THE SIPRO END OF TERM III EXAMINATIONS 2025

SUBJECT : INTEGRATED SCIENCE

CLASS : PRIMARY SIX

DURATION : 2 hours 15 minutes

Name: _____

School: _____

District: _____

READ THE FOLLOWING INSTRUCTIONS CAREFULLY:

1. This paper has two sections: **A** and **B**.
2. Section **A** has **20** questions (**40 Marks**).
3. Section **B** has **15** questions (**60 Marks**).
4. Attempt all questions in both sections. All answers to both sections **A** and **B**. must be written in the spaces provided.
5. All answers must be written in blue or black ball point pens or ***ink***. Only diagrams and graph work must be done in ***pencil***.
6. Unnecessary ***alteration*** of work will lead to loss of marks.
7. Any ***handwriting*** that cannot be easily read may lead to loss of marks.
8. Do not fill anything in the boxes indicated: "FOR EXAMINER'S USE ONLY"

For Examiner's Use Only;

SECTION A: 40 MARKS

Questions **1** *to* **40** *carry* **one** *mark each.*

1. Name the intestinal worms that enter the body through penetration of the bare skin of the feet.

2. Mention the type of fertilization to which amphibians undergo.

3. Name any **one** physical change that takes place in distillation method of making alcohol.

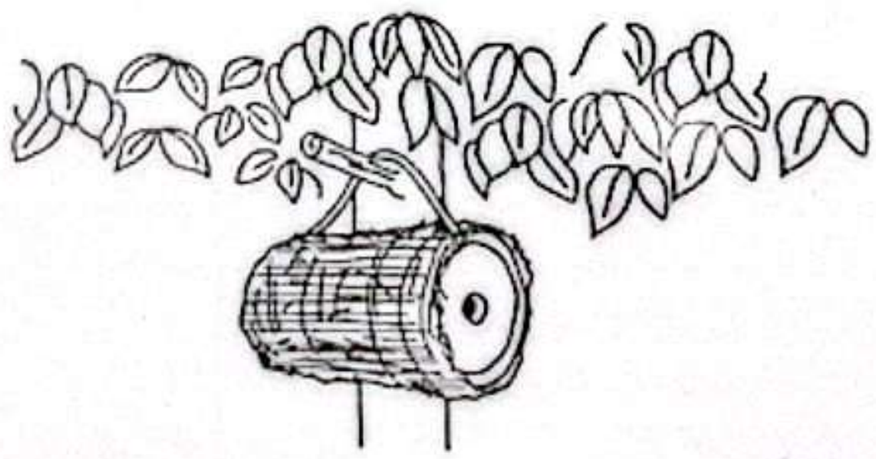

4. Give any **one** way crop farmers can contribute to the survival of crops during the dry season.

5. State **one** reason why the immunization process is done free of charge.

6. Mention any **one** example of a musical instrument that produces sound by vibration of the strings when plucked.

7. State **one** reason why water is called a universal solvent.

The diagram below is of a sited beehive. *Use it to answer questions 8 and 9.*

8. Give any **one** reason why such beehives are usually placed under a tree shed.

9. State any **one** disadvantage of using such a beehive in an apiary.

10. How do plants absorb water from the soil?

11. Name any **one** organ located in the chest cavity.

12. Mention any **one** importance of blood in the human body.

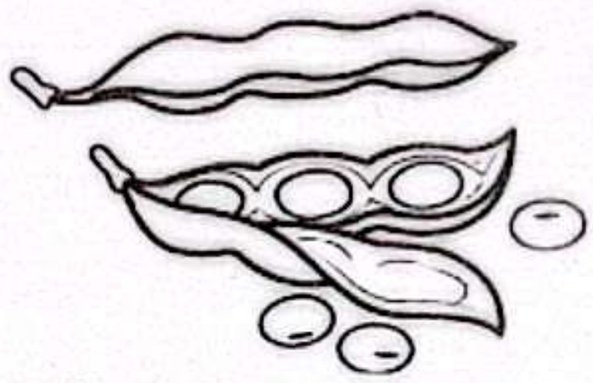

13. State **one** form of wood fuel that is made by burning wood in a limited supply of oxygen.

14. State any **one** benefit of a balanced diet to human health.

15. Give **one** reason why a rain gauge is put in an open space.

16. Mention **one** way poultry contributes to the control of kwashiorkor among infants.

Below is a diagram of a mode of seed dispersal. *Use it to answer questions 17 and 18.*

