

_____

46. a) Write **ORS** in full.

_____

b) Mention **one** solute used in making of **ORS**.

_____

c) How is **ORS** useful to a person suffering from diarrhea?

_____

d) Why is it important to wash hands before preparing **ORS** locally?

_____

47. a) What is photosynthesis?

_____

_____

b) Name any **one** raw material needed by plants to carry out photosynthesis.

_____

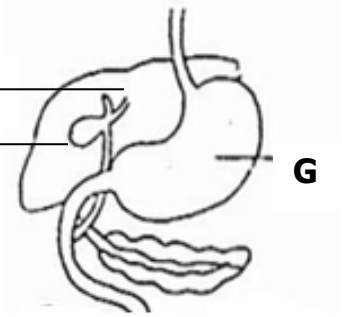

c) Write the food made by plants during photosynthesis.

_____

d) Name the gas released by plants during photosynthesis.

_____

48. **The diagram below shows parts of the human digestive system.**

a) Name the parts labelled **G** and **E**.

G _____

E _____

b) In which way is part **F** useful during digestion?

_____

c) How can you improve on the normal functioning of your digestive system?

_____

49. a) What is temperature?

_____

_____

b) In which units is temperature measured?

_____

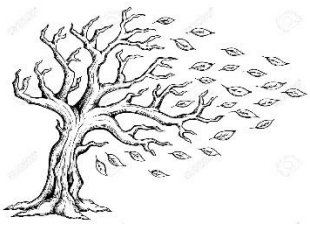

c) Name any **one** scale used in measuring temperature.

_____

d) Give any **one** reason why mercury is used in a clinical thermometer.

_____

50. **The table below is a weather chart. Use it to answer questions that follow**

A 	**B** 
C 	**D** 

a) Write **one** crop farming activity that may be carried out in conditions **A** and **C** above.

(i) **A** _____

(ii) **C** _____

b) Which weather condition is suitable for winnowing?

_____

c) Give the advantage of weather condition **D** to our environment.

_____

51. **The diagram below shows a garden tool.**

a) Identify the garden tool shown above.

_____

b) How is the above garden tool useful to farmers?

_____

c) How do you care for such garden tools at home?

(i)_____

(ii) _____

52. **Match the following vectors to the diseases they spread correctly.**

Vector	disease
Tsetse fly	plague
Housefly	malaria
Female anopheles mosquito	sleeping sickness
Rat fleas	cholera

(i) Tsetse fly : _____

(ii) Housefly : _____

(iii) Female anopheles mosquito : _____

(iv) Rat fleas : _____

53.a) Write any **one** food stuff rich in carbohydrates.

_____

b) Which deficiency disease can a child suffer from if he / she lacks enough carbohydrates.

_____

c) Apart from carbohydrates, name other **two** food values required in our bodies.

(i) _____

(ii) _____

54.a) What is soil erosion?

_____

_____

b) Mention any **one** cause of soil erosion.

_____

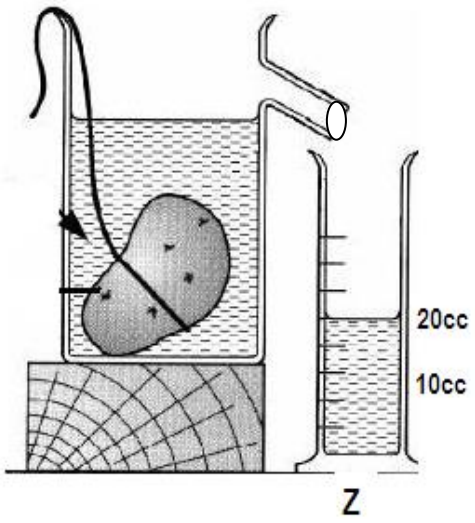

c) How can erosion be controlled in the following areas?

(i) school compound;

_____

(ii) a garden on a hilly land;

55. **The diagram below shows a method used in measuring objects.**

a) Which kind of objects are measured using the method shown above?

_____

b) Name container marked **Z**.

