KIKUNYU MODERN PRIMARY SCHOOL

PRIMARY SIX MATHEMATICS TOPICAL BREAKDOWN FOR TERM THREE 2025

SUB-TOPIC	REMARKS
Topic 1: **Length, Mass and Capacity**	
1. Revision on length	
2. Finding area of squares and rectangles	
3. Finding area when perimeter of a rectangle is given	
4. Finding area when perimeter of a square is given	
5. Finding perimeter when area of a rectangle is given	
6. Finding perimeter when area of a square is given	
7. Finding area of triangles	
8. Finding area of a trapezium	
9. Finding area of a parallelogram	
10. Finding area of a rhombus and a kite	

SUB-TOPIC	REMARKS
11. Finding the shaded area	
12. Comparing diameter and circumference	
13. Finding circumference of circles	
14. Finding perimeter of sectors of circles	
15. Finding the area of circles	
16. Finding volume of the cubes and cuboids	
17. Finding volume of triangular prisms	
18. Finding volume of cylinders	
19. Measuring capacity in liters and milliliters	
20. Calculating capacity in liters and milliliters	
Topic 2: **Lines, Angles and Geometric figures**	

SUB-TOPIC	REMARKS
1. Types of angles	
2. Naming supplementary angles	
3. Vertically opposite angles	
4. Complementary angles	
5. Constructing parallel line	
6. Constructing an angle of 90^0	
7. Constructing angles of 60^0 and 120^0	
8. Bisecting angles	
9. Constructing an angle of 30^0	
10. Constructing angles 45^0 and 135^0	
11. Naming polygons	
12. Drawing different types of polygons	

SUB-TOPIC	REMARKS
13. Properties of triangles	
14. Applying the angle sum of interior angles of a triangle	
15. Applying Pythagoras theorem to find the missing sides of a triangle	
16. Constructing a right-angled triangle	
17. Naming properties of quadrilaterals	
18. Applying angle properties of quadrilaterals	
19. Calculating angles of a rhombus and a parallelogram	
20. Drawing and constructing a square	
21. Constructing rectangles	
22. Constructing a hexagon	
Topic 3: **Integers**	

SUB-TOPIC	REMARKS
1. Adding positive to positive integers	
2. Adding positive to negative integers	
3. Adding negative to negative integers	
4. Subtracting positive integers from positive integers	
5. Subtracting positive integers from negative integers	
6. Subtracting negative integers from positive integers	
7. Subtracting negative integers from negative integers	
8. Adding and subtracting integers without a number line	
9. Application of integers	
Topic 4: **Algebra**	
1. Expressing algebraic expressions in words	

SUB-TOPIC	REMARKS
2. Expressing phrases as algebraic expressions	
3. Substitution	
4. Simplifying like terms	
5. Collecting like terms	
6. Solving simple equations by subtracting	
7. Solving equations by adding	
8. Solving equations by dividing	
9. Solving equations with fractions	
10. Forming and solving equations	

ABBREVIATIONS USED

- **WK → week**
- **PD → period**
- **U.L → Unlock literacy skills**
- **I.A → Activities of integration**
- **L.S.V → Life Skills and Values**
- **L/A → Learning Aids**
- **REF → Reference**

						3. The two parallel sides of a trapezium are 9 cm and 12 cm respectively. Its height is 6 cm. Find its area.							
		Length, Mass and Capacity	Finding area of a parallelogram	The learner finds area of a parallelogram	The learner reads, interprets and writes mathematical statements correctly	**Finding area of a parallelogram** - To find area of a parallelogram, multiply it's base by its height - Squares, rectangles and rhombuses are all parallelograms. - Opposite sides of a parallelogram are equal and parallel. **Examples** 1. Find the area of a parallelogram with a 6 cm base and 6 cm height. 2. Find the area of a parallelogram whose base is 10 cm and height 5 cm. **Activity** Find the area of the following parallelograms	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Creative thinking Effective commun-ication Problem solving	Finding area of a parallelogram	Counters Multiplic-tion tables	MK Pri Maths Pupil's Book 6 Page 135	

WK	PD	TOPIC	SUB TOPIC	COMPETENCES SUBJECT	COMPETENCES LANGUAGE	CONTENT	U.L/I.A	METHODS	LS/V	ACTIVITIES	L/A	REF	RMK
						1. 8 cm base and 5 cm height 2. 12 cm base and 5 cm height 3. 10 cm base and 10 cm height.							
		Length, Mass and Capacity	Finding area of a rhombus and a kite	The learner finds area of a rhombus and a kite	The learner reads, interprets and writes mathematical statements correctly	**Finding area of a rhombus and a kite** - When the lengths of the diagonals of a rhombus or a kite are given, use the formula below to find the area - Area = ½ x d^1 x d^2 **Examples** 1. Find the area of the rhombus whose diagonals are 8 cm by 6 cm. 2. Find the area of a kite whose diagonals are 15 cm by 8 cm. **Activity** Find the area of the rhombuses and kites of the given diagonals a) 9 cm by 4 cm	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Creative thinking Effective communication Problem solving	Finding area of a rhombus and a kite	Counters Multiplic-tion tables	MK Pri Maths Pupil's Book 6 Page 136

						b) 24 cm by 19 cm c) 12 cm by 24 cm							
		Length, Mass and Capacity	Finding the shaded area	The learner finds the shaded area	The learner reads, interprets and writes mathematical statements correctly	**Finding the shaded area** Calculating shaded area means "area of the outer object take away area of the inner object". **Examples** 1. Find the shaded area in the figure below. 2. Calculate the shaded area in the figure below. **Activity**	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Creative thinking Effective communi-cation Problem solving	Finding the shaded area	Counters Multiplic-tion tables	MK Pri Maths Pupil's Book 6 Page 137	

