The earth is the part of the world made up of land and water. The part of the earth made of water is called hydrosphere. <u>The Rotation of the earth</u> on its axis causes days and nights. One complete rotation of the earth (of 360º) is made in a period of 24hrs.Therefore, the earth rotates through an angle of 15º in every 1hr (15º=60min/1hr), 1º in every 4min (1º=4min)	Group discussion Guided discovery Group discussion Think pair share Guided discovery	The learner understands the location of east Africa on the EA map .understands how days and night time is caused	Mention any two lines of latitudes

		Antarctica is the only continent which is not inhabited by people because it experiences very cold climatic conditions. The highest point on earth is mountain Everest in Asia. Africa is the most central continent. This is because it is the only continent crossed by both the Equator and the Prime meridian, Antarctica is the largest cold desert in the world. **THE CONTINENT OF AFRICA** **How Africa is unique (different from other continents)** Africa is the second largest continent. Africa is the most central continent Africa has the largest and hottest desert in the world. Africa has the largest number of inland countries. Africa has the largest race of black people. The longest river in the world is found in Africa. It is the only continent that lies within the four hemispheres. It has the largest area lying between the tropics. The shortest people in the world are found in Africa (the Pygmies) Note:-The Early Europeans referred to Africa as a dark continent because they had little knowledge about the interior of Africa.	Group discussion Think pair share Guided discovery		Mention any two ways how Africa is different from ather continents Whts us the best way of locating places on a map?	

5		**Factors that kept Africa's interior unknown to the Europeans for so long.** Presence of huge highlands at certain entry points Africa's interior had hostile people. Presence of hot deserts at both extremes of the continent. Presence of dangerous animals in the interior of Africa. Lack of proper routes to the interior of Africa. Africa's interior had thick forests which harbored disease vectors. **LOCATING AFRICA USING LINES OF LONGITUDE AND LINES OF LATITUDE.** **(Grid reference)** Grid reference system is the method of locating places using lines of longitude and lines of latitude. Africa lies between latitudes 37ºN and 35ºS, and longitudes 17ºW and 52ºE. **Lines of Latitude.** These are imaginary lines drawn on maps or globe from East to West. The general name for all lines of latitude is parallels because they do not meet at any point. Latitude is the distance in degrees North or South of the equator Lines of latitude help in determining climate of places. Lines of latitude help us to tell how far a place is North or South of the equator. **Major lines of latitude.** The Equator (0º) Arctic circle (66½ºN)	Group discussion Guided discovery	Understands how the lines of latitude and longitudes are important to in the daily life	Name any two line of latitudes	Africa Soth America

		Tropic of Cancer (23½ºN) Antarctic circle (66½ºS) Tropic of Capricorn (23½ºS) **THE EQUATOR** The Equator divides the world into two equal parts (hemispheres) The Equator is marked 0º because it is the starting point for all latitude readings. The Equator is the most important line of latitude because it crosses the world at the centre. All countries which are crossed by the equator lie in both the Northern and Southern hemisphere. A hemisphere is a half part of the world as divided by the equator or prime meridian. The area between the Tropic of cancer and the Tropic of Capricorn is called the Tropical region.	Group discussion Guided discovery		Name any two line of latitudes	Latitudes Longitudes

		 Lines of Longitude Lines of longitude are imaginary lines drawn on maps or globes from North pole to the South pole of the earth. The general name for all lines of longitude is Meridians. Lines of longitude meet at the poles of the earth. Longitude is the distance in degrees East or West of the Prime meridian. Major lines of longitude. The prime meridian The international dateline	Group discussion Guided discovery		How is the prime meridian important to a pilot	Latitudes