_____

c) If the stone has a density of 3g/cc. calculate its mass ***(2 marks)***

PAPER TEN

SECTION A (40 Marks)

1. How are merino sheep useful to farmers who rear them?

   _____

2. Why is it a good habit to wash hands with soap and clean water after visiting a latrine?

   _____

3. Mention **one** example of natural source of heat and light.

   _____

4. Identify the immunizable disease that causes lameness of the limbs like legs.

   _____

5. What do insects use for breathing?

   _____

6. Name the gas used by plants at night.

   _____

7. Which type of mosquito transmits malaria fever to man?

   _____

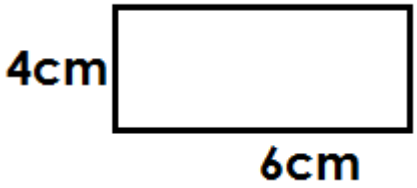

8. State the basic unit for measuring length.

   _____

9. What name is given to the food made by green plants during photosynthesis?

   _____

10. Calculate the area of the figure below.

11. Where in the alimentary canal of a bird is food crushed into small particles?

    _____

12. Mention the name given to the male part of a flower.

    _____

13. Mention any **one** example of exotic breed of poultry kept in Uganda.

    _____

14. In which body organ does gaseous exchange take place?

_____

15. Name the best breed of goats kept for milk production.

_____

16. Why should families boil water for drinking?

_____

17. Give a reason why DPT vaccine is called a triple vaccine.

_____

18. Name the best liquid conductor of heat.

_____

19. Which instrument is used to measure atmospheric pressure?

_____

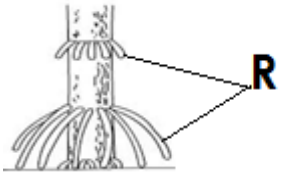

20. State the normal human body temperature in degrees Fahrenheit.

_____

21. What are weeds?

_____

22. Name the type of roots shown with letter R?

_____

23. Identify the part of a thermos-flask that prevents heat loss and gain by radiation.

_____

24. Suggest the suitable method used to find the volume of irregular objects.

_____

25. Draw a diagram of a simple serrated leaf in the space below.

26. Name the germ that causes malaria to people.

_____

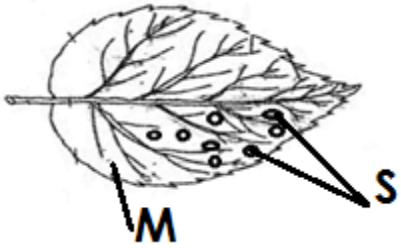

27. Mention any **one** material needed for bathing apart from water.

_____

28. Why is it dangerous to eat undercooked meat?

_____

Use the diagram below to answer the questions that follow

29. Name the part labelled with letter **M** on the diagram.

_____

30. State the importance of structures marked **'S'** in the above diagram.

_____

31. How is heat transfer by conduction important in our daily life?

_____

_____

32. Why is BCG vaccine given to babies at birth?

_____

33. What do we call the first set of teeth in young children?

_____

34. Write down **one** common sign of measles on a child suffering from measles.

_____

35. Identify the food value obtained from eating chicken.

_____

36. State the type of vitamin one acquires from the sun.

_____

37. Apart from water and oxygen, given another condition for germination.

_____

38. Give **one** advantage of suing free range system of rearing chicken.

_____

39. On which part of the body is measles vaccine administered?

_____

40. Covert 20° C to degrees Fahrenheit.

SECTION B

41. What is first aid?

_____

_____

b) Give **two** reasons why we give first aid.

(i) _____

(ii) _____

(c) Identify **one** item found in a first aid box.

_____

_____

42. (a) Why is a housefly referred to as an insect?

_____

b) What enables a housefly transmit disease–causing germs?

_____

(c) What is the suitable place for the housefly to lay its eggs?

_____

43. What do you understand by the term **"balanced diet"?**

_____

_____

(b) Mention **three** main classes of food that make up a balanced diet.

(i) _____

(ii) _____

(iii) _____

44. (a) Give the meaning of the term **'pollination'** in crop husbandry.

_____

_____

b) Mention **two** types of pollination.

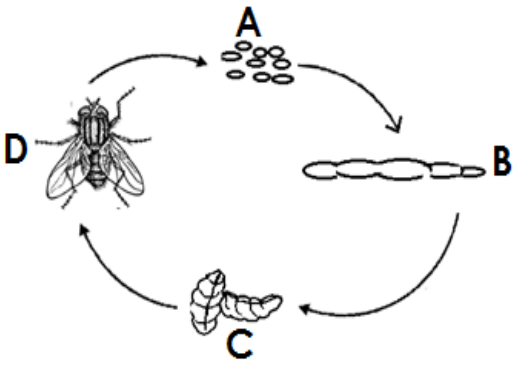

(i) _____

(ii) _____

c) How do moths find flowers for pollination at night?

