TOTAL		

SECTION A

Questions **1** to **40** carry one mark each.

1. Mention any one component of a balanced diet.

   .....

2. Why do plants grow healthier during wet season than dry season?

   .....

   .....

3. How do electricians prevent the electric wires from breaking when fixing them between poles?

   .....

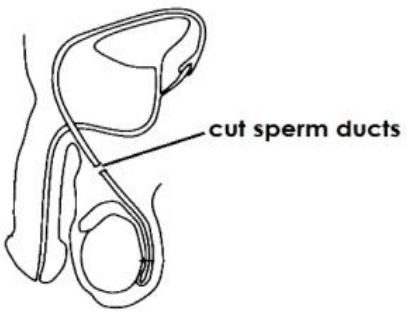

4. State any one danger of changes in the environment.

   .....

   .....

The diagram below shows some of the methods family planning used by some people. study and use them to answer questions 5 and 6.

E

D

5. Name the family planning method marked with letter **D**.

   .....

6. In which way are the above family planning methods similar besides being artificial?

   .....

   .....

7. Which type of weather can't be experienced at night?

.....

8. Distilled water is not recommended for drinking. How else can people make use of it?

.....

9. Give any one sign of poor personal hygiene among school children.

.....

10. Mention any one sign of constipation in human beings.

.....

11. How can Amina maintain the quality of her woollen sweater while washing?

.....

.....

12. Identify any one example of a useful insect in the environment.

.....

The diagram below shows a child passing out blood stained stool. Use it to answer questions 13 and 14.

13. Name any one bad health habit that can lead to the spread of the above disease.

.....

14. State the immediate effect of the above disease to human health.

    .....

15. Where in the human body are the lungs allocated?

    .....

16. State the mode of movement common in aquatic animals.

    .....

17. Apart from starving pests to death, give one other way paddock grazing controls animal pests.

    .....

18. Mention the first aid that can be given to a victim of near drowning.

    .....

19. Give any one importance of PIASCY messages in the control of spread of HIV/AIDS.

    .....

    .....

20. Why do lungs expand during inhalation?

    .....

    .....

21. Mention any one way people can take care of domestic birds.

    .....

22. Write down one example of a natural change in the environment.

    .....

23. Give a reason why the lifecycle of a housefly is said to be complete.

.....

.....

The diagram below is of a maple fruit. Use it to answer questions 24 and 25.

24. How are the seeds of the above fruit dispersed?

.....

25. Which characteristic makes the above seeds suitable for the mentioned mode of dispersal?

.....

26. State any one non-sexual way in which HIV/AIDS spreads among people.

.....

27. Give any one primary sex characteristic in P.6 boys.

.....

28. What excuse do health workers give for keeping vaccines under cool conditions?

.....

29. Mention any one example of a record kept on a sheep farm.

.....

30. Suggest any one way in which a waterborne toilet can be properly used.

.....

31. Write any one characteristic that makes a cocoyam a stem tuber.

.....

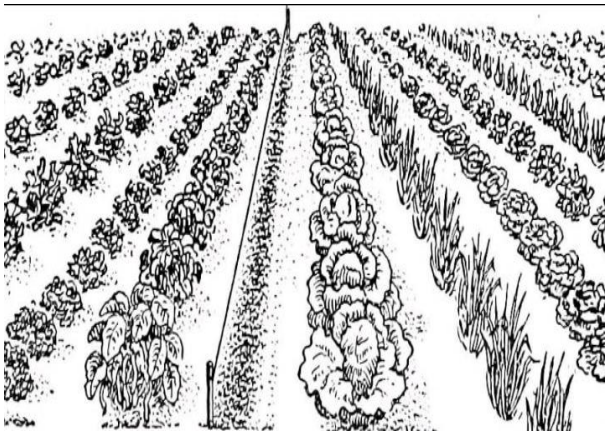

32. Why are creeping stems grouped under aerial stems?

.....

33. Name any one body organ found on the head.

.....

The diagram below shows one of the methods of planting seeds. Study and use it to answer the questions 34 and 35.

34. Name the other method of planting seeds besides the one shown in the diagram.

.....

35. How does the method of planting seeds in the diagram minimize the effect of crop pests?

.....

.....

36. What name is given to the habitat of rabbits?

.....

37. Mention any one new permanent substance formed by burning as a chemical change.

.....

38. State any one reason why babies fed by botting feeding are at a high risk of sickness.

.....

.....

39. How do tapeworms enter our bodies?

.....

.....

40. Which method is used to obtain petroleum products from crude oil?

.....

Section B

Questions **41** to **55** carry four marks each

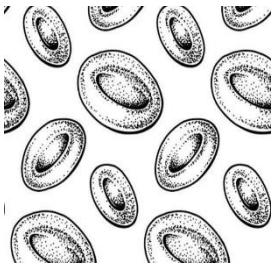

41. **The diagram below shows the solid components of blood. Study and use to answer the questions that follow.**

U

V

W

a) Which of the above blood components is responsible for;

i) clotting blood.