		THE PRIME MERIDIAN/ GREENWICH MERIDIAN The Prime meridian is also called the Greenwich meridian because it crosses Greenwich town in London. The Prime meridian is marked 0º because it is the starting point for all longitude readings. The Prime meridian divides the world into the Eastern and Western hemisphere. All countries crossed by the Prime meridian lie in both the Eastern and Western hemisphere. NOTE; The Prime meridian helps in telling international time. The International dateline separates one day from the next day. e.g. East of the Greenwich meridian may be Friday while West of it is Thursday Both lines of longitude and lines of latitude help in locating places on a map **Location of major lines of latitude and lines of longitude on the map of Africa**  	Group discussion Guided discovery	Understands how to use prime meridian to locate place and tell time		Hemispheres

		Finding Time According to GMT. Different regions of the world have different time zone according to the distance from the Prime meridian. Places which are in the same time zone have the same standard time. E.g. Uganda, Kenya and Tanzania are in the same time zone, and so have the same standard time. (East Africa standard time) East Africa lies at longitude 45º while Rwanda and Burundi are 30ºE of the Greenwich meridian. <u>Note:</u> The rotation of the earth on its axis causes day and night. The earth makes one complete rotation of 360º in one day (24hours). Therefore, it rotates through an angle of 15º in every 1hour (60min). Every 15º E or W of the Greenwich meridian is a time zone. When you travel 15º westwards, you lose an hour while travelling 15º eastwards makes you gain an hour. Note:	Group discussion Guided discovery			International dateline

		We usually add (+) hours for places which are in the East and subtract (-) the time when finding the time for places which are in the West. Changing of the time to and from 24hr clock (by either adding or subtracting 12 hrs) affects the units in which the time is given. (i.e., From am to pm and vice versa). Time in each time zone is calculated basing on the Greenwich mean time (GMT) which is at 0º longitude. **Example 1:** **Examples of calculations** **THE SHAPE AND SIZE OF AFRICA** The shape of Africa is not even. It is wide in the North and narrow in the south. Africa is about 8,000km from the far North at Ras Ben Sakka in Tunisia to the far South at Cape Agulhas in South Africa. 		Horizontally, Africa is about 7,400km from the far East at Ras Hafun in Somalia to the far West at Cape Vert peninsula in Senegal. 6	✓ Analyses the historical background of the EAC (EAHC, EACSO, founder members, founder member state, reason for formation, departments Collapse, achievement, revival, Of EAC	**THE HISTORICAL BACKGROUND OF THE EAST AFRICAN COMMUNITY.** The East African Community is a group of countries in Eastern Africa that are united to promote trade. It is an example of common markets or regional groupings. It is an inter-governmental organization meaning it brings several states together. The EAC was formed on 1st December 1967 to replace the East African Common Services Organization. The East African Common Services organization had been formed in 1961. The EACSO had its headquarters at Nairobi in Kenya. The EACSO replaced the East African High Commission (EAHC) which had been formed in 1946 after the second world war. Creech Jones, the British colonial secretary in East Africa by then, advocated for the formation of the EAHC. **Founders of the East African Community** Apollo Milton Obote Jomo Kenyatta Julius Nyerere	Group discussion Guided discovery	Understands how the EAC Is important to EA	Write in full? 14		❖ It takes a long time to correct wrong information. **c) LINGUISTICS.** This is the study and analysis of languages spoken by different people. Linguistics can help us tell when and how the languages spoken now in East Africa came into existence. **d) ANTHROPOLOGY.** This is the study of people's culture. Anthropology is the social science that studies the origins and social relationships of human beings. Anthropologists give information about cultural systems like the ideas, beliefs and institutions. **e) ARCHAEOLOGY.