BROAD EXAMINATIONS®

P.7 INTEGRATED SCIENCE EXAMINATION

MID - TERM I 2026

Time allowed: 2 hours 15 minutes.

Candidate's Name.....

Candidate's Signature: .....

School Name: .....

Read the following instructions carefully:

1. This paper is made up of two sections: **A** and **B**.
2. Section **A** has **40** questions (**40 Marks**)
3. Section **B** has **15** questions (**60 Marks**)
4. Answer **ALL** questions in both sections **A** and **B**.
5. All answers must be written in the space provided in blue or black ball point pens and ink. **Only diagrams should be done in pencil.**
6. Unnecessary crossing of answers will lead to loss of marks.
7. Any handwriting, which cannot be easily read, may lead to loss of marks.
8. Do **not** fill anything in the boxes indicated for Examiners' use only.

SECTION A (40 MARKS)

1. Name any **one** natural source of sound in the environment.

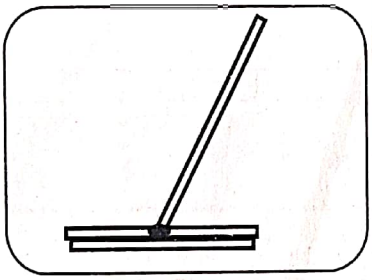

2. State the name given to the special container where vaccines are kept.

3. State any **one** way in which the use of a switch and fuse can be similar in an electric circuit.

4. Mention the disease of rabbits characterized by diarrhoea with blood.

5. State any **one** structural difference between a toad and a frog.

The diagram below shows a sanitary equipment used in cleaning our homes. Use it to answer questions 6 and 7.

6. Name the sanitary equipment drawn aside.

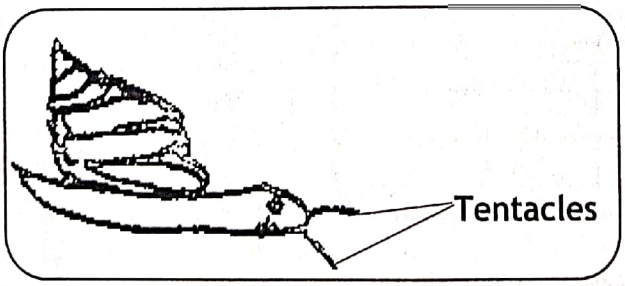

7. State the use of the above sanitary equipment in promoting sanitation at home.

8. Mention any **one** device used to reproduce sound.

9. Which part of the tooth contains nerve cells?

10. Where in the alimentary canal of humans does chemical digestion of proteins begin?

The diagram below shows a common organism in the environment. Use it to answer questions 11 and 12.

11. Name the group of invertebrates to which the above organism belongs.

CamScanner

12. State any **one** function of tentacles on the body of the above organism.

13. Write the collective name given to the small stones found in the gizzard of a bird.

14. State a clear reason why shearing in sheep is commonly done during dry season.

15. Write down any **one** reason why a boarding school should have a fire extinguisher.

16. Name the type of change which occurs when an egg breaks.

17. Mention the property of air that enables oil company workers to siphon petrol from underground.

18. State the function of synovial fluid found at the joints?

19. State the reason of stirring during the preparation of oral Rehydration solution.

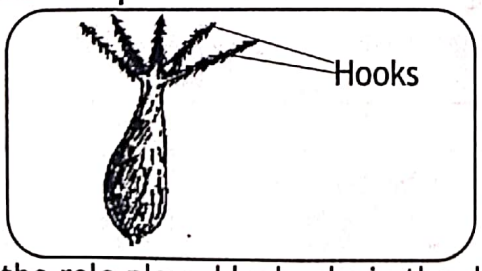

20. Name the group of musical instruments which produce sound by vibration of the beaten surfaces.

21. State the way through which deciduous plants reduce the rate of transpiration the during dry season.

22. Which food value is obtained from eating sweet potatoes?

23. Give the function of the carbon rod in a dry cell.

The diagram below shows a blackjack fruit commonly found in the environment. Use it to answer question 24.

24. State the role played by hooks in the dispersal of the blackjack seeds.

CamScanner

25. Mention the element of PHC that is promoted when PIASCY posters are displayed in the school compound.

26. **In the space below, draw and name the first aid equipment used to carry the casualty who is unable to walk.**

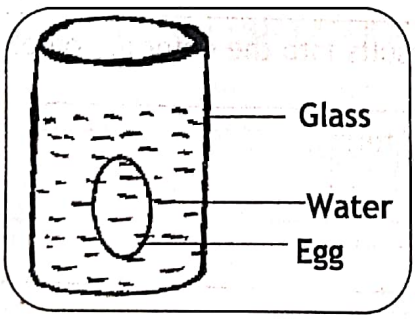

27. State any **one** way earthworms benefit from soil.

28. Write down any **one** advantage of using vegetative propagation to crop farmers.

29. Mention any **one** crop growing practice that controls population of plants in the garden.

30. Name any **one** example of a shelled reptile.

The diagram below shows an egg which was dipped in water by a P.5 pupil. Use it to answer question 31.

31. State what the experiment above proves about an egg.

32. State the difference between drug abuse and drug misuse.

33. Give any **one** function of yeast during the making of bread.

CamScanner

34. Mention any **one** common sign of diarrhoeal diseases in humans.

35. State a clear reason why a balloon bursts when exposed in sunshine for a long time.

36. Give any **one** way planting of grass helps to control soil erosion in the school compound.

37. Mention any **one** exotic breed of goats kept for milk production.

38. Give **one** reason why the beekeeper should consider distance to the water source when siting bee hives.

39. State any **one** reason why distilled water does not conduct electricity.

40. Write any **one** source of food in the environment.

SECTION B (60 MARKS)

41. (a) Apart from the heart, give any other **two** components of the circulatory system.
    (i)
    (ii)
    (b) State the role of the heart in the functioning of the circulatory system.

