CamScanner

31. Mention one way plants with weak stem climb others.

_____

The diagram below shows a domestic animal. Use it to answer questions 32 and 33.

32. Name the habitat of the above animal.

_____

33. State any one reason why a farmer keeps the above animal.

_____

34. How is a rake important on a farm?

_____

35. Which body sense enables a person to known that there is no sugar in the tea?

_____

36. State the important of ventilators on a house.

_____

37. State the method by which irish potatoes are propagated.

_____

38. State one importance of giving first aid to casualties.

_____

39. Why are school children advised to abstain from sex?

_____

40. How are projects like poultry important to a school?

_____

SECTION B

41a) Name the type of soil with the smallest particles.

_____

b) State any one organism that takes part in soil formation.

_____

c) Write down two human activities that may lower the fertility of soil.

i) _____

ii) _____

CamScanner

42a) What is a balanced diet?

b) State the importance of eating a balanced diet.

c) Mention any two diseases caused by poor feeding.

i)

ii)

43a) Give any one example of;

i) Biological change

ii) chemical change

b) Why is freezing referred to as a physical change?

c) State any one similarity between a chemical change and a biological change.

44 a) Give any one agent of pollination in flowers apart from insects.

b) Mention any one characteristic of wind pollinated flowers.

c) State the two types of pollination.

i)

ii)

45. Study the table below and answer correctly.

A	B
Childhood immunisable disease	Body part affected
Tetanus	Muscles
Tuberculosis	Skin
Measles	Lung
Hepatitis B	liver

a) Tetanus

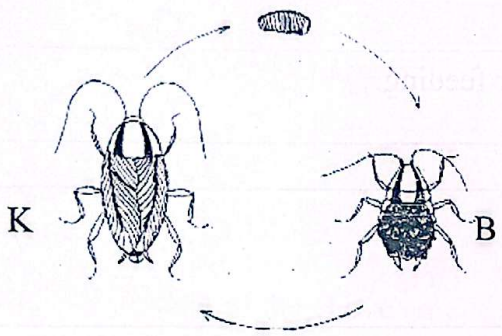

b) Hepatitis B

c) Tuberculosis

d) Measles

CamScanner

46. The diagram below shows the life cycle of a vector. Use it to answer the questions that follow.

a) Give the insect that undergoes the life cycle shown in the diagram above.

b) Name the stage marked B

c) What diseases is spread by stage marked K in man?

d) Mention one way of controlling stage K.

47a) Write PHC in full.

b) Write down the element of PHC people in a community promote when they carry out the following activities

i) brushing teeth every after a meal

ii) collecting rubbish from the environment

c) Mention one problem people in a community solve through promoting PHC.

48. Match list A with list B correctly

A	B
a) hydrotropism	chemicals
b) chemotropism	light
c) photosynthesis	water
d) geotropism	gravity

CamScanner

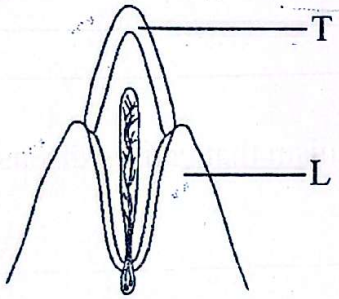

a) Hydrotropism _____

b) Chemotropism _____

c) Photosynthesis _____

d) Geotropism _____

49. Below is a diagram of a human tooth. Study it and answer questions that follow.

a) Identify the type of tooth shown above.

_____

b) Name parts marked T and L

i) T _____

ii) L _____

c) How useful is the above tooth to carnivorous?

_____

50a) Give any two ways a bee keeper can care for bees in the apiary.

i) _____

ii) _____

b) State the importance of a queen excluder in a modern bee hive.

_____

c) What name is given to the food that a queen bee feeds on?

_____

51a) Give the meaning of a wetland.

_____

b) How does a potter benefit from a wetland?

_____

c) Mention any two crops grown in a wetland.

i) _____

ii) _____

CamScanner

52. You are provided with the following items, a packed of milk, tea, clean saucepan, water, a sieve and a red hot charcoal stove.
Explain how you would provide tea for drinking.

(4 Marks)

53a) What term describes the tinny living organism that causes diseases to animals?

b) Give any one danger of bacteria to people.

c) Name any two childhood immunisable diseases caused by virus in children.

i)

ii)

54a) Write down any two ways a primary four pupil can make use of shadows.

i)

ii)

b) State any two ways shadows can be dangerous in the environment.

i)

ii)

55a) How can Peter make dirty water from the dam clean?

i)

ii)

b) Why is distilled water not good for drinking?

c) State why water made clean by filtration not good for human consumption?