WK	PD	TOPIC	SUB TOPIC	COMPETENCES SUBJECT	COMPETENCES LANGUAGE	CONTENT	U.L/I.A	METHODS	LS/V	ACTIVITIES	L/A	REF	RMK
						1. Calculate the shaded area in the figure below. 2. A room measuring 28 m by 17 m has a carpet placed leaving a gap of 75 cm around the carpet. Calculate the area uncovered by the carpet. 3. A wall measures 35 m by 25 m. It has two glass windows each measuring 5 m by 3 m. It is to be painted at a cost of Sh. 3,500 per square. What is the total cost of painting the wall?							
		Length, Mass and Capacity	Circumference and area of circles Comparing diameter and circumference	The learner compares diameter and circumference	The learner reads, interprets and writes mathematical statements correctly	Circumference and area of circles **Comparing diameter and circumference** Practical activity 1. Collect and use circular objects and strings 2. Mark the diameters across the center of the circular face	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Creative thinking Effective commun-ication Problem solving	Comparing diameter and circumference	Counters Multiplic-tion tables	MK Pri Maths Pupil's Book 6 Page 138	

WK	PD	TOPIC	SUB TOPIC	COMPETENCES SUBJECT	COMPETENCES LANGUAGE	CONTENT	U.L/I.A	METHODS	LS/V	ACTIVITIES	L/A	REF	RMK
						3. Measure the string around the circumference of the circular face 4. Compare the diameter to the circumference using a string 5. How many diameters fit along the circumference string? **Example** Measure a mug and divide it's circumference by its diameter to find pi (π) String = 66 cm around the mug Diameter = 21 cm Pi = $\frac{Circumference}{Diameter} = \frac{66}{21} = \frac{22}{7}$ = 3.14 Note: - pi means the number of times the diameter fits the circumference. - the symbol for pi is π and is limited to 22/7 or 3.14. **Homework : Practical work**							

WK	PD	TOPIC	SUB TOPIC	COMPETENCES SUBJECT	COMPETENCES LANGUAGE	CONTENT	U.L/I.A	METHODS	LS/V	ACTIVITIES	L/A	REF	RMK
						1. Measure, divide the circumference by diameter to get pi and record values. 2. What is the highest and lowest value you got for pi? 3. What is the common whole number got in all results? 4. What is the average of all results?							
		Length, Mass and Capacity	Finding circumference of circles	The learner finds circumference of circles	The learner reads, interprets and writes mathematical statements correctly	**Finding circumference of circles** - The circumference of a circle equals to 2πr or πD - Use π = 22/7 when radius or diameter is a multiple of 7 like 7,14,21,28,.... - Use π = 3.14 when radius or diameter is a multiple of 10 like 10,20,30,... **Examples** 1. Find the circumference of a circle whose radius is 7 cm.	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Creative thinking Effective commun-ication Problem solving	Finding circumference of circles	Counters Multiplic-tion tables	MK Pri Maths Pupil's Book 6 Page 139

		Integers	Application of integers	The learner uses the knowledge of integers to solve daily problems	The learner reads, interprets and writes mathematical statements correctly	**Applying integers in daily life** *Integers are used in our day-to-day life. Borrowing, debt and a fall refer to negatives, but profit and a rise refer to positives.* Examples 1. Kato borrowed Sh. 500 but paid back Sh. 300. How much money does Kato have? $^{-}$Sh. 500 + Sh. 300 = $^{-}$Sh. 200 So, he has a debt of Sh. 200 2. The temperature was 20^0F and dropped by 23^0F. What is the temperature now? $^{+}20^0$F – 23^0F = $^{-}3^0$F	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Creative thinking Critical thinking Effective commun-ication Problem solving	Applying integers in daily life	Counters Multiplic-tion tables	MK Pri Maths Pupil's Book 6 Page 183	
		Algebra	Expressing algebraic expressions in words	The learner expresses algebraic expressions in words	The learner reads, interprets and writes mathematical statements correctly	**Algebra** Algebraic expressions **Expressing algebraic expressions in words** *To show a single term, we use brackets and multiplication and division signs.*	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Creative thinking Critical thinking	Expressing algebraic expressions in words	Counters Multiplic-tion tables	P.6 Curric-ulum Set One Page 184 – 185

						Example 1 (i) $n + 5$ means add 5 to n. (ii) $n - 5$ means subtract 5 from n. (iii) $5n$ means multiply n by 5. (iv) $\frac{n}{5}$ means divide n by 5. **Example 2** (i) $2x + 3$ means multiply x by 2, then add 3 to the result. (ii) $2(x + 3)$ means add 3 to x, then multiply the result by 2. **Example 3** 1. $4y - 7$ means multiply y by 4, then subtract 7 from the result. 2. $4(y - 7)$ means subtract 7 from y, then, multiply the result by 4. **Example 4** (i) $\frac{x}{4} + 5$ means divide x by 4, then add 4 to the result. (ii) $\frac{x+5}{4}$ means add 5 to x, then divide the result by 4.			Effective communication Problem solving			MK Pri Maths Pupil's Book 6 Page 185