    (c) Name the circulatory disease that results into the deformation of red blood cells.

42. (a) Explain the meaning of the following terms.
    (i) Heat

    (ii) Temperature

    (b) State any **two** importance of heat transfer by convection in our daily lives.
    (i)
    (ii)

43. (a) Give the meaning of the term "dicotyledonous plants".

CamScanner

(b) State any **two** examples of dicotyledonous plants.

(i) _____

(ii) _____

(c) What type of root system do dicotyledonous plants have?

_____

44. **Match the terms used in sound energy in A to their meanings in B.**

A	B
Pitch	Reflected sound we hear
Volume	Number of vibrations made per second
Frequency	Highness or lowness of sound
Echo	Loudness or softness of sound.

(i) Pitch _____

(ii) Volume _____

(iii) Frequency _____

(iv) Echo _____

45. (a) Mention the gas in the atmosphere which occupies 0.97%.

_____

(b) State any **two** ways air can be important in the environment.

(i) _____

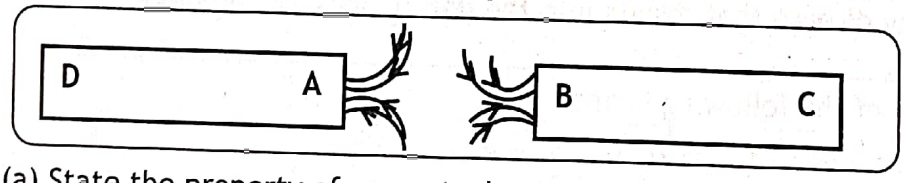

(ii) _____

(c) Give any **one** way planting of trees helps to purify air.

_____

_____

The diagrams below show two bar magnets which were brought nearer each other by a P.7 pupil. Use them to answer question 46.

46. (a) State the property of magnets demonstrated above.

_____

_____

(b) Name the poles marked;

(i) A _____

(ii) C _____

(c) State **one** application of magnets in our daily activities.

_____

47. (a) Write down any **two** vegetable crops which are first planted in a nursery bed.

(i) _____

(ii) _____

CamScanner

(b) Hardening off is one of the activities done to care for seedlings in a nursery bed. How is hardening off important to seedlings in a nursery bed?

_____

_____

(c) Apart from hardening off, give **one** other way of caring for seedlings in a nursery bed.

_____

48. (a) Give any **two** factors that may lead to weakened body immunity in humans.

(i) _____

(ii) _____

(b) State any **one** effect of weakened body immunity.

_____

(c) Give any **one** way in which a pregnant woman can acquire artificial immunity.

_____

49. (a) Write down any **two** cattle farm practices that cause harm to cattle.

(i) _____

(ii) _____

(b) State any **one** way paddocking helps to control tick borne diseases on a farm.

_____

_____

(c) Write any **one** product got from milk.

_____

50. (a) Write down any **two** common ways through which HIV/AIDS spreads in humans.

(i) _____

(ii) _____

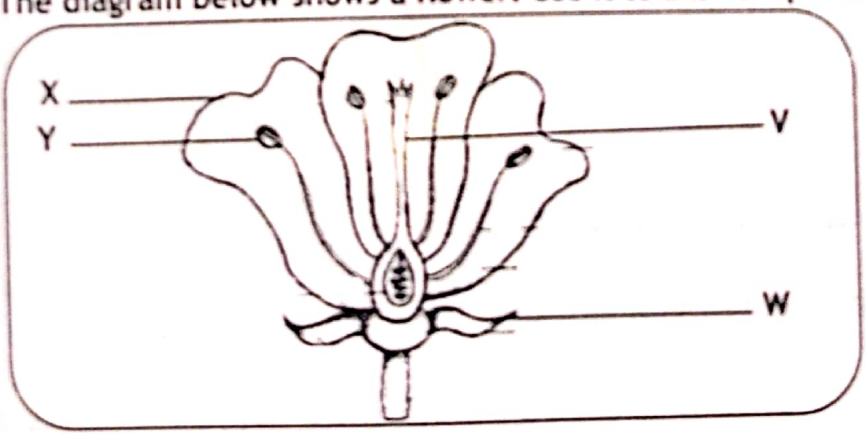

(b) Name the type of germ that causes HIV/AIDS.

_____

(c) How best can HIV positive mothers prevent their newly born babies from acquiring HIV?

_____

The diagram below shows a flower. Use it to answer question 51.

51. (a) Name the part marked Y.

_____

CamScanner

(b) State **one** function of the parts marked V and W.

(i) V _____

(ii) W _____

(c) How is part X able to attract pollinators?

_____

52. (a) Define the term exoskeleton.

_____

_____

(b) Give any **two** functions of bones in the human body.

(i) _____

(ii) _____

(c) Mention the type of skeleton that is possessed by caterpillars.

_____

53. (a) Give any **one** way in which you can identify whether a snake is poisonous or not.

_____

_____

(b) Give any **two** examples of non-poisonous snakes.

(i) _____

(ii) _____

(c) State a clear reason why a python licks its prey before swallowing it.

_____

_____

54. (a) Sate any **two** examples of chemical changes in the environment.

(i) _____

(ii) _____

(b) Give any **one** way in which chemical changes can be important to people.

_____

_____

(c) State **one** way chemical changes are similar to biological changes.

_____

_____

55. (a) Give any **two** examples of natural family planning methods.

(i) _____

(ii) _____

(b) Give any **one** advantage of using natural family planning methods.

_____

(c) State any **one** reason why some parents produce many children.

_____

_____
