NAME……CLASS: ……
SCHOOL……

1. **THEME:** Living Together in our District**.**

Topic: Location of Our District in Uganda**.**
Sub-topic: Maps and Pictures
Learning outcome (What I will be able to know.)
Demonstrates an understanding and use of map making and map reading skills to interpret information

SESSION ONE

Maps and pictures.

How to use this knowledge in my daily life(Relevance)

To enable the child or learner navigate their surrounding such as finding ways to school or a friend's house

Back ground knowledge (what I ready know)

- In the previous class we learnt about,
-Drawing shapes.
-Maps and pictures of different objects.
-Home and its around
-Elements of a good map. Home and its surround

Competences

- Define a map
- Defines a picture
- Describe maps and pictures of different objects
- Discusses similarity between maps and pictures
- Discusses the difference between picture and map

Key Learning principles

- Map- drawn as seen from above.
- Picture- drawn as seen from the side.
- A map is drawing of an object seen from above.
- A picture is a drawing of an object seen from the side

Learner- centered approach:

Imagine you told to draw your home and surround state how you would manage to fit all your thing on a piece of paper

Maps and pictures

Maps

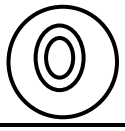

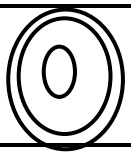

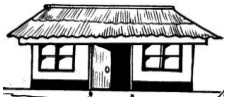

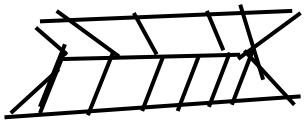

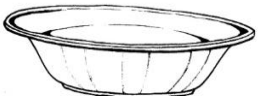

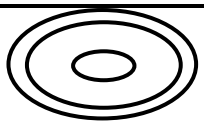

Amp is the representation of an object drawn as seen from above

Amal is a drawing of an objects as seen from above

Picture. Picture is representation of an object drawn as seen from the side.

A Picture is a drawing of an object as seen from the side.

Maps and pictures of different objects

Objects	Picture	Map
Pot		
Tree		
Basin		
House		
plate		

MINI ACTITY

1. _____ **Is the representations of an objects drawn** seen from the above

2. What term is given to the **drawing of an objects as seen from the side**

_____

3. In the space below draw a **map of tree**

4. Name **the representation shown below.**

_____

SIMILARITYBETWEEN MAPS AND PICTURES

- ✓ Both are representations of objects.
- ✓ Both are drawings

DIFFERENT BETWEEN APICTURE AND AMAP.

- A picture is drawn as seen from the side while a map is drawn as seen from above
- A picture is more detailed than a map.
- A picture is easier to understand than a map

MINI ACTIVITY.

Match Correctly

A picture	Has no scale
Amp	Seen from the side
Symbols	Seen from above
Sketch map	**A representation**

MEGA ACTIVITY

1. Give the **meaning** of the following.

a) **A Picture**

_____

b) **A map**

_____

2. How is a **map similar to a picture**

_____

3. Why is it easier for **one to** understand a **picture of an objects than its map?**

_____

4. Draw the **maps of the following objects**

A Cup	A House

5. What **name** is given to a **drawing as seen from atop?**

_____

6. Draw the **map of the object below**

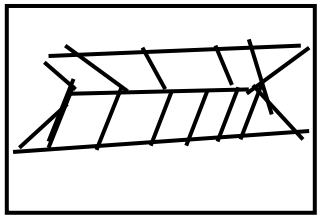

7. **Give any t<u>wo</u>** ways how a **map different from a picture?**

i) _____

ii) _____

8. Which object is **represented by the map below**

z

9. Give any **<u>two</u>** common **characteristics of maps and pictures.**

i) _____

ii) _____

10. Why are **tourist**s **from other countries** given the map of Uganda.

_____

Elements of a map.

(Relevance) To enable the learner identify and explain the elements of a map and understand the purpose of each element and how they work together to promote clear information.

How to use this knowledge in my daily life

<u>Back ground Knowledge) What</u> I already know

- Understanding directions (north south east, west)
- Recognizing maps symbols and legends.
- Ways of locating places

<u>COMPETENCES.</u>

- ✓ Identifies all elements of a map.
- ✓ Understanding the importance of different elements of a map.
- ✓ Discusses the problems a map reader may face when reading a map without the map elements.
- ✓ Understanding map symbols.
- ✓ Discuses reasons why map symbols are used OneMap.

Learner centered approach.

Imagine you are going to read amore or text book. What do you look at to know it the one

Key Learning Principle

Elements of a map - The basic component that make up a map.

Elements are map features/ map symbols.

Map symbols _ Features that are used to represent real objects on a map.

CFHKS: Stands for compass direction, frame, heading, key, scale.

ELEMENTS OF AMAP

- A key
- Scale
- A heading tile.
- A flame

IMPORTANCE OF DIFFERENT ELEMENTS OF AMAP

ELEMENTS	IMPORTANCE
Compass direction	_ It helps to show the direction of place on a map
A title/heading	_ It helps one to know what the map is all about
A key	_It helps a map reader to interpret symbols used on a map
scale	It helps a map reader to calculate the actual ground distance on a map.
A frame	_ It shows the extent of the area represented by the map

Problems a map reader may face when reading a map without the map elements

ELEMENTS MISSING	**The challenge a map reader is like to face**

Without a compass direction	Failure to know the direction of places on a map.
Without tittle/ heading	Failure to know what the map is all about
Without a key	Failure to interpret symbols used on map
Without a scale	Failure to calculate the actual ground distance on a map.
Without a frame	Failure to know the extent of the area represented by the map

QUALITIES OF AGOOD MAP

- A good map should have a key.
- Askey good map should have a compass direction.
- A good map should have a title/ heading.
- A good map should have a scale.
- A good map should have a frame.