_____

45. The diagram below shows a lifecycle of a housefly. Use it to answer the questions that follow.

a) Name the stages marked C and D.

(i) C: _____

(ii) D: _____

b) State the danger that may be caused by a housefly.

_____

c) How is stage **'B'** in the diagram above useful?

_____

_____

46. Define the term **'soil erosion'.**

_____

_____

(b) Mention **two** agents of soil erosion.

(i) _____

(ii) _____

(c) Identify any **one** method used to control soil erosion.

_____

47. (a) How do farmers prevent rusting of their garden tools?

_____

_____

(b) Name the **two** conditions necessary for rusting to take place.

(i) _____

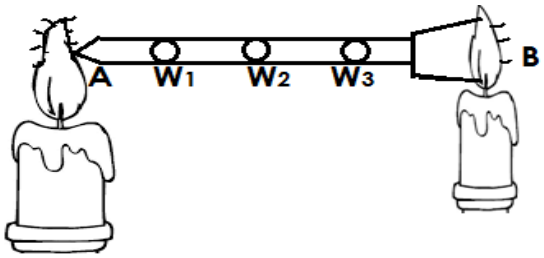

(ii) _____

(c) A farmer left his hoe outside at night. What happened to the hoe as it was exposed to moisture and oxygen at night?

_____

_____

48. The experiment below was carried out by a P.5 class. Use it to answer the questions that follow.

(a) By what process does heat travel from point A to B?

_____

(b) Identify the wax that melted first during the experiment.

_____

(c) Give a reason to support your answer in (b) above.

_____

_____

(d) In which state of matter is ice?

_____

49. (a) Give the difference between poultry and poultry keeping.

_____

_____

b) Mention any **two** systems of keeping poultry in Uganda.

(i) _____

(ii) _____

(c) Identify the system commonly used by poultry farmers in rural areas.

_____

50. In the space provided, draw the following;

Compound fracture	**Simple fracture**
A stretcher	**First aid box**

51. (a) Give any **two** reasons why farmers keep farm animals.

(i) _____

(ii) _____

b) Identify any **two** animals kept by Ugandan farmers.

(i) _____

(ii) _____

52. What is mulching?

_____

_____

b) State any two advantages of mulching to a farmer.

(i) _____

(ii) _____

c) How does mulching control soil erosion?

_____

_____

53. (a) Why should one move with a handkerchief always?

_____

_____

b) Outline any **two** activities done to promote personal hygiene.

(i) _____

(ii) _____

c) Cite any **one** habit that may led to getting water-borne diseases.

_____

54. Define the following as used in animal management.

(i) Docking;

_____

_____

(ii) De-worming;

_____

_____

b) Give any one reason why farmers castrate their farm animals.

_____

_____

c) Name the farm tool used to castrate farm animals like goats.

_____

55. Match the following diseases with their vector.

Disease	**Vector**
Typhus fever	female anopheles mosquito
Malaria	fleas
Dysentry	houseflies
Diarriahoea	cockroaches

(i) Typhus fever : _____

(ii) Malaria : _____

(iii) Dysentery : _____

(iv) Diarrhoea : _____

PAPER ELEVEN

SECTION A

1. Name any one source of heat.

   _____

2. Mention one example of a social insect.

   _____

3. Give the use of a dustbin in our classroom.

   _____

4. Which type of immunity does a child get after getting immunized against polio?

   _____

5. Mention one container used when finding volume of irregular objects.

   _____

6. In which state of matter does heat travel by convection?

   _____

7. Mention one animal that can be kept in an aquarium.

   _____

8. Which health habit is practiced after visiting the latrine or toilet?

   _____

9. How is oxygen important to the seeds during germination?

   _____

10. Give one way of preventing food contamination during its preparation.

    _____

11. State one way of controlling poultry vices on a poultry farm.

    _____

Study the diagram below and use it to answer the questions 12 and 13.

12. Name the item shown above.

    _____

13. Mention one element of weather managed by using the above item.

    _____

14. Why do we bathe?

_____

15. Give one way of controlling houseflies in our home.

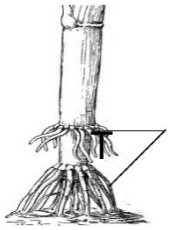

_____

16. Why do crop farmers mulch their gardens?

_____

Study the diagram below and use it to answer the questions that follow.

