BROAD EXAMINATIONS®

P.7 INTEGRATED SCIENCE EXAMINATION

TRIAL SET II TERM I 2026

Time allowed: 2 hours 15 minutes.

Candidate's Name.....

Candidate's Signature: .....

School Name: .....

Read the following instructions carefully:

1. This paper is made up of two sections: **A** and **B**.
2. Section **A** has **40** questions (**40 Marks**)
3. Section **B** has **15** questions (**60 Marks**)
4. Answer **ALL** questions in both sections **A** and **B**.
5. All answers must be written in the space provided in blue or black ball point pens and ink. **Only diagrams should be done in pencil.**
6. Unnecessary crossing of answers will lead to loss of marks.
7. Any handwriting, which cannot be easily read, may lead to loss of marks.
8. Do **not** fill anything in the boxes indicated for Examiners' use only.

SECTION A (40 MARKS)

1. Write the name given to the part of the body where two or more bones meet.

2. Name the commonest method of rearing birds used in the villages.

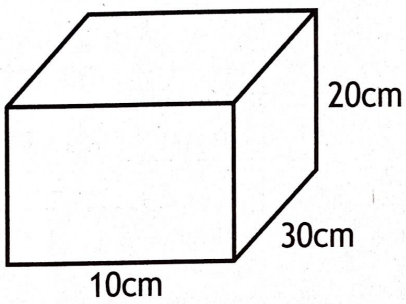

3. How are eggs of amphibians fertilized?

4. State any **one** example of biological changes in the environment.

5. Give any **one** factor which may affect the pitch of sound.

The diagram below is of a cuboid. Use it to answer question 6.

6. Calculate the volume of the cuboid.

7. Name the long bone found in the thigh of a human.

8. Give the reason why measles vaccine is administered at 9 months.

9. How is the left ventricle of the heart adapted to the function of pumping blood through a long distance with great pressure?

10. What happens to food when it reaches the stomach during digestion?

11. In which **one** way is smoking harmful to the body of an active smoker?

12. State the importance of scare crows in the practice of caring for crops in the garden.

13. Mosses and ferns are non-flowering plants, how do they reproduce?

14. How is the process of weathering important in the environment?

15. Give any **one** importance of seed dispersal to plants.

16. What form of energy makes matter to appear hot or warm?

17. Name the instrument used to detect the presence of mastitis in cattle.

18. State the mode of reproduction in bacteria.

19. Give any **one** way through which man can benefit from animals as resources.

20. State the importance of docking sheep in animal management.

21. What happens to lungs when one breathes in?

22. How are voluntary muscles different from involuntary muscles?

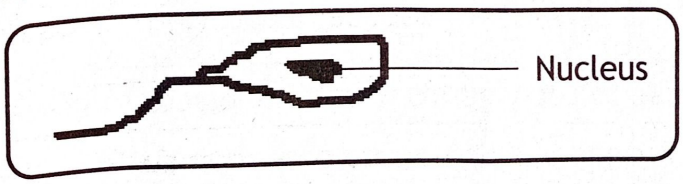

23. State a reason why we boil water for drinking.

24. Name the type of accident where a bone is cracked or broken.

25. State **one** structural difference between an ordinary pit latrine and a VIP latrine.

26. Write down any **one** disadvantage of using bottle feeding in caring for babies.

The diagram below is of a reproductive cell in humans. Use it to answer question 27.

27. Name the reproductive cell shown in the diagram above.

EXCELLENCE, AVOID MISSING BROAD HOLIDAY PACKAGES, WORK BOOKS & PAST PAPER BOOKLETS

28. Suggest any **one** danger of poor disposal of human wastes in the environment.

_____

29. Mention any **one** example of animals which belong to the group of myriapods.

_____

30. Name the female sterile bee in the bee hive.

_____

31. Give any **one** example of wind musical instruments.

_____

32. State **one** reason why a log of dry wood floats on water.

_____

_____

33. State the function of platelets as a component of blood in the human body.

_____

34. Give any **one** way babies acquire natural immunity after birth.

_____

35. State the role played by cold water during distillation of alcohol.

_____

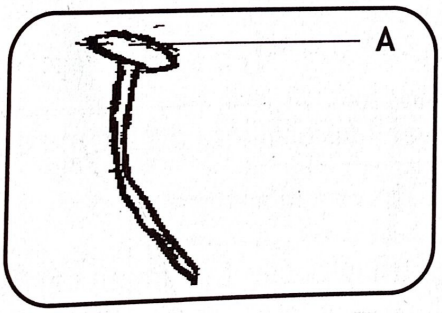

_____

36. Explain what grafting is as used in artificial plant propagation.

_____

_____

The diagram below shows a male reproductive part of a flower. Use it to answer question 37.

37. Name the part marked **A**.

_____

38. Mention any **one** product obtained from milk.

_____

39. Give a reason why a housefly is able to carry germs from dirty places to uncovered food.

_____

_____

40. State **one** difference between mammals and birds in terms of reproduction.

_____

_____

SECTION B (60 MARKS)

41. (a) Name any **two** exotic breeds of cattle kept for milk production.

(i) _____

(ii) _____

(b)Which type of cattle is kept for the following?

(i) providing labour on farms _____

(ii) providing meat _____

42. (a) Name the enzyme contained in saliva produced by the salivary glands.

_____

(b) What important process takes place in each of the following organs of the digestive system?

(i) ileum_____

(ii) colon_____

(c) Mention any **one** disorder of the digestive system.