MINI ACTIVITY

1. How is a **key important** to person using a map.

   _____

2. Which **challenge** will a **map reader face when using a map without a scale?**

   _____

3._____ helps to show direction of places on a map.

4. **Match correctly**

A key	Explains what the map is about
Scale	Shows the extent of the area by the map
Title	Explains map symbols
Frame	Used to calculate the actual ground distance on map

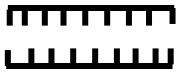

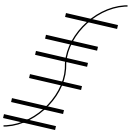

MAP SYMBOLS

Map symbols are features that are used to represent real object on a map

WHY SYMBOLS ARE USED ON MAPS

- ❖ To avoid congestion on the map.
- ❖ To make map reading easy.
- ❖ To ensure neatness of the map.

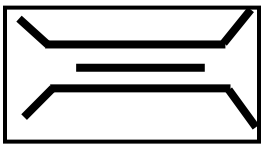

Common symbols used on maps

Rift valley	waterfall	Dam	Bridge	Mountain	Swamp	Railway	Factory	Mountain peak
								
Archaeological	Canal							
								

MINI ACTIVITY

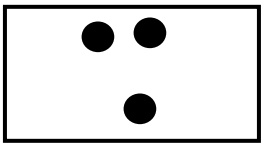

1. Mention any **two** elements of a **good map**
   i) _____ **ii)** _____
2. How are map elements **important to the map reader?**
   _____
3. What **challenge** will one face while **using a map with a frame.**
   _____
4. State any **two qualities** of a good map.
   i) _____
   ii) _____
5. Why are **symbols used** on a map instead of real objects
   _____
6. **Draw a map symbol of an airport in the space below**

7. State the challenge that **one** faced will using a **map without the following.**
   a) Title.
   _____
   b) _____
8. How is the object represented by the map symbol below important to the people

_____

9. Mention any t**wo qualities** of a good map
   i) _____
   ii) _____
10 How is the object represented by the map symbol below important to the country like Uganda.

_____

SESSION THREE

ASCALE

_(Relevance) To enable the learners use scale to estimate distance, measure length and calculate actual sizers of features on a map

How to use this knowledge in my daily life

(**Back ground knowledge)** What I already know

- Elements of a good map
- Map symbols

COMPETENCES

- Describe the different types of scale
- Calculate distance of places using a scale

Key learning principle

Scale ___ helps amp reader to calculate the ground distance on a map.

Aculate map ___ Map drawn to a scale

Sketch map is a map which is not drawn to scale

Learner -centered Approach.

Imagine you want to the find the total number of legs of pupils in your class. What can you do?

Content

A scale helps map-reader to calculate the actual ground distance on a map.

A map reader who reads a map without a scale may fail to calculate the actual ground distance on a map.

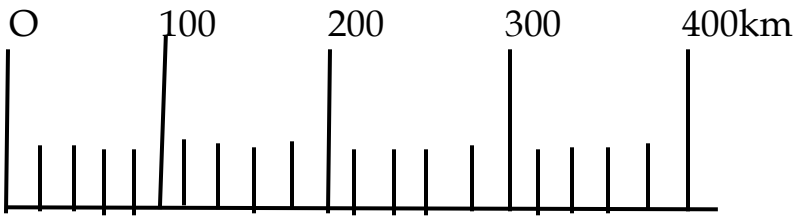

A scale is only found on accurate maps.

Sketch map is a map which is not drawn to scale.

Types of scales used on map

Linear scale

This is the type of scale drawn using lines that are divided into equal parts.

Representative/ fractional scale

This is the type of scale written as mathematical fraction e.g.

$\frac{1}{100km}$ or 1: 100000

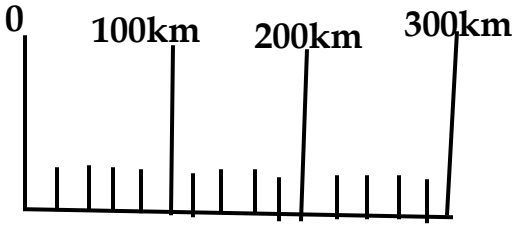

Statement scale

This type of scale can be given as a statement or words e.g 1cm represents 100km. on the ground

Measuring and calculating distances of places using a scale

Examples

1. Find the actual ground distance between town Q and town S if there is a distance of 6cm between the two towns on the map using the scale below

Solution

1cm =100km

6cm=(6x100) km

600km

Therefore, the distance between town q and town s is 600km

2. Find the actual ground distance between Kampala and Jinja if the is a distance of 8cm between the two towns on the map uses the scale 1cm=10km