17. Identify any **one** example of seeds that undergo the mode of dispersal drawn above.

18. Mention the type of weather to which the mode of dispersal above usually takes place.

19. Give any **one** way diarrhoeal diseases spread among people in a community.

20. State any **one** sign of proper feeding among infants.

21. Name the cattle management practice on a livestock farm that helps to increase space in the kraal.

22. Give any **one** example of soil pollutants.

23. State **one** difference between a germ and a vector.

24. **In the space provided below, draw the structure of an eagle's beak.**

25. Give the use of the sun in the rain cycle.

26. State **one** reason why crop farmers dry their harvested cereals before storage.

27. State **one** system of grazing cattle that is commonly practised in urban areas.

28. Mention any **one** activity done to care for breastfeeding mothers.

29. Explain the behaviour of the lungs when breathing in.

30. State the difference between wild and domestic animals.

31. Name the instrument used by people to measure the size of a garden.

32. Give **one** way of controlling deficiency diseases among family members.

33. State **one** reason why clean water prepared by decantation is not recommended for drinking.

34. Mention **one** immunizable disease that causes skin rash, running nose and red eyes among children.

The diagram below shows a dangerous substance. *Use it to answer questions 35 and 36.*

35. Give a reason why parents are advised to keep the substance drawn above out of reach of children.

36. Mention any **one** sign of a person that has taken the substance drawn above.

37. Mention the part of a VIP latrine that lets out bad smelling air from the pit.

38. State **one** effect of poor personal hygiene to human health.

39. How are mad dogs dangerous in the environment?

40. Mention **one** example of common food taboos in the community.

_____

SECTION B: 60 MARKS

Questions **41** *to* **55** *carry* **four** *marks each.*

41. a) Name the set of teeth that develops last in children.

_____

b) Mention the type of teeth that performs the role below when breaking down food;

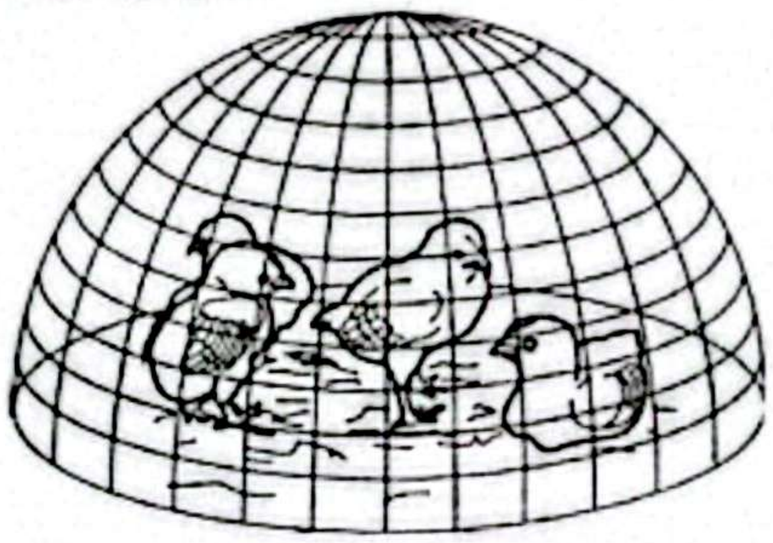

i) biting food _____

ii) tearing food _____

c) State any **one** effect of eating sugary foods to human teeth.

_____

42. **The diagram below is of a system used by poultry farmers.** *Use it to answer the questions that follow.*

a) Identify the method of keeping poultry shown in the diagram above.

_____

b) State any **two** advantages of using the method shown above to keep poultry.

i) _____

ii) _____

c) State the reason why the method shown in the above diagram is not commonly used in rural areas.

_____

43. a) Name the type of blood vessels in the body that perform the following functions;

i) transport oxygenated blood from the heart to other body parts;

_____

ii) transport deoxygenated blood from the body parts to the heart;

_____

b) Mention any **two** ways of keeping the heart in a proper working condition.

i) _____

ii) _____

44. The table below shows the crops Mr. Mutebi planted in different seasons.

Use it to answer the questions that follow.

