KAMPALA PRIMARY SCHOOLS HEADTEACHERS' EXAMINATIONS COMMITTEE (KAPSHA)

PRIMARY SIX END OF TERM II EXAMINATIONS 2023

INTEGRATED SCIENCE

TIME ALLOWED: 2 HOURS 15 MINUTES

PUPIL'S NAME: _____

SCHOOL: _____

DIVISION: _____

DO NOT OPEN THIS BOOKLET UNTIL YOU ARE TOLD TO DO SO.

Read the following instructions carefully.

1. This paper is made up of two sections: **A** and **B**
2. Section **A** has 40 questions (40 marks)
3. Section **B** has 15 questions (60 marks)
4. Answer ALL questions in both sections **A** and **B**
5. ALL answers **MUST** be written in Blue or Black Ball - point pen or ink
6. Un-necessary alteration of work may lead to loss of marks.
7. All diagrams MUST be drawn in pencils.
8. Any handwriting that cannot be easily read may lead to loss of marks.
9. Do **not** fill any thing in the boxes shown ***"For Examiner's use only".***

FOR EXAMINER'S USE ONLY

QN. NO.	*MARKS*	*SIGN*

TURN OVER

SECTION A

1. Name any ***one*** example of a monocotyledonous plant.

   .....

2. How does heat travel through liquid state?

   .....

3. Give ***one*** importance of feathers to birds.

   .....

4. Why isn't oxygen used in fire extinguishers?

   .....

5. Mention ***one*** sign of measles.

   .....

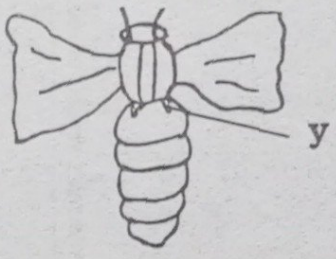

6. Give any ***one*** reason why bees swarm.

   .....

7. State ***one*** way of making water clean.

   .....

The diagram below is of an insect, use it to answer question 8.

8. Name part marked **y**.

   .....

9. Give ***one*** example of a wind instrument.

   .....

10. Why are reptiles regarded to as cold blooded animals?

    .....

11. Give ***one*** similarity between burning and rusting.

    .....

12. Write down ***one*** effect of alcohol to an individual.

    .....

13. How are earthworms useful to vegetable farmer?

    .....

14. Why are bats regarded to as nocturnal mammals?

    .....

15. Identify the mode of reproduction in both amoeba and bacteria.

    .....

Below is a diagram of a human tooth, use it to answer the questions that follow.

16. Name the tooth shown in the diagram.

    .....

17. How is the above tooth adapted to its function?

    .....

18. Give ***one*** similarity between fish and amphibians in terms of reproduction.

    .....

19. Name the poultry vice controlled by debeaking.

    .....

20. Give ***one*** characteristic feature of a clinical thermometer.

    .....

21. How are echoes reduced in theatres and cinema halls?

    .....

22. State the function of the ossicles found in the middle ear.

    .....

23. To which state of matter is paraffin?

    .....

24. How do fungi like mushrooms obtain their food?

    .....

25. Mention ***one*** solute used in making ORS.

    .....

26. Why should babies be weaned at **6 months**?

    .....

27. Give the importance of regular ironing of clothes before wearing.

    .....

28. When are splints used during first aid?

    .....

29. To which group of arthropods to spiders and scorpions belong?

    .....

30. Name ***one*** practice that helps to control the spread of corona virus in the community.

.....

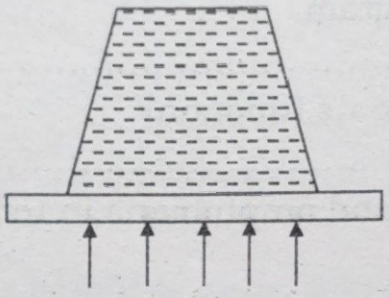

31. Give ***one*** sign of heat period in cattle.

.....

32. How do sea mammals keep warm in water?

.....

The diagram below shows a property of air.

33. State the property of air shown above.

.....

34. Give any ***one*** example of an animal fibre.

.....

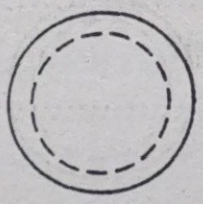

35. How is the ileum important to the digestive system?

.....

36. Mention any ***one*** vulnerable group of people.

.....

Below is a structure of a blood cell.

37. Give the function of the above blood cell.

.....

38. State any ***one*** effect of heat on matter.

.....

39. Name ***one*** principle of ***PHC***.

.....

40. Give ***one*** example of a drug of dependence.

.....

SECTION B

41. a) Give the importance of the semi circular canals in the ear.

.....

b) Mention any ***one*** disease of the ear.

.....

c) State any ***one*** cause of partial deafness.

.....

d) Give ***one*** way of proper maintenance of the human ear.

.....

42. a) What are draught cattle? .....

.....

b) Give any ***one*** example of draught cattle.

