SUBJECT. INTEGRATED SCIENCE PLE ANALYSIS 2025

PLE QNS	THEMATIC THEME SUBTHEME CLASS TERM	SPECIFFIC SCENARIO	SUBJECT KNOWLEDGE	TOPIC SUBTOPIC CLASS TERM	CORRECT ANSWER	SIMILAR QUESTION
1	Our environment Soil Primary three Term two	Carrying out farming at home Using soil for making pots, bricks and farming	Type of soil Uses of different types of soil	Components of the environment Soil Primary five Term two	Loam soil	which type of soil is used for making ceramic materials
2	Plants in our subcounty Parts of a flowering plant and their uses. Primary three Term two	Using flowers in our community like decoration, making perfumes Observing plants at home	Parts of a flowering plant Functions of parts of a flowering plant Pollination.	Plant life Parts of a flowering plant Primary four Term one	it receives pollen grains	How is a flower important to plant
3	Food and Nutrition Effects of poor feeding	Eating a lot of fatty foods Eating too much food Sleeping immediately after meals Drinking too much soda	Meaning of disorders Disorders of the digestive system Ways of preventing disorders of the digestive system	Digestive system Disorders of the digestive system P.5 Term two	Avoid eating food hurriedly Chewing food properly before swallowing	Give a reason why it's not advisable to sleep immediately after eating
4	Health in our sub-county/division Disease vectors	Draining stagnant water Spraying using insecticides	Meaning of disease vectors Examples of disease vectors	Vectors and diseases P.4 Term three	It reduces the hiding and breeding places of vectors	State the way draining stagnant water helps in promoting human health.

		Slashing tall grass Pouring oil on stagnant water	Ways of controlling vectors			
5	Plants in our sub-county/ division Plants and their habitants P.3 Term two	Planting trees Watering trees	Ways plants conserve air	World of living things Plant life P.4 Term one	Trees purify air in the environment Trees filter air in the environment	Mention any two importance of plants in the environment
6	Health in our Sub-county Diseases spread by vectors P.3 Term three	Health centres Hospitals Clinics Dispensaries	Ways of preventing the spread of tuberculosis	Human health Immunization P.5 Term one	Through getting immunization Avoid sharing utensils with infected people	Mention two diseases that can be prevented by wearing a face mask
7	Human body and health Parts of the body and their uses P.2 Term two	Breathing in human beings	Human body Human body organs P.4 Term two	Air that passes through the mouth is not filtered	Importance of lungs and nose	What name is given to the body organ used for breathing
8	Plants in our sub-county? Division Crop growing practices P.3 Term two	When harvesting crops	Crop growing practices e.g. harvesting Ways of harvesting crops Importance of harvesting	Occupations in our community Crop growing P.5 Term two	Digging out uprooting	State the importance of early harvesting.

9	Food and Nutrition Keeping food safe P.2 Term one	Preserving food Ways of preserving food	World of living things Plant life P.4 Term one	To promote food security	Root tubers Examples of root tubers Ways of preserving food Importance of preserving food	Apart from freezing, mention any other way of preserving food.
10	Food and nutrition Uses of food to our bodies P.1 Term two	Breast feeding a baby	Importance of food in the body Advantages of breast feeding to the baby	Food and nutrition P.5 Term three	Breast milk contains almost all food values which keep the body immune against diseases	State two advantages of breastfeeding to a baby
11	Health in our sub-county/division Disease vectors p.3 term three	Harmful bacteria Useful bacteria	Types of germs Characteristics of bacteria	Bacteria and Fungi P.5 Characteristics of bacteria	Bacteria have one cell Bacteria are microscopic	How are bacteria dangerous in the environment?
12	Environment and weather in our subcounty Air and sun \P.3 term 1	At the weather station At the airport	Weather instruments and their uses. Meaning of weather Type of weather Elements of weather	Weather changes around us Weather instruments P.4 term 1	Barometer is used to measure air pressure	Mention the use of hygrometer in the weather station
13	Our environment Common animals P.2 term 2	Stimulating milk letdown	Meaning g of milk letdown Importance of feeds to a cow	Cattle keeping Term 2 P.6	By making the cow calm	State the importance giving the cow mineral licks.
14	Diseases P.1 term 1	Personal hygiene Ways of keeping personal hygiene	Hygiene practices	Common communicable diseases and worm infestation	It prevents anal exposure hence preventing	How can threadworms be transmitted from one person to another.