** This is the scientific study of remains of people of long ago. It is carried out by archaeologists. Terms related to archaeology. Fosils are remains of animals, plants and of humans of long ago. **Examples of fossils.** • Skulls of People • Caves • Tools • Bones of animals and people • Rock paintings • Weapons Excavation is the process of digging up the remains of early man. After excavation the remains are carbon dated to determine their age. Carbon dating is the arrangement of the fossils to determine their age. Stratification is the grouping of fossils and arte-facts according to the depth of the ground where they are found. Arte-facts are remains of items used by people of long ago. Places where fossils and arte-facts are found. - Museums - archaeological sites. **Dr. Louis Leakey** Famous archaeologists in East Africa. a) Dr. Louis Leakey. He is the most prominent archaeologist in East Africa. He came to East Africa with his wife Mary Leakey. Dr. Louis Leakey discovered the oldest skull of man at Olduvai Gorge in Tanzania in 1959. 		This skull was believed to be for a man he named Zinjanthropus. The name Zinjanthropus is formed by two words; ie." Zenj" which means black and "anthropus" which means man. Therefore, the name "Zinjanthropus" means black man. Note: East Africa is therefore referred to as the cradle of mankind because the oldest skull of man was discovered in East Africa. **Dr. Merrick Posnansky.** He made his discoveries in the former Chwezi empire at Bigobyamugenyi in Sembabule district. **Dr. Peter Schmidt.** He carried out his discoveries in the iron age sites in Northern Tanzania around the shores of Lake Victoria. **James.S Kirkman and Neville Chittick**. He carried out archaeological work along the coast of East Africa(in the Zenj empire) They excavated the remains of the Portuguese along the coast of East Africa. e) Dr.Richard Leakey. He discovered the remains of early man around lake Turkana in Kenya. He was a son to Louis and Mary Leakey. **Importance/ advantages of archaeology.** ❖ It is a source of employment to people. ❖ It helps us to know the life style of our ancestors. ❖ It helps us to know the origin of mankind. An ethnic group can also be known as a tribal group. A tribe is a group of people who have the same origin and speak the same language. The Bushmen were the early inhabitants of East Africa before the coming of ethnic groups into East Africa. The Bushmen were displaced as a result of the ethnic migrations. The Nilotes are divided into three sub groups Namely; • The River-Lake Nilotes. • The Highland Nilotes. • The Plain Nilotes/ Nilo-Hamites. **THE RIVER- LAKE NILOTES.** They are also called the Nilotic/Luo speakers. They are called Luo speakers because they speak Luo as their language. They migrated from Bahr-el-Ghazal in South Sudan. The Nilotics are sometimes referred to as River-Lake Nilotes because they settled near lakes and rivers. The Nilotic entered into East Africa from Northern Uganda. The Nilotics first settled at Pubungu when they first reached Uganda. Pubungu currently is known as Pakwach. The Nilotics were led by Olum and his two sons Gipir and Labongo. The two brothers separated at Pubungu due to misunderstandings over the spear and the bead. **The Separation of the River-Lake Nilotes.** ✓ The first group led by Gipir settled in the West Nile. They intermarried with the Lendu leading to the rise of the Alur tribe. ✓ The second group moved to areas North of lake Kyoga and settled there and these form the Acholi tribe. The settlement patterns in East Africa vary from one area to another. Some areas in East Africa have houses built close to one another, some have scattered houses while others have houses that were built following a line. Types of settlement patterns. **(i) Linear settlement pattern** **(ii)** ✓ Houses are built along a line eg. besides a major road, railway line. Factors that lead to linear settlement pattern. ▪ Presence of a transport line eg. a road, railway etc. ▪ Presence of a river to provide water. ▪ Presence of a coast line which has fishing ground. (**ii) Nucleated settlement pattern/ clustered settlement pattern** ✓ Houses are built close to one another. ✓ It is common in areas where people own small pieces of land eg. in urban areas, housing estates and accommodation for workers. **Factors for a Nucleated settlement pattern.