Crop	Season
Maize	Season one
Cowpeas	Season two
Cassava	Season three
Beans	Season four
Irish potatoes	Season five

a) Identify the method of farming Mr. Mutebi uses on his farm.

_____

b) Give **two** reasons why Mr. Mutebi decided to use the farming method mentioned in (a) above.

i) _____

ii) _____

c) State **one** reason why beans and cowpeas are included in the farming method shown above.

_____

45. a) Give any **two** characteristics of essential drugs.

i) _____

ii) _____

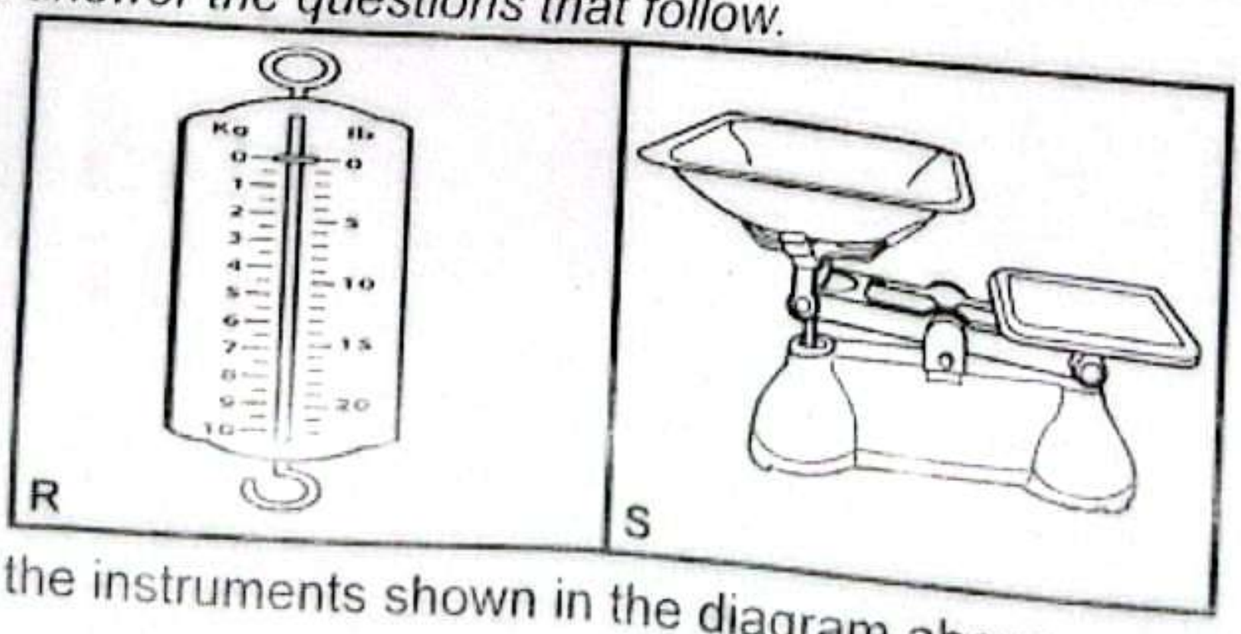

b) State **two** dangers of buying essential drugs from retail shops.

i) _____

ii) _____

46. The diagram below is of instruments used to measure mass and weight.

Use it to answer the questions that follow.

a) Name the instruments shown in the diagram above.

i) **R** _____ ii) **S** _____

b) Give any **two** items in school measured using the above instruments.

i) R _____

ii) S _____

47. a) State any **two** common accidents that can take place at school.

i) _____

ii) _____

b) Mention any **two** qualities of a good first aider.

i) _____

ii) _____

48. a) Give any **two** artificial vegetative methods of propagation.

i) _____

ii) _____

b) Write any **two** advantages of vegetative method of propagation.

i) _____

ii) _____

49. **The diagram below shows a mammal.** *Use it to answer the questions that follow.*

a) To which group of mammals does the animal above belong?

_____

b) Mention any **two** dangers of the animal drawn above to people.

i) _____

ii) _____

c) State one way people can control the animal drawn above in their homes.