		Dangers of not maintaining good hygiene.		P.4 term 3	threadworms from entering the body	
15	Human body and health External parts of the body and their uses Term one p.1	Bathing Fertilization pollination	External parts of the body Ways of caring for the body Personal hygiene	The reproductive system P.6 Term three	epididymis	Where in the male reproductive system are sperm cells produced?
16	Our environment Soil Primary three Term one	Seeing living organisms while digging Birds scratching for living organisms in the soil	Components of soil Importance of living organisms in the soil	Soil Components of soil (living organisms) P.5 Term two	Avoid bush burning Avoid pouring dangerous chemicals in the soil	How are living organisms important in the soil
17	Recreation, festivals and holidays Cultural festivals P.2 Term three	Functions Speech day At night	Volume of sound frequency Echoes Advantages pf echoes	Sound energy p.6 tern 2	Weather condition like humidity influence the pitch perception indirectly due to changes in speed	Nam the part of ear that helps to balamce the body in the right posture
18	Our environment in our subcounty/division WATER P.3 term 1	Changes in the environment Natural causes of changes in the environment.	Changes in the states of matter	Types of changes on the environment P.5 term 3	Freezing	How is freezing important in our daily life
19	Plants in our subcounty/division p.3 tern 2	Changes in the environment	Importance of evapotranspiration to plants	Types of changes on the environment P.5 term 3	It cools the plant	State one way in which physical change labeled C is important to plants.

20	Human body and health Diseases P.1 term 1	Places where alcohol is found E.g. hospitals, clinics, pharmacies	Uses of alcohol to people	Alcohol smoking and drugs P.6 TERM 2	It is used in cleaning medical instruments.	How is alcohol important to a health worker
21	Living things care of insects birds and animals P.3 term 2	Ways of caring for goats	Breeds of goats Importance of keeping goats.	KEEPING GOATS, SHEEP AND PIGS Diary breeds of goats. P.5 term 3	Saanen goats Toggenburg goats Alpine goats.	Mention the major product got from angora goats. ,l
22	Plants in our sub-county/division Plants and the habitats P.3 Term one	At the hotels At home Ceremonies burials	Uses of flowers in the environment	world of living things plant life P.4 Term one	Flowers prevent soil erosion	How is an orchard important to the school?
23	Human body and health Parts of the body and their function Term one P.2	Practicing good health lifestyles	Meaning of muscles Types of muscles Importance of muscles Ways of keeping muscles in good working conditions	Human body Muscular-skeletal system P.7 Term one	By doing regular physical exercise	Why is it good for a P.7 pupil to sit upright?
24	Food and nutrition Cooking food Primary one Term one	Seeing people cooking food at home, school, restaurants, and hotels Seeing people preparing to cook food	ways of cooking food	Human health Our food Primary four Term two	Mingling Frying Boiling Steaming Stewing	State one way of preparing matoke at home

25	Managing resources in our sub-county/division Saving resources projects	Phone charging cables Flat iron heating up Television cables Lightning rod on buildings	Meaning of conductors of electricity Examples of conductors of electricity	Electricity and magnetism Conductors of electricity	copper	How is an electric fence important to a farmer?
26	Managing resources in our sub-county/division Saving resources projects	Phone charging cables Flat iron heating up Television cables Lightning rod on buildings	Meaning of conductors of electricity Examples of conductors of electricity	Electricity and magnetism Conductors of electricity	It directs electrons to the ground without damaging the building	How is an electric fence important to a farmer?
27	Environment and weather in our subcounty P.3 TERM 1	Separation of seeds from juice Separation of sand from water	Reasons for filtering water Examples of water impurities	Science in human activities and occupation. Science at home and in our community P.6 term 3	To remove impurities in water	Give any one application of filtration at home.
28	Weather Types and elements of weather Primary one Term two	Winnowing Sailing boats Taking away bad smell Flying kites	Elements of weather Importance of wind Effects of wind Ways of managing the dangers caused by wind	Resources in the environment Wind as a resource Primary six Term two	Wind is used foe winnowing Wind is used for sailing boats	Give one way of controlling the dangers caused by strong wind
29	Basic technology in our subcounty Making things from artificial materials P.3 term 3	Keeping them away from heat sources Keeping them in dry places	Ways of maintain the strength of the magnet	Matter and energy Electricity and magnetism P.7 term 1	By keeping the magnets in pairs with opposites poles facing each other	Mention any two ways of demagnetizing magnets.