_____

43. (a) Write down any **two** types of essential drugs.

(i) _____

(ii) _____

(b) Give **two** reasons why it is not advisable to buy drugs from local shops.

(i) _____

(ii) _____

44. **Study and complete the immunization schedule in the table below.**

Vaccine	**Disease**	**Age**
Polio vaccine	Poliomyelitis	(i) _____
(ii) _____	Measles	(iii) _____
BCG vaccine	(iv) _____	At birth

45. (a) Give any **two** respiratory diseases caused by smoking.

(i) _____

(ii) _____

GET MISSING BROAD HOLIDAY PACKAGES, WORK BOOKS & PAST PAPER BOOKLETS.

(b) Suggest any **two** health habits done to maintain the respiratory system in proper working condition.

(i) _____

(ii) _____

46. (a) Write down any **two** materials which can lower the quality of water when poorly disposed of.

(i) _____

(ii) _____

(b) Give any **two** possible ways which can be used to conserve water.

(i) _____

(ii) _____

47. (a) Name any **two** methods used to extract honey from honey combs.

(i) _____

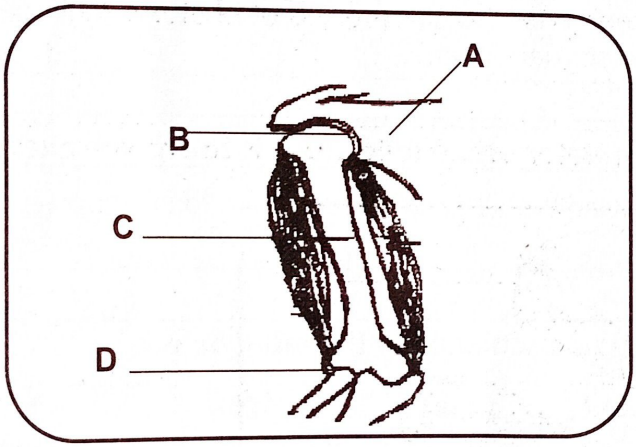

(ii) _____

(b) Mention any **two** needs of a person going to harvest honey.

(i) _____

(ii) _____

The diagram below shows the upper part of the arm. Use it to answer question 48.

48. (a) Name the bones represented by letters;

(i) A _____

(ii) C _____

(b) Name the type of joint at;

(i) B _____

(ii) D _____

49. (a) Write down any **two** living organisms which use soil as their habitats.

(i) _____

(ii) _____

(b) Give any **two** importance of living organisms in the soil.

(i) _____

(ii) _____

50. (a) State any **one** cause of convulsions.

_____

_____

(b) What first aid can you give to a convulsing person?

_____

_____

(c) Give any **two** reasons for giving first aid.

(i) _____

(ii) _____

51. (a) Write down any **two** raw materials necessary for photosynthesis to take place.

(i) _____

(ii) _____

(b) Name the form of energy which acts as a condition for photosynthesis to take place.

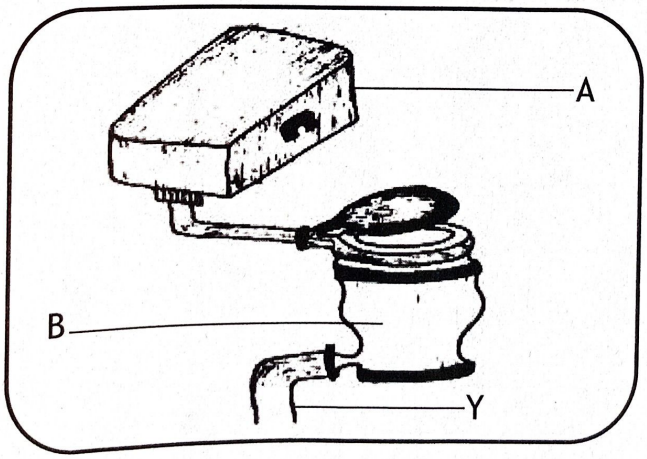

_____

(c) State the role of chlorophyll during the process of photosynthesis.

_____

_____

The diagram below is of a water borne toilet. Use it to answer question 52.

52. (a) Name the parts represented by letters;

(i) **A** _____

(ii) **B** _____

(b) State the function of part marked **A**.

_____

_____

(c) Where does part **Y** lead to?

_____

53. (a) What term describes the vertical arrangement of soil layers?

_____

(b) Which layer of soil is favourable for crop growing?

_____

(c) Suggest any **two** ways of improving soil fertility.

(i) _____

(ii) _____

54. (a) Write down any **two** dangers of teenage pregnancies.

(i) _____

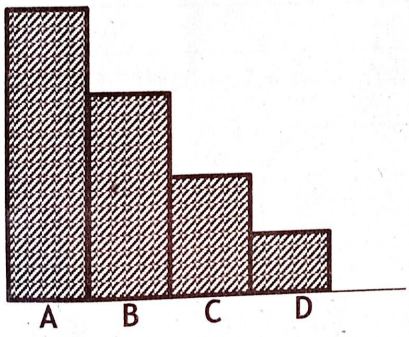

(ii) _____

(b) Mention any **two** life skills which can be used to prevent teenagers against the dangers of teenage pregnancies.

(i) _____

(ii) _____

The graph below shows components of air. Use it to answer question 55.

55. (a) Name the components of air represented by letters;

(i) **A** _____

(ii) **B** _____

(b) How useful is the component marked **B** in the environment?

_____

_____

(c) Give **one** instrument which uses the gas represented by letter **D**.

_____