S

17. Name the part marked S.

_____

18. How are the roots marked T useful to a maize plant?

_____

19. What do we call air in motion?

_____

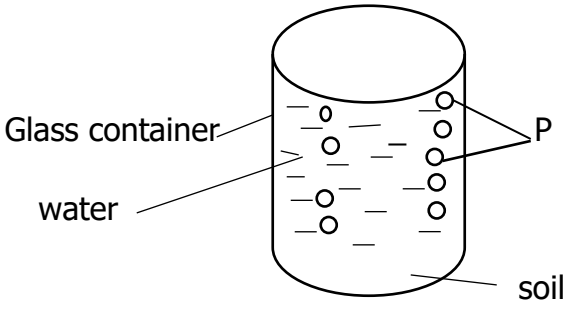

20. Give one reason why layers sometimes lay eggs with soft shells.

_____

21. Which type of thermometer is used to measure body temperature of a person?

_____

22. **Which property of air is shown in the diagram below**?

23. Name part marked P in the diagram above.

_____

24. Which type of digestion is carried out by the teeth?

_____

25. Name the sensitive part of a tooth.

_____

26. Mention one disease immunized against in children at birth.

_____

27. Give one way of preventing skin diseases in people.

_____

28. Which vector is involved in the 4Fs germ path?

_____

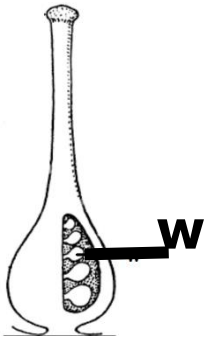

29. Which type of bees are commonly seen around flowers of plants?

_____

30. Write down any one method of harvesting root crops.

_____

Study the diagram below carefully.

31. What general name is given to the part of a flower shown above?

_____

32. Name the part marked W.

_____

33. Give a reason why a Stevenson screen is always painted white.

_____

34. Name one item made out clay soil.

_____

35. In which basic units is weight measured?

_____

36. In the space below, draw the diagram of a fibrous root system.

37. What are domestic animals?

_____

38. Why do poultry farmers keep broiler types of chicken?

_____

39. Name the type of clouds that give us rain.

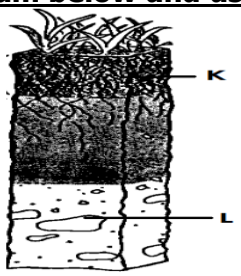

_____

40. Mention one disease of the digestive system.

_____

SECTION B

41. Study the diagram below and use it to answer the questions that follow.

a) What does the diagram above show about soil?

_____

b) Name the layers of soil labelled;

K _____

L _____

c) Why is the soil layer K good for crop growing?

_____

42a) Give any two ways of keeping our bodies clean.

i) _____

ii) _____

b) Name one item that is used to clean our bodies.

_____

c) Give one danger of having poor personal hygiene to a person.

_____

43a) What is the use of a fire extinguisher at school?

_____

b) Apart from schools, mention other two places where a fire extinguisher can be found.

i) _____

ii) _____

c) Give a reason why oxygen is not used in fire extinguishers.

_____

44. **Complete the table below carefully.**

TROPISM	**STIMULI**
phototropism	___
___	water
thigmotropism	__
___	force of gravity

45.a) What is photosynthesis?

_____

b) Give a reason why photosynthesis cannot take place at night in plants.

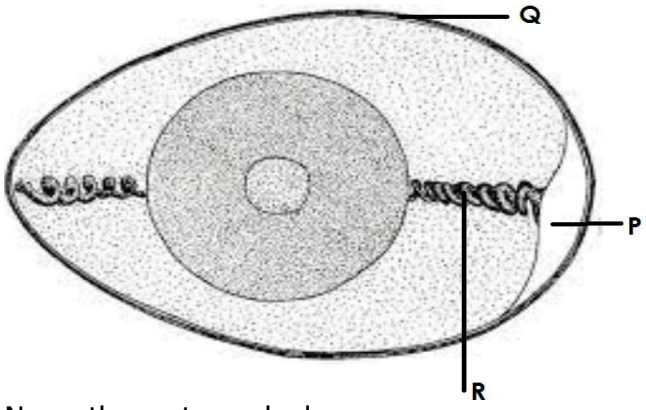

_____

c) Write down the two raw materials of photosynthesis.

i) _____

ii) _____

46. Study the diagram of an egg below and use it to answer the questions that follow.

a) Name the parts marked;

i) P _____ ii) R _____

b) How is part Q adapted to its function?