		Store them in pairs with opposite poles facing each other				
30	Human body and health P.T Term one	Preventing diseases Curing diseases Treating sick people	Meaning of drugs Types of drugs	Alcohol, smoking and drugs Drugs P.6 Term one	The age of the patient The condition of the diseases The weight of the patient	State one danger of taking drugs without the health worker's instruction
31	Accidents and safety First aid p.1 term 3	Reasons for giving first aid Use of blood in the body	Components of blood Uses of different components of blood in the body	Circulatory system Uses of blood in the body P.6 Term 2	Blood plasma	A part from transporting waste products, how else is blood plasma useful.
32	Measures Units of measurements P.1 term 3	Use of up thrust force	Behavior of objects when put in water	Measurements Floating objects P.5 Term 1	Buoyancy force	Why do objects weigh less when put in water?
33	Animals in our sub county/division Care for insects, birds and animals P.3 Term two	Protection of animals	The world of living things	Classification of living things Invertebrates p.6 term 1	They give protection	NAME THE GROUPOF ANIMALS IN WHICH RABBITS FALL
34	Animals in our sub county/division Care for insects, birds and animals P.3 Term two	Excursion Critical observation		Keeping poultry, bees p.5 term 1	Presence of grubs	What name is given to the food a queen bee feeds on

35	Recreation, festivals and holidays P.2 term 3	Heating the drum Plucking the guitar	How sound travels in different states of matter	Sound energy p.6 term 1	Solids have closely packed molecules that vibrate	State any one characteristic of solids
36	Human body and health Diseases p.1 term 1	Immunization of diseases	Examples of immunisable diseases.	Immunization p.5 term 2	DPT	Identify the type of vaccine that is given to the newly born babies.
37	The human body and health Diseases P.1 Term 1	Immunization of diseases	Childhood immunisable diseases Examples of childhood immunisable diseases	Immunization P.5 Term 1	70 children	Give a reason why BCG vaccine is given at birth.
38	Energy in our subcounty/division Sources of energy P.3 term 3	Sources of heat	Expansion of gases	Heat energy P.5 Term 2	Due to expansion of air molecules in the balloon	State two effects of expansion on state of matter
39	Human body and health External parts of the human body and their uses P.1 Term one	Promoting personal hygiene Feeding on a balanced diet	Body organs Ways of caring for body organs	Human body organs Brain P,4 Term two	Performing regular body exercise Having enough rest	State one way doing regular physical exercise help to keep the heart in a good working condition
40	Managing resources in our sub-county Saving resources P.3 Term two.	Establishment of industries. Improper disposal of wastes in water bodies.	Dangers of poor waste management in the environment.	Resources in the environment. p.6 Term two	It leads to water pollution. It leads water contamination.	State one way how improper disposal of industrial wastes in water bodies can be controlled in the community.

41	Human body and health. Parts of the body P.2 Term one.	Adolescents moving in groups. Adolescents sitting together with members of the opposite sex.	Meaning of puberty. Meaning of adolescents. Sex changes in adolescents.	Reproductive system. P.6. Term three.	Adolescents become interested in members of the opposite sex. Adolescents start moving in groups with the peers.	Explain how adolescents can manage their body changes.
42	Living things Birds and insects Primary three Term two	Harmful and useful insects	Groups of invertebrates Characteristics of different groups of invertebrates Characteristics of insects Uses of insects	Classification of animals Arthropods Primary six Term one	a) Arthropods b) Both W and Y have segmented bodies c) Y can be eaten as food	How do arachnids differ from other insects
43	Food and nutrition Classification of food. P.2 term 1	Classes of food Signs of malnutrition	Importance of roughages, water and food taboos.	Food and nutrition P.5 term 1	Roughages prevent constipation Water rehydrates the body Food taboos conserve the environment	Why do people eat food?
44	The human body and health Diseases P.1 Term one	Family planning Oral hygiene Control of diarrheal diseases	Elements of P.H.C	Human health Immunization P.5 Term one	a) hepatitis B b) maternal anaemia c) Typhoid fever d)halitosis	Identify the immunisable disease that affects the liver
45	Living things in the environment p.3 term 2	Farming Planting crops	Meaning of apiary Importance of bee keeping	Bee keeping Goat, sheep and pig keeping	i) Bees from an apiary pollinate coffee plants.	Give a reason why farmers prefer rearing goats to cattle.

			Advantages of goat keeping to a crop farmer.		ii) goats droppings is used as manure in coffee plantations. b) bees can sting goats in the goat unit. c) by fencing the area around the apiary.	
46	Energy in our subcounty /division Sources of energy P 3 Term 3	Operating the microscope Solar and lunar eclipse Pinhole cameras Sunlight through windows.	Meaning of light Principles of light Experiments about light rays How shadow is formed.	Matter and energy Light energy	a) experiment N b) light travels in a straight line. c) when the light rays are obstructed by an opaque object.	a) give the reason why the observer was not able to see light in experiment N b) state the importance of creating the hole in the above experiment. Describe how the shadow is formed.
47	Managing resources in our subcounty/division Sources of energy Primary three Term two	Burning f charcoal o	Reasons of covering wood with soil during charcoal burning Effects of charcoal burning in the environment ways of controlling deforestation.	Resources in the environment Plants as resources Primary six Term two	a) It limits oxygen supply to the burning wood b) Leads to air pollution c) By using energy saving stove By setting strict laws against charcoal burning.	How does charcoal burning lead to air pollution.
48	Basic technology in our sub county	Making crafts Collecting scrap materials	Soil erosion Importance of recycling	Soil Soil pollutants P.5 term 2	a) To prevent harmful materials from contaminating the soil	State two importance of recycling wastes.