** ▪ Presence of better social services eg. health service, education service etc. ▪ Shortage of land in an area. ▪ Presence of natural resources eg. minerals ▪ Presence of fertile soils in an area. After the death of Kabalega at Jinja, his son Yosia Kitahimbwa succeeded him -During the reign of Omukama Kyebambe Nyamutukura, his son called Prince Kaboyo Omuhanwa left the palace and started Tooro kingdom. **TOORO KINGDOM** The title given to the king of Tooro is Omukama. The current king of Tooro is Oyo Nyimba Kabamba Iguru IV. Currently, Tooro covers districts like Kabarole, Kyenjojo, Kyegegwa, Kamwenge.etc. Note:-When omukama Kabalega overthrew and exiled omukama Kasagama, Capt. Frederick Lugard restored omukama Kasagama of Tooro back to his throne. **Reasons why Tooro broke away from Bunyoro kingdom.** ❖ The Batooro felt that they were not adequately protected by the king of Bunyoro from their enemies. ❖ The Batooro felt that they were very far from the capital of Bunyoro since they would take long to see the king. ❖ Prince Kaboyo was very greedy and impatient for power since he had been appointed as a clan leader which had reduced his chances of becoming a king. **BUGANDA KINGDOM.** There are two traditions that explain the founder of Buganda kingdom. According to the Banyoro (Nyoro tradition), Kato Kimera is believed to be the founder of Buganda kingdom. Kato Kimera was the twin brother to Isingoma Rukidi Mpuga the founder of Bunyoro kingdom. According to the Baganda (Ganda tradition), Kintu is believed to be the founder of Buganda kingdom and this is explained by the Legend of the first Muganda. Buganda kingdom is located in the North West of Lake Victoria and currently occupies districts like Kampala, Mukono, Mpigi, Luwero, Mityana, Masaka, Bukomansimbi, Kalungu, Mubende, Nakaseke Wakiso, etc. The title given to the king of Buganda is kabaka. 		Eventually, Germany was defeated. The League of Nations was an international organization that was formed to prevent outbreak of another world war. It punished Germany by taking away all her colonies in Africa including Tanganyika. The League of nations gave German East Africa (Tanganyika) to Britain to rule it as a mandate territory. German East Africa was renamed Tanganyika. Rwanda and Burundi were given to Belgium. This was because Democratic Republic of Congo was a Belgian colony. Today Rwanda and Burundi use French as their official language. This is because they were ruled Belgians who speak French. Note: ✓European governments which were given mandate territories were meant to rule them for the good of the natives, till they were ready for their independence. ✓Mandate territories were the former colonies of Germany that were given to other European countries by the League of Nations after world war I. ✓Tanganyika was a mandate territory of the British while Rwanda and Burundi were mandate territories of the Belgians. ✓East African countries were involved in the war because their colonial masters took men to work as soldiers and porters in the war zones. **Effects of the world war in East Africa.** ❖It led to death of many people. ❖The Germans were forced to leave their farms in Tanganyika. ❖It led to outbreak of famine in East Africa. 		Air pollution is the introduction of harmful substances into air/ atmosphere. How to control air pollution ▪ By planting more trees ▪ By treating waste gases from industries before being released to the atmosphere ▪ Proper maintenance to reduce exhaust fumes. **Conservation of forests** ▪ Through afforestation and reafforestation. ▪ Through controlled harvesting of trees ▪ Through re-afforestation ▪ By establishing forest reserves ▪ By encouraging the use of energy saving cooking stoves ▪ Through rural electrification ie. it controls the rate of deforestation by reducing demand for wood fuel. Note: Rural electrification is the extension of electricity in rural areas. **Conservation of water.** ▪ By protecting trees in the environment. ▪ By harvesting rain water and using it wisely. ▪ By closing taps after fetching water. ▪ By reporting leaking water pipes to leaders. ▪ By removing wastes settling in trenches. Bodies that promote conservation of the natural environment in Uganda. ✓ National Environment Management Authority (NEMA) ✓ National Forestry Authority (NFA) This conserves forests in Uganda. ✓ Uganda Wildlife Authority (UWA) This is in charge of conservation of wildlife in Uganda. 		