_____

c) State one condition where a fertilized egg can fail to hatch into a chick.

_____

47.a) Write down any two examples of wild animals.

i) _____

ii) _____

b) Give one danger of wild animals to people.

_____

c) Why do animals make sound?

_____

48a) Write D.D.D in full.

_____

b) State any two causes of dehydration in people.

i) _____

ii) _____

c) Give a reason why ORS is given to a dehydrated person.

_____

49a) What is the normal body temperature of a person in ^{0}C ?

_____

b) Apart from Fahrenheit, give any other scale in which temperature is measured.

_____

c) Change 20^{0}C to ^{o} F (2mks)

50a) Write down any two components of soil.

i) _____ ii) _____

b) Besides weathering, give any other method how soil is formed.

_____

c) Which type of soil is good for making glasses?

_____

51. **Match the following correctly.**

A		**B**
Mass	-	space occupied by an object.
Density	-	amount of liquid a container can hold.
Volume	-	quantity of matter an object contains.
Capacity	-	mass per unit volume.

a) Mass _____

b) Density _____

c) Volume _____

d) Capacity _____

52.a) What is sanitation?

_____

b) Give any two ways of promoting sanitation at school.

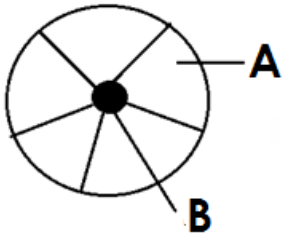

i) _____

ii) _____

c) Mention one disease that spreads through having poor sanitation in the environment.

_____

53. **The diagram below shows the two regions of shadows. Use it to answer the questions that follow.**

a) Name the regions of the shadow marked;

A _____

B _____

b) Which type of objects lead to the formation of shadows in our environment?

_____

c) Give one use of shadows to people.

_____

54.a) Name any two items found in a first aid box.

i) _____

ii) _____

b) Mention the accident where splints are used to give first aid.

_____

c) State one reason why casualties are given first aid.

_____

55a) Give the digestive juices produced by these organs;

i) Pancreas _____

ii) Liver _____

b) State one disorder of the digestive system.

_____

c) Give one way of maintaining the proper working of the digestive system in man.

_____

PAPER TWELVE

SECTION A: (40 marks)

1. Name the part of a plant that makes food.

   _____

2. Mention the component of air needed to preserve bottled drinks.

   _____

3. Why is mercury the best liquid to be used in clinical thermometers?

   _____

4. Which form of energy from the sun enables us to see?

   _____

5. From which part of an egg does a chick develop?

   _____

6. State one reason why milk is considered a liquid.

   _____

7. Why wouldn't you place ventilators below windows?

   _____

8. Give one method farmers use to control parasites in goats.

   _____

9. Why is filtration not considered a safe way of making water safe for drinking?

   _____

10. Mention one way we can take care of our teeth.

    _____

11. Name the force that holds molecules of a liquid substance together.

    _____

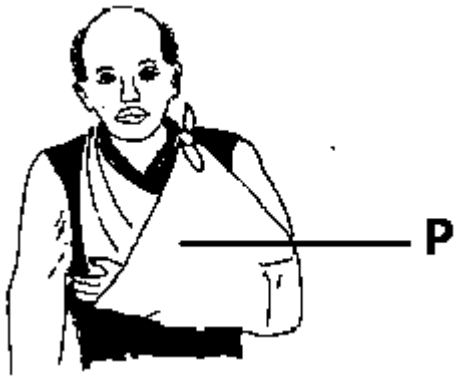

12. What is docking?

    _____

13. State any one situation where bottle-feeding is considered a better method of feeding the baby than breastfeeding.

    _____

Use the diagram below to answer questions 14 and 15.

14. Name the first aid equipment marked P.

_____

15. For what type of injury is the above equipment usually used?

_____

16. Mention the element of Primary Health Care that prevents deficiency diseases.

_____

17. Write one physical characteristic of a cereal crop.

_____

The diagram below shows different organisms. Use it to answer the questions 18 and 19.