Solution

1cm= 10km

8cm= (8x10) km

80km

Therefore, the distance from Kampala and Jinja is 80km

MINI ACTIVITY

1. Give the **meaning** of a **map scale**

_____

2. How is **sketch** map **different from an accurate map**

_____

3. Mention the **three** types of **scales you know**

i) _____ ii) _____ iii) _____

4. Calculate the actual ground distance from town A TO B which are 6cm apart. Using the scale below scale = (1=100.

MEGA ACTIVTY

1. Why are **maps drawn by P.4 pupils** referred to as sketch maps?

_____

2. State any **two** types of **scales used on maps**

i) _____

ii) _____

3. Calculate the grouped distance between town W and town Y if there is a distance of 8cm between the two towns on the map. Scale1cm= 10km

4. How is a **scale important** to a map reader on a map.

_____

5. **Apart from** the scale, mention any **two elements of a good map**

i) _____ ii) _____

6. Name the map **symbol below**

7. How do we call the kind of scale **involves mathematical fractions?**

_____

8. **Give the meaning of statement scale.**

_____

9. How is a **scale important** to a pilot while **operating a plane?**

_____

10. The distance between Kampala and masaka **is 6cm** on the map **Calculate the actual ground distance Scale (1cm=400km)**

SESSION TWO

Ways of locating places

(Relevance) How to use knowledge in my daily life

Learner will be able to navigate to their daily community to school work or other regular destinations.

COMPETENCES.

- Defines location.
- Discusses ways of locating places on a map.
- Defines terms related to a compass.
- Discusses compass points.
- Discusses groups of propleg who uses a compass

Key learning principle

Location _ places where something is found local/ traditional way of locating places is by using land marks.

Commonest/traditional way of telling direction is by using the position of the sun.

A compass is an instrument white a compass direction is a symbol

How to locate places

Location is the places where something is found.

Location refers to the position of something or a place.

Ways of the telling direction of places in the Community

- By using the position of the sun.
- By using the compass
- By using shadows
- By using land marks

Ways of locating places on a map.

- By using the grid reference system (lines of latitude and lines of longitude.)
- By using compass direction
- By sing neighbouring places
- By using physical features.

MINI ACTIVITY

1. Give the **meaning of location.**

_____

2. Name the **traditional way** of locating places in **our community**

_____

3. Why are **tourists from other countries** given a compass.

_____

4. Draw a **compass rose** in the space provided below.

Using Compass to find direction of places

- A Compass is an instrument used to show direction of places.
- A Compass direction a symbol used to show direction of places on a map.
- A Compass needle always points to the North when a compass is at rest

The determinant point of a compass is North

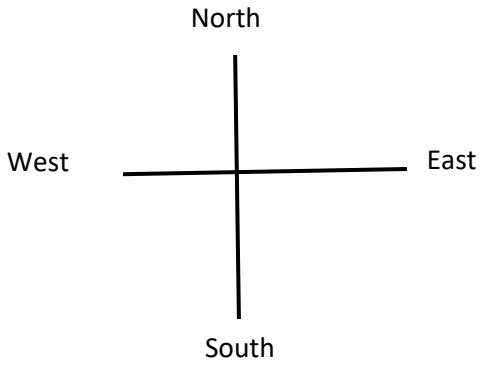

A Compass rose is a drawn compass

- Compass point
- Cardinal points
- Semi- cardinal points

Cardinal points of compass.

Cardinal points are the four major points of a compass They include,

- North
- South
- East
- West

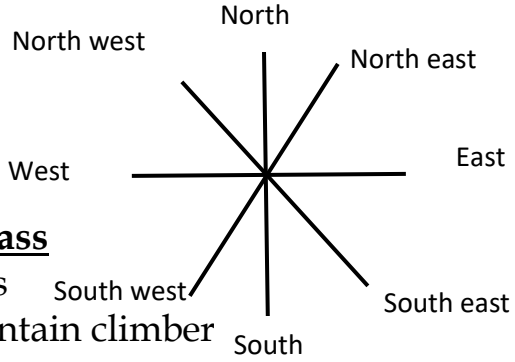

Semi- cardinal points of a compass.

- ❖ These are points that lie between the cardinal points.
- ❖ They lie at 45° the cardinal points
- ❖ They can be also called cardinal points or Secondary points.

They include

- ✓ Northeast
- ✓ South east
- ✓ Northeast
- ✓ Southwest

Groups of people who use a compass

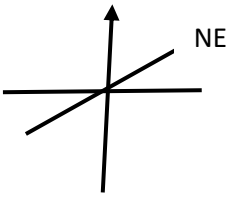

- ➢ Railway drivers pilots
- ➢ Tourists. Mountain climber
- ➢ Ship captains Sailors
- ➢ Souts and girl guides.
- ➢ Solders

MINI ACTIVITY

1. Give the **difference between semi cardinals and Carinal point.**

_____

2. Name the **cardinal point opposite to the one indicated below**

_____

MEGA ACTIVITY

1. Mention the **commonest way of telling direction** in your district

_____

2. Give any **one** way of **locating places on a map you know**.

_____

3. Name the **direction to which compass needle points** when it is at rest.

_____

4. How is a **compass direction different from a compass.**

_____

5. Why do you think **mountain climbers are given compass.**

_____

6. State any **one** example of **cardinal points**

_____

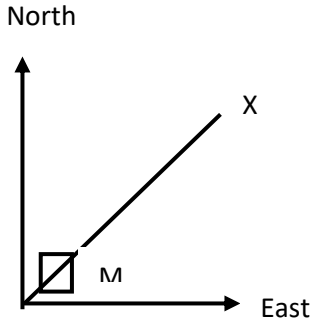

7. Name **the compass direction when is directly opposite Northwest**

_____

8. Why do you think rally drives move with a **compass when carrying out the activities?**

_____

9.

a) Name the compass direction **marked x.**

_____

b) State the **degrees between x and East**

_____

10. Give the meaning of the following.

a) **Compass rose.**

_____

b) **Compass direction**

SESSION FIVE

Degrees around the compass face

(Relevance)

- Understanding how to use a compass will allow learner participate in orienteering activities like liking, camping, and adventure spots.