_____

50. **In the table below, list A has types of changes and list B has examples of different types of changes, but in a wrong order.**

List A (Types of changes)	List B (Examples of changes)
natural changes	formation of gullies
chemical changes	shedding leaves in deciduous trees
physical changes	changes in weather
biological changes	breaking of an egg

Match the examples of changes in list B to their types in list A correctly.

i) natural changes _____

ii) chemical changes _____

iii) physical changes _____

iv) biological changes _____

© Sipro Educational Services Tel: 0414669050/ 0755-274911/0776-274911

51. a) Give the meaning of the term immunity.

_____

_____

b) State any **two** ways of acquiring natural immunity.

i) _____

ii) _____

c) Mention any **one** importance of immunity to the body.

_____

52. a) Name **two** non-living agents of pollination.

i) _____

ii) _____

b) State any **two** characteristics of insect pollinated flowers.

i) _____

ii) _____

53. a) Give a difference between heat conductors and heat insulators.

_____

_____

b) Write any **two** examples of insulators of heat.

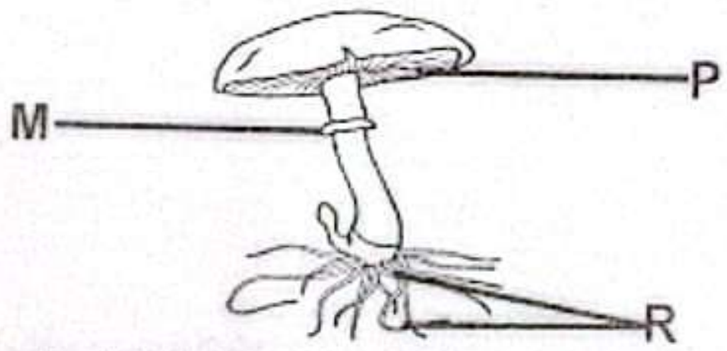

i) _____

ii) _____

c) Mention any **one** use of insulators in our daily life.

_____

54. **Below is a diagram showing an organism.** *Study and use it to answer the questions that follow.*

a) Name the part marked with letter **M**.

_____

b) Give the function of parts labelled with letters **P** and **R**.

i) **P** _____

ii) **R** _____

c) Give **one** reason why the organism drawn above is common in areas with rotting matter.

_____

55. a) Mention any **two** advantages of rearing rabbits.

i) _____

ii) _____

b) State **two** ways of caring for rabbits.

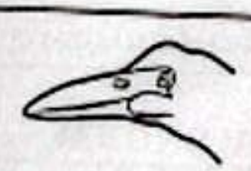

i) _____

ii) _____

THE SIPRO PRIMARY SIX INTEGRATED SCIENCE END OF TERM III MARKING GUIDE - 2025

NO	CLASS LEVEL	CORRECT RESPONSE	WRONG ANSWER	MARKING POINT	TECHNICAL ADVICE
1	P.4	Hookworms / hookworm infestation	Hook worms / tape worms	Correct spelling / Correct worms that enter the body through the bare skin.	Comprehensively revise about worms.
2	P.6	External fertilization	Internal fertilization	Correct type of fertilization.	Go through the types of fertilization for different animals.
3	P.6	Evaporation / condensation	Conduction	Physical change involved in the distillation method of making alcohol.	Practically do that experiment about distillation with the learners to enhance mastery of concepts.
4	P.3/ P.4	By watering the crops through irrigation / Through planting drought resistant species / Mulching the garden / Timely pruning.	By thinning.	Crop growing practice that prevents drying of crops.	Revise through crop growing practices in a detailed way.
5	P.5	To ensure total immunization of all people in the called for age / To enable people from poor families be immunized.	To make it cheap.	Ensuring 100% total immunization.	Revise through the immunization programme.
6	P.6	Violin / viola / bow harp / lyre / adungu / guitar / banjo	Drum / whistle	String musical instrument that is plucked.	Discuss the sound production in organisms and musical instruments as well.
7	P.5	All solutes dissolve in water.	Water is a solvent.	Ability to dissolve most solutes.	Carry out an experiment about making solutions using solvents and solutes.
8	P.5	To prevent excessive heat in a hive that can cause swarming / To protect them from direct sunlight.	To easily be seen	Correct reason for placing a hive in a tree shed.	Revise the factors to consider when siting a hive.
9	P.5	It is difficult to monitor the colony / Difficulty in harvesting honey / Honey is mixed with grubs / Hive can easily be destroyed / It is short lasting / Difficult to inspect.	Bees may run away.	Disadvantage of local beehives.	Compare traditional and modern beehives.
10	P.4	Through osmosis	By absorption.	Correct process	Revise the plant processes.
11	P.4	Lungs / heart	Stomach	Organs located in the chest cavity.	Go through the location of various body organs.