.....

ii) Carrying oxygen round the body.

.....

b) In which one way are the components of blood marked **U** adapted to their function?

.....

.....

c) Mention any one vector borne disease that affects the components marked **W**.

.....

42. a) Identify any two items used to manage sunny weather.

i) .....

ii) .....

b) Give any two uses of rainwater to people.

i) .....

ii) .....

43. a) Define a school health parade.

.....

.....

b) Mention any one body part checked during the health parade.

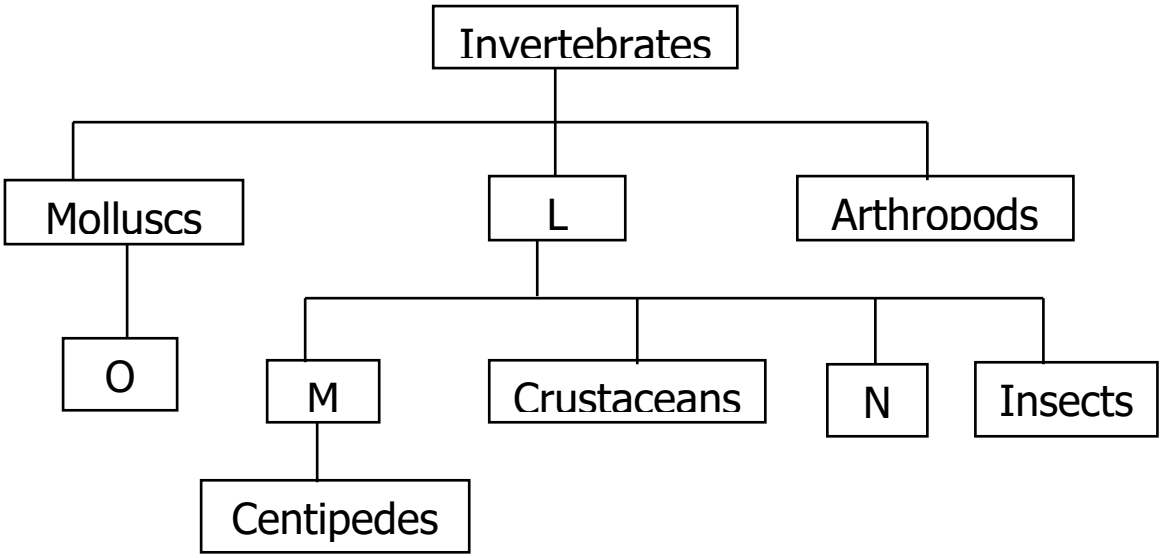

.....

Apart from organizing school health parade, state two other activities done by the school health club to improve health of people at school.

i) .....

ii) .....

44. **Study the table about invertebrates and use it to answer the questions that follow.**

a) Name the group of invertebrates represented by letter **L**.

.....

b) Identify any one organism that can be grouped under group of arthropods marked **N**.

.....

c) In which two ways are insects similar to organisms in **N**?

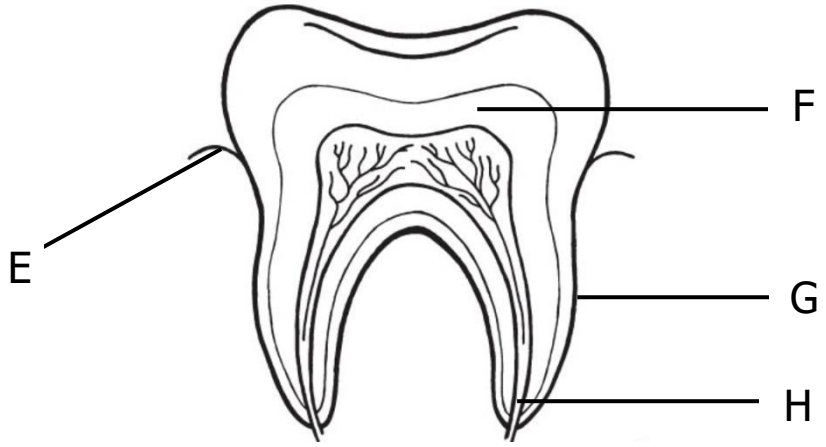

i) .....

.....

ii) .....

.....

45. **The diagram below shows the structure of a tooth. Study it carefully to answer the questions that follow.**

a) Name the parts marked with letters **E** and **G**.

i) E.....

ii) G.....

b) Give the function of part **H** to the tooth.

.....

c) Which letter shows the part that helps in formation of the enamel?

.....

46. a) State one difference between essential drugs and non-essential drugs.

.....

.....

.....

b) Identify any one example of a non-essential drug.

.....

c) How does each of the following life skills safeguard youth against drug dependency?

i) self control

.....

.....

ii). Critical thinking

.....

.....

47. a) What is soil erosion?

.....

.....

b) State any one cause of soil erosion in the environment.

.....

c) Briefly explain how each of the following practices help to control soil erosion in an area.

i). Contour ploughing

.....

.....

ii). Cover cropping.

.....

.....