.....

c) State the importance of cross breeding cattle.

.....

d) Identify any ***one*** cattle disease.

.....

43. a) Give ***one*** example of a root tuber.

.....

b) Name any ***one*** example of a pest for root tubers.

.....

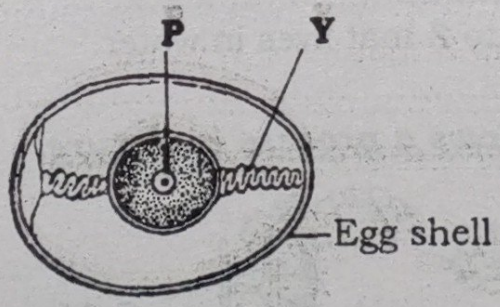

c) Mention ***one*** method of propagation in root tubers.

.....

d) State the main food value obtained from root tubers.

.....

44. ***Use the diagram below to answer the questions that follow.***

a) Name part **Y**. .....

b) What will part **P** develop into during incubation?

.....

c) Give ***one*** function of the egg shell.

.....

d) What food value do we get by eating eggs?

.....

.....

45. a) Who is a casualty? .....

.....

b) Mention any ***one*** cause of accidents at school.

.....

c) State any ***two*** reasons for giving first aid.

i) .....

ii) .....

46. a) Name ***one*** type of soil.

.....

b) List down any ***two*** components of soil.

i) ..... ii) .....

c) Name ***one*** process by which soil is formed.

.....

47. ***Use the lists of organism below to answer questions that follow.***

X	Y	Z
Spider	Lizards	Monkeys
Ticks	Fish	Whale
Mites	Snakes	Lions
Scorpions	Toads	Chimpanzees

a) What general name is given to animals in group **X**?

.....

b) How are animals in group **Y** similar in terms of reproduction?

.....

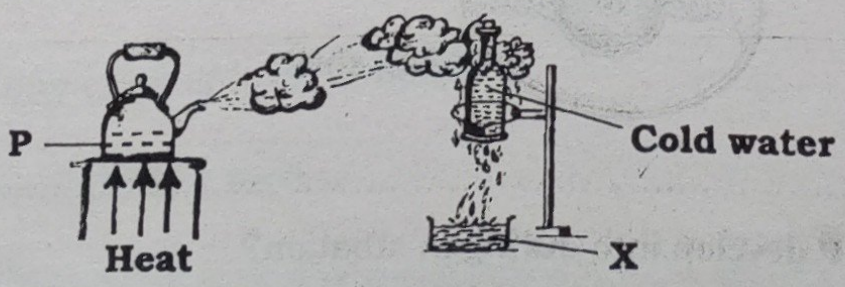

c) In which way are animals in group **Z** different from those in group **X** and **Y**? .....

.....

d) Name the animal in group **Z** that lives in water.

.....

48. ***The diagram below shows a process in nature.***

a) Name the natural process in the environment similar to the one above.

.....

b) Give the physical process at point marked **P**.

.....

c) Why is cold water used in the above experiment?

.....

d) State the advantage of the above process in the environment.

.....

49. a) What are renewable resources? .....

.....

b) Give any ***two*** examples of non-renewable resources.

i) ..... ii) .....

c) What role is played by **NEMA** as regards to environmental management?

.....

50. a) Give any ***one*** example of a chemical change.

.....

b) State any ***two*** characteristics of chemical changes.

i) .....

ii) .....

c) Mention any ***one*** example of a biological change.

.....

51. a) State ***two*** excuses why people smoke.

i) .....

ii) .....

b) Name the poisonous drug contained in tobacco.

.....

c) Give ***one*** effect of smoking to a pregnant mother.

.....

52. a) List down ***two*** examples of exotic breeds of rabbits.

i) ..... ii) .....

b) Give ***one*** reason why people keep rabbits.

i) .....

ii) .....

c) Mention ***one*** common disease between rabbits and poultry.

.....

53. a) What is photosynthesis?

.....

.....

b) Give ***two*** raw materials for the above process to take place.

i) ..... ii) .....

c) Why is it not advisable to sleep with potted plants in the same room at night? .....

.....

54. ***Match the weather instruments in A with their functions in B correctly.***

A	B
Instrument	Function
i) Windsock	atmospheric pressure
ii) Rain gauge	strength of wind
iii) Six's thermometer	temperature
iv) Barometer	amount of rainfall received

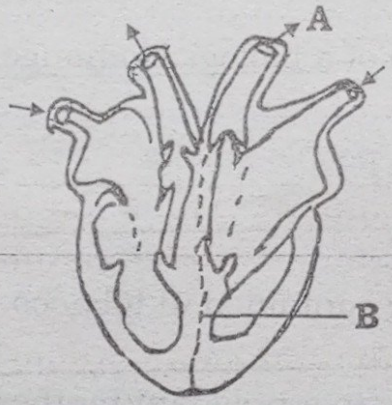

i) Windsock .....

ii) Rain gauge .....

iii) Six's thermometer .....

iv) Barometer .....

