CamScanner

SECTION B (60 Marks)

41. a) Which ventricle is similar to most arteries in terms of their structure?

b) How does snake venom affect the normal functioning of the heart?

c) In what way does doing physical exercise improve blood circulation?

d) Why is the heart located in the chest cavity?

42. a) Mention any **two** kinds of chemical changes that depend on oxygen to take place.

i) _____

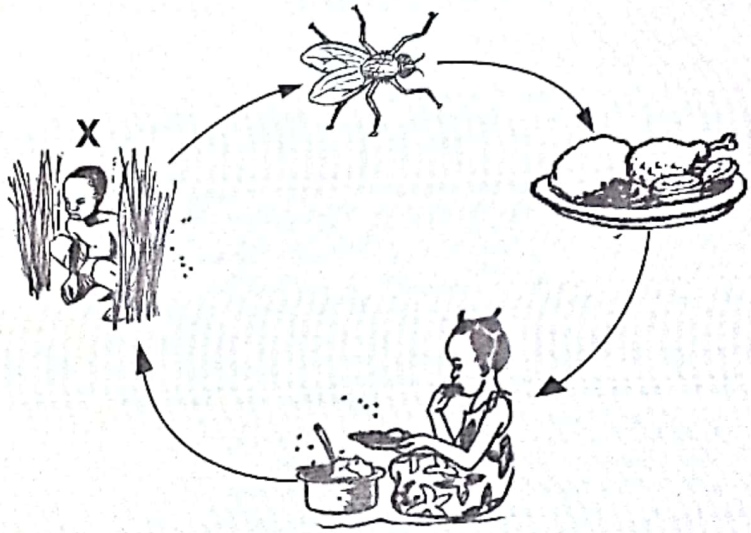

ii) _____

b) State any **two** ways people benefit from chemical changes of fermentation.

i) _____

ii) _____

Study the diagram showing the kind of germ path below and answer the questions in number 43.

43. a) What name is given to the germ path shown above?

b) State the characteristics common to diseases spread through the above germ path.

c) Give any **two** ways how a P.7 child can prevent the spread of germs at **X** when at school.

i) _____

ii) _____

44. a) Which rabbit disease has one of its common signs stated in each case below.

i) Rough fur, and bloody diarrhoea

ii) Difficulty in breathing

CamScanner

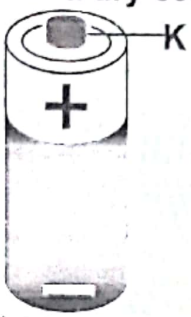

b) State any **one** routine management practice that helps to control rabbit diseases.

c) How does having a wire mesh on a rabbit hutch help to control diseases among rabbits?

45. **Complete the table below correctly.**

Name of joint	Type of movable joint	Location in the body
Elbow joint	_____	Elbow
_____	Ball and socket joint	_____
Wrist joint	_____	Wrist

Study the diagram below of a dry cell and answer the questions in number 46

46. a) Mention any home device that uses dry cells.

b) From which non-metal is the rod marked **K** made.

c) How does a dry cell produce electricity?

d) Why is it not advisable to leave used up dry cells in the reach of children?

47. **Usually when a person gets a fracture on a limb, the first aid given is tying splints onto the fractured part to keep it in one position.**

a) Mention any **two** materials used to make the splint.

i) _____

ii) _____

b) Why should the fractured part be kept in one position?

c) Which kind of foods are recommended to feed a patient with a fracture?

48. In **four** sentences, explain the steps followed to find out whether cooking oil is a floating substance.

i) _____

ii) _____

iii) _____

iv) _____

CamScanner

49. a) In which part of the tooth do we find;
i) living cells and channels through which the tooth receives food

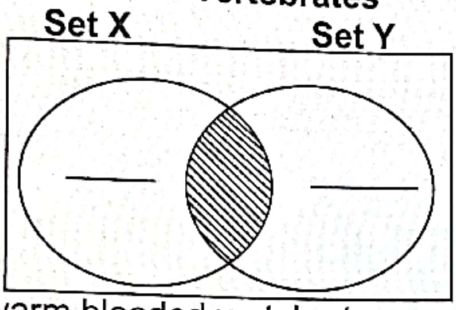

ii) blood capillaries that supply food and oxygen to the tooth.

b) Why is it not advisable to have a habit of drinking too hot or cold substances?

c) Which part of the teeth is commonly affected by gingivitis?

50. **Study the Venn diagram and answer the questions about it correctly.**

ε = vertebrates

Key
Set **X** – warm blooded vertebrates
Set **Y** – cold blooded vertebrates

a) State any **one** group of the universal set which belongs to set
i) **X** only
ii) **Y** only

b) State the common characteristics to animals of set **X** and set **Y** that can be placed in the shaded region on the venn diagram.

c) Why can't Molluscs be members of the universal set?

51. a) Which method of extracting honey involves
i) melting the honey combs in warm water?

ii) squeezing honey combs wrapped in a cloth?

b) State any **two** ways how bee keepers maintain the quality of honey after extracting it from the combs.
i)
ii)

52. a) State the reasons why each of the following organs named below is said to belong to the digestive system
i) Liver

ii) Pancreas

CamScanner

b) In which one way does hydrochloric acid promote digestion of food in the stomach?

_____

c) Why does the walls of the alimentary canal produce mucus?

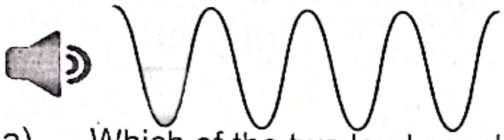

_____

The diagrams below show, two loud speakers producing musical sound. Study and answer the questions about them.

Loud speaker M

Loud speaker N

53 a) Which of the two loud speakers is producing musical sound of high pitch?

_____

b) Give a reason for the answer you have given in part (a) above.

_____

c) How does cold weather reduce pitch of sound produced by musical instruments like drums?

_____

d) Which alloy is used to make musical instruments that make up a brass band.

_____

54. a) State the importance of each part of a toilet named below

i) Cistern

_____

ii) septic tank

_____

b) Give any **two** problems that may be faced by a school that uses a toilet system.

i) _____

ii) _____

55. **Match the animals with their young ones.**

Animals	**Young ones**
Elephant	Kitten
Sheep	Puppy
Dog	Calf
Cat	Lamb
	Kid

i) Elephant _____

ii) Sheep _____

iii) Dog _____

iv) Cat _____