How to use this knowledge in my daily life

Back ground knowledge. What I already know.

- Understanding points of the compass.
- Understanding the degrees on the compass between points

Competences.

- Calculates direction of places using a compass rose
- Describes how position of the sun is used to tell direction.

Key learning principle

A Compass circular Faces=360°

The sun rises__ East. _ Cardinal of points lie 90 degrees

The sun sets__ West. _ Semi- cardinal/ points lies 50 apart

The commonest local way of telling directions is using the position of the sun

Content

Degrees Around the Compass

The face of a compass is Circular and is equivalent to360^o

Cardinal points from at 90° from at 45° between two nearby cardinal points.

The starting point is always at North without 0° and the ending point is also at North with 360°

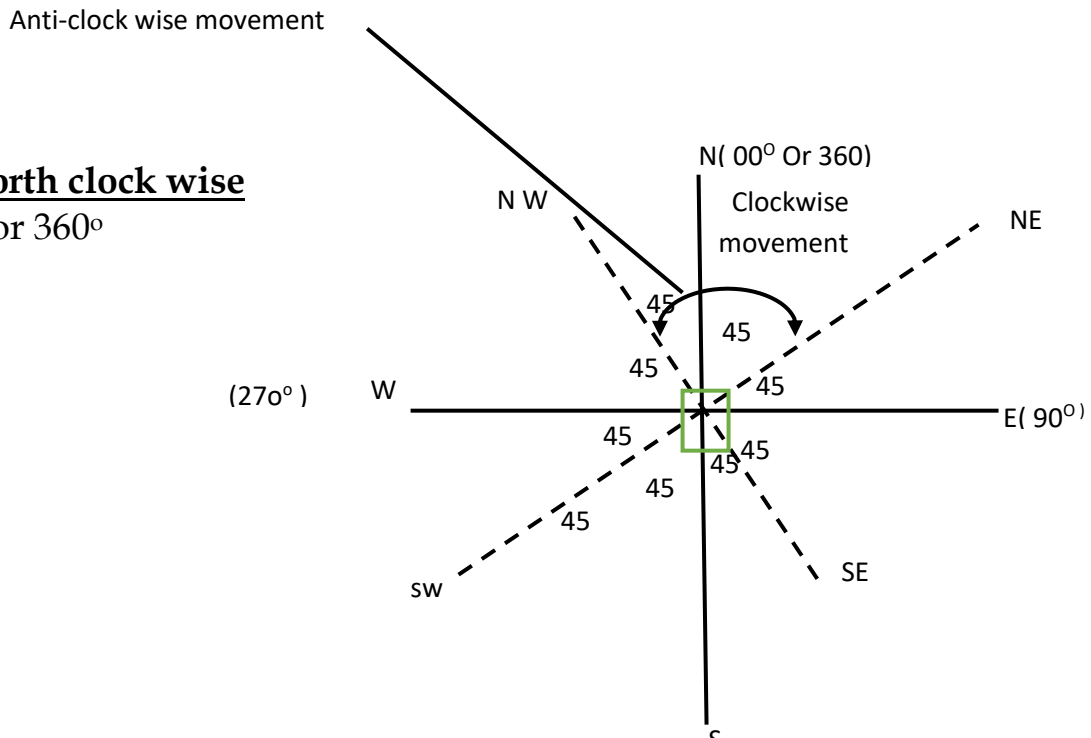

Starting from North clock wise

North lies at 00° or 360°

East lies at 90°

South lies at 180°

West lies 270°

MINI ACTIVITY

1. State the **degrees between two cardinal points**

_____

2. Name the **determinant** point of a compass. (18^0)

_____

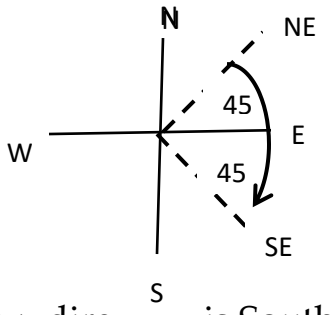

3. State the **two** turns made on the **compass when telling direction**

i) _____

ii) _____

EXAMPLES

Okello was facing **North East** and tuned through angle of **90° clock wise**. Which new direction did he face?

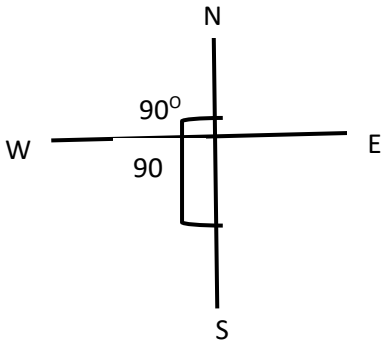

S.E or Southeast

Okello new direction is South-east

HAND ON ACTIVITY

1. Dora was facing **North** and turned through and angle of **180°** anti _clockwise what is her new direction

south

Using the position of the sun to tell direction

- Using the position of the sun is the commonest way of telling direction in our district.
- The sun rises in the East every morning and sets in the West every Evening.
- The position of the sun determines the position of the shadow of the objects
- In the noontime (mid-day) the sun is always over head

- In the morning, shadows of all objects are in the west.
- In the evening, shadows of all objects are in the East

Position of shadows at different hours of the day.