55. ***The diagram below shows a human heart, use it to answer the following questions.***

a) Name the part marked with letter **B**. .....

b) Which blood vessel receives blood that has worked in the body?

.....

c) How is blood vessel **A** useful in respiration?

.....

.....

d) Identify ***one*** disease that may affect the above organ.

.....

******GOOD LUCK******

SECTION A

1. Maize, millet, sorghum, rice (reject simsim)
2. By convection
3. For warmth/for flight/ for attraction of the opposite sex/ for incubation of eggs
4. Oxygen supports burning
5. Skin rash/ red eyes/ running nose/ red lips
6. Due to overcrowding, death of a queen bee, when another queen is born, bad smell around, a lot of noise around, direct sunshine into the hive
7. By filtration, by decanting, through distillation,
8. Halters
9. Wind vane, wind sock, anemometer
10. Their body temperatures changes according to the surrounding / environment, they don't have a constant body temperature
11. Both a chemical changes, both need oxygen to take place
12. It causes brain damage, it causes self neglect, it damages the liver
13. It acrates the soil, it improves soil fertility/ humus
14. They become active at night
15. Both reproduce by binary fission/cell division
16. Canine tooth
17. It is sharp and pointed
18. Both reproduce by laying eggs, both undergo external fertilization
19. Egg eating
20. It has c bend/kink, it has a bulb
21. By using soft boards, use of woolen carpets, use of heavy curtains, use of bamboo sticks
22. They amplify the sound vibrations
23. A liquid
24. By the of the mycelium/ hyphasis, by feeding on dead decaying matter, saprophtically
25. salt/ sugar
26. Breast milk alone is not enough for the baby
27. To kill some germs, to remove parasites like lice, to appear smart
28. When one has fractured limbs
29. Arachnids
30. Wash hands with soap and clean water, keep social distance, by sanitizing, use of face masks
31. It makes a lot of noise, the animal is restless, the animal mounts others, the animals loses appetite
32. They have a blubber
33. Air exerts pressure
34. Silk, wool, mohair, fur
35. It has the villi, finger like structures, it is long and coiled, it is covered with a thin layer
36. The sick, invalid, the disabled, the convulscents, breast feeding mother, pregnant mothers, babies
37. To transport oxygen around the body
38. Matter expands, evaporates, may melt, may get burnt
39. Participation for all, health services for all, health for all, health services should be affordable
40. Alcohol, cocaine, heroine, marijuana, khat, nicotine etc

SECTION B

41. a) For body balancing
    b) Otitis – boils
    c) Too much wax in the ear, a lot of noise, heavy blows/slaps
    d) By cleaning with a soft cloth, by bathing properly
42. a) They are animals that provide labour on the farm.
    b) Zebu, Boran, Ankole
    c) To improve on the local breeds of animals
    d) Mastitis, Rinderpest, East coast fever, Anthrax, foot and mouth, Brucellosis
43. a) Cassava, sweet potatoes, carrots, turnips
    b) Moles, rats, rabbits, squirrels, monkeys
    c) Use of seeds, use of vines, use of stem, cuttings
    d) Carbohydrates
44. a) Y - Chalaza
    b) It develops into a chick
    c) For protection of internal parts, for exchange of gases
    d) Proteins
45. a) A person who has got an accident.
    b) Rough games, playing with sharp objects, careless running
    c) To promote recovery, to reduce pain, to control bleeding, to prepare the injury for further treatment
46. a) Loam soil, clay soil, sand soil
    b) Air/water/humus/living organisms/rock particles
    c) By weathering/decomposition
47. a) X – Arachnids
    b) All lay eggs
    c) Z – reproduce their young ones alive, are warm blooded, breast feed their young ones, have mammary glands
    d) A whale
48. a) Rain cycle
    b) Evaporation
    c) To condense the vapour
    d) It helps in the formation of rain/ it provides water
49. a) These are resources that can be replaced naturally
    b) fossils, petroleum, coal, minerals, rocks
    c) To protect the environment, to control environment pollution
50. a) Burning/digestion/rusting/photosynthesis
    b) A completely new substance is formed/ it is irreversible
    c) Growth, reproduction, germination, moulting, fertilization
51. a) To fit in their peer groups, to appear mature, to concentrate in their work, to warm up themselves
    b) Nicotine
    c) It leads to premature birth, under weight babies
52. a) California rabbits, Chinchilla rabbits, Newzealand white, Rex rabbits, Angola rabbits
    b) For income, for meat, for fur
    c) Coccidiosis, Ear canker, pneumonia, snuffles
53. a) Photosynthesis is the process by which green plants make their own food.
    b)
    c)
54. a) Windsock – strength of wind
    b) Rain gauge – amount of rainfall received
    c) Six's thermometer – temperature
    d) Barometer – atmospheric pressure
55. a) Septum
    b) Venacava
    c) It transports oxygenated blood to all body parts/cells
    d) Heart failure/hyper tension, coronary thrombosis, heart cancer