National Environment Management Authority (NEMA) It was started in 1995 It is in charge of conserving the environment/ wetlands in Uganda. NEMA is under the Ministry of Water and Environment. How NEMA conserves the environment/ roles of NEMA. ❖ It teaches people about the importance of forests and swamps. ❖ It creates forest reserves. ❖ It enforces laws against wetland degradation. ❖ It evicts people settling in wetlands. **Challenges faced by NEMA.** ❖ Shortage of funds. ❖ Ignorance among the people about the importance of wetlands. ❖ Rapid population growth. This creates need for more land for settlement. Importance of conserving vegetation. ❖ It reduces soil erosion. ❖ It conserves the natural beauty of the environment. ❖ It promotes constant supply of wood fuel. ❖ It conserves the natural habitat for animals. ❖ It promotes tourism. ❖ It promotes constant supply of craft raw materials. ❖ It controls drought. **CONSEQUENCES OF IRRESPONSIBLE LIVING IN THE ENVIRONMENT.**	Guided discovery Group discussion Think pair share Guided discovery Group discussion Think pair share Guided discovery Group discussion Think pair share			Floods ▪ Pollution of the environment ▪ Drought ▪ Diseases ▪ Soil erosion ▪ Resource depletion ▪ Land slides ▪ Over production of children Floods ▪ Pollution of

		▪ Floods ▪ Pollution of the environment ▪ Drought ▪ Diseases ▪ Soil erosion ▪ Resource depletion ▪ Land slides ▪ Over production of children (a) Floods This is a large amount of water covering an area that is usually dry. It is caused by too much rainfall. Floods occur in low lands/ valleys. **Effects of floods** ❖ They lead to destruction of property. ❖ They lead to loss of animal and human life. ❖ They lead to displacement of people. Solutions to floods ❖ By planting trees along river banks ❖ By constructing reservoirs to hold excess water ❖ By maintaining vegetation cover in catchment areas (b) **Landslides** This is a large mass of soil that falls down the slopes of a mountain. Landslides mainly occur in highland areas where trees have been cut down on a large scale. Causes of landslides ❖ Too much rainfall. ❖ Deforestation. **Effects of landslides.** ❖ They lead to destruction of property. ❖ They lead to loss of animal and human life. ❖ They lead to displacement of people. Note: ✓ Landslides can be controlled in highland areas by planting more trees. 	✓ Discuses climatic change (causes, indicators and dangers) ✓ Discusses ways of controlling climatic change and global warming ✓ Discuses global warming (causes indicators dangers and solutions)	✓ The government resettled the people who were affected by landslides in Bududa to Western Uganda which had a safer plateau. (d) **Desertification/ prolonged drought.** This is the condition by which an area receives very little rainfall and has very few plants growing on it. A Desert is an area that receives very little rainfall and has very few plants growing on it. Desertification comes as a result of uncontrolled removal of vegetation and swamp drainage. **Causes of drought** ❖ Deforestation ❖ Swamp drainage ❖ Bush burning. Effects of drought ❖ It leads to shortage of food/ famine. ❖ It dries up pasture for animals. ❖ It leads to withering of crops/ crop failure ❖ It leads to soil infertility. **How to control drought.** ❖ By planting more trees. ❖ By protecting vegetation and water sources. **Note:-**Food production can be increased in desert areas by carrying out irrigation farming, growing drought-resistant crops and by growing fast maturing crops. (d) **Pollution**. This is the introduction of harmful substances in the environment **Types of pollution** ▪ Air pollution ▪ Land pollution ▪ Water pollution ▪ Sound/ noise pollution (i) **Air pollution.** (ii) This is the introduction of harmful substances into the atmosphere. 	✓ Stimulates newspaper articles on consequences of irresponsible environmental behavior. ✓ Identifies solutions to environmental problems Mentions bodies in Uganda that care for the environment	**Things which pollute air (how air is polluted)** ❖ Fumes from factories and cars. ❖ Smoke from burning bushes and charcoal. ❖ Tobacco smoke from smokers. ❖ Radioactive substances from bombs. ❖ Smoke from volcanic mountains. Solutions to air pollution ❖ Avoid bush burning. ❖ By maintaining vegetation cover. ❖ By fixing exhaust gas purifiers. (iii) **Water pollution.