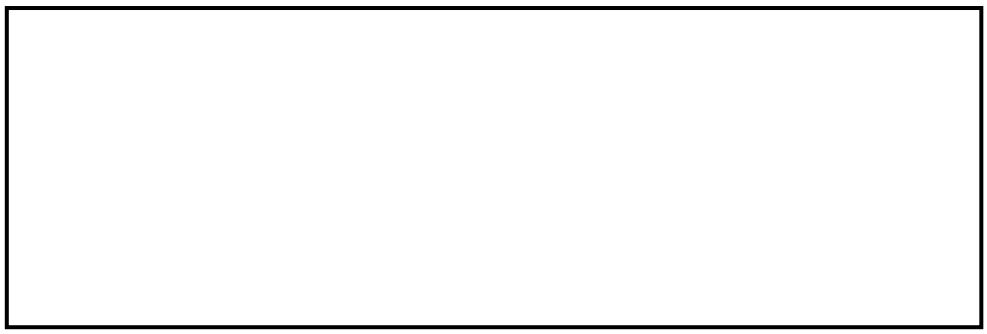

- In the morning.
- The shadows are in the west.
- In the evening.
- The shadow is in the East
- At noon / mid-day.
- The shadow is Round the object.

MINI ACTIVITY

1. Mention the **commonest way of telling direction** in your district.
   i) _____
2. Why are shadows of objects **always around the object at noon time?**

   _____

3. Andrew was facing the East and he turned **90°** anti-clock wise. **What was his new direction**

Using the position, the sun to the direction

example 1

Roman was going to school in the morning and he saw hiss shadow Infront of him. In which direction was the school?

Since the sun is always in the East in the morning.

And Shadow was are always West in the morning. Then, the school was in the West.

MINI ACTIVITY.

1. Susan was going to the market in the evening and saw her shadow o the right-hand side. In which direction was the market.

   _____

2. The shadow of Anent was in the east when she was going to the market. **which time of the day was she travelling**

   _____

2. Felix was going to school in the morning and he saw his shadow front. To **which direction was the school**?

_____

SESSION TW0

HIGHLANDS IN OUR DISTRICT.

(Relevance) To enable the learner appreciate nature and understand geography and how land forms affects people and the environment

Competence

The learner,

- Defines a hill
- defines a mountain
- defines a peak
- identifies examples of mountains in Uganda.
- Identifies highest peaks of major mountains in Uganda.
- Identifies economic activities commonly carried out on the slopes of mountains and hills
- Locates major mountains on the sketch map of Uganda.

What Ia ready know

(Back ground knowledge)

Economic activities carried out by people in our district major hills that farm Kampala.

Key Learning principle

A hill_____ apiece of land higher than the area around.

A mountain _____ ahigh large piece of land usually higher than a hill

Mountains and hills in our district

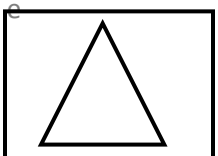

A hill is a piece of land higher than the area around.

A mountain is ahigh large piece of land usually higher than a hill.

A peak: Is the highest point of a mountain

A map symbol of a mountain

Examples of mountains in Uganda

Mountain Rwenzori highest mountain

Mountain Zulia Mountain morangole

Mountain Elgon Mountain Napak

Mountain moroto

Mini activity

1. Write the meaning of a mountain.

_____

2. Differentiate **between a hill and a mountain.**

_____

_____

3. Give any **two examples of mountains in Uganda**.

i)_____ii)_____

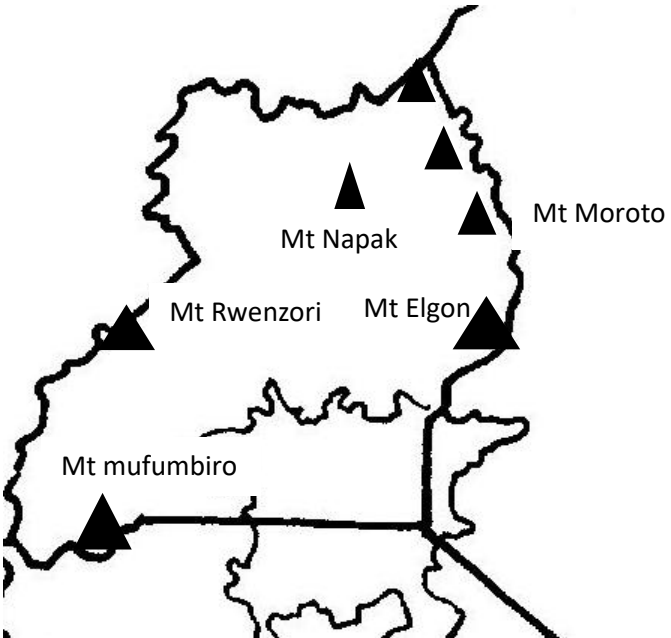

Highest peaks of major mountains in Uganda

Mountain	Highest peak
Mt Rwenzori	Margherita.
Mt Mufumbiro	Muhavura
Mt Elgon	Wagagai
Mt Moroto	Sokdek