18. Which organism is different from the others in the list?

_____

19. Give a reason for your answer in (18) above.

_____

20. Mention one type of soil erosion.

_____

21. Give a method a P. 5 pupil can use to recover salt from a salt solution?

_____

22. Mention one insect that undergoes an incomplete metamorphosis.

_____

23. Mention one effect of heat on solids.

_____

24. Why are mushrooms unable to manufacture their own food?

_____

25. Name one fuel used for cooking.

_____

26. Write PHC in full.

_____

27. Draw the fibrous root system in the space below.

28. How is the weather forecast helpful to a crop farmer?

_____

29. What advice can you give to a mother whose child has the following signs: **pot belly, very bright eyes, very thin with a face looking like that of an old man**?

_____

30. Mention one advantage of breastfeeding to a baby.

_____

31. Mention one way of preparing food.

_____

32. Give one indicator of food that has gone bad.

_____

33. Name one storage facility for grains in a home.

_____

34. Which immunisable disease is likely to attack people with no latrines in their community?

_____

35. What is a fracture?

_____

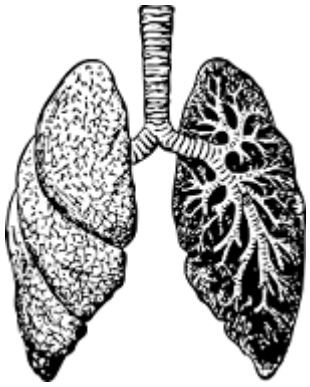

36. Why are telephone wires fixed loosely on poles?

_____

37. What method is used to find the volume of irregular objects?

_____

The diagram below a body organ. Use it to answer questions 38 and 39.

38. Name the organ shown above.

_____

39. How is the organ useful in a human body?

_____

40. Give one example of a vulnerable person.

_____

Section B: (60 marks)

41(a) What is mixed farming?

_____

(b) Name one breed of goats kept for milk production.

_____

(c) Which fibre do farmers obtain from sheep?

_____

(d) Mention one advantage of using paddock grazing in the management of sheep and goats.

_____

42(a) Give one example of a physical change.

_____

(b) What type of change takes place when a seedling develops into a big plant?

_____

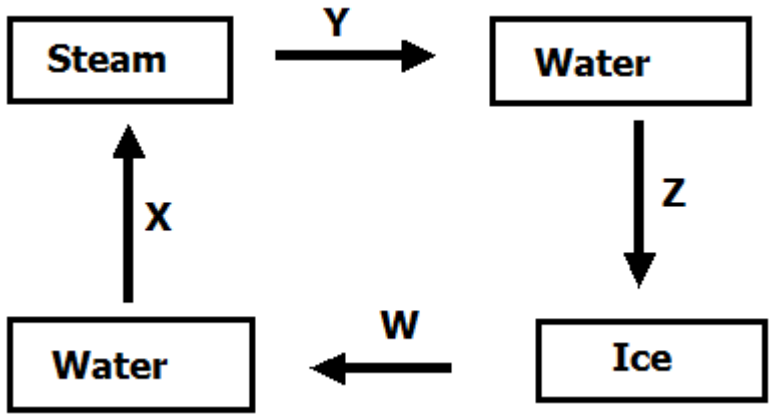

(c) Give one characteristic of a chemical change.

_____

(d) Point out one example of a chemical change.

_____

43. **The diagram below shows how water went through different changes of state. Use it to answer the questions that follow.**

(a) Name process marked X on the diagram.

_____

(b) Which letter marks the process through which dew is formed?

_____

(c) How is process marked W important to man?

_____

(d) Which form of energy in needed for process X to take place?

_____

44(a) Give one condition needed for rusting to take place.

_____

(b) How does man benefit from the following process?

(i) decomposition

_____

(ii) fermentation

_____

(c) Identify one material that can decompose.

_____

45(a) What is immunity?

_____

(b) What type of immunity is developed when vaccines are introduced into one's body?