CamScanner

12	P.6	Blood defends the body against infections / Blood transports materials in the body / Blood transports waste materials in the body.	Blood adds water in the body.	Uses of blood in the body.	Revise the components of blood and their uses in body.
13	P.6/P.3	Charcoal	Firewood	Correct form of wood fuel.	Discuss the conservation mode of wood fuel.
14	P.4	It makes the body immune / It prevents poor health / It prevents stunted growth / Promotes proper growth / Prevents deficiency diseases.	It causes happiness.	Advantages of a balanced diet in the body.	Go through the components of a balanced diet.
15	P.4	To measure the correct / actual amount of rainfall received / To prevent obstruction of rain drops by other objects.	To prevents wrong usage.	Prevention of obstruction of rainwater.	Task learners to make models of weather instruments and discuss their usage.
16	P.5	Poultry provides chicken and eggs which are sources of proteins when eaten.	Poultry prevents kwashiorkor.	Edible products from poultry.	Train learners on daily life application questions.
17	P.6	Bean seeds / soya bean / acacia seeds / castor oil seeds	Groundnut seeds	Seeds that undergo explosive mechanism.	Use the school garden to demonstrate modes of seed dispersal.
18	P.6	Sunny weather	Sun	Correct type of weather.	Revise adaptations of seeds or fruits to their dispersal modes.
19	P.4	Eating dirty food / feeding from dirty containers / Through houseflies / Through houseflies landing on food/ Through leaving food uncovered / Eating food with dirty fingers.	Through mosquito bites.	Spread of diarrhoeal diseases.	Go through management of diarrhoeal diseases.
20	P.4	Good health / Proper growth / Normal body weight /Dark coloured hair on the head.	Proper movement	Sign of proper sanitation.	Revise the uses of different food value in the body.
21	P.6	Dehorning	Slaughtering	Correct cattle management practice.	Review cattle managent practices in details.
22	P.5/P.3	Broken bottles / polythene bags / Used engine oil / Broken glasses	Manure	Non-biodegradable	Discuss the effects of soil pollutants to soil productivity.
23	P.4	Germs are disease causative agents while vectors are germ carriers / Germs cause diseases while vectors spread germs.	Germs spread diseases while vectors cause germs.	Correct complete difference.	Revise the types / groups of germs.
24	P.6			Correct shape of a bird of prey's beak.	Compare the types of beaks of birds.

CamScanner

25	P.3	The sun heats the water causing evaporation / The sun heats plants causing transpiration.	The sun provides light.	Use of sun in the water cycle.	Discuss the steps involved in a rain cycle.
26	P.4	To prevent the breeding of bacteria / To prevent rotting	To keep it well.	Reason for drying cassava tubers.	Go through proper storage of harvests.
27	P.5/P.7	Zero grazing	Tethering / paddocking	Common method used in towns / urban areas to rear cattle.	Visit nearby farms to identify the methods of grazing used.
28	P.5	Feeding her on a balanced diet / Feeding her on plenty of fluids	Giving them crutches.	Care for breastfeeding mothers.	Revise about weaning and benefits of weaning to a baby.
29	P.6	The lungs expand to let in inhaled air / They increase in size to let in inhaled air / They increase in volume.	They reduce in size / They relax.	Correct behaviour of the lungs when breathing in.	Use a model of the respiratory system to discuss how it works.
30	P.3	Wild animals live on their own while domestic animals are kept at home/ Domestic animals are tamed by people while wild animals are untamable.	Wild animals live at home while domestic animals live in the wild.	Complete correct comparison	Go through habitats for domestic animals and wild animals
31	P.4	Tape measure / measuring tape	String / garden string	Correct instrument used to measure the garden size.	Revise the instruments used to measure. Review the ways of controlling deficiency diseases.
32	P.4	By feeding on a balanced diet / By regular deworming / By swallowing iron tablets	By going for immunization.	Control measure of deficiency diseases	Review the ways of controlling deficiency diseases.
33	P.6	Decantation does not kill germs in water / Decanted water still contains germs / Germs escape with water during decantation.	Decanted water is dirty.	Presence of germs	Carry out experiments on preparation of clean water.
34	P.5	Measles	Mesiles	Correct spelling	Emphasise the signs and symptoms of immunizable diseases.
35	P.6/ P.4	To prevent body poisoning / To prevent children from drinking the poison.	To keep children safe.	Prevention of poisoning.	Revise ways of controlling common accidents at home.
36	P.6	Uncontrolled sweating / uncontrolled vomiting /stomachache / Rapid breathing / Uncontrolled diarrhoea / lather-like discharge from the mouth / nosebleeds / high fever	Body weakness	Sign of poisoning.	Go through ways of administering first aid for different accidents.
37	P.6	Vent pipe	Vent screen	Correct part that directs smelly air from the pit of a VIP latrine.	Compare the VIP latrine and the conventional pit latrine.