48. a) Give any two examples of useful fungi?

i).....

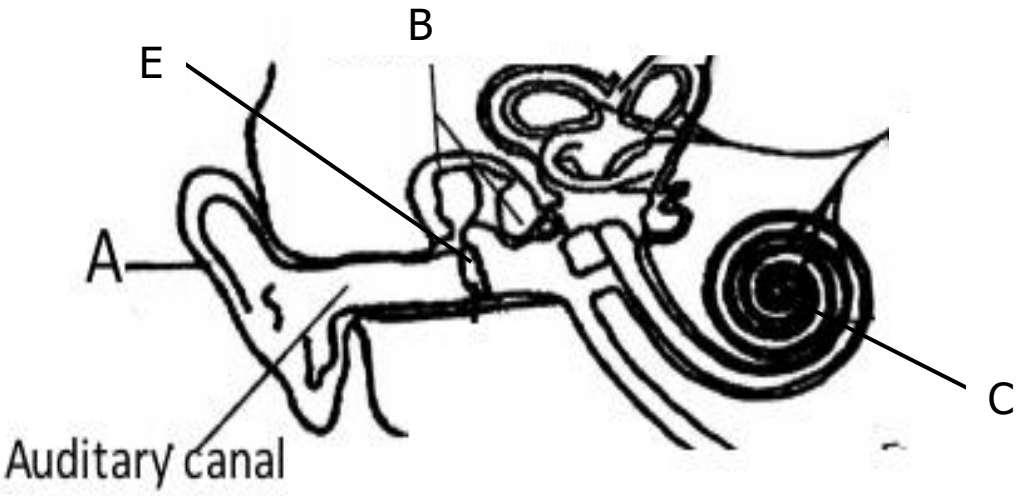

ii) .....

b) In which two ways are fungi useful in our daily life?

i).....

ii).....

49. **The diagram below is of the human ear. Study it carefully and answer the questions that follow.**

a) Name the part marked with letter **C**.

.....

b) Give the function of part marked with letter **E**.

.....

.....

c) Suggest any one characteristic that makes part marked with letter **A** suitable for collecting sound waves.

.....

.....

d) Use **an arrow** with letter **D** to label one part which is not involved in the process of hearing on the diagram above.

50. a) Mention any two injuries that affect the skin.

i).....

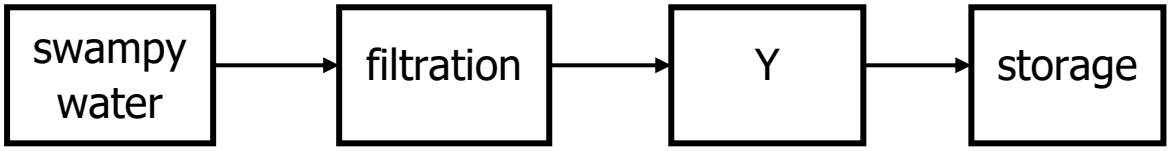

ii).....

b) Suggest any two reasons for giving first aid to casualties.

i).....

ii).....

51. **Study the process of obtaining safe water below and answer the questions that follow.**

a) Name the process at **Y**.

.....

b) Why is swampy water filtered before being taken at point **Y**?

.....

.....

c) State the importance of passing water through point **Y**?

.....

.....

d) Mention one other process through which swampy water can go before being taken to point **Y**.

.....

52. **The table below shows resources in part K and methods of harvesting them in part L in a wrong order.**

Part K: Resources	**Part L** (methods of harvesting)
Soil	Using propellers on windmills
Animals	Using solar panels
Wind	Excavation
sunshine	trapping

Correctly match the resources with the methods of harvesting them in the space provided below.

a) Soil.....

b) Animals.....

c) Wind.....

d) Sunshine.....

53. a) Name any two materials from which a cork of a vacuum flask can be made.

i) .....

ii) .....

b) Which method of heat transfer is prevented by each of the following parts in a vacuum flask?

i) Silvered walls:

.....

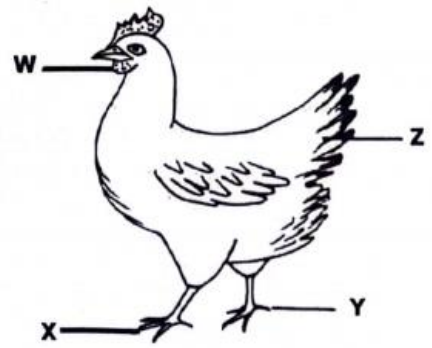

.....

ii) Vacuum:

.....

.....

54. **The diagram below shows external feature of a hen. Study and use it to answer the questions that follow.**

a) Name the external parts marked **X** and **Y**.

i) X.....

ii) Y.....

b) How is part marked **Y** useful to a hen?

.....

c) Identify the part that enables a hen to cool its body on hot days.

.....

55. a) Mention any two examples of latrines.

i) .....

ii) .....

b) Why are ventilated improved Pit latrines said to be;

i) improve:

.....

.....

ii) ventilated:

.....

.....