_____

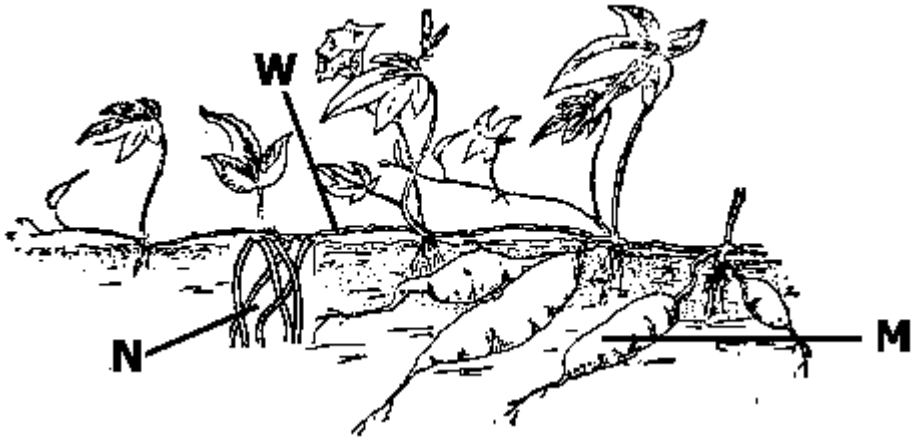

(c) What disease is one protected against by the BCG vaccine?

_____

(d) How is the polio vaccine administered into the body?

_____

46. **Study the diagram below is of a sweet potato plant. Use it to answer the questions that follow.**

(a) Name the type of roots marked N and M.

(i) M:_____

(ii) N: _____

(b) What type of stem is marked with letter W?

_____

(c) How is part W important to a sweet potato plant?

_____

47(a) Give one characteristic of sand soil.

_____

(b) Write down the process through which rocks turn into soil.

_____

(c) Apart from rock particles, name one other component of soil.

_____

(d) Mention one way of controlling soil erosion on mountain slopes.

_____

48(a) How is reproduction in mushrooms different from that in yeast?

_____

(b) Give one moulds are important to man.

_____

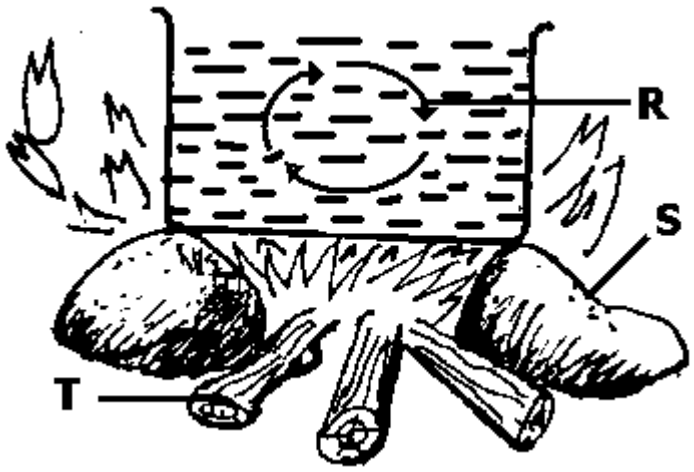

(c) State one way bacteria are important to a crop farmer.

_____

(b) Name one shape of bacteria.

_____

49. The diagram below shows water being boiled in a saucepan.

(a) Name parts marked R and S.

(i) R:_____

(ii) S: _____

(b) State the importance of T in the above experiment.

_____

(c) Name the material from which the sauce pan is made.

_____

50(a) What is digestion?

_____

(b) Mention the digestive juice produced in the stomach.

_____

(c) How is the liver important to process of digestion?

_____

(d) Write down one disorder of the digestive system.

_____

51(a) What is mass?

_____

(b) What are the units for measuring volume?

_____

(c) Calculate the density of a stone with mass of 30g and a volume of 6cc.

_____

(d) Why does ice flat on water?

_____

52(a) What are vectors?

_____

(b) At what stage is a mosquito dangerous to human health?

_____

(c) How does a tsetse fly transmit diseases to humans?

_____

(d) Mention one way of controlling mosquitoes at the larva stage.

_____

53(a) What is an apiary?

_____

(b) Mention one way bees benefit from a flower garden near their hive.

_____

(c) Give one duty of a worker bee in a hive.

_____

(d) State one importance of swarming to bees.

_____

54(a) Why do poultry farmers keep broilers?

_____

(b) Give one reason why layers sometimes eat their eggs.

_____

(c) What should be done to prevent layers from eating their eggs?

_____

(d) Mention one system used in keeping poultry.

_____

55(a) What is sanitation?

_____

(b) Mention one danger of having bushes around the home.

_____

(c) State one way people in a home can make good use of waste paper.

_____

(d) Give one danger of building a pit latrine near a water source.

_____