CamScanner

38	P.4/ P.2	Skin diseases / Body odour / Increased body parasites / Lice in the head / Skin injuries due to overgrown fingernails / Bad breath / Eye diseases	High fever	Danger of poor personal hygiene.	Go through the essence of proper personal hygiene.
39	P.4	They bite people and spread rabies / They spread rabies through biting people.	They spread diseases	Spread of rabies.	Remind learners on ways vectors spread germs.
40	P.5	Muslims don't eat pork / Adventists don't eat pork / Muslims don't eat meat slaughtered by a non- Muslim / Christians don't eat meat on Fridays during lent period.	Women were not allowed to eat chicken.	A food taboo, but not a food belief.	Revise the following in details; food taboos / food beliefs / food consumption patterns.

SECTION B

41.	P.4	a) Permanent set	Molar teeth	Sets of teeth that develop last.	Revise the types of the teeth and the parts of teeth with the functions.
		b) (i) Incisor / incisors (ii) canines / canine	Canines / Incisor	Teeth for given functions.	
		c) They can lead to teeth decay / Lead to dental caries.	They attract germs.	Effect of eating sugary foods	
42.	P.5	a) Fold / pen / ark method	Cage method	Correct identification of method given	Discuss through the methods of rearing poultry and where they are commonly used.
		b) It controls poultry vices since few birds are kept / Egg collection is easy / Manure collection is easy.	It is cheap	Advantages of the ark method	
		c) It is expensive to manage / People in villages can't afford buying feeds.	People in villages have limited space.	Reason why ark method is not commonly used in rural areas.	
43.	P.6	a) (i) arteries (ii) veins	Pulmonary artery Pulmonary vein	Correct blood vessels	Revise through blood vessels and blood components comprehensively / Explain to the learners how the heart works.
		b) By feeding on a balanced diet / Doing regular physical exercise / Avoid smoking / Going for regular medical checkup.	By playing well.	Care for the heart.	
44.	P.4	a) Crop rotation	Intercropping	Correct name of the method.	Revise other crop growing practices, and visit the nearby gardens to check on other methods of farming.
		b) It improves soil fertility / It increases crop yields / It controls pests / It controls soil erosion / Controls crop diseases.	It is easy to carry out.	Advantages of crop rotation.	