Economic activities commonly carried out on the slopes of mountains

- Crop growing Lumbering Tourism Mines

Major mountains in Uganda

Note

 Mountain

NB **Mt** Rwenzori form a natural boundary between Uganda and DRC
Mt Elgon forms a natural boundary between Uganda and Kenya

Mega activity

1. Mention any **four** major **mountains in Uganda.**

   _____
   _____
   _____
   _____

2. Draw the **map symbol of a mountain peak**.

   _____

3. Name the highest **mountain in Uganda.**

   _____

4. Mention any **three** economic activities that are commonly carried out around mountains

   i) _____ ii) _____ iii)_____

5. Name the highest peaks of the following mountains

   a) **Mountain Rwenzori**_____

   b) **Mountain Elgon.**_____

   c) **Mountain Moroto.**_____

6. Which Mountain forms a boundary between Uganda and DRC.

   _____

7. **Define a mountain.**

   _____

Project work

Use a box and make count out of the map of Uganda and on it indicate the following mountains Mount Rwenzori Mount Elgon

SESSION THREE

Advantages and disadvantages of highlands

How to use this knowledge in my daily life

(Relevance)

To understand their role in the environment such as providing resources, habitat and influence weather

- Identifies importance of hills and mountains

- Describes the formation of relief/orographic rainfall with help of an illustration.
- Identifies problems faced by people living in mountains areas
- Suggest possible solutions to the problems faced by people living in mountains areas.
- Identifies ways of controlling soil erosion in highland areas

What I already know(Back grounds)

_ Definitions of mountain
_ Example s of major mountains in Uganda.
_ Location of the mountains

Key Learning Principle

Importance _____ uses/advantages
Disadvantages _____ Negative thigs/bad thing

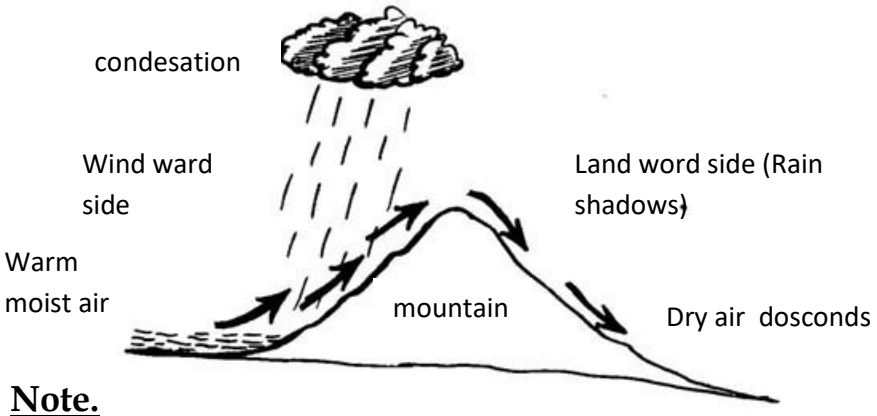

Learner _Centered approach

Imagine you stay in an area with hills or mountain mention any four things that you would enjoy

Importance of hills and mountains.

- ❖ They help in rain formation ie relief rain fall.
- ❖ They have fertile soils which support crop cultivation.
- ❖ They attract tourists who bring in come.
- ❖ They have cool temperatures with favor daily faring.
- ❖ They are used by telecom cation companies to place on masks
- ❖ Some mountains are source of minerals e.ghills in Tororo which provide limestone used for building
- ❖ Some mountains form natural boundaries

Formation of Relief rainfall/ orographic rain fall

Note.

The wind word side of mountains receives plenty of rainfall because it receives most winds

The word wind side is suitable for crop growing because it receives plenty of rain fall

Dias advantages of Mountains

- They hinder agricultural mechanization
- The make road railway construction difficult.
- Some mountains erupt and destroy property
- They have sleep slopes which promote soil erosion.
- They are greatly affected by land slides

Mini Activity

1. Give any **two importance** of hills and mountains

_____

_____

2. Which **type of rain fall received in areas around mountains**

_____

3. Give any **two** disadvantages of **mountains**

_____

_____

Problems faced by people living on slopes of mountains

- ❖ Severe soil erosion
- ❖ Landslides e.g Bududa district
- ❖ Volcanic eruptions
- ❖ Poor road net work
- ❖ Much coldness
- ❖ Poor agricultural mechanization
- ❖ Attack from wild animals

Possible solutions to the above problems

- ✓ By rearing donkeys for transport
- ✓ By tracing land to reduce soil erosion
- ✓ By planting trees to control land slides
- ✓ Byrosetting people to safe plans.
- ✓ By constructing winding roads

How to control soil erosion in highland areas

- By tracing. By contour ploughing By ship cropping

Mega activity

1. Give any **two** ways **mountains are important to people**

_____

_____

2. Which **type of rain fall** is mostly received in high areas

_____

3. How are **hills useful** to telecommunication companies.

_____

4. How are **mountains useful** to the construction industry

_____

5. Name the **mountain that lies** along the **border of Uganda and Kenya**

_____

6. State any **two** economic importance of mountains

_____

_____

7. Why does the **leeward side** of a mountain usually receive very little rain fall

_____

8. Which **factor favors crop growing** the wind ward side of the mountain

_____

9. Mention any **two ways soil erosion can be controlled** in highland areas

_____

_____

10. What causes **landslides in hilly areas.**

_____

11. How can **road transport be made possible in hilly areas**

_____

12. Which animal is commonly used for **transport in hilly areas**

_____

SESSION FOUR

Location of our district in Uganda

How to use this knowledge in my daily life.