	Processing and making things from artificial materials P.3 term 2	Collecting plastics and polythene bags.	Ways of conserving the environment Accidents Ways of avoiding accidents Dangers of accidents		It helps to separate organic wastes from being non biodegradable wastes b) by putting on face masks. By wearing gloves.	
49	Living things Animals in our subcounty / division Care for animals/insects P.3 term 2 Child protection Child work and child abuse Effects of child abuse. Ways of child protection P.2 term 2	Slashing tall grass Draining stagnant water. Punishments given to those who commit crimes.	Meaning of sanitation Ways of promoting SANITATION	Human health sanitation. P.4 term 2 Population and health P.7	a) sleeping under treated mosquito nets - feeding on a balanced diet. b) setting strict by laws by providing guidance and counselling services.	State two ways of controlling mosquitoes at home. Mention two ways why it is bad to commit crimes.
50	Living things Living things P.3 term 2	Uses of oxygen	Uses of lungs in the body. Ways of caring for the excretory organs	Excretory system P.7 term 3	a) carbon dioxide /water vapor b) it leads to contraction of muscles which makes the body warm. c) i) provides fresh air	State the importance of oxygen in the body

					ii) makes the skin soft and moist.	
51	Energy in our subcounty Sources of energy P.3 term 3	Sun drying harvested crops Sun drying clothes Preserving food Schools hospitals clinics, universities	Meaning of energy resources Types of energy resources. Examples of energy resources Importance of the sun as an energy resource.	Energy resources Sun as an energy resource Heat energy Burning P.5 term 2	a) heat from the sun dries people's clothes heat from the sun is used to sun dry clothes. b) for easy identification.	Give the reason why farmers are advised to sun dry their crops before storing b) apart from using fire extinguisher, mention one other way of putting out fire.
52	Environment and weather in our sub county/ community Air and Sun P.3 Term one	Ironing of clothes Boiling of water Drying of harvested crops keeping tea or porridge hot	Conductors of heat Heat transfer by radiation Parts of a vacuum flask Functions of parts of a vacuum flask.	Heat energy Conductors of heat Methods of heat transfer	a) aluminum copper silver b) it enables plants to make food through photosynthesis it enables people to dry harvested crops c) It helps to reflect radiant heat which keeps the hot liquids hot	How is a cork able to prevent heat loss by conduction?
53	Health in our sub-county HIV/AIDS Primary three Term three	Blood testing for HIV/AIDS Seeing AIDS patients Having unprotected sexual intercourse Seeing people taking ARVs drugs	Components of blood Diseases of the blood Effects of HIV/AIDS; To an individual Family and community Effects of HIV virus on white blood cells	Human body Circulatory system Diseases of the circulatory system Primary six Term one	a. HIV virus destroys and weakens the white blood cells which fight against disease causing germs	Give one way through which aids can be spread from the mother to the child.

			Ways of caring foe aids patients		b. It leads to shortage of skilled labour It leads to street children due to death of children c. advising them to take ARVS in time taking them at health centers	
54	Thing we make Importance of things we make p.1 term 3	Fetching water from the borehole Playing using a seesaw	Meaning of simple machines Meaning of labour Classes of levers Ways of increasing the efficiency of first class levers	Simple machines and frictions Levers P.7 term 2	a) first class lever b) an arrow pointing downward c) by oiling moving parts of a machine. By repairing damaged parts of a machine.	Give a reason why it is advisable to oil the moving parts of a machine.
55	Accidents and first aid Accidents and safety at home Primary one Term two	Places where accidents commonly happen Causes of accidents like playing with hot objects Giving first aid to victims	Causes of burns and scalds at home Ways of preventing accidents at home and school. Qualities of a good first aider Reasons for giving first aid	Accidents poisoning and first aid Burns and scalds Primary four Term three	a) Skin contact with hot metals Skin contact with hot charcoal Skin contact with fire flames b) Avoid playing with sharp objects Dispose off broken bottles properly Keeping sharp objects out of reach of children	Give one cause of poisoning at home How can food poisoning be controlled at home.

					c) Assesses the quality of an injury Save life of a casualty.