CamScanner

		c) They have nitrogen fixing bacteria that fix nitrogen in the soil to improve soil fertility / They help in fixing nitrogen in the soil / They improve soil fertility.	They increase crop yields.	Importance of legumes in a crop rotation cycle.	
45.	P.6	a) They are affordable / They are available / They cure common diseases / They reduce common signs and symptoms of diseases.	They are well packed / prescribed /have expiry dates.	Characteristics of essential drugs.	Help learners to differentiate between essential drugs and factory manufactured drugs. Teach them the groups of essential drugs and their characteristics.
		b) Drugs may be expired / Drugs may not be prescribed / A wrong drug may be given / Some drugs may be fake / contaminated.	Drugs may not be packed.	Correct reasons why drugs shouldn't be bought from retail shops.	
46	P.5	a) (i) spring balance (ii) scale balance	Weighing scale Spring balance	Correct identification of instruments.	Go through the instruments used for measuring different quantities.
		b) Beans /flour / sugar / salt / cowpeas / groundnuts / maize	Cooking oil	Items measured in kg or g.	
47.	P.4/ P.2	a) cuts / car knocks / nosebleeds / scalds / snake bites / poisoning / fainting / drowning / near drowning / convulsion	falls	Accidents that are likely to be in schools.	Revise the causes and dangers of common accidents.
		b) Should be kind / honest /knowledgeable /quick /fast / creative.	Should be exemplary	Qualities of a good first aider.	
48.	P.6	a) Marcotting / use of stem cuttings / layering / grafting /budding	Row planting / suckers, broadcasting / crowns	Artificial methods of vegetative propagation.	With clear diagrams and using the school garden, revise the methods of artificial vegetative propagation.
		b) The young plant grows fast / The young plant gets food nutrients directly from the parent plant / The young plant retains the good characteristics from parent plant.	The plant is free from pests.	Advantages of artificial methods of vegetative propagation.	
49.	P.6	a) Gnawing mammals / Rodents	Lagomorphs	Correct group of mammals.	Revisit the animal classification table and use the question answer approach to revise the characteristics of each group of mammals.
		b) It poisons / contaminates food / It bites and destroys crops / It makes noise in the house / Destroys property.	It scares a lot.	Dangers of rats to people.	
		c) Through setting rat traps / Trapping through poisoning /Rearing cats to eat them.	Through beating.	Control of rats.	
50.	P.5	(i) change in weather	Formation of gullies	Correct matching	Carry out comprehensive revision on types of changes.
		(ii)rusting	shedding leaves in deciduous trees.		
		(iii) formation of gullies	changes in weather		
		(iv)shedding leaves in deciduous trees	breaking of an egg		

CamScanner

51	P.5	a) Immunity is the body's ability to resist diseases is the body's ability to fight against disease causing germs.	Immunity is the introduction of vaccines in the body.	Correct meaning of immunity.	Thoroughly revise through the types of immunity and the ways of acquiring immunity.
		b) Through breastfeeding / Recovering from an illness / Feeding on a balanced diet / From the moti.er to the unborn baby through the placenta.	Through immunization.	Way of acquiring natural immunity.	
		c)It keeps the baby healthy /Allows proper growth / Makes the body resistant to disease attacks.	It keeps the body safe.	Importance of immunity.	
52.	P.4	a) Water / wind	Birds / insects	Non- living agents of pollination.	With the help of real flowers, help learners differentiate insect pollinated flowers and wind pollinated flowers.
		b) They produce heavy stick pollen / They are brightly coloured / They produce a scent / They have nectar in nectaries / The stigma is above the anthers / Produce little pollen.	They produce much light pollen.	Characteristics of flowers pollinated by insects.	
53.	P.5	a) Heat conductors allow easy passage of heat while heat insulators allow slow passage of heat.	Heat conductors conduct heat while heat insulators insulate heat.	Passage of heat at given rates.	Use real objects to demonstrate the rate of conduction heat in them. Also carry out an experiment to show that water conducts heat slowly.
		b) Water / rubber / plastics / ceramics / paper / piece of cloth / wood	Table /cup /book	Examples of a material not items.	
		c) They are used to cover electric wires / For covering iron handles / For making sockets / For making water pipes / For making water tanks / For carrying hot objects.	For making saucepans	Uses of heat insulators	
54.	P.5	a) Ring	Stem	Correct name	Revise the parts of a mushroom and their function/ Compare feeding in bacteria and fungi.
		b) (i) Produces spores (ii) Absorbs food nutrients from decaying matter /Supporting the mushroom.	Store spores. Absorbs food from the soil.	Correct uses of the given parts.	
		c) It feeds on decaying mater from such areas.	It is where it grows from.	Absorption of food from decaying mater.	
55.	P.4	a) They mature fast / They produce many young ones / They need a small space / They have a short gestation period.	They are small in size / They provide meat and fur.	Advantages of rearing rabbits.	Help learners to interpret the advantages of keeping rabbits and reasons for keeping rabbits. Visit a nearby rabbitary for practical learning.
		b) Regular vaccination / cleaning their shelter / deworming them / Disinfecting the hutch always/ Culling sick rabbits / Timely feeding and treating when sick.	Bathing them.	Caring for rabbits.	

CamScanner