How to use this knowledge in my daily life (Relev

Understanding the location of the district fosters sense of community and answers about local resources, services, and opportunities

Competence

- Defines a district
- Identifies the political head of district.
- Identifies reasons why Uganda is divided into district
- Discusses the disadvantages of creating More districts I Uganda

What I ready know. **(Back ground knowledge)**

_Sub regions of Uganda

_Levels of the government

Key Learning Principle

District An administrative area at the level of local council Five (v)

Chairperson LCV_ Political head of district

Lord Mayer_ Political head of city.

Political heed_ title given to political leaders

Location of our district in Uganda

A district is an administrative area at the level of local five (LCV) Uganda is divided into districts mainly to case administration.

Chairperson LCV is the Political head of district. Lord Mayor is the Political head of City.

Some district has municipalities which are divided into divisions

District in Uganda are divided into Countries and sub countries in order to make administration easy.

Districts in Uganda are grouped into regions and each region is divided into sub- regions according to the customs of people in that area.

Reasons why Uganda is divided into districts

- ❖ To ease administration.
- ❖ To extend social services nearer to people.
- ❖ To create more job opportunities.

Disadvantages of creating more new districts

- ✓ It leads to separation of communicates/ tribes.
- ✓ It leads to high administrative costs.
- ✓ It makes equal distraction of resources difficult.

Mini activity

1. What do you understand by the term **district?**

_____

2. What tittle is given to the **political head of a district**?

_____

3. Mention any **two** reasons why Uganda is divided into districts.

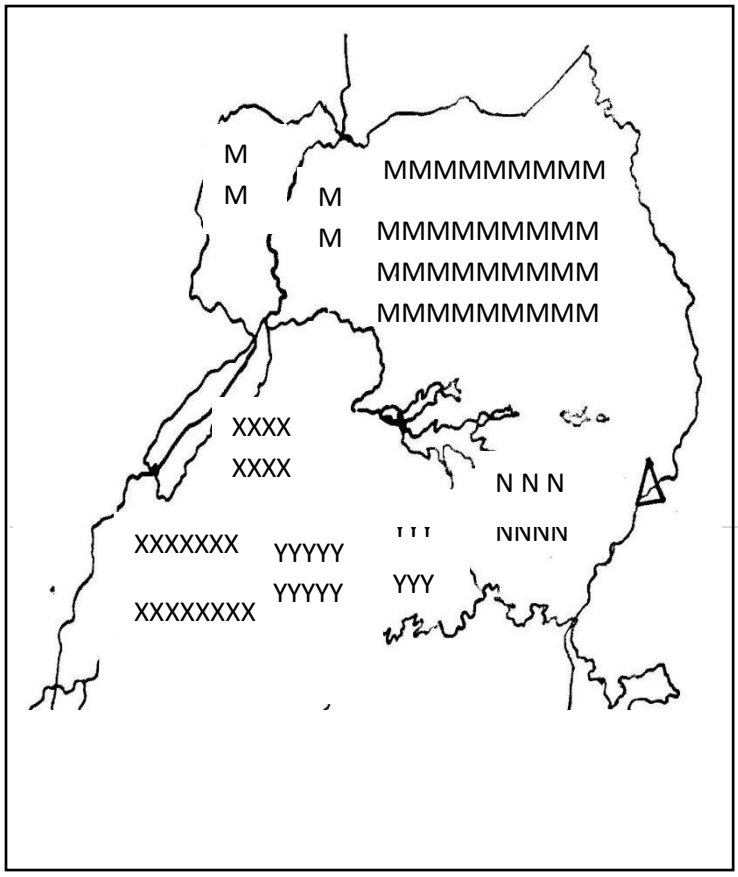

_____

_____

Regions that form Uganda

Central region
Northern region
Western region
Eastern region

A map of Uganda showing Region that make up Uganda

Key

XXXX XXXX	Western region
YYYY YYYY	Central region
NNN NNN	Eastern region
MMM M MM	Northern region