** (iv) This is the contamination of water sources with harmful substances. How water is polluted. ❖ By dumping wastes into water bodies. ❖ By urinating and defecating into water bodies. ❖ By discharging untreated sewage into water bodies. How to control water pollution ❖ By planting trees along river banks. ❖ By treating industrial wastes and sewage before releasing them into water bodies. ❖ By cleaning wells regularly. ❖ Avoid pouring wastes into water bodies. (iii) Land pollution. This is the process of lowering the quality of land by adding wastes. It is the introduction of harmful substances on land. How land is polluted. ❖ By dumping garbage on land ❖ By dumping rocks from mines on land ❖ By dumping used tins, polythene bags and plastics on land ❖ Excessive use of artificial fertilizers. 		❖ Dumping of old vehicles and factory machines on land. Solutions to pollution of land. ❖ By recycling plastics and metals. ❖ By using compost manure instead of artificial fertilizers. (iv) **Sound pollution.** This is the condition when there is too much noise in the environment. Causes of noise pollution ❖ Noise from war weapons. ❖ Noise from birds eg weaver birds. ❖ Noise from many people gathered in a sports stadium. ❖ Noise from engines of vehicles. Effects of noise pollution ❖ It causes stress. ❖ It leads to diseases. ❖ It can lead to mental disorders. ❖ It causes permanent damage to the hearing system. **Diseases related to pollution** **Type of pollution** Disease(s) Water pollution -cholera -dysentery -diarrhea -typhoid fever Air pollution -asthma -lung cancer -flu Sound pollution -headache -mental disorders (e) **Silting**. This is the deposition of soil into water bodies by erosion. Silt is the soil carried by flowing water. **Effects of silting.**	Guided discovery Group discussion Think pair share Guided discovery Group discussion Think pair share Guided discovery Group discussion Think pair share			▪ Sound/ noise pollution

		❖ It leads to creation of shallow water bodies ❖ It causes floods. **Solutions to silting.** ❖ By controlling soil erosion ❖ Avoid cultivation along river banks **CLIMATE CHANGE**. Climate change is the variation/ fluctuation of the weather patterns of an area. It is the change in the average weather condition over a long time. Global warming is the major cause of climate change. **Global warming** This is the constant rise of world temperatures. Page Or: This is the continuous heating of the earth due to emission of greenhouse gases to the atmosphere. Examples of greenhouse gases. • Carbon dioxide • Carbon monoxide • Nitrous oxide **Causes of global warming.** • Deforestation • Bush burning • Industrialisation • Ozone layer depletion Note ✓ Global warming occurs when the ozone layer is destroyed by excessive sun heat (rays). ✓ Ozone layer is a layer of gases that protect the earth from strong sun rays.	Guided discovery Group discussion Think pair share Guided discovery Group discussion Think pair share Guided discovery Group discussion			

		✓ When trees are cut and bushes burnt, it reduces on the vegetation that would have absorbed carbon dioxide which destroys the ozone layer. **Effects / indicators of global warming** ❖ Acidic rainfall ❖ Melting of snow on high mountains. ❖ Excessive heat during day. ❖ Incidents of severe and prolonged drought. ❖ Reduction in the volume of water in water bodies. **Ways of reducing global warming.** ❖ By planting more trees. ❖ By using renewable sources of energy. eg hydro electricity and solar energy. ❖ By treating industrial fumes before emissions. ❖ Banning importation of old vehicles. ❖ By enforcing laws that protect the environment. Factors that cause change in climate. ▪ Prevailing winds. ▪ Ocean currents ▪ Drainage/ Nearness to water bodies. ▪ Latitude (distance from the equator) Indicators of climate change. ▪ Altitude ▪ Human activities. ▪ Vegetation ❖ Prolonged drought. ❖ Occurrence of storms. ❖ Reduction of crop productivity. ❖ Occurrence of floods. **WEATHER DISASTERS**.