Mini activity,

1. Mention any **two** regions **found in Uganda**.

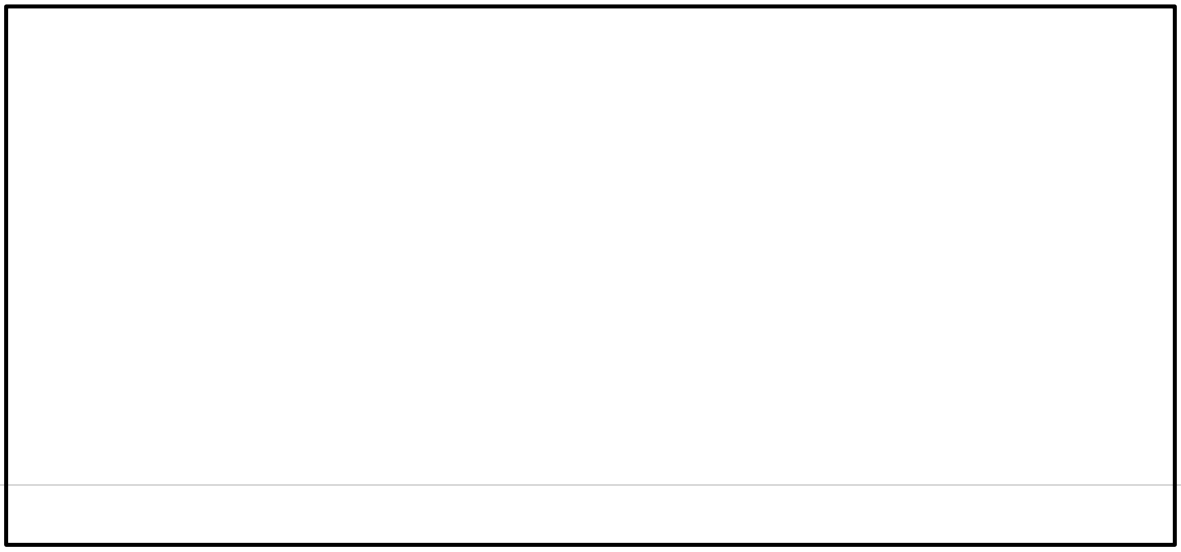

_____

_____

2. In which **region is your school found?**

_____

Draw sketch map of Uganda and indicate all region in the space below

Sub_ regions found each region of Uganda

Region of Uganda	Sub region	District
Central region	Buganda	Kampala Mityana, Masaka, Kalangala, Mpigi, Wakiso
Northern region	Acholi sub-region	Gulu, Kitgum, Agago, pader
	Karamoja sub-region	Kotido, Abim, Moroto
	Lango Sub-region	Lira, Apac, Oyam
	Western Nile sub-region	Arua, Nebbi, Yumbe, Zombo
Western region	Bunyoro, sub-region	Hoima, Kabaale, Masindi
	Tororo Sub-region	Kabarole, Kamwenge
	Rwenzori sub- region	Kasese, Ntoroko, Bindibugyo
	Ankole sub-region	Mbalala, Ibanda, Kiruhura.
Eastern region	Busoga sub-region	Jinja, Iganga, Mayuge, Luuka
	Teso sub-region	Mbale, Sironko, Kween
	Sebei sub-region	Kaphorwa, Bukwo, Kween
	Bukedi sub-region	Pallisa, Kibuku, Toro, Busia

Mega Activity

1. In which district is your school located?

2. What title **is given** the political head of a district?

_____

3. Give any **two** reasons why **Kampala is divided into district**

i) _____ ii) _____

4. In which region is your **district found?**

_____

5. Name the **largest geographical** region of Uganda.

_____

6. Mention any **two**-sub region found in Uganda of the following regions of Uganda.

a) **Northern region**

_____

b) **Western region**

_____

c) **Eastern region**

_____

7. Mention any **two** geographical regions found in Uganda

_____

8. Apart from Kampala, mention any other two districts found in Buganda Sub Region

_____

Kampala district

How to use this knowledge in my daily life (Relevance)

_ Understanding Kampala district helps learners develop deeper understanding of social studies, Concepts such as community development, economic and political

Competences

- Locate the district on the map of Uganda
- Compares the size of his /district.
- Locate important places in his/ her district What I ready know (Back ground knowledge) **Key Learning principle**

Kampala _ Capital city of Uganda.

Lord mayor _ Political head of Kampala city

Kampala district.

Kampala is the capital city of Uganda.

Kampala got its name from dominant on the seven(antelope) which were dominant on the seven original hills that made up Kampala.

They include, Namirembe hill Mengo hill, Makerere hill

Nakesero hill, Old Kampala hill, Lubaga hill and Mulago hill

The size of Kampala has been increasing and expanding to cover more other hills

e.g Nsambya, Kireka, Makindye

For easy administration Kampala is divided into urban Councils while the rural districts are divided into Countries

Kampala is head by the lord mayor while other districts have or are headed by the chairperson LCV

Kampala is run by Kampala Capital/City Authority (KCCA) which is headed by the Executive Director.

The Current executive director of KCCA is Hajjat Sharifah Buzeki

The Capital city of Uganda was transferred from Entebbe to Kampala in 192 because Kampala had more land for Expansion

Mini Activity

1. Name the **Capital city of Uganda.**

_____

2. Name the body that run the **Capital city of Uganda.**

_____

3. Which **tittle is given** to the Political city of Uganda?

_____

Note Kampala district is the smallest district in Uganda

Neighbours of Kampala district

Wakiso _____South West.

Mukono_____East

_ The political head of municipality is mayor

Mega Activity

1. Write KCCA in full.

_____

2. Name any **three** divisions that make up Kampala district

_____

3. Name the **smallest district** in Uganda

_____

4. Who is the **Current Executive** director of KCCA?

_____

5. Name the **district that neighbor Kampala** in the East

_____

6. Mention any **two** hills that made **originally Kampala city**.

_____

7. Why was the **capital city transferred** from Entebbe to Kampala?

_____

8. Which **tittle is given to the political head** of a municipality?

_____

9. Which body was replaced by **Kampala city Council in Kampala City?**

_____

10. State any three problems facing schools in Uganda today.
11. How is a school signpost important to people in the community?
12. Mention any two symbols on which a school going child can be identified.
13. Give any three ways the above challenges can be solved.
14. Mention any two groups of people who care for pupils at school.
15. Give any three ways a school benefits people in the nearby community.
16. State any two ways a school benefits from people in the community.
17. Mention any two causes of misunderstandings between the school and the neighbourhood.
